GOLD'N FUTURES MINERAL CORP.
(formerly EUROPEAN METALS CORP.)

(AN EXPLORATION STAGE COMPANY)

MANAGEMENT DISCUSSION AND ANALYSIS

FOR THE SIX MONTHS ENDED

JUNE 30, 2021 AND 2020

(EXPRESSED IN CANADIAN DOLLARS)

Gold'n Futures Mineral Corp. (formerly European Metals Corp.)
Management Discussion and Analysis
For the six months ended June 30, 2021 and 2020

This Management Discussion and Analysis ("MD&A") of Gold'n Futures Mineral Corp. (formerly European Metals Corp.) (the "Company") is dated August 18, 2021 and provides an analysis of the Company's performance and financial condition for the period ended June 30, 2021 and 2020. The Board of Directors carries out its responsibility for review of this disclosure principally through its audit committee, comprised of independent directors. The audit committee reviews this disclosure and recommends its approval by the Board of Directors.

This MD&A has been prepared in compliance with the requirements of National Instrument 51-102 F1– Continuous Disclosure Obligations. This MD&A should be read in conjunction with our audited consolidated financial statements and related notes for the year ended December 31, 2020 and our condensed interim consolidated financial statements for the six month period ended June 30, 2021, prepared in accordance with International Financial Reporting Standards (the "Financial Statements"). All figures are in Canadian dollars unless stated otherwise. The Financial Statements and additional information, including the Company's Certifications of Interim Filings and press releases, are available on the Canadian System for Electronic Document Analysis and Retrieval (SEDAR) at www.sedar.com.

The Company is in the exploration stage and is subject to the risks and challenges similar to other companies in a comparable stage of exploration. These risks include, but are not limited to, dependence on key individuals, successful exploration results and the ability to secure adequate financing to meet the minimum capital required to successfully advance the projects and continue as a going concern.

The mailing address of the Company is Suite 810 - 789 West Pender Street, Vancouver, British Columbia, V6C 1H2, and its head office is located at 409 – 22 Leader Lane, Toronto, Ontario, M5E 0B2. The shares of the Company are listed on the Canadian Stock Exchange (the "CSE") under the symbol "FUTR" and on the OTCQB under the symbol "GFTRF".

This document is required by securities legislation to contain and does contain forward-looking statements, opinions about future events and comments regarding risks and opportunities, which reflect the Company's current expectations regarding future events. To the extent that any statements in this document contain information that is not historic, the statements are essentially forward-looking and are often identified by words such as, but not limited to, "anticipate", "expect", "estimate", "intend", "project", "plan" "might", "could" and "believe". In the interest of providing shareholders and potential investors with information regarding EMC, including management's assessment of future plans and future operations, certain statements in this MD&A are forward-looking and are subject to the risks, uncertainties and other important factors that could cause the Company's actual performance to differ materially from that expressed in or implied by such statements. Such factors include, but are not limited to volatility and sensitivity to market metal prices, impact of change in foreign currency exchange rates and interest rates, imprecision in reserve estimates, environmental risks including increased regulatory burdens, unexpected geological conditions, adverse mining conditions, changes in government regulations and policies, including laws and policies; and failure to obtain necessary permits and approvals from government authorities, and other development and operating risks.

Although the Company believes that the expectations conveyed by the forward-looking statements are based upon information available on the date that such statements were made, there can be no assurance that such expectations will prove to be correct. The reader is cautioned not to rely on these forward-looking statements. The Company disclaims any obligation to update these forward-looking statements unless required to do so by applicable Securities laws. All subsequent forward-looking statements, whether written or orally attributable to the Corporation or persons acting on its behalf, are expressly qualified in their entirety by these cautionary statements.

Overall Performance

The Company is carrying on the business of the acquisition and exploration of properties for mining of precious and base metals. The Company has not earned any revenue to date from its mining operations and is therefore considered to be in the exploration ("exploration") stage.

The Financial Statements, references to notes and discussion presented within this report make reference to the Financial Statements of the Company and its wholly-owned subsidiaries: Mantis Explorations Inc., Mantis Explorations Ltd., Avenue Bancorp Ltd., and University Avenue Management Ltd. On consolidation, all intercompany transactions and balances have been eliminated.

The Financial Statements have been prepared on a going concern basis, which assumes the Company will continue in operation for the foreseeable future and be able to realize its assets and discharge its liabilities and commitments in the normal course of business. In assessing whether the going concern assumption is appropriate, management takes into account all available information about the future, which is at least, but not limited to, twelve months from the end of the reporting period. Management is aware, in making its assessment, of material uncertainties related to events or conditions that cast significant doubt upon the entity's ability to continue as a going concern, as described in the following paragraphs.

Gold'n Futures Mineral Corp. (formerly European Metals Corp.)
Management Discussion and Analysis
For the six months ended June 30, 2021 and 2020

All figures are in Canadian dollars unless otherwise stated. This MD&A was prepared with the information available as at August 18, 2021.

The Financial Statements have been prepared on a going concern basis, which assumes that the Company will be able to realize its assets and discharge its liabilities in the normal course of business.

As at June 30, 2021, the Company has not generated any revenues from operations. The Company realized a net loss of \$693,888 (2020 - \$396,601) for the period, and working capital (deficiency) of \$154,823 (December 31, 2020 - (\$189,558)) and an accumulated deficit of \$22,925,625 (December 31, 2020 - \$22,231,737). The Company's operations have been primarily funded from equity financings which are dependent upon many external factors and may be difficult to impossible to secure or raise when required. The Company will continue to require additional funding to maintain its ongoing levels of operations and administration, and retire its indebtedness as they come due. While the Company has been successful in securing financings in the past, there can be no assurance that it will be able to do so in the future.

The timing and availability of additional financing will be determined largely by market conditions, legal restrictions, and the results of the Company's ongoing exploration programs. The Company had no revenue during the period ended June 30, 2021 and 2020, respectively.

In March 2020, the World Health Organization declared the outbreak of COVID-19 a global pandemic. Government measures to limit the spread of COVID-19, including the closure of non-essential businesses, did not materially disrupt the Company's operations during the third quarter of 2020. The mining industry has not been recognized as essential services across Canada. As at June 30, 2021, we have also not observed any material impairments of our assets or a significant change in the fair value of assets due to the COVID-19 pandemic.

Due to the rapid developments and uncertainty surrounding COVID-19, it is not possible to predict the impact that COVID-19 will have on our business, financial position and operating results in the future. In addition, it is possible that estimates in the Company's financial statements will change in the near term as a result of COVID-19 and the effect of any such changes could be material, which could result in, among other things, impairment of long-lived assets including intangibles and goodwill. The Company is closely monitoring the impact of the pandemic on all aspects of its business.

The Financial Statements do not give effect to adjustments that would be necessary to the carrying values and classification of assets, liabilities and reported expenses should the Company be unable to continue as a going concern. These adjustments could be material.

This discussion contains forward-looking statements that involve risks and uncertainties. Exploration expenditures are deferred and included on the consolidated statements of financial position unless the value is impaired, or the projects are abandoned which results in such expenditures being written off.

Shares for Debt Settlements

During the period ended June 30, 2021, there were no shares for debt settlements.

During the period ended June 30, 2020, the Company completed the following shares for debt settlements:

On January 3, 2020, the Company issued 17,833,817 common shares to settle debt of \$445,845 to a former related party.

On February 21, 2020, the Company issued 2,000,000 common shares to settle debt of \$50,000 with consultants of the Company.

