1. CORPORATE INFORMATION

The Company was incorporated as a numbered company under the laws of the Province of British Columbia on January 12, 2014. Pursuant to a plan of arrangement (the "Arrangement") dated January 14, 2014, between the Company and Vinergy Resources Ltd. ("Vinergy"), the Company acquired from Vinergy a business interest and \$5,000 in cash as part of the Arrangement.

As consideration for the business interest and the cash, the Company issued to Vinergy 2,633,334 common shares in its capital, which shares were distributed by Vinergy to its shareholders. Vinergy completed the share distribution on June 18, 2014.

With the completion of the share distribution, on June 18, 2014, the Company became a reporting issuer in British Columbia, Alberta and Ontario and changed its name on August 1, 2014, to SPT Sulphur Polymer Technologies Inc. On December 17, 2014, the Company was listed and began trading on the Canadian Securities Exchange ("CSE") under the symbol "SEE". On January 15, 2018 the Company changed its name to LeanLife Health Inc.

The head office and registered and records office for the Company is located at Suite 380 – 680 Hornby Street, Vancouver, British Columbia, V6C 3B6.

2. BASIS OF PREPARATION

(a) Statement of Compliance

This condensed interim financial information for the six months ended September 30, 2018 have been prepared in accordance with IAS 34 "Interim financial reporting". The condensed interim financial information should be read in conjunction with the annual financial statements for the year ended March 31, 2018, which have been prepared in accordance with International Financial Reporting Standards ("IFRS").

These financial statements were reviewed by the Audit Committee and approved and authorized for issue by the Board of Directors on November 29, 2018.

3. GOING CONCERN ISSUES

The Company incurred a loss of \$986,027 for the six months ended September 30, 2018 (2017: \$697,328), and has an accumulated deficit of \$8,271,857 and working capital deficiency of \$737,289 at September 30, 2018 (March 31, 2018: deficit of \$7,285,830 and working capital defiency of \$67,169). These factors indicate the existence of a material uncertainty that may cast significant doubt about the Company's ability to continue as a going concern.

The Company's ability to continue its operations and to realize assets at their carrying values is dependent upon its ability to fund its existing acquisition and exploration commitments on its exploration and evaluation assets when they come due, which would cease to exist if the Company decides to terminate its commitments, and to cover its operating costs. The Company may be able to generate working capital to fund its operations by the sale of its exploration and evaluation assets or raising additional capital through equity markets. However, there is no assurance it will be able to raise funds in the future. These financial statements do not give effect to any adjustments required to realize it assets and discharge its liabilities in other than the normal course of business and at amounts different from those reflected in the accompanying financial statements.

4. CRITICAL ACCOUNTING ESTIMATES AND JUDGMENTS

The Company makes estimates and assumptions about the future that affect the reported amounts of assets and liabilities. Estimates and judgments are continually evaluated based on historical experience and other factors, including expectations of future events that are believed to be reasonable under the circumstances. In the future, actual experience may differ from these estimates and assumptions.

5. SEGMENTED INFORMATION

A reportable segment, as defined by 'IFRS 8 Operating Segments', is a distinguishable business or geographical component of the Company, which are subject to risks and rewards that are different from those of other segments. The Company considers its primary reporting format to be business segments. As at June 30, 2018, the Company considers that it has one reportable business segment.

11. CAPITAL DISCLOSURES

The Company's objectives when managing capital is to safeguard its ability to continue as a going concern, so that it can provide returns for shareholders and benefits for other stakeholders. The Company considers the items included in shareholders' equity and cash as capital. The Company manages the capital structure and makes adjustments to it in response to changes in economic conditions and the risk characteristics of the underlying assets. The Company's primary objective with respect to its capital management is to ensure that it has sufficient cash resources to fund the development of the real estate development Business. To secure the additional capital necessary to pursue these plans, the Company intends to raise additional funds through the equity or debt financing. The Company is not subject to any capital requirements imposed by a regulator.

