MONTEGO RESOURCES INC.
NOTES TO THE CONDENSED INTERIM FINANCIAL STATEMENTS
FOR THE THREE MONTH PERIOD ENDED SEPTEMBER 30, 2014 AND 2013
(Expressed in Canadian dollars)

1. NATURE OF OPERATIONS

Montego Resources Inc. ("the Company") was incorporated on July 20, 2012 under the laws of British Columbia. The address of the Company's corporate office and its principal place of business is 200-551 Howe Street, Vancouver, British Columbia, Canada.

The Company's principal business activities include the acquisition and exploration of mineral property assets. As at September 30, 2014, the Company had not yet determined whether the Company's mineral property asset contains ore reserves that are economically recoverable. The recoverability of amounts shown for exploration and evaluation assets is dependent upon the discovery of economically recoverable reserves, confirmation of the Company's interest in the underlying mineral claims, the ability of the Company to obtain the necessary financing to complete the development of and the future profitable production from the properties or realizing proceeds from their disposition. The outcome of these matters cannot be predicted at this time and the uncertainties cast significant doubt upon the Company's ability to continue as a going concern.

The Company had a deficit of \$484,139 as at September 30, 2014, which has been funded by the issuance of equity. The Company's ability to continue its operations and to realize its assets at their carrying values is dependent upon obtaining additional financing and generating revenues sufficient to cover its operating costs.

These financial statements do not give affect to any adjustments which would be necessary should the company be unable to continue as a going concern and therefore be required to realize its assets and discharge its liabilities in other than the normal course of business and at amounts different from those reflected in these financial statements.

2. SIGNIFICANT ACCOUNTING POLICIES

a) Statement of compliance

The financial statements are prepared in accordance with IAS 34 Interim Financial Reporting ("IAS34") using accounting policies consistent with the International Financial Reporting Standards ("IFRS") issued by the International Accounting Standards Board ("IASB") and Interpretations of the International Financial Reporting Interpretations Committee ("IFRIC"). They do not include all financial information required for full annual financial statements and should be read in conjunction with the Audited Financial Statements of the Company for the year ended June 30, 2014.

The financial statements are prepared in accordance with accounting policies consistent with the International Financial Reporting Standards ("IFRS") issued by the International Accounting Standards Board ("IASB") and Interpretation of the International Financial Reporting Interpretation Committee ("IFRIC").

The financial statements were authorized for issue by the Board of Directors on December 09, 2014.

b) Basis of presentation

The financial statements have been prepared on the historical cost basis, with the exception of financial instruments which are measured at fair value, as explained in the accounting policies set out below. In addition, these financial statements have been prepared using the accrual basis of accounting, except for cash flow information.

The accounting policies set out below have been applied consistently to all periods presented in these financial statements.

MONTEGO RESOURCES INC.
NOTES TO THE CONDENSED INTERIM FINANCIAL STATEMENTS
FOR THE THREE MONTH PERIOD ENDED SEPTEMBER 30, 2014 AND 2013
(Expressed in Canadian dollars)

2. SIGNIFICANT ACCOUNTING POLICIES (continued)

c) Cash and cash equivalents

Cash in the statements of financial position is comprised of cash in banks and on hand, and short term deposits with an original maturity of three months or less, which are readily convertible into a known amount of cash.

d) Exploration and evaluation assets

All costs related to the acquisition, exploration and development of mineral properties are capitalized. Upon commencement of commercial production, the related accumulated costs are amortized against projected income using the units-of-production method over estimated recoverable reserves.

Management annually assesses carrying values of non-producing properties and properties for which events and circumstances may indicate possible impairment. Impairment of a property is generally considered to have occurred if the property has been abandoned, there are unfavourable changes in the property economics, there are restrictions on development, or when there has been an undue delay in development, which exceeds three years. In the event that estimated discounted cash flows expected from its use or eventual disposition is determined by management to be insufficient to recover the carrying value of the property, the carrying value is written-down to the estimated recoverable amount.

The recoverability of mineral properties and exploration and development costs is dependent on the existence of economically recoverable reserves, the ability to obtain the necessary financing to complete the development of the reserves, and the profitability of future operations. The Company has not yet determined whether or not any of its future mineral properties contain economically recoverable reserves. Amounts capitalized to mineral properties as exploration and development costs do not necessarily reflect present or future values.