Private Placements

During the period ended June 30, 2021, the Company completed the following private placements:

The Company completed a non-brokered private placement of 4,662,251 units (Units) of the Company at \$0.15 per Unit, for gross proceeds of \$699,338. Each Unit consisted of one common share and one transferable common share purchase warrant (Warrant). Each Warrant entitles the holder to purchase one additional share \$0.25 per share for a period of 36 months. The Company issued an additional 105,233 Warrants as finder's fees (Finders' Warrants) in connection with a portion of the Offering. The fair value of the Finders' Warrants was determined to be \$8,882 calculated using the Black-Scholes Option Pricing Model with the following assumptions: expected life of warrants - 3 years; expected volatility - 100%; expected dividend yield - 0%; and risk-free rate - 0.49%.

Gold'n Futures Mineral Corp. (formerly European Metals Corp.)
Management Discussion and Analysis
For the six months ended June 30, 2021 and 2020

Subsequent to the period ended June 30, 2021, the Company announced the cancellation of a non-brokered private placement for gross proceeds of up to \$6,000,000 consisting of up to 13,333,33 units (Units) of the Company at \$0.15 per Unit and up to 20,000,000 flow-through shares (FT Shares) at a price of \$0.20 per FT Share. Each Unit consisted of one common share and one transferable common share purchase warrant (Unit Warrant). Each Unit Warrant entitles the holder to purchase one additional share \$0.25 per share for a period of 36 months from closing of the private placement.

Subsequent to the period ended June 30, 2021, the Company announced that it has entered into an agreement with Canaccord Genuity Corp., as agent and sole book-runner (the "Agent"), in connection with a best efforts, private placement of units ("Units") and flow-through units ("FT Units") of the Company at a price of C\$0.085 per Unit and of C\$0.095 per FT Unit for aggregate gross proceeds of up to C\$2,500,000 (the "Offering"). Each Unit is comprised of one common share of the Company (a "Common Share") and one Common Share purchase warrant ("Warrant"). Each FT Unit is comprised of one common share of the Company (a "FT Common Share") and one Warrant each of which will qualify as a "flow-through share" (within the meaning of subsection 66(15) of the Income Tax Act (Canada)(the "Tax Act"). Each Warrant may be exercisable to acquire one Common Share (a "Warrant Share") at a price of C\$0.12 per Warrant Share for a period of 24 months from the closing of the Offering. The Agent will have an option (the "Agent's Option") to increase the size of the Offering by up to 15% through the sale of additional Units and FT Unit at the respective offering prices, which Agent's Option is exercisable, in whole or in part, at any time up to 48 hours prior to the closing of the Offering.

During the period ended June 30, 2020, the Company completed the following private placements:

On January 31, 2020, the Company completed the first tranche of a non-brokered private placement of 16,770,000 common shares at \$0.025 per share for gross proceeds of \$419,250. The Company incurred cash finder's fees of \$12,022 and issued 480,900 finder warrants ("Finder Warrants") with a fair value of \$6,340. Each Finder Warrant is exercisable into one common share at \$0.025 per share and matures on January 31, 2022. The fair value of the Finder Warrants was determined using the Black-Scholes Option Pricing Model with the following inputs: Volatility – 100%; expected life – 2 years; and risk-free rate of 1.43%.

On February 24, 2020, the Company completed the second tranche of the non-brokered private placement of 11,600,000 common shares at \$0.025 per share for gross proceeds of \$290,000.

On August 14, 2020, the Company completed a non-brokered private placement of 8,550,000 Units at \$0.10 per Unit, for gross proceeds of \$855,000. Each Unit consisted of one common share and one share purchase warrant. Each warrant entitles the holder to purchase one additional share \$0.25 per share until August 14, 2022.

Share Options

During the period ended June 30, 2021, the Company recognized a total of \$55,845 (2020 - \$Nil) in share-based compensation on the grant of 750,000 (2020 – Nil) share options which was comprised of the following:

On March 24, 2021, the Company granted 750,000 share options to a director and an officer of the Company. Each option is exercisable at \$0.15 per share until March 24, 2023. All of the options vested upon date of grant. The estimated fair value of the options was \$55,845, measured using the Black-Scholes Option Pricing Model with the following assumptions: share price \$0.15; exercise price - \$0.15; expected life - 2 years; volatility - 100%; dividend yield - \$0; and risk-free rate – 0.24%.

Appointments and Resignation

On January 22, 2021, the Company announced the appointment of Mr. Matt Fish to the Company's Board of Directors. On March 24, 2021, the Company appointed Mr. Fish as the Company's Treasurer. Mr. Fish is a practicing securities lawyer focused on technology and resource issuers. He has extensive experience with respect to public companies, capital markets and other facets fundamental to the natural resources sector.

On March 24, 2021, the Company announced the resignation of Mr. Theo van der Linde as Director and Interim CEO. The Company wishes to thank Mr. van der Linde for his contributions and wishes him well in his future endeavours.

On March 24, 2021, the Company announced the appointment of Mr. Stephen Wilkinson as the Company's CEO. Mr. Wilkinson M.Sc. (Geology), B.Sc. (Geology), MBA, is a senior mining executive with more than 40 years of related experience, having acted as president of numerous resource companies and Flow Through Investment Funds, corporate director, research analyst, and business consultant.

On March 24, 2021, the Company announced the appointment of Mr. Walter Hanych, P. Geo. to the Company's Board of Directors. Mr. Hanych has over forty years of experience in the exploration industry from grass-roots projects to advanced mine feasibility projects, including corporate structure and financing.

Gold'n Futures Mineral Corp. (formerly European Metals Corp.)
Management Discussion and Analysis
For the six months ended June 30, 2021 and 2020

Engagement of Independent Trading Group as Market Maker

During the period ended June 30, 2021, the Company engaged the services of Independent Trading Group ("ITG") to provide market-making services. ITG will trade shares of the Company on the Canadian Securities Exchange with the goal of maintaining a reasonable trading market and improving the liquidity of the Company's common shares. Under the agreement, ITG will receive compensation of \$6,000 per month, payable monthly in advance. The agreement is for an initial term of three months, ending on July 31, 2021. The agreement may be terminated by either party with 30 days' notice. There are no performance factors contained in the agreement and ITG will not receive shares or options as compensation. ITG and the Company are unrelated and unaffiliated entities and at the time of the agreement, neither ITG nor its principals have an interest, directly or indirectly, in the securities of the Company.

Cree Lake Property Option

On February 13, 2020, the Company entered into an option agreement (the "Agreement") with Blackrock Exploration Inc. (the "Optionor") to earn up to a 51% undivided interest (the "Option") in the Cree Lake Gold Property. On June 29, 2020, the Optionor agreed to amend the Agreement by eliminating the Company's previous commitment to issue an additional 8,000,000 common shares.

The Cree Lake Gold Property is located in Swayze, Cunningham and Dore Townships, approximately 195 kilometers northwest of Sudbury, Ontario. The project comprises 151 single cell and 43 boundary claims covering approximately 4,074 hectares.

Pursuant to the amended Agreement, the Company has fulfilled its obligation to issue to the Optionor an aggregate of 5,000,000 common shares with a value of \$125,000. The Company's obligation to incur exploration expenditures on the Cree Lake Gold Property is as follows:

Date	Common Shares	Exploration Expenditures
Within 10 days of the execution of the Agreement (issued Feb 23/20)	4,000,000	Nil
On or before June 30, 2020 (issued June 30/20)	1,000,000	Nil
On or before October 31, 2020 (incurred)	Nil	\$160,000
On or before December 31, 2021	Nil	\$200,000
On or before December 31, 2022	Nil	\$300,000

In addition, the Optionor has retained a 3% net smelter royalty ("NSR") on the Cree Lake Gold Property and the Company will have the right to purchase from the Optionor one-half of the 3% NSR for \$2,000,000 at any time during the term of the Agreement.

