# Revive Therapeutics Provides Update on Phase 3 Clinical Trial for Bucillamine in COVID-19

TORONTO, Aug. 16, 2022 -- Revive Therapeutics Ltd. (“Revive” or the “Company”) (OTCQB: RVVTF) (CSE: RVV) (FRANKFURT:31R), a specialty life sciences company focused on the research and development of therapeutics for medical needs and rare disorders, is pleased to provide an update on the Company’s U.S. Food & Drug Administration (“FDA”) Phase 3 clinical trial (the “Study”) (NCT04504734) to evaluate the safety and efficacy of Bucillamine, an oral drug with anti-inflammatory and antiviral properties, in patients with mild to moderate COVID-19.

After a lengthy review and analysis of the supporting pre-dose selection data (the “Data”) from the Study by the unblinded statistician team, the Company will now amend the Study protocol with the proposed new primary efficacy endpoints and submit to the FDA for further discussion and agreement. The proposed new primary efficacy endpoints may include the time to resolution from COVID-19 via the polymerase chain reaction (“PCR”) test and the rate of sustained clinical resolution of certain symptoms of COVID-19. These proposed endpoints address the shift in COVID-19 clinical outcomes observed over the course of the pandemic, and, therefore, have more meaningful study endpoints for the FDA to consider for regulatory approval.

The Company believes that with the Omicron variant, including the spreading of BA.5, currently the dominant strain, there is an urgent need to treat symptom resolutions in addition to preventing hospitalizations.

The Company is not making any express or implied claims that its product has the ability to eliminate or cure COVID-19 (SARS-2 Coronavirus) at this time.

**About Revive Therapeutics Ltd.**

Revive is a life sciences company focused on the research and development of therapeutics for infectious diseases and rare disorders, and it is prioritizing drug development efforts to take advantage of several regulatory incentives awarded by the FDA such as Orphan Drug, Fast Track, Breakthrough Therapy and Rare Pediatric Disease designations. Currently, the Company is exploring the use of Bucillamine for the potential treatment of infectious diseases, with an initial focus on severe influenza and COVID-19. With its acquisition of Psilocin Pharma Corp., Revive is advancing the development of Psilocybin-based therapeutics in various diseases and disorders. Revive’s cannabinoid pharmaceutical portfolio focuses on rare inflammatory diseases and the company was granted FDA orphan drug status designation for the use of Cannabidiol (CBD) to treat autoimmune hepatitis (liver disease) and to treat ischemia and reperfusion injury from organ transplantation.