When options are granted on mineral properties or properties are sold, proceeds are credited to the cost of the property. If no future capital expenditure is required and proceeds exceed costs, the excess proceeds are reported as a gain.

d) Share-based compensation

Share-based payments to employees and others providing similar services are measured at the estimated fair value of the instruments issued on the grant date and amortized over the vesting periods. Share-based payments to non-employees are measured at the fair value of the goods or services received or the fair value of the equity instruments issued if it is determined the fair value of the goods or services cannot be reliably measured, and are recorded at the date the goods or services are received. The amount recognized as an expense is adjusted to reflect the number of awards expected to vest. The offset to the recorded cost is to equity settled share-based payments reserve.

Consideration received on the exercise of stock options is recorded as share capital and the related equity settled share-based payments reserve is transferred to share capital. Charges for options that are forfeited before vesting are reversed from equity settled share-based payment reserve.

Share-based compensation expense relating to deferred share units is accrued over the vesting period of the units based on the quoted market price. As these awards can be settled in cash, the expense and liability are adjusted each reporting period for changes in the underlying share price.

MONTEGO RESOURCES INC.
NOTES TO THE CONDENSED INTERIM FINANCIAL STATEMENTS
FOR THE THREE MONTH PERIOD ENDED SEPTEMBER 30, 2014 AND 2013
(Expressed in Canadian dollars)

2. SIGNIFICANT ACCOUNTING POLICIES (continued)

e) Flow-through shares

The resource expenditure deductions for income tax purposes related to exploration and development activities funded by flow-through share arrangements are renounced to investors in accordance with Canadian tax legislation. On issuance, the premium recorded on the flow-through share, being the difference in price over a common share with no tax attributes, is recognized as a liability. As expenditures are incurred, the liability associated with the renounced tax deductions is recognized through profit and loss with a pro-rata portion of the deferred premium.

To the extent that the Company has deferred tax assets in the form of tax loss carry-forwards and other unused tax credits as at the reporting date, the Company may use them to reduce its deferred tax liability relating to tax benefits transferred through flow-through shares.

f) Foreign currency

Transactions and balances in currencies other than the Canadian dollar, the currency of the primary economic environment in which the Company operates ("the functional currency"), are translated into the functional currency using the exchange rates prevailing at the dates of the transactions. Foreign exchange gains and losses resulting from the settlement of such transactions and from the translation of monetary assets and liabilities denominated in foreign currencies at exchange prevailing on the statement of financial position date are recognized in the statement of comprehensive loss.

g) Decommissioning, restoration and similar liabilities

An obligation to incur restoration, rehabilitation and environmental costs arises when environmental disturbance is caused by the exploration or development of a mineral property interest. Such costs arising from the decommissioning of plant and other site preparation work, discounted to their net present value, are provided for and capitalized at the start of each project to the carrying amount of the asset, along with a corresponding liability as soon as the obligation to incur such costs arises. The timing of the actual rehabilitation expenditure is dependent on a number of factors such as the life and nature of the asset, the operating license conditions and, when applicable, the environment in which the mine operates.

Discount rates using a pre-tax rate that reflects the time value of money are used to calculate the net present value. These costs are charged against profit or loss over the economic life of the related asset, through amortization using either the units-of-production or the straight-line method. The corresponding liability is progressively increased as the effect of discounting unwinds creating an expense recognized in profit or loss

Decommissioning costs are also adjusted for changes in estimates. Those adjustments are accounted for as a change in the corresponding capitalized cost, except where a reduction in costs is greater than the unamortized capitalized cost of the related assets, in which case the capitalized cost is reduced to nil and the remaining adjustment is recognized in profit or loss.

The operations of the Company have been, and may in the future be, affected from time to time in varying degree by changes in environmental regulations, including those for site restoration costs. Both the likelihood of new regulations and their overall effect upon the Company are not predictable.

The Company has no material restoration, rehabilitation and environmental obligations as the disturbance to date is immaterial.