During the period ended June 30, 2021, the Company abandoned its option on the early exploration stage Cree Lake Project. Consequently, \$285,000 was written off to operations.

Cree Lake Exploration Program

On September 1, 2020, the Company announced that a field crew was mobilized to the company's Cree Lake Gold Property. The field crew was undertaking a program of prospecting, mapping and soil sampling on the property; following up on target areas identified from a high-resolution Airborne Magnetic, VLF-EM and Radiometric survey which was flown in 2017.

Gold'n Futures Mineral Corp. (formerly European Metals Corp.)
Management Discussion and Analysis
For the six months ended June 30, 2021 and 2020

As outlined in the NI 43-101 Technical Report examining the property's historical data, dated December 4, 2019, and posted on the Company's SEDAR profile on August 28, 2020 (the "Technical Report"), the Cree Lake property hosts several high-grade gold occurrences. The most significant historical high-grade gold occurrences have yielded gold values ranging from 2.0 g/t to 30.10 g/t in grab samples and drill core samples as high as 2.05 g/t along a 15.5-meter drill length (14.75 meters true width). To the south of the property several subparallel iron formation horizons exist, distributed along a strike length in excess of 3 kilometres with individual horizons up to 20 meters in width. The grab samples disclosed are selected disclosures and are not necessarily indicative of the mineralization hosted on the property.

The Rideout Deformation Zone (the "RDZ"), a high strain zone defining a structure to be the possible westward extension of the Cadillac-Larder Lake Break along which many of the gold mines in Kirkland Lake, Ontario occur, passes through the Property. The Kirkland Lake Gold Camp has yielded (to 2019) more than 41 million oz of gold from 36 mines. 60-kilometers east of the Property is IAMGOLD's Cote Lake gold deposit through which the RDZ passes. Cote Lake hosts a total Proven and Probable Reserves of 4.7 million ounces, total Measured and Indicated Resource (inclusive of Reserves) of 6.5 million ounces and total Inferred Resources of 1.6 million ounces. The mineralization, resources and reserves hosted on other properties in the Kirkland Lake Gold Camp are not necessarily indicative of mineralization hosted on the property.

The property straddles the RDZ, and, coupled with the known association of some Archean gold deposits (Musselwhite Mine (Newmont), Beardom ore Gold Camp) with Banded Iron Formation, makes the Property a compelling exploration play.

The aforementioned scientific and technical content has been prepared, reviewed and approved by Mr. Walter Hanych, P. Geo., who is a Qualified Person under NI 43-101 regulations and is a consultant of the Company. Mr. Hanych has verified this data based only on his review of the Technical Report and all sampling, analytical, and test data contained within.

Property option agreement for Hercules - Elmhirst Property

On October 15, 2020, the Company entered into an Option Agreement (the "Agreement") with Argonaut Gold Inc. ("Argonaut") to acquire up to a 90% interest in the Hercules – Elmhirst property (the "Property") located 120 kilometers northeast of Thunder Bay, Ontario in the townships of Elmhirst and Rickerby, within the Thunder Bay North Mining District. The property consists of 372 contiguous claim cells (6,951 hectares).

Pursuant to the Agreement, the Company can earn up to a 50% interest in the Hercules – Elmhirst Property by paying \$3,500,000 cash, and incurring \$7,000,000 in exploration expenditures as follows:

Due Date	Cash payments due to Argonaut*	Exploration Expenditures to be incurred each year
On October 15, 2020 (paid)	\$500,000	Nil
October 15, 2021	\$750,000	\$500,000
October 15, 2022	\$1,000,000	\$1,500,000
October 15, 2023	\$1,250,000	\$2,000,000
October 15, 2024	Nil	\$3,000,000

*Argonaut has the option to receive an equivalent number of the Company's common shares in lieu of the cash payments.

The Company must also grant the royalty in a form acceptable to Argonaut, acting reasonably, promptly upon the Company earning the first 50% interest in the Hercules – Elmhirst Property.

Upon completion of the aforementioned commitments, the Company will have an option to earn an additional 40% interest in the Hercules – Elmhirst Property from Argonaut by paying an additional \$5,000,000 cash or, at the sole discretion of Argonaut issuing an equivalent number of common shares of the Company, and by delivering a National Instrument 43-101 compliant pre-feasibility study on the Hercules – Elmhirst Property by a Qualified Person by December 31, 2026.

The Company issued a total of 10,000,000 common shares with a value of \$2,000,000 as finder's fees in connection with the Hercules – Elmhirst Property acquisition.

Historical work on Hercules – Elmhirst Property

To date, the work completed on the property forms an extensive database including reconnaissance grab samples; channel samples; a variety of geophysical surveys; and, a drill hole database that includes historic drilling totalling some 450 holes. More than a total of 2,000 grab and channel samples were collected from the Property. In the last two field seasons, more than 150,000 square metres of trenches were developed.

In May 2010, Watts, Griffins and McCourt Limited ("WGM") was retained by Kodiak Exploration Limited ("Kodiak"), the former owners of the Property, to produce a National Instrument 43-101 Mineral Resource (the "Technical Report") currently classified as a

Gold'n Futures Mineral Corp. (formerly European Metals Corp.)
Management Discussion and Analysis
For the six months ended June 30, 2021 and 2020

historical estimate (“Historical Estimate” is defined below) for the property. The Technical Report was prepared by WGM for mineralized zones that displayed sufficient data to allow for continuity of geology and grades. The zones included: Golden Mile (GM), Wilkinson Lake Gold Zone (WLG), Lucky Strike (LS), Marino and 7 of 9. Data is referenced in the chart below, following the definition of Historical Estimate:

The historical resource estimate is based on prior data and reports obtained and prepared by previous operators, and information provided by governmental authorities.

- (i) a qualified person has not done sufficient work to classify the historical estimate as current mineral resources or mineral reserves.
- (ii) the issuer is not treating the historical estimate as current mineral resources or mineral reserves.

Establishing a current mineral resource estimate on the Hercules – Elmhirst property will require further evaluation, which the Company and its consultants intend to complete in due course.

Category	Zone	Tonnes	Au (g/t) Uncapped	Contained Ounces	Au (g/t) (Capped at 60 g/t Au)	Contained Ounces
Total Indicated	Golden Mile & WLGZ	231,800	14.95	111,450	7.64	56,970
Total Inferred	Golden Mile, WLGZ, Lucky Strike, Marino, 7 of 9	761,300	4.13	101,050	3.04	74,380

Notes to mineral resources table on the Hercules – Elmhirst property:

1. The Historical Estimate referred to as Mineral Resource, which are not Mineral Reserves, do not have demonstrated economic viability and may be materially affected by environmental, permitting, legal, title, taxation, sociopolitical, marketing, or other relevant issues.
2. The quantity and grade reported in the Historical Estimate as Inferred Mineral Resources are uncertain in nature and there has been insufficient exploration to define these resources as Indicated or Measured and it is uncertain if further exploration will result in upgrading them to an Indicated or Measured Mineral Resource category. The Mineral Resources were estimated using the CIM Standards on Mineral Resources and Reserves, Definitions and Guidelines prepared by the CIM Standing Committee on Reserve Definitions and adopted by CIM Council December 11, 2005. However, the estimates are over 12 years old and do not reflect current inputs and parameters, and the CIM definition of a mineral resource and is being reported as a “Historical Estimate” (see Historical Estimate above).
3. The GM Trench Zone (surface at approx. 345 m) is 10-12 m deep and the WLG Trench Zone (surface at approx. 327 m) is 6-8 m deep.
4. Indicated Mineral Resources for the GM and WLG zones are based on the centroid of a block being a maximum of 15 m from a composite.
5. 0.5 m Au composites were used for grade interpolation and were capped at 60 g/t.
6. A gold price of US\$850 was assumed.
7. For the “Historical Estimate” a minimum horizontal width of 1.5 m and a 1.0 g Au/t cut-off was determined to be appropriate. This cut-off should be looked at in more detail in the next phase of study, as applying a single cut-off grade across all zones may not be appropriate due to the large difference in average grades between the zones.

