ePlay Digital Announces iPad Version of Klocked To Engage and Inspire Indoor Runs

Dropping into a larger screen metaverse is like watching a sports broadcast - featuring you and your epic moments.

ePlay Digital Inc. ([CSE:EPY](#) | [OTC:EPYFF](#) | [FSE:2NY2](#)) (the “Company”) today announced that Klocked’s award-winning app is now available on iPad for indoor running on treadmills. The new larger screen display is oriented horizontally like wide-screen television. The new functionality also enables Bluetooth connectivity to treadmills, smartphones, [Coros](#) and [Garmin](#) smartwatches, the [Runn](#) Smart Treadmill Sensor, and Under Armour sneakers. Runners can watch in full-screen HD action as they run through the streets of Paris or ruins of Tikal from their basement or the gym.

“Klocked is the only immersive audio and video running experience that works indoors and out,” says Trevor Doerksen, CEO of ePlay Digital and co-creator of Klocked fitness app. “The iPad version of the Klocked app gives runners a view and soundscape for their everyday training, group runs, phenomenal race day experiences, and epic sports moments in real-time.”

Klocked's revolutionary real-time Sports Science Platform is compatible with Garmin* watches including Garmin Fenix 7, Fenix 6, Forerunner 945, 745, 245, 55, Enduro series, and other Garmin watches and devices. Klocked is also compatible with Coros Pace 2, Apex Pro, Vertix, and Vertix 2 watches by tapping the Bluetooth symbol and selecting indoor run in Klocked and virtual run on Coros and Garmin smartwatches. In addition, Klocked is compatible with Bluetooth enabled Under Armour sneakers, Bowflex treadmills and other Bluetooth devices that track and transmit cadence, stride length, distance, and other data in real-time. The new indoor run compatibility has been tested on various treadmill brands including NordicTrack to show accurate activity tracking where GPS is not possible.

The Klocked Bluetooth connect feature not only offers live tracking and HD video of Klocked World, it offers something else that no other smart device offers - Klocked Interval ML. Most smart devices allow calibration to the treadmill at the end of activity only. Klocked offers interval calibration and machine learning in order to provide the most accurate smart device calibration on the market

Klocked new 3rd party watch, treadmill, and sneaker compatibility supports existing Klocked audio and video cues, adaptive music to optimize cadence, pre-race and in-race coaching, and the P4 AI performance-enhancing audio cues that improve training and race-day performance. Real-time evaluation is powered by Klocked P4 AI and [Weav Music](#)'s performance-enhancing adaptive music & AR coaching technology.

Coach Kelly

Coach Kelly joins Klocked users on race and fun run days. [Upcoming races](#) and fun runs include Berlin, Paris, and New York. Join 30-minutes before start time and Coach Kelly walks participants through the upcoming event. Coach Kelly is with you at race start, during the race, and through to the finish line. Check out the [schedule](#).

More Sports Science

Additional Advanced Sports Science Features include:

- Placement visual and audio cues to advance race position by gender and age division
- Gamification to advance to the next level
- Leaderboards by age and gender divisions
- Special challenges and races
- Bonus points and special effects for passing and participating in challenges
- Earn real and augmented reality t-shirts, race bibs, and medals

Klocked Sports Science Platform is now available in the free [Klocked App](#).