MONTEGO RESOURCES INC.
NOTES TO THE CONDENSED INTERIM FINANCIAL STATEMENTS
FOR THE THREE MONTH PERIOD ENDED SEPTEMBER 30, 2014 AND 2013
(Expressed in Canadian dollars)

2. SIGNIFICANT ACCOUNTING POLICIES (continued)

h) Loss per share

The Company presents basic and diluted loss per share data for its common shares, calculated by dividing the loss attributable to common shareholders of the Company by the weighted average number of common shares outstanding during the period. Diluted loss per share does not adjust the loss attributable to common shareholders or the weighted average number of common shares outstanding when the effect is anti-dilutive.

i) Income taxes

Current tax is the expected tax payable or receivable on the taxable income or loss for the year, using tax rates enacted or substantively enacted at the balance sheet date, and includes any adjustments to tax payable or receivable in respect of previous years.

Deferred income taxes are recorded using the liability method whereby deferred tax is recognized in respect of temporary differences between the carrying amounts of assets and liabilities for financial reporting purposes and the amounts used for taxation purposes.

Deferred tax is measured at the tax rates that are expected to be applied to temporary differences when they reverse, based on the laws that have been enacted or substantively enacted by the statement of financial position date. Deferred tax is not recognized for temporary differences which arise on the initial recognition of assets or liabilities in a transaction that is not a business combination and that affects neither accounting, nor taxable profit or loss.

A deferred tax asset is recognized for unused tax losses, tax credits and deductible temporary differences, to the extent that it is probable that future taxable profits will be available against which they can be utilized. Deferred tax assets are reviewed at each reporting date and are reduced to the extent that it is no longer probable that the related tax benefit will be realized.

j) Financial assets

All financial assets are initially recorded at fair value and designated upon inception into one of the following four categories: held to maturity, available for sale, loans and receivables or at fair value through profit or loss ("FVTPL").

Financial assets classified as FVTPL are measured at fair value with unrealized gains and losses recognized through earnings. The Company's cash is classified as FVTPL.

Financial assets classified as loans and receivables and held to maturity assets are measured at amortized cost. As at September 30, 2014, the Company has not classified any financial assets as loans and receivables.

Financial assets classified as available for sale are measured at fair value with unrealized gains and losses recognized in other comprehensive income and loss except for losses in value that are considered other than temporary which are recognized in earnings. At September 30, 2014, the Company has not classified any financial assets as available for sale.

Transactions costs associated with FVTPL financial assets are expensed as incurred, while transaction costs associated with all other financial assets are included in the initial carrying amount of the asset.

MONTEGO RESOURCES INC.
NOTES TO THE CONDENSED INTERIM FINANCIAL STATEMENTS
FOR THE THREE MONTH PERIOD ENDED SEPTEMBER 30, 2014 AND 2013
(Expressed in Canadian dollars)

2. SIGNIFICANT ACCOUNTING POLICIES (continued)

k) Financial liabilities

All financial liabilities are initially recorded at fair value and designated upon inception as FVTPL or other financial liabilities.

Financial liabilities classified as other financial liabilities are initially recognized at fair value less directly attributable transaction costs. After initial recognition, other financial liabilities are subsequently measured at amortized costs using the effective interest rate method. The effective interest rate method is a method of calculating the amortized cost of a financial liability and of allocating interest expense over the relevant period. The effective interest rate is the rate that discounts estimated future cash payments through the expected life of the financial liability, or, where appropriate, a shorter period. The Company's accounts payable are classified as other financial liabilities.

Financial liabilities classified as FVTPL include financial liabilities held for trading and financial liabilities designated upon initial recognition as FVTPL. Derivatives, including separated embedded derivatives are also classified as held for trading and recognized at fair value with changes in fair value recognized in earnings unless they are designated as effective hedging instruments. Fair value changes on financial liabilities classified as FVTPL are recognized in earnings. At June 30, 2014, the Company has not classified any financial liabilities as FVTPL.

A financial liability is derecognized when the obligation under the liability is discharged or cancelled or expires.

3. SIGNIFICANT ACCOUNTING ESTIMATES AND JUDGMENTS

The preparation of these financial statements requires management to make certain estimates, judgments and assumptions that affect the reported amounts of assets and liabilities at the date of the financial statements and reported amounts of expenses during the reporting period. Actual outcomes could differ from these estimates. These financial statements include estimates which, by their nature, are uncertain. The impacts of such estimates are pervasive throughout the financial statements, and may require accounting adjustments based on future occurrences. Revisions to accounting estimates are recognized in the period in which the estimate is revised and future periods if the revision affects both current and future periods. These estimates are based on historical experience, current and future economic conditions and other factors, including expectations of future events that are believed to be reasonable under the circumstances.