Hercules – Elmhirst property highlights

- Direct road access and large continuous land package
-in close proximity (~70 km) to Greenstone Gold Mines Hardrock Deposit (4.2 Mos)
- Host syn-volcanic Elmhirst Lake Intrusion Complex (2736 Ma)
-13 km by 7 km with felsic metavolcanic equivalents
-complex system of predominantly granodiorite-(trondhjemite-tonalite) intrusions (GTT) with a central magnetic core of diorite/quartz diorite
-extrusive co-magmatic felsic pyroclastic form arcuate apron about Elmhirst Lake Intrusion Complex (ELIC)
- Hosts > 30 gold-bearing quartz vein/stockwork zones in shears within the ELIC

Golden Mile

- the jewel of the multiple vein systems
- has strike length in excess of 1.6 km
- characterized by laminated, sheeted vein system
- averages 20.2 g/t Au / 4.0 meters true thickness over a 400m length
- coarse visible gold (electrum) and local gold-bearing base metal mineralization

Gold'n Futures Mineral Corp. (formerly European Metals Corp.)
Management Discussion and Analysis
For the six months ended June 30, 2021 and 2020

- exceptional surface gold grades
 - surface channels up 32.96 g/t Au / 11.55 meters; averaging 20.2 g/t Au over an average length of 4.0 meters. REF: Kociumbas, W.M., P.Geo., 2010, WGM, Technical Review and Mineral Resource Estimate of the Hercules Property, May 26, 2010. P-44 S 10.2.1.
- Open, high grade potential down-plunge of the Golden Mile vein system
 - at shallow (50m) depths and in deeper (450m) parts of the vein system
 - 5 partially outlined gold shoots over a 2.2 km strike length
- Gold-bearing structures coincide with
 - strong regional magnetic high and low features for over 3.6 kilometers
- Similar in geological environment to
 - Renabie Mine (1.1 Moz) in the Missinaibi Lake Batholith (2721 Ma)
 - Bourlamaque Intrusive Complex (2700 Ma), which hosted approximately 4.1 Moz Au
 - IAMGOLD's Cote Lake Deposit (10Moz) in the Chester Intrusive Complex (2740 Ma)
- Upside potential for brownfield development
 - open structural corridor for 3.6 kilometers
 - multiple gold shoots
 - a strong resource factor
 - excellent gold recoveries

The aforementioned scientific and technical information for the Hercules - Elmhirst Property has been prepared, reviewed and approved by Mr. Walter Hanych, P. Geo., who is a Qualified Person under NI 43-101 regulations and is a consultant of the Company.

Commissioning of a NI 43-101 Report for Hercules - Elmhirst Property

The Company has commissioned a National Instrument 43-101 report, which will summarize the historical work performed on the Hercules-Elmhirst property. Once the report is complete, the Company will begin the compilation and tabling of the historical data in preparation for constructing a current resource block model. Structural and geological modelling of the gold zones will be an integral component of this compilation to identify domains of gold mineralization. The Company will also undertake a program of core re-sampling as past sampling intervals were not consistently extended to the shoulders of a sample or sample intervals.

Staking new claims – Hercules – Elmhirst Property

The Company has acquired by staking 5 multi-cell claims totaling 82 units located in the Castlewood Lake Area of the Thunder Bay North District of Ontario. The new claims are contiguous with the northeastern portion of the Hercules property and cover an area of approximately 1,312 ha. The new staking in combination with the original Hercules claims increases the project area to more than 10,000 ha. With the additional claims, the Company has strategically protected the northern and northeastern portion of the Kaby Lake Intrusive Complex (the "KLIC") and its contact with metamorphosed felsic and mafic volcanic rocks. This is an important contact as the Hercules gold zones are associated with northeastern contact of the Elmhirst Lake Intrusive Complex ("ELIC"). The KLIC is approximately 2.5 kilometers northeast of the main gold zones of the Hercules gold project and is similar in age and composition to the ELIC. Within the KLIC and adjacent volcanic units, there are known mineral occurrences. Within the mafic volcanics there is an area of sulphide mineralization where historical drilling in 1988 by Duration Mines Ltd. and later in 2010 by Kodiak Exploration Ltd. tested a number of nickel – copper occurrences. In the central part of the Company's newly staked claims and near the northern contact of the KLIC, a 1986-1987 basal till sampling program, undertaken by the Ontario Geological Survey and Geological Survey of Canada, yielded a sample with 4 gold grains. Significantly, areas associated with known gold deposits such as the Sturgeon River Gold mine and Dik-Dik mine also produced gold grains in basal till from the same sampling program. The results of this program were published in the Ontario Ministry of Northern Development and Mines Map P-3105 – Gold Grains in Surface Till Samples, Beardmore-Geraldton Area.

Identifying Areas of Priority – Hercules – Elmhirst Property

During the period ended June 30, 2021, the compilation of historical data on the Hercules Gold Property has identified a large area encompassing several gold targets for exploration and resources expansion ("Area A"). Area A measures approximately 2,100 metres long by 800 metres wide. Several partially delineated vein occurrences are contained within Area A that require further mapping, sampling and diamond drilling. In addition, a significant zone bearing favorable geological and geophysical characteristics for gold mineralization is recognized within Area A along the northern contact of the Elmhurst Intrusive Complex and metavolcanic units.

The team of geologists engaged by the Company are collecting and compiling all available data files with the intention of assembling a comprehensive database on the extensive Hercules Gold Property and the surrounding area. The compilation of thousands of files includes historical prospecting, government mapping and reports, previous exploration programs and hundreds of assessment files. The Company is completing this data compilation in order to build a single model for its development of priority targets. Even though the compilation of all historical data has not completed, the Company continues to identify exciting areas of investigation on the Hercules Gold Property. In particular, the team is finding many gaps in the historical resource zones all of which occur within a small area amounting to less than 5% of the Hercules Gold Property.

Gold'n Futures Mineral Corp. (formerly European Metals Corp.)
Management Discussion and Analysis
For the six months ended June 30, 2021 and 2020

Area A and its Target Zones

Area A measures 2,100-metres in length by 800-metres in width outlining 168-hectares. Significantly, Area A captures magnetic high features recognized to be associated with the gold systems at the Hercules Gold Property. Area A, which encompasses Targets 1 and 3, is defined to investigate the closely spaced, stacked relationship of six known gold zones and the broader contact zone for its bulk tonnage potential.

Target 1 is the broad hybrid contact zone of the Elmhirst Lake intrusion and volcanic host units. This contact zone is framing a structural setting essentially parallel to the Yellow Brick Road and Penelton gold vein systems. Importantly, this area has not been drilled in the past. Map P801, the preliminary provincial geological map of Elmhirst Township, shows the approximate location of this intrusive contact. However, outcrops of the contact were not mapped, likely due to a scarcity of exposures. The contact has good geophysical indicators for gold mineralization including its elevated magnetic signature, and the trend of the intrusive contact is also striking north-west and may be structurally controlled much like the gold veins system located just to the south.