12. FINANCIAL INSTRUMENTS AND RISKS

The company is exposed through its operations to the following financial risks:

- · Liquidity risk
- Market risk
- Foreign exchange risk
- Credit risk

In common with all other businesses, the Company is exposed to risks that arise from its use of financial instruments. This note describes the Company's objectives, policies and processes for managing those risks and the methods used to measure them. Further quantitative information in respect of these risks is presented throughout these financial statements.

There have been no substantive changes in the Company's exposure to financial instrument risks, its objectives, polices and processes for managing those risks or the methods used to measure them from previous years unless otherwise stated in the note.

Liquidity Risk

Liquidity risk is the risk that the Company will not be able to meet its financial obligations as they fall due. The Company manages liquidity risk through the management of its capital structure and financial leverage.

As at September 30, 2018, the Company had a cash balance of \$27,590 and GST receivable of \$14,625 to settle current trade liabilities of \$544,160. The Company will require financing from lenders, shareholders or other investors to generate sufficient capital to meet its short term business requirements.

12. FINANCIAL INSTRUMENTS AND RISKS (continued)

Market Risk

Market risk is the risk of loss that may arise from changes in market factors such as interest rates, investment fluctuations, and commodity and equity prices. Market conditions will cause fluctuations in the fair values of financial assets classified as held-for-trading and available-for-sale and cause fluctuations in the fair value of future cash flows for assets or liabilities classified as held-to-maturity, available-for-sale, loans and receivables and other financial liabilities. The Company is not exposed to significant interest rate risk as the Company's has no interest bearing debt. The Company's ability to raise capital to fund operations to manufacture and sell its products is subject to risks associated with fluctuations in prices. Management closely monitors commodity prices, individual equity movements, and the stock market to determine the appropriate course of action to be taken by the Company.

Foreign currency risk

Foreign currency risk is the risk that a variation in exchange rates between the Canadian dollar and US dollar or other foreign currencies will affect the Company's operations and financial results. The Company does not have significant exposure to foreign currency rate fluctuations.

(c) Price risk

The Company is exposed to price risk with respect to commodity and equity prices. Equity price risk is defined as the potential adverse impact on the Company's earnings due to movements in individual equity prices or general movements in the level of the stock market. Commodity price risk is defined as the potential adverse impact on earnings and economic value due to commodity price movements and volatilities. The Company closely monitors commodity prices of flax seed oil, individual equity movements, and the stock market to determine the appropriate course of action to be taken by the Company.

Credit Risk

Financial instruments that potentially expose the Company to credit risk are cash and cash equivalents. To minimize the credit risk on cash the Company places the instrument with a high credit quality financial institution. The maximum exposure to loss arising from these advances is equal to their total carrying amounts.

Fair Values

The Company's financial instruments include cash and cash equivalents, amounts receivable and accounts payable and accrued liabilities. The carrying amounts of these financial instruments are a reasonable estimate of their fair values because of their current nature. It is impractical to determine the fair value of these financial instruments with sufficient reliability due to the nature of these financial instruments, the absence of secondary market and the significant cost of obtaining external appraisals. The fair value of these financial instruments approximates their carrying value under the effective interest method.

Fair Value Hierarchy

The Company classifies its fair value measurements in accordance with the three level fair value hierarchy as follows:

- Level 1 fair value measurements are those derived from quoted prices (unadjusted) in active markets for identical assets or liabilities; and
- Level 2 fair value measurements are those derived from inputs other than quoted prices included within Level 1 that are observable for the asset or liability, either directly (i.e. as prices) or indirectly (i.e. derived from prices); and
- Level 3 fair value measurements are those derived from valuation techniques that include inputs for the asset or liability that are not based on observable market data (unobservable inputs).

The following table sets forth the Company's financial assets measured at fair value by level within the fair value hierarchy as follows:

At September 30, 2018	Level 1		Level 2 Level 3				Total		
Cash and cash equivalents	\$	27,590	\$	- \$	-	\$	27,590