Significant assumptions about the future and other sources of estimation uncertainty that management has made at the financial position reporting date, that could result in a material adjustment to the carrying amounts of assets and liabilities, in the event that actual results differ from assumptions made, relate to, but are not limited to, the following:

Significant accounting estimates

- i. the assessment of indications of impairment of the mineral property and related determination of the net realizable value and write-down of the mineral property where applicable;
- ii. the estimated value of the acquisition costs which are recorded in the statement of financial position;
- iii. the measurement of deferred income tax assets and liabilities; and
- iv. the inputs used in accounting for share-based payments in profit or loss.

MONTEGO RESOURCES INC.
NOTES TO THE CONDENSED INTERIM FINANCIAL STATEMENTS
FOR THE THREE MONTH PERIOD ENDED SEPTEMBER 30, 2014 AND 2013
(Expressed in Canadian dollars)

3. SIGNIFICANT ACCOUNTING ESTIMATES AND JUDGMENTS (continued)

Significant accounting judgments

- i. the determination of categories of financial assets and financial liabilities; and
- ii. the evaluation of the Company's ability to continue as a going concern.

4. ADOPTION OF NEW OR AMENDED ACCOUNTING STANDARDS

The mandatory adoption of the following new and revised accounting standards and interpretations on July 1, 2013 had no significant impact on the Company's financial statements for the years presented:

IFRS 10 – Consolidated Financial Statements

IFRS 10 requires an entity to consolidate an investee when it is exposed, or has rights, to variable returns from its involvement with the investee and has the ability to affect those returns through its power over the investee. IFRS 10 replaces SIC-12 Consolidation - Special Purpose Entities and parts of the previous IAS 27 Consolidated and Separate Financial Statements.

IFRS 11 – Joint Arrangements

IFRS 11 requires a venturer to classify its interest in a joint arrangement as a joint venture or a joint operation. Joint ventures will be accounted for using the equity method of accounting whereas for a joint operation the venturer will recognize its share of the assets, liabilities, revenue and expenses of the joint operation. Under IFRS 11, proportionate consolidation is no longer permitted.

IFRS 12 – Disclosure of Interests in Other Entities

IFRS 12 establishes disclosure requirements for interests in other entities, such as joint arrangements, associates, special purpose vehicles and off balance sheet vehicles. The standard carries forward existing disclosures and also introduces significant additional disclosure requirements that address the nature of, and risks associated with, an entity's interests in other entities.

IFRS 13 – Fair Value Measurement

IFRS 13 is a comprehensive standard for fair value measurement and disclosure requirements for use across all IFRS standards. The new standard clarifies that fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. It also establishes disclosures about fair value measurement.

IAS 1 – Presentation of Financial Statements

In June 2011, the IASB issued an amendment to IAS 1, which requires entities to separately present items in other comprehensive income based on whether or not they may be reclassified to profit or loss in future periods.

IAS 27 – Separate Financial Statements

As a result of the issue of IFRS 10, IFRS 11 and IFRS 12, IAS 27 Separate Financial Statements has been reissued, as the consolidation guidance will now be included in IFRS 10. IAS 27 has been reissued to only prescribe the accounting and disclosure requirements for investments in subsidiaries, joint ventures and associates when an entity prepares separate financial statements.

IAS 28 – Investments in Associates and Joint Ventures

As a consequence of the issuance of IFRS 10, IFRS 11 and IFRS 12, IAS 28 has been amended to provide accounting guidance for investments in associates and sets out the requirements for the application of the equity method when accounting for investments in associates and joint ventures. The amended IAS 28 is applied by all entities that are investors with joint control of, or significant influence over, an investee.

MONTEGO RESOURCES INC.
NOTES TO THE CONDENSED INTERIM FINANCIAL STATEMENTS
FOR THE THREE MONTH PERIOD ENDED SEPTEMBER 30, 2014 AND 2013
(Expressed in Canadian dollars)

4. ADOPTION OF NEW OR AMENDED ACCOUNTING STANDARDS (continued)

IAS 32 - Financial Instruments: Presentation

In December 2011, the IASB issued an amendment to clarify the meaning of the offsetting criterion and the principle behind net settlement, including identifying when some gross settlement systems may be considered equivalent to net settlement.

