Disclaimer

Certain statements contained in the following MD&A constitute "forward-looking statements" (within the meaning of the Canadian securities legislation) that involve risks and uncertainties. Forward-looking statements are frequently, but not always, identified by words such as "expects", "anticipates", "believes", "intends", "estimates", "potential", "possible" and similar expressions, or statements that events, conditions or results "will", "may", "could" or "should" occur or be achieved. The forward-looking statements may include statements regarding future events, developments, acquisitions, capital expenditures, timelines, strategic plans, or other statements that are not statements of fact. Forward-looking statements are statements about the future and are inherently uncertain, and actual achievements of the Company may differ materially from those reflected in forward-looking statements due to a variety of risks, uncertainties and other factors. For the reasons set forth above, investors should not place undue reliance on forward-looking statements. Important factors that could cause actual results to differ materially from the Company's expectations include uncertainties involved in continued availability of capital and financing; dependence on key personnel; uncertainties related to the Company's operations and products; uncertainties as to future expense levels and the possibility of unanticipated costs or expenses or cost overruns; and general economic, market or business conditions. Investors are cautioned that any such statements are not guarantees of future performance and that actual results or developments may differ materially from those projected in the forward-looking statements. The Company has no policy for updating forward looking information beyond the procedures required under applicable securities laws.

Overview

Nature of Business

Delota Corp. (formerly, Spyder Cannabis Inc.) was incorporated pursuant to the provisions of the *Business Corporations Act* (Alberta) on February 20, 2014. The Company's common shares currently trade on the TSX Venture Exchange ("TSX-V") under the symbol "LOTA". The Company is an established cannabis and vape retailer that sells cannabis products, vape and nicotine-related products, herbal vaporizers, other smoking cessation products and accessories where regulations permit. The Company currently operates the retail brands 180 Smoke and Offside Cannabis. The Company's corporate and registered office is 7941 Jane Street, Unit 2, Concord, Ontario, L4K 2M7.

Delota is an established cannabis and vape retailer that owns and operates a portfolio of Canadian retail brands well-positioned to capitalize on the evolving cannabis and nicotine retail sectors.

The Company's goal is to build the most popular and beloved retail cannabis and nicotine brands in Canada by aggressively growing its footprint and developing retail banners that resonate with a loyal and growing customer base.

About 180 Smoke

[180 Smoke](#) is Ontario's largest specialty vape chain with 28 retail locations across the province and a leading Canada-wide e-commerce presence. 180 Smoke has over 130,000 in-store accounts at its brick-and-mortar locations and over 190,000 online accounts through its e-commerce platform. Unlike other specialty vape retailers, 180 Smoke has secured "store within a store" relationships with big tobacco to have experiential hubs for their products.

About Offside Cannabis

[Offside Cannabis](#) is a value-centered dispensary brand providing retail and online services. Offside Cannabis believes in boutique bud products and services at big box bud prices – ultimately, Offside Cannabis aims to provide its customers with good value for their dollar. There are currently five licensed locations in Niagara Falls (2), Pickering, Port Perry and Hamilton.

Overall Performance

On May 31, 2019, the Company completed the acquisition of Spyder Vapes Inc. ("Spyder Vapes"), a privately held company incorporated on August 18, 2014. The Company acquired all of the issued and outstanding common shares of Spyder Vapes through a reverse takeover transaction (the "RTO"), which was affected pursuant to a merger agreement between Anchor Capital Corporation and Spyder Vapes Inc. Results of Operations for the Three and Nine Months Ended October 31, 2022

The condensed interim consolidated financial statements of the Company have been prepared using IFRS on a going concern basis, which presumes the realization of assets and discharge of liabilities in the normal course of business for the foreseeable future. As such, there is a material uncertainty related to these events and conditions that may cast significant doubt on the ability to continue as a going concern and therefore, it may be unable to realize its assets and discharge its liabilities in the normal course of business. As a result, within the next twelve months, the Company will need to generate positive cash flows from operations, and/or obtain additional equity or debt financing in order to meet its liabilities as they come due and to continue with its business activities. The condensed interim consolidated financial statements do not reflect the adjustments or reclassification of assets and liabilities that would be necessary if the Company were unable to continue its operations. Accordingly, the Company's condensed interim consolidated financial statements have been prepared on the basis of accounting policies applicable to a going concern, which assumes that the Company will continue in operation for the foreseeable future and will be able to realize its assets and discharge its liabilities in the normal course of business.

The Company has financed its operations from inception to date through the issuance of debt and equity securities. The Company currently has limited source of revenues, and as such, administrative and other expenses may exceed available cash resources from its revenue. Additional funding may be required to further the Company's future business projects and to meet ongoing requirements for to fund its operations.

The Company monitors its capital structure and makes adjustments according to market conditions in an effort to meet its objectives given the current outlook of the business and industry in general. The Company may manage its capital structure by issuing new shares, repurchasing outstanding shares, adjusting capital spending, or disposing of assets. The capital structure is reviewed by management and the board of directors on an ongoing basis.

