

Provenance Gold Announces Strategic Technical Advisors

Vancouver, British Columbia--(Newsfile Corp. - June 8, 2021) - Provenance Gold Corp. (CSE: PAU) (FSE: 3PG) (OTCQB: PVGDF) (the "Company") is pleased to announce that it has appointed as strategic advisors Steven D. Craig, P.Geo. and Nathan Tribble, P.Geo. (ON) who will assist with detailed technical advisory work within the Company.

These additions further compliment the Company's strong geological knowledge of Nevada gold and silver as Rauno Perttu, Provenance's Chief Executive Officer (CEO), is an Oregon registered engineering geologist with fifty years of experience in the mining industry. He has worked internationally in all phases of minerals and metals exploration, evaluation, and development. Mr. Perttu has extensive experience in the western USA, including Nevada, and has made several gold and silver discoveries. He is working closely with Steve Craig and the Company's other advisors and consultants to advance the Company's current Nevada properties. Mr. Craig located the Company's projects in Nevada and is playing a key role in their advancement.

Mr. Craig is a Senior Consulting Geologist with 47 years of exploration, development, and operating experience. Mr. Craig's career has taken him to many projects and mines around the world, but his true passion is Nevada where he has focused most of his professional effort. He has previously led an exploration team for Kennecott / Rio Tinto as Regional Manager and discovered several gold deposits and or developed resource expansions.

Mr. Tribble, P.Geo. (ON) has over 13 years of professional experience in exploration and mining, with a particular focus on gold and base metal exploration and project evaluation. His past experience includes Senior Principal Geologist for Sprott Mining, Senior Geologist for Bonterra Resources, Jerritt Canyon Gold, Kerr Mines, Northern Gold, Lake Shore Gold and Vale Inco. He was also part of the exploration team that discovered the 8.2 million-ounce Côte Lake gold deposit for Trelawney Mining and Exploration Inc. Mr. Tribble is registered as a Professional Geoscientist in Ontario and holds a Bachelor of Science degree in Geology from Laurentian University.

As the Company continues to aggressively explore its pivotal properties in Nevada, these additions to the Company's technical advisory team will enhance the likelihood of further developing the three Nevada projects.

The Company also announces that it has granted 3,500,000 stock options to various advisors, representatives, consultants, and directors of the Company. The options have an exercise price of \$0.155 per share, and have a twenty-four (24) month term from the date of the grant and vest immediately.