IAS 36 – Impairment of Assets

In May 2013, the IASB, as a consequential amendment to IFRS 13 *Fair Value Measurement*, modified some of the disclosure requirements in IAS 36 regarding measurement of the recoverable amount of impaired assets. The amendments resulted from the IASB's decision in December 2010 to require additional disclosures about the measurement of impaired assets (or a group of assets) with a recoverable amount based on fair value less costs of disposal

IFRIC 20 – Production Stripping Costs

In October 2011, the IASB issued IFRIC 20, which requires the capitalization and depreciation of stripping costs in the production phase if an entity can demonstrate (i) that it is probable future economic benefits will flow to the entity, (ii) the component of the ore body for which the access has been improved is identifiable, (iii) the costs related to the stripping activity associated with that component can be reliably measured.

IFRIC 21 – Levies

IFRIC 21 provides guidance on when to recognize a liability for a levy imposed by a government, both for levies that are accounted for in accordance with IAS 37 *Provisions, Contingent Liabilities and Contingent Assets* and those where the timing and amount of the levy is certain.

Amendments to other standards

In addition, there have been other amendments to existing standards, including IFRS 7 *Financial Instruments: Disclosure*, IAS 27 *Separate Financial Statements* and IAS 28 *Investments in Associates and Joint Ventures*. IAS 27 addresses accounting for subsidiaries, jointly controlled entities and associates in non-consolidated financial statements. IAS 28 has been amended to include joint ventures in its scope and to address the changes in IFRS 10 to IFRS 13.

5. NEW ACCOUNTING STANDARDS ISSUED BUT NOT YET EFFECTIVE

Standards issued, but not yet effective, up to the date of issuance of the Company's financial statements are listed below. This listing of standards and interpretations issued are those that the Company reasonably expects to have an impact on disclosures, financial position or performance when applied at a future date. The Company intends to adopt these standards when they become effective.

New accounting standards effective for annual periods on or after July 1, 2016:

IAS 16 – Property, Plant and Equipment and IAS 38 – Intangible Assets

In May 2014, the IASB issued amendments to IAS 16 *Property, Plant and Equipment* and IAS 38 *Intangible Assets*. The amendments clarify that the use of revenue-based methods to calculate the depreciation of an asset is not appropriate because revenue generated by an activity that includes the use of an asset generally reflects factors other than the consumption of the economic benefits embodied in the asset. The amendments also clarifies that revenue is generally presumed to be an inappropriate basis for measuring the consumption of the economic benefits embodied in an intangible asset. This presumption, however, can be rebutted in certain limited circumstances.

MONTEGO RESOURCES INC.
NOTES TO THE CONDENSED INTERIM FINANCIAL STATEMENTS
FOR THE THREE MONTH PERIOD ENDED SEPTEMBER 30, 2014 AND 2013
(Expressed in Canadian dollars)

5. NEW ACCOUNTING STANDARDS ISSUED BUT NOT YET EFFECTIVE (continued)

New accounting standards effective for annual periods on or after July 1, 2018:

IFRS 9 - Financial Instruments

In November 2009, as part of the IASB project to replace IAS 39 Financial Instruments: Recognition and Measurement, the IASB issued the first phase of IFRS 9 Financial Instruments, that introduces new requirements for the classification and measurement of financial assets. The standard was revised in May 2010 to include requirements regarding classification and measurement of financial liabilities.

The extent of the impact of adoption of these standards and interpretations on the financial statements of the Company has not been determined.

6. EXPLORATION AND EVALUATION ASSET

	Acquisition Costs	Exploration Costs	Total
	\$	\$	\$
Balance, July 20, 2012	-	-	-
Acquisition costs	10,000	-	10,000
Other exploration costs	-	109,535	109,535
Balance, June 30, 2013 and 2014 and September 30 2014	10,000	109,535	119,535

Redtop Sunrise Group

Pursuant to an option agreement dated July 25, 2012, with Rich River Exploration Ltd. and Craig Alvin Lynes, collectively, the "Optionors", the Company was granted an option to acquire a 100% undivided interest in the Redtop Sunrise Group property (the "Property") comprised of 12 mineral claims located near the Clearwater region of British Columbia.