The continuing operations of the Company are dependent on funding. The Company intends to finance its future requirements through a combination of debt or equity financing. There is no assurance that the Company will be able to obtain such financing or obtain them on favorable terms. These material uncertainties cast significant doubt as to the Company's ability to continue as a going concern. As at October 31, 2022 and January 31, 2022, the Company's condensed interim consolidated financial statements do not include any adjustments related to the recoverability and classification of recorded asset amounts or the amount and classification of liabilities or any other adjustments that might be necessary should the Company be unable to continue as a going concern. Such adjustments could be material.

Outstanding Share Data

There were 26,809,615 common shares of the Company issued and outstanding as at October 31, 2022 and December 30, 2022, being the date of this report. There were Options for the purchase of 735,000 common shares of the Company and share purchase warrants for the purchase of 2,962,956 common shares of the Company issued and outstanding as at October 31, 2022 and December 30, 2022, being the date of this report.

Acquisition of 180 Smoke

On March 30, 2021, the Company acquired (the "Acquisition") all of the issued and outstanding common shares of the entities that collectively comprise the business of 180 Smoke (collectively, "180 Smoke"), a dominant vape retailer in Canada, namely: (i) 2360149 Ontario Inc. d/b/a 180 Smoke and its wholly-owned subsidiaries 420 Wellness Inc. and 180 Smoke LLC; (ii) 180 VFC Inc.; and (iii) 2488004 Ontario Inc. The Acquisition was completed with an arm's length party on a cash-free basis (after post-closing adjustments), for promissory note of \$11,129,171 and nominal consideration of \$1.

The following table summarizes the fair value of consideration paid on the acquisition date and the allocation of the purchase price to the assets and liabilities acquired.

	\$

Following the Acquisition, the Company determined that the amount allocated to goodwill was deemed impaired as a result of the consideration paid being higher than the value of the 180 Smoke business. This was mainly attributable to the consideration associated with the promissory note. The Company subsequently settled the promissory note as detailed in Note 13. During the year ended January 31, 2022, the Company recorded an impairment of goodwill in the amount of \$6,919,963, which was reported on the Company's consolidated statements of operations and comprehensive loss.

Promissory Note

During the year ended January 31, 2022, the Company had a promissory note in the principal amount of \$11,129,171 held by 2766563 Ontario Inc. ("276 Ontario"), which was unsecured, non-interest bearing and due on demand. This promissory note arose from the Company's acquisition of 180 Smoke (Note 9).

On March 30, 2022, the Company acquired all of the issuing and outstanding common shares of 276 Ontario through the issuance of an aggregate of 12,000,001 common shares of the Company, at a price of \$0.25 per common share. As a result of the acquisition of 276 Ontario, the Company's promissory note held with 276 Ontario has been eliminated on consolidation and a gain on the settlement of debt in the amount of \$8,129,171 was recorded during the nine months ended October 31, 2022.

Government Loan

During the year ended January 31, 2021, the Company obtained an aggregate of \$300,000 in loans under the Canada Emergency Business Account (collectively, the "CEBA Loan"). The CEBA Loan was granted in the form of an interest-free revolving line of credit of which up to \$300,000 may be drawn. On January 1, 2021, any balance remaining on the revolving line of credit automatically converted into a non-revolving term loan. Any outstanding balance on the CEBA Loan not repaid by January 1, 2023 will be converted into an interest-bearing loan at a rate of 5% per annum. The CEBA Loan matures on December 31, 2025. If two-thirds (or \$200,000) of the outstanding CEBA Loan is paid on or before December 31, 2022, the remaining one-third (or \$100,000) will be forgiven. The Company expects to repay \$200,000 of the outstanding CEBA Loan on or before such date. The Company has discounted the CEBA Loan using a discount rate of 12% during the interest-free loan period, which is the Company's specific business unit's incremental borrowing rate. The fair value of the CEBA Loan at inception amounted to \$157,514. The difference between the amount received and the fair value of the CEBA Loan of \$142,486 was recorded as government assistance in the Company's consolidated statements of operations and comprehensive loss during the year ended January 31, 2021.

During the three and nine months ended October 31, 2022, the repayment related to the CEBA Loan was extended to December 31, 2023. The maturity extension resulted in a modification of debt which resulted in a gain recognized in the amount of \$20,158 which has been recorded in government assistance on the consolidated statements of operations and comprehensive loss.

Accretion expense on the CEBA Loan during the three and nine months ended October 31, 2022 amounted to \$5,098 and \$14,696, respectively, (October 31, 2021 – \$5,104 and \$14,713, respectively). As at October 31, 2022, the fair value of the CEBA Loan amounted to \$173,629 (January 31, 2022 - \$158,933).

Government Grants

The Canada Emergency Wage Subsidy ("CEWS") government program provides a wage subsidy of up to 75% for qualifying businesses. The purpose of the wage subsidy is to allow employers to re-hire workers that were previously laid off and to continue to employ those who are already on payroll. During the three and nine months ended October 31, 2022, the Company has received \$nil (October 31, 2021 – \$nil and \$111,016, respectively) as a wage subsidy under the CEWS. This has been recognized in the condensed interim consolidated statements of operations and comprehensive loss as a reduction to the related expenses.

Off Balance Sheet Arrangements

As at October 31, 2022, the Company had no material off balance sheet arrangements such as guaranteed contracts, contingent interests in assets transferred to an entity, derivative instrument obligations or any instruments that could trigger financing, market or credit risk to the Company.