Target 3 comprises six mineralized zones or veins which include the Marino, Miron, 7 of 9, Yellow Brick Road, Penelton and Wilkinson Lake gold zones. The Marino gold zone was intermittently drilled in the past and hosts a historical Inferred resource estimate of 57,800 tonnes grading 1.73 g/t Au for 3,220 ounces ("oz") of gold. The Wilkinson Lake gold zone contains a historical Indicated estimate of 11,860 oz of gold contained in 39,900 tonnes grading 6.09 g/t Au and an Inferred resource 17,400 tonnes grading 7.24 g/t. In addition, all of the Target 3 gold zones are far from delineated by mapping, trenching or drilling and would benefit from the more comprehensive program being planned by the Company.

North Kaby Lake Stock and Ballina Lake Gold Zone

The compilation of historical data on the Hercules Gold Property has identified two additional gold targets for its 2021 exploration program associated with indicative geological, geophysical and geochemical anomalies. Significantly, these new targets were found outside of and to the east of the Elmhirst Lake Intrusive Complex that is the host for the high-grade Hercules gold vein systems

Regional Target-1– North Kaby Lake Stock

The Kaby Lake Stock is a granitic intrusive body that is very similar to and almost a twin of the Elmhirst Lake Intrusive Complex. It occurs and dominates much of the Hercules Property in the northeastern part of the claims' group. The Stock is an important host to mineral deposits including the past producing DikDik Mine which reportedly produced 3,525-tons grading 0.689 ounces per ton (21.5 grams per tonne) gold and the Foisey vein system which has returned assays up to 0.62 ounces per ton (19.4 grams per tonne) gold.

This Regional Target - 1 is based in part on the location of a gold-bearing glacial till sample collected by the Ontario Geological Survey in 1987. The survey was conducted across the Beardmore-Geraldton gold camp. The program was highly successful and identified a strong correlation between visible grains of gold found in glacial till samples with known gold mines and deposits in the camp. For example, the past producing Quebec Sturgeon River Gold Mine, located about 12-kilometres southwest of the Hercules gold systems, returned three basal till samples with 15, 22 and 74 gold grains. Similarly, the Dik Dik Mine, located about 10-kilometres east of the Hercules gold systems, had two till samples that showed 3 and 4 gold grains.

The Company's Regional Target-1 is contained within the Company's newly staked claims located, about 5-kilometres northeast of the Hercules gold systems. Regional Target-1 is centered on a government sample that contained 4 visible gold grains. Geologically, the target area occurs at the northern nose of the Kaby Lake Stock at the contact with felsic metavolcanic units of the Beardmore-Geraldton greenstone belt and near the intersection of two regional structures now each occupied by diabase dikes. These are geological features with which the primary gold systems at Hercules such as the Yellow Brick Road, Penelton, and Amede are associated. The association of the geological features with the finding of visible grains of gold in the glacial overburden is indicative of the potential for a yet-to-be discovered gold vein system for which our field crews will be exploring.

Regional Target-2 – Ballina Lake Gold Zone.

The Ballina Lake Gold Zone is located about 11-kilometres northeast of the Hercules gold systems and consists of two showings associated with the eastern contact of the Kaby Lake Stock with mafic metavolcanic units. The gold showing at Ballina Lake had exploration performed on it in the past and during 2010 the work included limited outcrop stripping, pitting, sampling and diamond drilling.

Grab samples of 17.94 grams/tonne (g/t) gold and 20.03 g/t gold were reported from sheared metavolcanics at the south shore of Ballina Lake. In this location, pit samples ranged from 1.01 g/t to 5.60 g/t gold over 0.3-metres to 1.22-metres and of the three holes drilled across the trenched area, the most notable intersection was from hole KB 10-13 which returned 2.65 g/t over 0.7-metres.

Approximately 500-metres to the southwest of Ballina Lake is another gold occurrence which is within the Kaby Lake Stock. This showing received limited trenching from which a chip sample yielded 1.01 g/t gold over 2-metres. One hole, KB 10-16, drilled across the projected trend of the trenches and collared in a complex magnetic feature very similar to the Hercules gold occurrences that extends

Gold'n Futures Mineral Corp. (formerly European Metals Corp.)
Management Discussion and Analysis
For the six months ended June 30, 2021 and 2020

for over 2,000-metres. Five intercepts ranging from 1.20 g/t to 3.31 g/t gold over sub-meter to meter drill core lengths were reported from this hole.

The Ballina Lake gold zones represent excellent candidates for further exploration. The Company intends to have its geological team conduct mapping and sampling programs to prospect for drill sites for the upcoming drill programs.

Brady Gold Property

The Company entered into a purchase and sales agreement (“PSA”) with United Gold Inc. (“United Gold”) to acquire 100% interest in the Brady Gold project located in the south-central Newfoundland gold belt. In order to acquire the interest, the Company issued 6,000,000 common shares of the Company with a value of \$720,000 and granted a 2% net-smelter royalty (“NSR”) to United Gold. The Company has the right to re-purchase the NSR by providing written notice and paying \$1,000,000.

The Company issued 600,000 common shares of the Company with a value of \$72,000 as finder’s fee to qualified parties in connection with the acquisition.

Brady Gold Property - 34 Mineral Claims

During the period end June 30, 2021, the Company entered into an option agreement to acquire interest in mineral claims that surround the Brady Gold Property and Reid Gold Zone. Pursuant to the option agreement, the Company will issue 3,000,000 common shares in the capital of the Company as follows:

Due Date	Common shares
Upon regulatory approval	500,000 (issued with a fair value of \$65,000)
On or before May 21, 2022	500,000
On or before May 21, 2023	1,000,000
On or before May 21, 2024	1,000,000

Upon completion of the share issuance, the vendor will hold a 2% Net Smelter Returns royalty.

Brady Gold Property - Historical Estimate

The following historical data and associated resource estimate is based on prior data and reports obtained and prepared by previous operators, and information provided by governmental authorities. (i) a qualified person has not done sufficient work to classify the historical estimate as current mineral resources or mineral reserves. (ii) the issuer is not treating the historical estimate as current mineral resources or mineral reserves. Establishing a current mineral resource estimate on the Property will require further evaluation, which the Company and its consultants intend to complete in due course.

Brady Gold Property - Exploration History

From 2003 to 2013 a total of 6,353.56 meters of diamond drilling in 30 holes had been completed on the Property, including 5,436.46 meters of diamond drilling (24 holes) which targeted the Reid Zone. In late 2009, a seven hole, 1,200 meter drill program expanded the area of known gold mineralization at the Reid Zone. The drill program (holes BO-09-16 to BO-09-22) focused on the Reid Zone to the north, west and south of the historical drilling, with most holes spaced 50 meters from the pre-existing holes. Drill intercepts included (BO-09-17) which returned from 102.50m - 119.30m, 16.80 meters of 1.02 g/t, and from 133.05m - 153.50 m, 20.45 meters of 1.27 g/t Au which included a higher grade intercept from 147.75m - 153.50m, 5.75 meters of 3.89 g/t Au. The Reid Zone remains open to depth and along strike with gold mineralization starting near surface.

In March, 2011, a second phase of drilling on the Property designed to expand the known mineralization and to gain additional information to update the initial resource estimate on the Reid Zone. The program delivered the highest grades to date highlighted by: BO-11-24 which intersected from 29.94m – 61.00m, 36.06 meters grading 1.15 g/t Au and from 84.0m – 103.98m, 19.98 meters grading 1.05 g/t Au; hole BO-11-25 which intersected from 307.55m – 333.00m, 25.45 meters grading 1.48 g/t Au including a section from 317.10m – 324.980m, 7.80 meters grading 3.62 g/t Au.