To earn the 100% interest, the Company agreed to issue 175,000 common shares of the Company to the optionors, make cash payments totaling \$100,000, and incur a total of \$1,000,000 in exploration expenditures as follows:

	Common Shares	Cash	Exploration Expenditures
	#	\$	\$
Upon execution of the agreement (paid)	-	10,000	-
On or before July 25, 2013 (incurred)	-	-	100,000
Upon listing of the Company's common shares on the Canadian Securities Exchange (the "Listing")	85,000	15,000	-
On or before the first anniversary of the Listing	90,000	-	-
On or before the second anniversary of the Listing	-	15,000	200,000
On or before the third anniversary of the Listing	-	25,000	300,000
On or before the fourth anniversary of the Listing	-	35,000	400,000
Total	175,000	100,000	1,000,000

MONTEGO RESOURCES INC.
NOTES TO THE CONDENSED INTERIM FINANCIAL STATEMENTS
FOR THE THREE MONTH PERIOD ENDED SEPTEMBER 30, 2014 AND 2013
(Expressed in Canadian dollars)

6. EXPLORATION AND EVALUATION ASSET (continued)

The Optionor will retain a 3% Net Smelter Returns royalty on the Property. The first 2% of the royalty may be purchased by the Company at \$500,000 for each 1%. The purchase of the remaining 1% is negotiable after commercial production commences.

7. SHARE CAPITAL

a) Authorized:

The Company is authorized to issue an unlimited number of common shares without par value.

b) Escrow Shares:

As at September 30, 2014, there are no issued and outstanding common shares of the Company held in escrow.

c) Issued and Outstanding as at September 30, 2014: 6,487,501 common shares.

- (i) During the period the Company issued 350,000 common shares at a price of \$0.08 per share, for net proceeds of \$28,000.
- (ii) During the year ended June 30, 2014, the Company issued 1,437,500 common shares at a price of \$0.08 per share, raising gross proceeds of \$115,000.
- (iii) During the year ended June 30, 2013, the Company issued 3,000,000 common shares of the Company at a price of \$0.001 per share, raising gross proceeds of \$3,000. The fair value of the 3,000,000 common shares issued was estimated to be \$240,000. Accordingly, the Company recorded share-based compensation expense of \$237,000, and a corresponding increase to contributed surplus.
- (iv) During the year ended June 30, 2013, the Company issued 1,700,000 common shares at a price of \$0.08 per share, raising gross proceeds of \$136,000, of which 850,000 common shares were issued on a flow-through basis. As of June 30, 2014, all exploration expenditures related to the flow-through shares had been incurred, and the Company had renounced expenditures of \$68,000.

For the purposes of calculating the tax effect of any premium related to the issuance of flow-through shares, management reviewed the price per share in a recent non flow-through financing and compared it to the price used in this issuance and determined there was no premium.

d) Stock Options:

On September 15, 2014, the Company adopted a stock option plan for granting stock options to directors, employees and consultants, under which the total outstanding options are limited to 10% of the outstanding common shares of the Company at any one time. The Company also granted 800,000 fully-vested stock options to certain officers and directors of the Company to purchase up to a total of 800,000 common shares in the capital of the Company at a price of \$0.10 per common share. The options expire ten years from the date the Company's common shares commence trading on the Canadian Securities Exchange (the "Listing Date").

FOR THE THREE MONTH PERIOD ENDED SEPTEMBER 30, 2014 AND 2013
(Expressed in Canadian dollars)

8. RELATED PARTY BALANCES AND TRANSACTIONS

Parties are considered to be related if one party has the ability, directly or indirectly, to control the other party or exercise significant influence over the other party in making financial and operating decisions. Related parties may be individuals or corporate entities. A transaction is considered to be a related party transaction when there is a transfer of resources or obligations between related parties.

The following amounts are due to related parties and have been included in accounts payable and accrued liabilities:

	September 30, 2014	September 30, 2013
	\$	\$
Accounts payable and accrued liabilities	103,312	119,840

The amounts are due to companies controlled by directors of the Company. The amounts are non-interest bearing, unsecured and are due upon demand.

The Company had the following related party transactions:

	Period ended September 30, 2014	Period ended September 30, 2013
	\$	\$
Rent	2,250	2,250
Professional fees	6,150	-
	8,400	2,250

Geological fees, rent, and professional fees are paid to directors and companies controlled by directors of the Company.

Key management personnel receive compensation in the form of short-term employee benefits. Key management personnel include the directors of the Company. The remuneration of key management is as follows:

	Period ended September 30, 2014	Period ended September 30, 2013
	\$	\$
Management fees	20,250	20,250
Share-based compensation	-	-
	20,250	20,250

Management services were provided by companies owned by two directors of the Company.