Significant Accounting Policies

The condensed interim consolidated financial statements have been prepared on the historical cost basis except for certain financial instruments which are measured at fair value. In addition, the condensed interim consolidated financial statements have been prepared using the accrual basis of accounting, except for certain cash flow information. The functional currency of the Company and its subsidiaries is the Canadian dollar, which is also the Company's presentation currency.

New Accounting Pronouncements

Amendments to IAS 1: Classification of Liabilities as Current or Non-current

The amendment clarifies the requirements relating to determining if a liability should be presented as current or non-current in the statement of financial position. Under the new requirement, the assessment of whether a liability is presented as current or non-current is based on the contractual arrangements in place as at the reporting date and does not impact the amount or timing of recognition. The amendment applies retrospectively for annual reporting periods beginning on or after January 1, 2023. The Company is currently evaluating the potential impact of these amendments on the Company's consolidated financial statements.

Amendments to IAS 37: Onerous Contracts and the Cost of Fulfilling a Contract

The amendment specifies that the 'cost of fulfilling' a contract comprises the 'costs that relate directly to the contract'. Costs that relate directly to a contract can either be incremental costs of fulfilling that contract or an allocation of other costs that relate directly to fulfilling contracts. The amendment is effective for annual periods beginning on or after January 1, 2022 with early application permitted. The Company is currently evaluating the potential impact of these amendments on the Company's consolidated financial statements.

Amendments to IFRS 9: Financial Instruments

As part of its 2018-2020 annual improvements to IFRS standards process, the IASB issued amendments to IFRS 9. The amendment clarifies the fees that an entity includes when assessing whether the terms of a new or modified financial liability are substantially different from the terms of the original financial liability. These fees include only those paid or received between the borrower and the lender, including fees paid or received by either the borrower or lender on the other's behalf. An entity applies the amendment to financial liabilities that are modified or exchanged on or after the beginning of the annual reporting period in which the entity first applies the amendment. The amendment is effective for annual reporting periods beginning on or after January 1, 2022 with earlier adoption permitted. The Company is currently evaluating the potential impact of these amendments on the Company's consolidated financial statements.

Basis of consolidation

Subsidiaries are entities controlled by the Company. Control exists when the Company has the power, directly and indirectly, to govern the financial and operating policies of an entity and be exposed to the variable returns from its activities. The financial statements of the Company's subsidiaries are included in the condensed interim consolidated financial statements from the date that control commences until the date that control ceases. These condensed interim consolidated financial statements include the accounts of the Company and its wholly-owned subsidiaries: 2360149 Ontario Inc. and its wholly-owned subsidiaries: 420 Wellness Inc. and 180 Smoke LLC; 2766563 Ontario Inc.; 2488004 Ontario Inc.; 180 VFC Inc.; and Spyder Cannabis Subco Inc. and its wholly-owned subsidiaries: Spyder Vapes Inc., Spyder Vapes (East) Inc., Spyder Vapes (Appleby) Inc., and The Green Spyder Inc. and its wholly-owned subsidiaries: The Green Spyder (Pickering) Inc., The Green Spyder (Lundy's) Inc. and The Green Spyder IP Inc. All inter-company transactions, balances and unrealized gains and losses on transactions between these subsidiaries are eliminated upon consolidation.

Significant accounting judgements and estimates

In the application of the Company's accounting policies, management is required to make judgements, estimates and assumptions that affect the carrying amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the consolidated financial statements, and the reported amounts of revenues and expenses for the years presented. The estimates and associated assumptions are based on historical experience and other factors that are considered to be relevant, the results of which form the basis of the valuation of assets and liabilities that are not readily apparent from other sources. Actual results may differ from these estimates.

The estimates and underlying assumptions are reviewed on an ongoing basis. Revisions to accounting estimates are recognized in the year in which the estimate is revised if the revision affects only that year or in the year of the revision and future years if the revision affects both current and future years.

The following are the critical judgements in applying accounting policies and key sources of estimation uncertainty at the end of the reporting year that have a risk of causing a material adjustment to the carrying amounts of assets and liabilities within the next financial year.

Estimates and judgements

Critical accounting estimates are those that require management to make assumptions about matters that are highly uncertain at the time the estimate or assumption is made. Judgements are used in situations when there is a choice and/or assessment required by management. Critical accounting estimates are also those that could potentially have a material impact on the Company's consolidated financial results where a different estimate or assumption is used. The significant areas of estimation uncertainty and use of judgements are as follows:

Inventory valuation

Inventory is carried at the lower of cost and net realizable value; in estimating net realizable value, the Company makes estimates related to obsolescence, future selling prices, seasonality, customer behavior, and fluctuations in inventory levels. The Company records a write-down to reflect management's best estimate of the net realizable value of inventory based on the above noted factors.

Share-based compensation

Estimating fair value for granted stock options and warrants requires determining the most appropriate valuation model which is dependent on the terms and conditions of the grant. This estimate also requires determining the most appropriate inputs to the valuation model including the expected life of the option or warrant, volatility, dividend yield, and rate of forfeitures and assumptions of these inputs.

