NEWS RELEASE

Leading Certification Company Confirms Quality of LeanLife Product

VANCOUVER, British Columbia, June 4, 2019: [LeanLife Health Inc.](#) (CSE: LLP) (the “Company”) a Company focused on proprietary plant-based food products is pleased to announce that SGS has independently validated the purity of LeanLife’s product.

LeanLife recently sent samples to [SGS](#), the world's leading inspection, verification, testing and certification company, for independent confirmation of the product's quality and specifications. The results from this accredited lab confirm that LeanLife is able to produce a product, using a fully scalable and environmentally friendly process, so incredibly high in purity and quality that it sets a new near-impassable standard in the market.

The results also confirm that the LeanLife product is compliant with global standards in health and food safety.

The results from this testing provided the data required for Product Specification and Quality Certificate documentation which are an essential component in the marketing and customer evaluation process. The completed documentation and samples are now being distributed by LeanLife’s salesforce to some of Europe’s largest food producers.

“The SGS results confirm that the LeanLife product is as pure as you can get, making it appealing to food producers and creating a barrier to entry by any potential competitor. The data also confirms that LeanLife can produce the product using a fully-scalable proprietary process capable of meeting market demand while maintaining extraordinary quality. With this independent validation complete and documented samples being distributed to food producers, LeanLife is now in a position to secure customer orders,” said Stan Lis, CEO.

About LeanLife Health and the Omega-3 Market

LeanLife Health’s products are shelf-stable extractions from flaxseed, a plentiful plant-based source of Omega-3, that give them a significant advantage as a fortified food ingredient.

The products can be used as food additives or as nutraceuticals and have been used to make bread, noodles, cheese, yogurt, juice and milk products for the European market.

LeanLife Health’s industry leading and proprietary Omega-3 product formulations are of the highest quality, contain no cholesterol and are made from Canadian-grown flaxseed. Products are available in oil, emulsion and powder forms.

The global Omega-3 market reached USD \$33 Billion in 2016 and is expected to reach upwards of USD \$57 Billion by 2025, according to a report by Grand View Research, Inc.
