### About Fundamental

Fundamental Applications Corp. was founded in 2014 to launch innovative mobile applications targeted at millennials. Millennials are described as a demographic born between 1980 and 2000 into a digital world with significant discretionary income. Fundamental intends to launch their first application, Serum™, in the fall of 2014. Serum™ is an innovative and unique mobile chat application which enables users to post questions and have text conversations with a group of their friends anonymously; nobody involved in the conversation is aware of who in the group is responding. Serum™ also provides control to the users over conversations they initiate, such as adding or removing participants. Serum™ goes beyond existing applications such as Whisper and Secret, which only allow for one-way conversations, by creating an interactive way of sharing. Serum™ also goes above and beyond in terms of implementing protocols for anti-bullying. Fundamental intends to launch additional apps targeting privacy, anonymity and chat once it has built a large Serum™ user base.

Further information about the Fundamental is available under its profile on the SEDAR website [www.sedar.com](http://www.sedar.com) and on the CSE website [www.thecse.ca](http://www.thecse.ca).
