

## ORCA TOUCHSCREEN ANNOUNCES PLANS FOR A STOCK SPLIT

**Vancouver, BC, July 4, 2014 – Orca Touchscreen Technologies Ltd.** (the “Company” or “Orca Touchscreen”) (CSE:OAA) is pleased to announce that it intends to complete a forward stock split. The four (4) for one (1) forward stock split (the “**Forward Split**”) has an intended record date of July 11, 2014 (the “**Record Date**”).

The Company intends to execute the Forward Split using the ‘Push-out Method’ whereby the shareholders keep the share certificates they currently hold, and the shareholders of record as of the close of business on the Record Date are issued additional shares by the Company’s transfer agent.

Three (3) additional common shares shall be issued for each one (1) common share held as of the close of business on the Record Date. The Company anticipates that the additional shares will be issued to holders on or about July 11, 2014 (the “**Delivery Date**”).

The additional shares will be issued in Direct Registration System (DRS). DRS stands for Direct Registration System, being an electronic form of share registration in “book-entry” form. Rather than delivering physical share certificates, the Company’s transfer agent, Computershare, will on the Delivery Date issue a “DRS Advice” to each holder confirming the additional shares issued and registered electronically in DRS. For more information on DRS, see <http://www.computershare.com/ca-en/business/cis/oc/pages/drs.aspx>.

The Company currently has 10,110,000 issued and outstanding common shares. Upon completion of the Forward Split, the Company will have 40,440,000 issued and outstanding common shares.