Carrying values of tangible assets

The Company assesses the carrying value of its tangible assets annually or more frequently if indicators of impairment exist. If it is determined that carrying values of assets cannot be recovered, the unrecoverable amounts are charged against current net income (loss). Recoverability is dependent upon assumptions and judgements regarding market conditions, costs of operations and sustaining capital requirements. Other assumptions used in the calculation of recoverable amounts are discount rates and future cash flows. A material change in assumptions may significantly impact the potential impairment of these assets.

Contingencies

Management uses judgement to assess the existence of contingencies. By their nature, contingencies will only be resolved when one or more future events occur or fail to occur. Management exercises significant judgement to assess the likelihood of the occurrence of one or more future events.

Income taxes

The calculations for current and deferred taxes require management's interpretation of tax regulations and legislation in the various tax jurisdictions in which the Company operates in, which are subject to change. The measurement of deferred tax assets and liabilities requires estimates of the timing of the reversal of temporary differences identified and management's assessment of the Company's ability to utilize the underlying future tax deductions against future taxable income before they expire, which involves estimating future taxable income.

The Company is subject to assessments by various taxation authorities in the tax jurisdictions in which it operates and these taxation authorities may interpret the tax legislation and regulations differently. In addition, the calculation of income taxes involves many complex factors. As such, income taxes are subject to measurement uncertainty and actual amounts of taxes may vary from the estimates made by management.

Leases

The Company estimates a lease term by considering the facts and circumstances that can create an economic incentive to exercise an extension option, or not exercise a termination option by assessing relevant factors such as profitability. Extension options (or periods after termination options) are only included in the lease term if the lease is reasonably certain to be extended (or not terminated). The assessment of a lease term is reviewed if a significant event or a significant change in circumstance occurs, which affects this assessment and that is within the control of the lessee. The Company estimates the incremental borrowing rate used to measure the lease liability for each lease contract. This includes estimation in determining the asset-specific security impact.

Deferred tax assets and liabilities

The estimation of income taxes includes evaluating the recoverability of deferred tax assets and liabilities based on an assessment of the Company's ability to utilize the underlying future tax deductions against future taxable income prior to expiry of those deductions. Management assesses whether it is probable that some or all of the deferred income tax assets and liabilities will not be realized. The ultimate realization of deferred tax assets and liabilities is dependent upon the generation of future taxable income, which in turn is dependent upon the successful execution of the Company's business plan. To the extent that management's assessment of the Company's ability to utilize future tax deductions changes, the Company would be required to recognize more or fewer deferred tax assets or liabilities, and deferred income tax provisions or recoveries could be affected.

Carrying values of goodwill and other intangible assets

The values associated with goodwill and other intangible assets involve significant estimates and assumptions, including those with respect to the determination of cash generating units ("CGUs"), future cash inflows and outflows, discount rates and useful asset lives. At least annually, the carrying amount of goodwill and other intangible assets are reviewed for potential impairment. Among other things, this review considers the recoverable amounts of the CGUs based on the higher of value in use or fair value less costs of disposal using discounted estimated future cash flows. These significant estimates require considerable judgement which could affect the Company's future results if the current estimates of future performance and fair value change.

Purchase price allocation

The purchase price allocation for business combinations and asset acquisitions is based on the fair value of the assets acquired, liabilities assumed, and intangible assets identified, including managements' process for developing the estimates and the significant assumptions underlying the estimates.

Assessment of revenues

Management assesses which contracts occur at a point in time, over a period of time, and based on usage and royalties. Judgement is required on revenues recorded over a period of time. Royalty, service fee, and license fee revenues from franchisees of the Company are recognized over a period of time as they are earned in accordance with the substance of the relevant agreement.

Cash

Cash includes cash on hand, balances held in trust by counsel, cash deposits in financial institutions and other short-term deposits that are readily convertible into cash. Short-term deposits with maturity dates greater than 90 days are classified as short-term investments.

Inventory

Inventory is valued at the lower of cost and net realizable value. Cost is determined using the weighted average cost method. Net realizable value is determined as the estimated selling price in the ordinary course of business less the estimated costs of completion and the estimated costs necessary to make the sale. Costs are comprised of all variable costs, and certain fixed costs, incurred in bringing inventory to the location and in a condition necessary for sale to customers. Storage and administrative overhead are expensed as incurred. Supplier rebates and discounts are recorded as a reduction in the cost of goods sold.

Business Combinations

Acquisitions have been accounted for using the acquisition method required by *IFRS 3 - Business Combinations*. Goodwill arising from acquisitions is measured as the fair value of the consideration transferred less the net recognized amount of the estimated fair value of identifiable assets acquired and liabilities assumed (subject to certain exemptions to fair value measurement principles such as deferred tax assets or liabilities), all measured as of the acquisition date. Transaction costs that are incurred by the Company in connection with a business combination are expensed as incurred (except for costs directly related to the issuance of shares which are recognized in equity). The Company uses its best estimates and assumptions to accurately value assets and liabilities assumed at the acquisition date as well as contingent consideration, where applicable, and these estimates are inherently uncertain and subject to refinement. As a result, during the measurement period, which does not exceed more than one year from the acquisition date, the Company records adjustments to the assets acquired and liabilities assumed with a corresponding offset to goodwill. On conclusion of the measurement period or final determination of the values of assets acquired or liabilities assumed, whichever comes first, any subsequent adjustments are recorded in the consolidated statements of operations and comprehensive loss.