A resource estimate for the Reid Zone was prepared in September 2012 and currently would be regarded as a historical estimate, as referenced above.

The historical estimate at 0.3 g/t Au cut off, produced 9.57 million tonnes averaging 0.56 g/t Au classified as Inferred for a rounded total of 173,000 ounces of gold. The deposit remains open down dip and along strike therefore considerable additional drilling is required to substantially expand the zone.

The above resource was based on 21 holes totalling 4,699 meters and 1,486 samples. A mineralized grade shell typical of porphyry mineralization was constructed on a 0.10 g/t cut-off. Five-meter composites were utilized and outlier high grade gold values were

Gold'n Futures Mineral Corp. (formerly European Metals Corp.)
Management Discussion and Analysis
For the six months ended June 30, 2021 and 2020

capped. Grade continuity was established by using semi-variograms and bulk density of 2.80 was used from 55 core samples of the Reid zone. Grader blocks of 20 x 20 x 5 meters in dimension were generated by Ordinary Kriging. From various cut-off grades for an open pit operation a 0.3 g/t cut-of was highlighted in the Giourx 2013 report which is cited in this press release.

The Reid Zone shares similarities to a relatively new type of gold deposit called Intrusion- Related Gold Systems (IRGS), first defined in 1999 (McCoy, 1999). Several well-known examples of this type of deposit are found in the Tintina Gold Belt in Alaska and the Yukon Territory and include the Fort Knox, Donlin Creek and Brewery Creek deposits. A comparison of these deposits and the Property shows many similarities such as a complex tectonic terrane comprised of deformed shelf sequences and their proximity to major terrane bounding structures. The host felsic to intermediate porphyritic intrusions contain quartz veins, arsenopyrite and black shale rafts, which are also common features between the three deposit areas. The host lithology to the intrusions, the alteration and the vein style and mineralogy (with the exception of lack of stibnite mineralization) are also similar.

The Reid mineralization is a much older (488 Ma) system than the Cretaceous Cordilleran examples. The comparison between these deposits suggests that the Property has the potential to host significant intrusion hosted, open pit mineable gold deposits similar in size and grade to that of the Fort Knox deposit (252 MT @ 0.47 g/t Au –Kinross Gold website)". Giroux, G.H., P.Eng. and Froude, T., P.Geo.. 2013, Form 43-101F, Technical Report for the Reid Zone Resource Estimate, Brady Project. p12-13.

The aforementioned scientific and technical content has been prepared, reviewed and approved by Mr. Walter Hanych, P. Geo., who is a Qualified Person under NI 43-101 regulations and is a consultant of the Company.

Handcamp Project Letter of Intent

During the period ended June 30, 2021, the Company entered into a letter of intent to acquire up to 75% interest in the Handcamp Gold and Silver property. The Company may acquire the interest by issuing shares to the optionor subject to regulatory approval as follows:

<u>Due Date</u>	<u>Common shares</u>
Upon the execution of a definitive agreement	500,000
Upon the 1st anniversary of the execution of a definitive agreement	500,000
Upon the 2nd anniversary of the execution of a definitive agreement	1,500,000
Upon the 3rd anniversary of the execution of a definitive agreement	2,500,000

The Company has also agreed to participate in a private placement financing of the optionor, anticipated to close on June 30, 2021 (the "Offering"). The Company shall purchase 600,000 shares of optionor at a price of \$0.25 per share. The total gross proceeds of the Offering will be no less than \$500,000.

The Handcamp Property is located in central Newfoundland, 13km south of the town of South Brook and approximately 1km east of the Trans-Canada Highway. The Handcamp Property covers much of the northern part of the central Buchans–Roberts Arm belt that is well known as the host of several past producing mining operations including the famous and rich Buchans polymetallic mine located approximately 80 km south west of the Handcamp Property. From 1928 until its closure in 1984 the Buchans mine is reported to have produced 16.2 million tonnes with average grades of 14.51% zinc, 7.65% lead, 1.33% copper, 126 g/t Ag, and 1.37 g/t Au.

Also in the central Buchans-Roberts Arm belt and approximately 2km south of the Handcamp Property boundary, the Gullbridge deposit was discovered in 1905 along the western shore of Great Gull Lake. The Gullbridge deposit went into production in 1967 and operations ceased in 1972. Three million tonnes averaging 1.1% copper had been produced. Zinc, gold and silver were reportedly present in the sulphide mineralization but were not recovered.

The major occurrence at the Handcamp Property is a rusty weathering, structurally bound, linear altered and gossan zone up to 50m wide, mapped for 1.2km along strike and drilled to a vertical depth of up to 190m. The mineralization is hosted within mafic volcanic rocks and associated iron formation. The zone dips steeply to the west. Reportedly, the bulk of the mineralized zone is the intensely altered to quartz–muscovite (± fuchsite) –pyrite–magnetite. Mineralization consists of pyrite, chalcopyrite, sphalerite, minor galena and gold.

The aforementioned scientific and technical content has been prepared, reviewed and approved by Mr. Walter Hanych, P. Geo., who is a Qualified Person under NI 43-101 regulations and is a consultant of the Company.

Environmental Liabilities

The Company is not aware of any environmental liabilities, obligations or responsibilities associated with the Company's mining interests.

Related Party Transactions And Key Management Compensation

Key personnel and directors are:

Vicki Rosenthal – Director, CFO, and Corporate Secretary
 Stephen Wilkinson – appointed CEO on March 24, 2021
 Walter Hanych – appointed Director on March 24, 2021
 Matthew Fish – appointed Director on January 22, 2021 and appointed Treasurer on March 24, 2021
 Maciej Lis – Director
 Mike Hudson – Director
 Theo van der Linde – former Director, and former Interim CEO (Resigned as Director and Interim CEO on March 24, 2021)

Related parties include the Board of Directors, officers, and enterprises that are controlled by these individuals as well as certain persons performing similar functions. Related party transactions conducted in the normal course of operations are measured at the exchange value (the amount established and agreed to by the related parties).

The Company had the following related party expenses during the period ended June 30, 2020 and 2021.

As at June 30, 2021, included in accounts payable and accrued liabilities are amounts owing to related party amounting to \$42,000 (December 31, 2020 - \$77,515) that are unsecured, payable on demand and without interest.

	June 30, 2021 \$	December 31, 2020 \$
CEO	\$12,000	-
Company controlled by a former Director and former Interim CEO	-	24,083
Company jointly controlled by a former Director and former Interim CEO	-	23,432
Company controlled by a Director and Treasurer	30,000	30,000
	<u>42,000</u>	<u>77,515</u>

On January 3, 2020, the Company issued 17,833,817 common shares to a former related party to settle debt of \$445,845.

During the year ended December 31, 2020, the Company entered into a loan agreement with a firm jointly controlled by the former Interim CEO and former Director whereby the firm agreed to lend \$25,000. The loan is unsecured, due on demand and bears interest at 8% per annum. As at June 30, 2021, the Company had a balance payable including principal and interest of \$26,299 (December 31, 2020 - \$25,307).

