Overall Performance

EMC is carrying on the business of the acquisition and exploration of properties for mining of precious and base metals. EMC has not earned any revenue to date from its mining operations and is therefore considered to be in the exploration ("exploration") stage.

The public trading in the shares of the Company was halted on May 5, 2016 due to the inability of the Company to file the year ended December 31, 2015 financial statements and MD & A for 2015 by the required regulatory deadline. Funds were not available at the required time to complete the filings. The cease trade order previously imposed by the Ontario Securities Commission was revoked on March 29, 2018.

Trading will recommence once a resubmission of a qualifying transaction has been approved by the CSE.

On August 22, 2019 the Company completed a consolidation of its share capital on a one new for five hundred old basis. The share and per share amounts have been adjusted within these financial statements to reflect the share consolidation.

The financial statements, references to notes and discussion presented within this report make reference to the condensed interim consolidated financial statements for the period ended March 31, 2020 of European Metals Corp. and its wholly-owned subsidiaries: Mantis Explorations Inc., Mantis Explorations Ltd., Avenue Bancorp Ltd., and University Avenue Management Ltd. On consolidation, all intercompany transactions and balances have been eliminated.

The condensed interim consolidated financial statements have been prepared on a going concern basis, which assumes the Company will continue in operation for the foreseeable future and be able to realize its assets and discharge its liabilities and commitments in the normal course of business. In assessing whether the going concern assumption is appropriate, management takes into account all available information about the future, which is at least, but not limited to, twelve months from the end of the reporting period. Management is aware, in making its assessment, of material uncertainties related to events or conditions that cast significant doubt upon the entity's ability to continue as a going concern, as described in the following paragraphs.

All figures are in Canadian Dollars unless otherwise stated. Additional information relating to the Company can be found on SEDAR at www.sedar.com.

These condensed interim consolidated financial statements have been prepared on a going concern basis, which assumes that the Company will be able to realize its assets and discharge its liabilities in the normal course of business.

As at March 31, 2020, the Company has not generated any revenues from operations. The Company realized a net loss of $189,791 (2019 - $25,835) for the period, and a working capital (deficiency) of $450,910 (December 31, 2019 – ($407,373)) and an accumulated deficit of $20,224,175 (December 31, 2019 - $20,034,384). The Company's operations have been primarily funded from equity financings which are dependent upon many external factors and may be difficult to impossible to secure or raise when required. The Company will continue to require additional funding to maintain its ongoing levels of operations and administration, and retire its indebtedness as they come due. While the Company has been successful in securing financings in the past, there can be no assurance that it will be able to do so in the future.

The Company had no revenue during the three month period ended March 31, 2020 and 2019, respectively.

Funding continues to be difficult to access in 2019 and the ability of the Company to continue as a going concern, realize its assets and discharge its liabilities in the normal course of business and continue with, or expand upon its exploration programs is contingent upon securing equity financing or monetizing assets. The timing and availability of additional financing will be determined largely by market conditions, legal restrictions, and the results of the Company's ongoing exploration programs. There is no certainty that the Company will be able to raise funds as they are required in the future.

These condensed interim consolidated financial statements do not give effect to adjustments that would be necessary to the carrying values and classification of assets, liabilities and reported expenses should the Company be unable to continue as a going concern. These adjustments could be material.

This discussion contains forward-looking statements that involve risks and uncertainties. Exploration expenditures are deferred and included on the consolidated statements of financial position unless the value is impaired, or the projects are abandoned which results in such expenditures being written of.

The Company's primary objective with respect to its capital management is to ensure that it has sufficient cash resources to fund its exploration commitments. To secure the additional capital necessary to continue with the exploration of mineral properties, the Company may attempt to raise additional funds through the issuance of debt or equity. The Company is not subject to any capital requirements imposed by a lending institution.

The Company monitors its capital structure and makes adjustments according to market conditions in an effort to meet its objectives given the current outlook of the business and industry in general. The Company may manage its capital structure by issuing new shares and adjusting capital spending. The capital structure is reviewed by management and the Board of Directors on an ongoing basis.

There were no changes in the Company's process, policies and approach to capital management during the three month period ended March 31, 2020 and the year ended December 31, 2019.

FINANCIAL RISK MANAGEMENT

In March 2020, the World Health Organization declared coronavirus COVID-19 a global pandemic. This contagious disease outbreak, which has continued to spread, and any related adverse public health developments, has adversely affected workforces, economies, and financial markets globally, potentially leading to an economic downturn. The impact on the Company is not currently determinable but management continues to monitor the situation.

The Company's activities expose it to a variety of financial risks: credit risk, liquidity risk and market risk (including interest rate risk, foreign currency risk and price risk).

(i) Credit risk

Credit risk is the risk of loss associated with a counterparty's inability to fulfill its payment obligations. The Company's credit risk is primarily attributable to cash and sales tax recoverable. Cash is held with a Canadian chartered bank, from which management believes the risk of loss to be minimal.

(ii) Liquidity risk

Liquidity risk is the risk that the Company will not have sufficient cash resources to meet its financial obligations as they come due. The Company's liquidity and operating results may be adversely affected if its access to the capital market is hindered, whether as a result of a downturn in stock market conditions generally or matters specific to the Company. The Company generates cash flow primarily from its financing activities. As at March 31, 2020, the Company had cash and cash equivalents of $583,377 (December 31, 2019 - $157,151) to settle trade accounts payable and accrued liabilities, and sales tax payable of $136,601 (December 31, 2019 - $564,524), the Company's financial liabilities have contractual maturities of less than 30 days and are subject to normal trade terms. The Company regularly evaluates its cash position to ensure preservation and security of capital as well as liquidity. As discussed in Note 1, the Company's ability to continually meet its obligations and carry out its planned exploration activities is uncertain and dependent upon the continued financial support of its shareholders and securing additional financing. Management is continuing in its efforts to secure a financing and believes it will be successful.

(iii) Market risk

Market risk is the risk of loss that may arise from changes in market factors such as interest rates and foreign exchange rates.

(iv) Interest rate risk

The Company has cash and cash equivalent balances and no variable interest-bearing debt. The Company's current policy is to invest excess cash in guaranteed investment certificates issued by a Canadian chartered bank with which it keeps its bank accounts. The Company periodically monitors the investments it makes and is satisfied with the creditworthiness of its Canadian chartered bank.

(v) Foreign currency risk

The Company's functional and presentation currency is the Canadian Dollar and major purchases are transacted in Canadian Dollars. The Company at the present time does not have any foreign currency balances subject to foreign currency risk.

(vi) Sensitivity analysis

Based on management's knowledge and experience of the financial markets, the Company believes the following movements are reasonably possible over a twelve-month period:

Cash is subject to floating interest rates. The Company has no variable debt and receives low interest rates on its cash and cash equivalents balances. As such, the Company does not have significant interest rate risk.

OFF-BALANCE SHEET ARRANGEMENTS

None are applicable at this time, however with mineral exploration, obligations for environmental, First Nation compliance and health and safety issues can create non-reportable concerns. The Company hopes to minimize such situations by maintaining adequate insurance coverage, establishing honest and open communications and operating in a safe and responsible manner compliant with current standards as per the most recent applicable acts and regulations.

OUTLOOK

The Company is dependent on obtaining financing for the exploration and development of its mineral properties and/or any potentially profitable qualifying transaction. Subsequent to March 31, 2020, the Company intends to complete further private placements and further explore the Cree Lake mineral property option agreement which Management hopes will serve as a qualifying transaction. Given the current market in which junior companies find themselves, future financing may be a difficult task. There is no assurance that such financing will be available when required, or under favourable terms.