Goodwill

Goodwill is initially measured at cost and is calculated as the excess of the purchase price for an acquired business over the fair value of acquired net identifiable assets and liabilities and is allocated to the cash generating units (“CGU”) to which it relates. Goodwill is not amortized but is evaluated for impairment against the carrying amount of the CGU annually or more often if events or circumstances indicate that there may be an impairment. The carrying amount of a CGU includes the carrying amount of assets, liabilities and goodwill allocated to the CGU. If the recoverable amount is less than the carrying value, the impairment loss is first allocated to reduce the carrying amount of any goodwill allocated to the CGU and then to the other non-financial assets of the CGU proportionately based on the carrying amount of each asset. Any impairment loss is charged to income in the period in which the impairment is identified. Goodwill is stated at cost less accumulated impairment losses. Subsequent reversals of goodwill impairment are prohibited.

Foreign currency translation

Revenues and expenses denominated in foreign currencies are translated into Canadian dollars using the exchange rate in effect at the transaction date. Monetary assets and liabilities are retranslated at the reporting date using the rate in effect at the consolidated statements of financial position date and non-monetary items are translated at historical exchange rates. Related exchange gains and losses are included in the consolidated statements of operations and comprehensive loss for the period.

Property and equipment

Property and equipment is stated at cost less accumulated depreciation and any accumulated impairment losses. Cost includes expenditures that are directly attributable to the acquisition of the asset. Depreciation is provided using the following methods at rates intended to depreciate the costs of the assets over their estimated use lives:

Asset	Method	Rate
Furniture and equipment	Declining balance	20%
Computer equipment	Declining balance	30%
Leasehold improvements	Straight-line	5 years
Automobile	Declining balance	30%
Website and signs	Straight-line	2 years

When a property and equipment asset has significant components with different useful lives, each significant component is depreciated separately. The estimated useful lives and depreciation methods are reviewed at the end of each reporting period, with the effect of any changes in estimate accounted for on a prospective basis.

An item of property and equipment is derecognized upon disposal or when no future economic benefits are expected to arise from the continued use of the asset. Any gain or loss arising on the disposal or retirement of an item of property and equipment is determined as the difference between the sales proceeds and the carrying amount of the asset and is recognized in consolidated statements of operations and comprehensive loss.

Other subsequent expenditures are capitalized if future economic benefits will arise from the expenditure. All other expenditures, including repairs and maintenance, are recognized in the consolidated statements of operations and comprehensive loss.

Provisions

Provisions are recognized when (a) the Company has a present obligation (legal or constructive) as a result of a past event; and (b) it is probable that an outflow of resources embodying economic benefits will be required to settle the obligation and a reliable estimate can be made of the amount of the obligation. Where the Company expects some or all of a provision to be reimbursed, the reimbursement is recognized as a separate asset but only when the reimbursement is virtually certain. The expense relating to any provision is presented in the consolidated statements of operations and comprehensive loss, net of any reimbursement. If the effect of the time value of money is material, provisions are discounted using a current pre-tax rate that reflects, where appropriate, the risks specific to the liability. Where discounting is used, the increase in the provision due to the passage of time is recognized as a finance cost.

Intangible assets

The useful lives of intangible assets are assessed to be either finite or indefinite.

Intangible assets acquired are measured on initial recognition at cost. The cost of an intangible asset acquired in a business combination is the fair value at the date of acquisition. The useful lives of intangible assets are assessed as either finite or indefinite. Intangible assets with finite lives are amortized over the useful economic life and assessed for impairment whenever there is an indication that the intangible asset may be impaired. The amortization expense on intangible assets with finite lives is recognized in the consolidated statements of operations and comprehensive loss. Intangible assets with indefinite useful lives are not amortized, but are tested for impairment annually or more frequently when circumstances indicate that the carrying value may not be recoverable.

Asset type	Amortization method	Amortization term
Website and ERP	Straight-line	10 years
Trade name	Straight-line	15 years

Estimated useful life of an intangible asset is the lesser of the economic life of the intangible asset and the number of years the right is legally enforceable. The estimated useful life, residual value and amortization method are reviewed at the end of each reporting period, with the effect of any changes in estimate being accounted for on a prospective basis.

Following initial recognition, intangible assets with indefinite useful lives are carried at cost less any accumulated impairment losses.

Leases

At inception of a contract, the Company assesses whether a contract is, or contains, a lease. The Company recognizes a right-of-use asset and a lease liability based on the present value of future lease payments when the leased asset is available for use by the Company. The lease payments include fixed and in-substance fixed payments and variable lease payments that depend on an index or rate, less any lease incentives receivable. The lease liability is initially measured at the present value of the lease payments that are not paid at commencement date, discounted using the interest rate implicit in the lease or, if that rate cannot be readily determined, the Company's incremental borrowing rate. Lease payments are discounted over the lease term, which includes the fixed term and renewal options that the Company is reasonably certain to exercise. Lease payments are allocated between the lease liability and an interest expense, which is recognized in finance costs over the lease term in the Company's consolidated statements of operations and comprehensive loss.