In accordance with IAS 24, key management personnel are those having authority and responsibility for planning, directing and controlling the activities of the Company directly or indirectly, including any directors (executive and non-executive) of the Company. The remuneration of directors and key management of the Company was as follows:

	June 30, 2021 \$	June 30, 2020 \$
Management fees to the CEO	39,600	-
Accounting fees to a company jointly controlled by a former Director and former Interim CEO	9,000	800

Director fees to a company controlled by a former Director and former Interim CEO	15,000	-
Director fees to a former director	-	20,000
Legal fees to a director	-	27,555
Share-based compensation	55,845	-
	<u>131,145</u>	<u>48,355</u>

Capital Risk Management

The Company includes equity, comprising issued share capital, share subscriptions received in advance, warrant reserves, share-based payments reserve, and deficit, in the definition of capital.

The Company's primary objective with respect to its capital management is to ensure that it has sufficient cash resources to fund its exploration commitments. To secure the additional capital necessary to continue with the exploration of mineral properties, the

Gold'n Futures Mineral Corp. (formerly European Metals Corp.)
Management Discussion and Analysis
For the six months ended June 30, 2021 and 2020

Company may attempt to raise additional funds through the issuance of debt or equity. The Company is not subject to any capital requirements imposed by a lending institution.

The Company monitors its capital structure and makes adjustments according to market conditions in an effort to meet its objectives given the current outlook of the business and industry in general. The Company may manage its capital structure by issuing new shares and adjusting capital spending. The capital structure is reviewed by management and the Board of Directors on an ongoing basis.

There were no changes in the Company's process, policies and approach to capital management during the six month period ended June 30, 2021.

Financial Risk Management

In March 2020, the World Health Organization declared coronavirus COVID-19 a global pandemic. This contagious disease outbreak, which has continued to spread, and any related adverse public health developments, has adversely affected workforces, economies, and financial markets globally, potentially leading to an economic downturn. The impact on the Company is not currently determinable but management continues to monitor the situation.

As at June 30, 2021, the fair values of the Company's financial instruments approximate their carrying values due to the relatively short-term maturity of these instruments. The Company's activities expose it to a variety of financial risks: credit risk, liquidity risk and market risk (including interest rate risk, foreign currency risk and price risk).

(i) Credit risk

Credit risk is the risk of loss associated with a counterparty's inability to fulfill its payment obligations. The Company's credit risk is primarily attributable to cash. Cash is held with a Canadian chartered bank, from which management believes the risk of loss to be minimal.

(ii) Liquidity risk

Liquidity risk is the risk that the Company may not have sufficient cash resources to meet its financial obligations as they come due. The Company's liquidity and operating results may be adversely affected if its access to the capital market is hindered, whether as a result of a downturn in stock market conditions generally or matters specific to the Company. The Company generates cash flow primarily from its financing activities. As at June 30, 2021, the Company had cash and cash equivalents of \$229,851 (December 31, 2020 - \$6,483) to settle trade accounts payable and accrued liabilities, and sales tax payable of \$170,298 (December 31, 2020 - \$177,015). The Company's financial liabilities have contractual maturities of less than 30 days and are subject to normal trade terms. The Company regularly evaluates its cash position to ensure preservation and security of capital as well as liquidity. As discussed in Note 1, the Company's ability to continually meet its obligations and carry out its planned exploration activities is uncertain and dependent upon the continued financial support of its shareholders and securing additional financing. Management is continuing in its efforts to secure a financing and believes it will be successful.

(iii) Market risk

Market risk is the risk of loss that may arise from changes in market factors such as interest rates and foreign exchange rates.

(iv) Interest rate risk

The Company has cash and cash equivalent balances and no variable interest-bearing debt. The Company's current policy is to invest excess cash in guaranteed investment certificates issued by a Canadian chartered bank with which it keeps its bank accounts. The Company periodically monitors the investments it makes and is satisfied with the creditworthiness of its Canadian chartered bank.

(v) Foreign currency risk

The Company's functional and presentation currency is the Canadian dollar and major purchases are transacted in Canadian dollars. The Company at the present time does not have any foreign currency balances subject to foreign currency risk.

(vi) Sensitivity analysis

Based on management's knowledge and experience of the financial markets, the Company believes the following movements are reasonably possible over a twelve-month period:

Gold'n Futures Mineral Corp. (formerly European Metals Corp.)
Management Discussion and Analysis
For the six months ended June 30, 2021 and 2020

Cash is subject to floating interest rates. The Company has no variable debt and receives low interest rates on its cash and cash equivalents balances. As such, the Company does not have significant interest rate risk.

Fair Value Measurements

The Company's financial instruments consist of cash, sales tax payable, and accounts payable and accrued liabilities.

The Company has classified fair value measurements of its financial instruments using a fair value hierarchy that reflects the significance of inputs used in making the measurements as follows:

Level 1: Valuation based on quoted prices (unadjusted) in active markets for identical assets or liabilities;

Level 2: Valuations based on directly or indirectly observable inputs in active markets for similar assets or liabilities, other than Level 1 prices, such as quoted interest or currency exchange rates; and

Level 3: Valuations based on significant inputs that are not derived from observable market data, such as discounted cash flow methodologies based on internal cash flow forecasts.

The fair value of the Company's cash is classified as a Level 1 fair value measurement. The Company does not have any Level 2 or 3 fair value measurements.

Future Outlook

Gold'n Futures Mineral Corp. is in the exploration stage and all previous properties which the Company had acquired in prior years in which an interest had been maintained have been fully impaired in the financial statements. On February 13, 2020, the Company completed its qualifying transaction to revitalize the Company. Management plans to further evaluate the Hercules – Elmhirst property to determine the next steps with respect to exploration activities.

Financial Overview

The Company does not earn any significant revenue from consolidated operations. Interest is derived from the investment of funds for the period between the receipt of funds from equity placements, and the disbursement of exploration expenditures.

Consolidated Results of Operations

All of the balances set out in this and following sections, including the Summary of quarterly results conform to IFRS standards.

Gold'n Futures Mineral Corp. (formerly European Metals Corp.)
Management Discussion and Analysis
For the six months ended June 30, 2021 and 2020

For the six months ended June 30, 2021 and 2020

During the six months ended June 30, 2021 ("2021"), the Company reported a net loss and comprehensive loss of \$693,888, compared to \$396,601 in the six months ended June 30, 2020 ("2020"), an increase in loss of \$297,287. Some of the significant charges to operations are as follows:

- i) Corporate development fees of \$172,485 (2020 - \$Nil) were comprised of video production, website development, branding, social media management and promotional fees. These services were primarily provided by two independent consulting firms in an effort to raise awareness of the Company's current business activities in the public domain.
- ii) Share-based compensation of \$55,845 (2020 - \$Nil) was recognized on the grant of 750,000 (2020 - Nil) share options to a director and an officer of the Company. The estimated fair value of the options was measured using the Black-Scholes Option Pricing Model with the following assumptions: share price \$0.15; exercise price - \$0.15; expected life - 2 years; volatility - 100%; dividend yield - \$0; and risk-free rate - 0.24%.
- iii) Consulting fees increased \$77,357, from \$40,798 in 2020 to \$118,155 in 2021. The Company hired a firm to provide financial advisory services and expensed \$46,685 (2020 - \$Nil) of the \$120,000 paid for services covering February 2021 to January 2022. An additional \$31,870 (2020 - \$40,798) was paid to consultants to help develop the business, seek potential new mining projects, and financing opportunities. The Company appointed a new CEO effective March 24, 2021. The company expensed \$39,600 (2020 - \$Nil) in management fees related to the CEO appointment.
- iv) Professional fees in 2021, decreased by \$22,790, from \$71,560 in 2020 to \$48,770 in 2021. Professional fees are comprised of \$20,250 (2020 - \$23,225) for accounting, \$28,520 (2020 - \$20,780) for corporate services, and \$Nil (2020 - \$27,555) for legal fees. During the comparative period, legal fees were primarily attributed to shares for debt settlements, completion of a private placement, and negotiation of the Cree Lake property option agreement.
- i) Registration, filing, and transfer agent fees decreased \$1,642 from \$13,892 in 2020 to \$12,250 in 2021. The decrease in fees is attributed to the application fee to relist on the CSE and the shareholder communication costs incurred in relations to the annual general meeting during 2020. The Company incurred monthly sustaining fees to the CSE for the full 2021 period.
- v) Directors' fees of \$15,000 (2020 - \$20,000) are comprised of \$15,000 to the former Interim CEO and \$5,000 to the former CEO. Fees in 2020 were significantly less as the former Director had only charged for one month of services compared to three months of services by the former Director in 2021.
- vi) Due diligence fees of \$Nil (2020 - \$92,295) were incurred as a result a business and legal review on Trinity Alps. Based on the Company's internal review and findings, the Company terminated the Letter of Intent with Trinity Alps.

