GOLD'N FUTURES ANNOUNCES PRIVATE PLACEMENT OF UNITS

VANCOUVER, BC – (Newsfile – October 31, 2023) **GOLD'N FUTURES MINERAL CORP.** (CSE: FUTR) (FSE: G6M), (OTC: GFTRF) (the “**Company**” or “**Gold'n Futures**”) is pleased to announce an offering of units of the Company (“**Units**”) at C\$0.01 per Unit for gross proceeds of up to C\$130,000 (the “**Offering**”) to be issued by way of a non-brokered private placement pursuant to exemptions from applicable Canadian securities laws. The size of the offering may be increased subject to Board of Directors and regulatory approval.

Each Unit will consist of one common share of the Company (“**Common Share**”) and one Common Share purchase warrant (“**Warrant**”), with each Warrant entitling the holder to purchase one additional Common Share at a price of C\$0.05, at any time prior to the date which is sixty (60) months from the closing of the private placement (“**Closing Date**”); provided that, if at any time after the Closing date, the volume weighted average trading price of the Common Shares on the CSE is at least C\$0.10 per share for the preceding ten (10) consecutive trading days, the Company has the right to accelerate the expiry date of the Warrants issued under the Offering (“**Warrant Acceleration Right**”) by way of written notice and press release. Subject to the Warrant Acceleration Right, the expiry date of the Warrants shall occur thirty (30) days from the end of the abovementioned ten (10) consecutive trading days and any Warrants not exercised during the thirty (30) day term shall expire.

The first closing under the Offering is scheduled to be on or about November 8, 2023, subject to customary closing conditions and may be closed in tranches. A finder’s fee will be payable at the close of the Offering.

The Company intends to use the proceeds of the Offering for general working capital purposes and exploration expenses.

Qualified Person

The scientific and technical content of this press release has been prepared, reviewed and approved by Mr. Walter Hanych, P. Geo., who is a Qualified Person under NI 43-101 regulations and is a director of the Company.

About Gold'n Futures Mineral Corp.

Gold'n Futures Mineral Corp. (CSE: FUTR) (FSE: G6M) (OTC: GFTRF) is a mineral exploration company with two advanced Canadian gold projects. The **Hercules Gold Project** is 195 km northeast of Thunder Bay, Ontario in the Beardmore – Geraldton gold mining camp. It is 54 km north west of Equinox Gold’s Greenstone gold mine that reportedly boasts 5.5 million ounces of Proven and Probable Reserves (<https://www.equinoxgold.com/growth-projects/greenstone-project/>). The Hercules Property consists of 425 contiguous claims (11,370 ha). From the historical and its current work, the Company has built a comprehensive database and model and is preparing a new Mineral Resource Estimate based upon current and historical drilling totalling the order of 537 holes comprising 114,000 m of core.

The **Brady-Huxter Gold Project** is in Central Newfoundland, 50 km southeast of the town of Gander. The Brady-Huxter property consists of nine mineral licenses, which cover 2,350 ha and contains two large porphyry-hosted gold deposits, the Reid and Mosquito Hill. These deposits have a combined drill-defined historical resource estimate of 59.5 million tonnes containing 938,753 oz of indicated and inferred gold mineralization (see Gold'n Futures news of October 16, 2023).

Gold'n Futures is conducting programs to expand its gold resources and to develop viable gold mining operations through the application of extensive geological experience and knowledge combined with advanced technologies and computer modeling.

Forward-Looking Statements:

This news release includes certain forward-looking statements and forward-looking information (collectively, "forward-looking statements") within the meaning of applicable Canadian securities legislation. All statements, other than statements of historical fact, included herein including, without limitation, statements regarding the trading of the Company's common shares on the Canadian Securities Exchange, future capital expenditures, anticipated content, commencement, and cost of exploration programs in respect of the Company's projects and mineral properties, anticipated exploration program results from exploration activities, resources and/or reserves on the Company's projects and mineral properties, and the anticipated business plans and timing of future activities of the Company, are forward-looking statements. Although the Company believes that such statements are reasonable, it can give no assurance that such expectations will prove to be correct. Often, but not always, forward looking information can be identified by words such as "pro forma", "plans", "expects", "will", "may", "should", "budget", "scheduled", "estimates", "forecasts", "intends", "anticipates", "believes", "potential" or variations of such words including negative variations thereof, and phrases that refer to certain actions, events or results that may, could, would, might or will occur or be taken or achieved. In making the forward-looking statements in this news release, the Company has applied several material assumptions, including without limitation, that market fundamentals will result in sustained precious and base metals demand and prices, the receipt of any necessary permits, licenses and regulatory approvals in connection with the future exploration of the Company's properties, that the COVID-19 global pandemic will not affect the ability of the Company to conduct the exploration program on the Hercules Gold Project, the availability of financing on suitable terms, and the Company's ability to comply with environmental, health and safety laws.

Forward-looking statements involve known and unknown risks, uncertainties and other factors which may cause the actual results, performance or achievements of the Company to differ materially from any future results, performance or achievements expressed or implied by the forward-looking statements. Such risks and other factors include, among others, statements as to the anticipated business plans and timing of future activities of the Company, including the Company's option to acquire the Hercules Gold Project, the proposed expenditures for exploration work thereon, the ability of the Company to obtain sufficient financing to fund its business activities and plans, delays in obtaining governmental and regulatory approvals (including of the Canadian Securities Exchange), permits or financing, changes in laws, regulations and policies affecting mining operations, risks relating to epidemics or pandemics such as COVID-19, including the impact of COVID-19 on the Company's business, financial condition and results of operations, the Company's limited operating history, currency fluctuations, title disputes or claims, environmental issues and liabilities.

Readers are cautioned not to place undue reliance on forward-looking statements. The Company undertakes no obligation to update any of the forward-looking statements in this news release except as otherwise required by law.

Mineral Resources which are not Mineral Reserves, do not have demonstrated economic viability. The estimate of Mineral Resources may be materially affected by metal prices and exchange rate assumptions; changes in local interpretations of mineralization geometry and continuity; changes to grade capping, density and domain assignments; changes to geotechnical,

mining and metallurgical recovery assumptions; ability to maintain environmental and other regulatory permits; and ability to maintain the social license to operate. The estimate of Mineral Resources may be materially affected by environmental permitting, legal title, taxation, socio-political, marketing, or other relevant issues. Mineral Resources are classified according to Canadian Institute of Mining, Metallurgy and Petroleum ("CIM") Definition Standards (2014) and CIM Best Practices (2019). The Inferred Mineral Resource in this estimate has a lower level of confidence than that applied to an Indicated Mineral Resource and cannot be converted to a Mineral Reserve. It is reasonably expected that the majority of the Inferred Mineral Resource could be upgraded to an Indicated Mineral Resource with continued exploration.

The Canadian Securities Exchange accepts no responsibility for the adequacy or accuracy of this release.