When a contract contains both lease and non-lease components, the Company will allocate the consideration in the contract to each of the components on the basis of the relative stand-alone price of the lease component and the aggregate stand-alone price of the non-lease components. Relative stand-alone prices are determined by maximizing the most observable prices for a similar asset and/or service.

Lease payments for assets that are exempt through the short-term exemption and variable payments not based on an index or rate are recognized in selling, distribution and administrative expenses as incurred. Lease incentives received for variable payment leases are deferred and amortized as a reduction in recognized variable rent expenses over the term of the related leases.

Right-of-use assets are measured at cost, less any accumulated depreciation and any accumulated impairment losses, and adjusted for any re-measurement of lease liabilities. Cost is calculated as the initial measurement of the lease liability plus any initial direct costs and any lease payments made at or before the commencement date. Right-of-use assets are depreciated on a straight-line basis over the shorter of the lease term or the useful life.

In sublease arrangements where the Company is the intermediate lessor, it determines whether the sublease is finance or operating by reference to the right-of-use asset. A sublease is a finance sublease if substantially all of the risks and rewards of the head lease right-of-use asset have been transferred to the sub-lessee and the Company accounts for the sublease as two separate contracts. The Company derecognizes the right-of-use asset corresponding to the head lease and records a net investment in the finance sublease with corresponding interest income recognized in finance income in the consolidated statements of operations and comprehensive loss and a net investment receivable recognized in trade and other receivables or a net investment payable in accounts payable and accrued liabilities in the consolidated statements of financial position.

In May 2020, the IASB published COVID-19-Related Rent Concessions, which amends IFRS 16, *Leases*, to provide lessees with a practical expedient that relieves lessees from assessing whether a COVID-19-related rent concession is a lease modification. COVID-19-Related Rent Concessions qualify for the practical expedient if there was a decrease in lease consideration, reduction of lease payments that affected payments originally due on or before June 30, 2021, and no substantive changes to other terms and conditions of the lease. The amendment became effective for annual reporting periods beginning on or after June 1, 2020. Earlier application is permitted.

The Company applied the practical expedient for the annual period ended January 31, 2022 and has recorded any eligible change in lease payments resulting from COVID-19-Related Rent Concessions in the consolidated statements of operations and comprehensive loss, at the later of the date on which the rent concession arrangement is executed and the period to which the rent concession related to.

Share-based payments

Share-based payments to employees are measured at the fair value of the instruments issued and recognized over the expected service periods. Share-based payments to non-employees are measured at the fair value of the goods or services received or the fair value of the equity instruments issued, if it is determined that the fair value of the goods or services cannot be reliably measured, and are recorded at the date the goods or services are received. Valuation models such as Black-Scholes are used to measure the fair value of the instruments issued when there are sufficient and reliable observable market inputs. The offset to the recorded cost is applied to contributed surplus. Consideration received on the exercise of stock options and the related contributed surplus is recorded as share capital and the related contributed surplus is transferred to share capital.

Government assistance

The Company recognizes government assistance when there is reasonable assurance that the Company has met the requirements of the approved grant program and the Company is reasonably certain, based on management's judgement, that the government grant will be received. Government assistance, including grants, related to operating expenses is accounted for as a reduction to the related expenses. The Company received government assistance in the form of grants as noted in Note 15.

IFRS 15 - Revenue from contracts with customers

Revenue is measured at the fair value of consideration received or receivable, net of sales tax, trade discounts, rebates and other allowances.

The Company records revenue in accordance with the five steps as outlined below:

- Step 1: Identify the contract(s) with a customer;
- Step 2: Identify the performance obligations in the contract;
- Step 3: Determine the transaction price;
- Step 4: Allocate the transaction price to the performance obligations in the contract; and
- Step 5: Recognize revenue when (or as) the Company satisfies a performance obligation.

The Company's revenue consists of sales from its retail stores and e-commerce operations through the delivery of products and/or rendering of services. For retail store customers, control passes upon point of sale, and for e-commerce customers, control passes upon delivery. Revenue from the sale of goods is measured at the fair value of the consideration received less an appropriate deduction for returns, discounts, rebates, and loyalty program costs, net of sales taxes. The Company sells products with a limited right to return. The provision for returns is estimated based on the last 12 month's return rate for retail stores and e-commerce sales, respectively.

Cost of goods sold

Cost of goods sold expense relates to the Company's retail and e-commerce operations, and includes direct materials, direct labor, and shipping and handling related to the sale of goods.

Equity

Common shares are classified as equity. Transaction costs directly attributable to the issuance of common shares and share purchase options are recognized as a deduction from equity, net of any tax effects. When share capital recognized as equity is repurchased, the amount of the consideration paid, including directly attributable costs, is recognized as a deduction from total equity.

The Company has adopted a residual method with respect to the measurement of common shares and warrants issued as private placement units. Warrants attached to units are valued based on the fair value of the warrants using the Black-Scholes option pricing model and the share price at the time of financing, and the difference between the proceeds raised and the value assigned to the warrants is the residual fair value of the shares. The proceeds from the issue of units are allocated between share capital and warrants.