During 2021, the Company abandoned its option on the early exploration stage Cree Lake Project. Consequently, \$285,000 the Cree Lake Project was written off to operations.

For the three-month period ended June 30, 2021 and 2020

During the three-month period ended June 30, 2021 ("Q2-2021"), the Company reported a net loss and comprehensive loss of \$151,532, compared to \$206,810 in the three-month period ended June 30, 2020 ("Q2-2020"), an decrease in loss of \$55,278. Some of the significant charges to operations are as follows:

- ii) Corporate development fees of \$36,154 (Q2-2020 - \$Nil) were comprised of video production, website development, branding, social media management and promotional fees. These services were primarily provided by two independent consulting firms in an effort to raise awareness of the Company's current business activities in the public domain.
- iii) Consulting fees increased \$82,518, from \$2,000 in Q2-2020 to \$84,518 in Q2-2021. The Company hired a firm to provide financial advisory services and expensed \$29,918 (Q2-2020 - \$Nil) of the \$120,000 paid for services covering February 2021 to January 2022. An additional \$15,000 (Q2-2020 - \$2,000) was paid to consultants to help develop the business, seek potential new mining projects, and financing opportunities.
- iv) Professional fees in Q2-2021, increased by \$1,815, from \$24,005 in Q2-2020 to \$25,820 in Q2-2021. Professional fees are comprised of \$9,000 (Q2-2020 - \$14,225) for accounting, \$16,820 (Q2-2020 - \$9,780) for corporate services, and \$Nil (Q2-2020 - \$27,555) for legal fees. During the comparative period, legal fees were primarily attributed to shares for debt settlements, completion of a private placement, and negotiation of the Cree Lake property option agreement.
- v) Registration, filing, and transfer agent fees decreased \$4,544 from \$11,151 in Q2-2020 to \$6,607 in Q2-2021. The decrease in fees is attributed to the application fee to relist on the CSE and the shareholder communication costs incurred in relations to the annual general meeting during Q2-2020.

Gold'n Futures Mineral Corp. (formerly European Metals Corp.)
Management Discussion and Analysis
For the six months ended June 30, 2021 and 2020

- vi) Directors fees of \$Nil (Q2-2020 - \$15,000) are comprised of \$5,000 to the former CEO. Fees in 2020 were significantly less as the former Director had only charged for one month of services compared to three months of services by the former Director in 2021.

Summary of Quarterly Results

Quarterly variances occur mainly due to seasonal factors, administrative costs and fees related to new property acquisitions, and levels of exploration activities.

The Company started the 2021 fiscal year with a working deficiency of \$189,558. As at June 30, 2021, the Company had a working capital of \$154,823. The increase in the working capital was the result of completing a private placement of \$699,338 during the period ended June 30, 2021.

The table below shows the outstanding share capital of the Company as of as of the date of this MD&A.

	# of shares
Common Shares	114,914,353
Outstanding Share Options	6,800,000
Outstanding Warrants	13,798,384
Fully Diluted Share Capital	135,012,737

Off-Balance Sheet Arrangements

None are applicable at this time, however with mineral exploration, obligations for environmental, First Nation compliance and health and safety issues can create non-reportable concerns. The Company hopes to minimize such situations by maintaining adequate insurance coverage, establishing honest and open communications and operating in a safe and responsible manner compliant with current standards as per the most recent applicable acts and regulations.

Outlook

The Company is dependent on obtaining financing for the exploration and development of its mineral properties. There is no assurance that such financing will be available when required, or under favourable terms. Management plans to further evaluate the Hercules – Elmhirst property to determine the next steps with respect to exploration activities.

Proposed Transactions

In the normal course of business, management actively targets sources of additional financing through alliances with financial entities or other business and financial transactions which would assure continuation of the Company's operations and exploration programs. As of the date of this MD&A, the Company has no proposed transactions other than what has been outlined in the md&a.

Risk And Uncertainties

Risk is inherent in all business activities and cannot be entirely eliminated. Our goal is to enable the Company's business processes and opportunities by ensuring that the risks arising from our business activities, the markets and political environments in which we operate are mitigated. The risks and uncertainties described in the MD&A for the year ended September 30, 2020 are considered by management to be the most important in the context of the Company's business and are substantially unchanged as of the Report Date. Those risks and uncertainties are not inclusive of all the risks and uncertainties the Company may be subject to and other risks may apply.

Changes In Accounting Policies And Critical Accounting Estimates

During the six months ended June 30, 2021, there were no changes to the Company's significant accounting policies, nor any new accounting policies adopted.

The preparation of the Financial Statements in conformity with IFRS requires management to make estimates, judgments and assumptions that affect the reported amounts of assets and liabilities, and disclosure of contingent assets and liabilities at the date of the Financial Statements, and the reported amounts of revenues and expenses for the reporting period. Actual results could differ from management's best estimates as additional information becomes available.

The information about significant areas of estimation uncertainty and judgment considered by management in preparing the Financial Statements are described in Note 2 of the Company's audited consolidated financial statements for the year ended December 31, 2020.

Internal Controls Over Financial Reporting

Management has designed internal controls over financial reporting to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with IFRS. The design of the Company's internal control over financial reporting was assessed as of the date of this Management Discussion and Analysis. Based on this assessment, it was determined that certain weaknesses existed in internal controls over financial reporting. As indicative of many small companies, the lack of segregation of duties and effective risk assessment were identified as areas where weaknesses existed. The existence of these weaknesses is to be compensated for by senior management monitoring, which exists. Management will continue to monitor very closely all financial activities of the Company and increase the level of supervision in key areas. It is important to note that this issue would also require the Company to hire additional personnel in order to provide greater segregation of duties. Since there is insufficient work at this time to warrant the additional costs, management has chosen to disclose the potential risk in its filings and proceed with increased personnel only when the budgets and work load will enable the action. The Company has attempted to mitigate these weaknesses, through a combination of extensive and detailed review by management of the financial reports, the integrity and reputation of senior accounting personnel, and candid discussion of those risks with the audit committee.

Management's Responsibility For Financial Statements

Information provided in this report, including the consolidated financial statements, is the responsibility of management. In the preparation of these statements, estimates are sometimes necessary to make a determination of future value for certain assets or liabilities. Management believes such estimates have been based on careful judgments and have been properly reflected in the accompanying financial statements. Management maintains a system of internal controls to provide reasonable assurances that the Company's assets are safeguarded and to facilitate the preparation of relevant and timely information.

Approval

The Board of Directors of the Company has approved the disclosure contained in this MD&A.