Impairment of non-financial assets

The carrying amount of the Company's non-financial assets are reviewed at each reporting date to determine whether there is any indication of impairment. If any such indication exists, then the asset's recoverable amount is estimated.

The recoverable amount of an asset or cash-generating unit is the greater of its value in use and its fair value less costs to sell. In assessing value in use, the estimated future cash flows are discounted to their present value using a pre-tax discount rate that reflects current market assessments of the time value of money and the risks specific to the asset. For the purposes of impairment testing, assets that cannot be tested individually are grouped together into the smallest group of assets that generate cash inflows from continuing use that are largely independent of the cash flows of other assets or groups of assets (the "cash-generating unit" or "CGU").

An impairment loss is recognized if the carrying amount of an asset or CGU exceeds its estimated recoverable amount. Impairment losses are recognized in profit or loss. Impairment losses recognized in respect of CGUs are allocated to reduce the carrying amount of the assets in the unit (or group of units) on a pro rata basis.

Impairment losses recognized in prior periods are assessed at each reporting date for any indications that the loss has decreased or no longer exists. An impairment loss is reversed if there has been a change in the estimates used to determine the recoverable amount. An impairment loss is reversed only to the extent that the asset's carrying amount does not exceed the carrying amount that would have been determined, net of depreciation and amortization, if no impairment loss had been recognized.

Income taxes

Tax expense is comprised of current and deferred tax. Tax is recognized in the consolidated statements of operations and comprehensive loss except to the extent that it relates to items recognized in comprehensive loss or equity in the consolidated statement of financial position.

Current tax

Current tax is calculated using tax rates which are enacted or substantively enacted at the end of the reporting period. Management periodically evaluates positions taken in tax returns with respect to situations in which applicable tax regulations are subject to interpretation. It establishes provisions where appropriate on the basis of amounts expected to be paid to taxation authorities.

Deferred tax

Deferred tax is recognized, using the liability method, on temporary differences arising between the tax bases of assets and liabilities and their carrying amounts in the consolidated financial statements. Deferred tax is determined using tax rates which are enacted or substantively enacted at the end of the reporting period and are expected to apply when the related deferred tax asset is realized, or the deferred tax liability is settled.

Deferred tax liabilities are generally recognized for all taxable temporary differences, except for temporary differences that arise from goodwill, which is not deductible for tax purposes. Deferred tax liabilities are also recognized for taxable temporary differences arising on investments in subsidiaries except where the reversal of the temporary difference can be controlled, and it is probable that the difference will not reverse in the foreseeable future.

Deferred tax assets are recognized to the extent it is probable that taxable profits will be available against which the deductible balances can be utilized. All deferred tax assets are reviewed at each reporting period and reduced to the extent that it is no longer probable that the asset will be recovered.

Financial instruments

Financial assets

Financial assets are classified as either financial assets at fair value through profit or loss (“FVTPL”), fair value through other comprehensive income (“FVTOCI”) or amortized cost. The Company determines the classification of financial assets at initial recognition.

Financial assets at FVTPL

Financial instruments classified as fair value through profit and loss are reported at fair value at each reporting date, and any change in fair value is recognized in the consolidated statements of operations during the period in which the change occurs. Realized and unrealized gains or losses resulting from assets held at FVTPL are included in the consolidated statements of operations and comprehensive loss in the period in which they relate to.

Financial assets at FVTOCI

Financial assets carried at FVTOCI are initially recorded at fair value plus transaction costs with all subsequent changes in fair value recognized in other comprehensive loss. For investments in equity instruments that are not held for trading, the Company can make an irrevocable election (on an instrument-by-instrument basis) at initial recognition to classify them as FVTOCI. On the disposal of the investment, the cumulative change in fair value remains in other comprehensive loss and is not recycled to the consolidated statements of operations.

Financial assets at amortized cost

Financial assets are classified at amortized cost if the objective of the business model is to hold the financial asset for the collection of contractual cash flows, and the asset’s contractual cash flows are comprised solely of payments of principal and interest. The Company’s accounts receivable are recorded at amortized cost. A provision is recorded based on the expected credit losses for the financial asset and reflects changes in the expected credit losses at the end of each reporting period.

Financial liabilities

Financial liabilities are initially recorded at fair value and subsequently measured at amortized cost, unless they are required to be measured at FVTPL (such as derivatives) or the Company has elected to measure at FVTPL.

Financial instruments

The Company has made the following classifications:

Financial instrument	Classification
Cash	FVTPL
Government loan	FVTPL
Trade and other payables	Other financial liabilities
Loans payable	Other financial liabilities
Promissory note	Other financial liabilities

Impairment

IFRS 9 requires an 'expected credit loss' model to be applied which requires a loss allowance to be recognized based on expected credit losses. This applies to financial assets measured at amortized cost. The expected credit loss model requires an entity to account for expected credit losses and changes in those expected credit losses at each reporting date to reflect changes in initial recognition.

The Company's cash and guaranteed investment certificate is valued at Level 1. Other than that, none of the Company's financial instruments are recorded at fair value on the consolidated statements of financial position.

Loss per common share

Basic loss per common share is computed by dividing the loss for the year by the weighted average number of common shares outstanding during the year, including contingently issuable shares which are included when the conditions necessary for issuance have been met. Diluted loss per share is calculated in a similar manner, except that the weighted average number of common shares outstanding is increased to include potentially issuable common shares from the assumed exercise of common share purchase options and warrants, if dilutive. The number of additional shares included in the calculation is based on the treasury stock method for options and warrants.

Financial Instruments and Other Risk Factors

The Company's financial instruments consist of cash and cash equivalents, trade and other payables and loans payable.

The Company's cash and cash equivalents is measured at fair value under the fair value hierarchy based on level one quoted prices in active markets for identical assets or liabilities. The presentation of the Company's due from related party and accounts payable is fair value, taking into account their short-term nature. The fair value of loan payable approximates fair value. The fair value of convertible debentures are measured on the statement of financial position using level 3 of the fair value hierarchy.

The Company's financial instruments are exposed to certain financial risks, including currency risk, credit risk, liquidity risk, interest rate risk, price risk and foreign currency risk.

Financial risk management and objectives

Fair value

Financial instruments of the Company consist of cash, trade and other payables, advances to/from shareholders', convertible debentures and loans payable. There are no significant differences between the carrying amounts of the current assets and current liabilities reported on the statements of financial position and their estimated fair values due to the short-term nature of these items. The convertible debentures and loans payable approximate their fair value as terms and conditions represent market terms and conditions.

The Company has determined the estimated fair values of its financial instruments based on appropriate valuation methodologies. Where quoted market values are not readily available, the Company may use considerable judgement to develop estimates of fair value. Accordingly, any estimated values are not necessarily indicative of the amounts the Company could realize in a current market exchange and could be materially affected by the use of different assumptions or methodologies.

The Company's risk exposures and their impact on the Company's financial instruments are summarized below:

Market risk

Market risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in market prices. Market prices comprise four types of risk: interest rate risk, foreign exchange risk, commodity price risk and other price risk, such as equity risk. Financial instruments affected by market risk include loans and borrowings and deposits.

Credit risk

The Company is exposed to credit risk on its cash balance which is held with reputable financial institutions. As at October 31, 2022, management considered the Company's credit risk in relation to such financial assets to be low.

Interest rate risk

Interest rate risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate due to changes in market interest rates. The Company is exposed to interest rate risk arising from fluctuations in interest rates on its loans payable balance which accrues interest at a variable rate. Fluctuations in market rates do not have a significant impact on the Company's results of operations.

Liquidity risk

Liquidity risk is the risk that the Company will not be able to meet its financial obligations as they fall due within one year. The Company's approach to managing liquidity risk is to ensure, as far as possible, that it will have sufficient liquidity to meet its liabilities when due, under both normal and stressed conditions, without incurring unacceptable losses or risking damage to the Company's reputation.

As at October 31, 2022 there is substantial doubt about the Company's ability to continue as a going concern primarily due to its history of losses and negative working capital. Liquidity risk continues to be a key concern in the development of future operations.

Risks and Uncertainties

The Company is subject to a number of risks and uncertainties due to the nature of its business and the present stage of development. Current and potential investors should give special consideration to the risk factors involved.

Additional Financing

The continued development of the Company will require additional financing. There is no guarantee that the Company will be able to achieve its business objectives. The Company intends to fund its future business activities by way of additional offerings of equity and/or debt financing as well as through anticipated positive cash flow from operations in the future. The failure to raise or procure such additional funds or the failure to achieve positive cash flow could result in the delay or indefinite postponement of current business objectives. There can be no assurance that additional capital or other types of financing will be available if needed or that, if available, will be on terms acceptable to the Company. If additional funds are raised by offering equity securities, existing shareholders could suffer significant dilution. Any debt financing secured in the future could involve the granting of security against assets of the Company and also contain restrictive covenants relating to capital raising activities and other financial and operational matters, which may make it more difficult for the Company to obtain additional capital and to pursue business opportunities, including potential acquisitions. The Company will require additional financing to fund its operations until positive cash flow is achieved.

Investments may be pre-revenue

The Company has made and may make future investments in entities that have no significant sources of operating cash flow and no revenue from operations. As such, the Company's investments are subject to risks and uncertainties including the risk that the Company's investments will not be able to:

- implement or execute their current business plan, or create a business plan that is sound;
- maintain their anticipated management team; and/or
- raise sufficient funds in the capital markets or otherwise to effectuate their business plan.

If the Company's investments cannot execute any one of the foregoing, their businesses may fail, which could have a materially adverse impact on the business, financial condition and operating results of the Company.

Intellectual property and proprietary protection

The success of the Company will depend, in part, on the ability of the Company and the Company's investments to maintain, enhance and protect its intellectual property, including various existing and potential proprietary discoveries, techniques and processes. The Company and the Company's investments may be vulnerable to competitors who develop competing technology. Furthermore, the protection of the Company's intellectual property may be a costly litigation process.

Reliance on management

The success of the Company is dependent upon the ability, expertise, judgement, discretion and good faith of its senior management. Qualified individuals are in high demand, and the Company may incur significant costs to attract and retain them. The loss of the services of such individuals or an inability to attract other suitably qualified persons when needed, could have a material adverse effect on the Company's ability to execute on its business plan and strategy, and the Company may be unable to find adequate replacements on a timely basis, or at all.