9. MANAGEMENT OF CAPITAL

The Company's objectives when managing capital are to safeguard the Company's ability to continue as a going concern in order to pursue the sourcing and exploration of its resource property. The Company does not have any externally imposed capital requirements to which it is subject.

The Company considers the aggregate of its share capital, contributed surplus and deficit as capital. The Company manages the capital structure and makes adjustments to it in light of changes in economic conditions and the risk characteristics of the underlying assets. To maintain or adjust the capital structure, the Company may attempt to issue new shares or dispose of assets or adjust the amount of cash.

10. FINANCIAL INSTRUMENTS AND FINANCIAL RISK

International Financial Reporting Standards 7, *Financial Instruments: Disclosures*, establishes a fair value hierarchy that reflects the significance of the inputs used in making the measurements. The fair value hierarchy has the following levels:

Level 1 - quoted prices (unadjusted) in active markets for identical assets or liabilities;

Level 2 - inputs other than quoted prices included in Level 1 that are observable for the asset or liability, either directly (i.e. as prices) or indirectly (i.e. derived from prices); and

Level 3 - inputs for the asset or liability that are not based on observable market data (unobservable inputs).

Fair Value of Financial Instruments

The Company's financial assets include cash and are classified as Level 1. The carrying value of these instruments approximates their fair values due to the relatively short periods of maturity of these instruments.

Assets measured at fair value on a recurring basis were presented on the Company's statements of financial position as at September 30, 2014 are as follows:

	Fair Value Measurements Using			Total
	Quoted Prices in Active Markets For Identical Instruments (Level 1)	Significant Other Observable Inputs (Level 2)	Significant Unobservable Inputs (Level 3)	
	\$	\$	\$	\$
Cash	17,561	-	-	17,561

10. FINANCIAL INSTRUMENTS AND FINANCIAL RISK (continued)

Fair value

The fair value of the Company's financial instruments approximates their carrying value as at September 30, 2014 because of the demand nature or short-term maturity of these instruments.

Financial risk management objectives and policies

The Company's financial instruments include cash, prepaid expenses, and accounts payable. The risks associated with these financial instruments and the policies on how to mitigate these risks are set out below. Management manages and monitors these exposures to ensure appropriate measures are implemented on a timely and effective manner.

(i) *Currency risk*

The Company's expenses are denominated in Canadian dollars. The Company's corporate office is based in Canada and current exposure to exchange rate fluctuations is minimal.

The Company does not have any significant foreign currency denominated monetary liabilities. The principal business of the Company is the identification and evaluation of assets or a business and once identified or evaluated, to negotiate an acquisition or participation in a business subject to receipt of shareholder approval and acceptance by regulatory authorities.

(ii) *Interest rate risk*

The Company is exposed to interest rate risk on the variable rate of interest earned on bank deposits. The fair value interest rate risk on bank deposits is insignificant as the deposits are short-term.

The Company has not entered into any derivative instruments to manage interest rate fluctuations.

(iii) *Credit risk*

Credit risk is the risk of loss associated with the counterparty's inability to fulfill its payment obligations. Financial instruments that potentially subject the Company to concentrations of credit risks consist principally of cash. To minimize the credit risk the Company places these instruments with a high quality financial institution.

(iv) *Liquidity risk*

In the management of liquidity risk of the Company, the Company maintains a balance between continuity of funding and the flexibility through the use of borrowings. Management closely monitors the liquidity position and expects to have adequate sources of funding to finance the Company's projects and operations.

11. SUBSEQUENT EVENTS

- i. On November 17, 2014, the Company entered into an escrow agreement with Equity Financial Trust Company pursuant to which 4,275,000 common shares of the Company will be held in escrow pursuant to the requirements of National Instrument 46-201 – *Escrow for Initial Public Offerings* to be released as to 10% thereof on the Listing Date and as to 15% on each of the 6, 12, 18, 24, 30 and 36 month anniversary dates thereafter.
- ii. On November 17, 2014, the Company filed a prospectus (the “Prospectus”) with the British Columbia and Alberta Securities Commissions in respect of an Initial Public Offering (the “Offering”). The Company has agreed to offer 4,500,000 common shares of the Company at a price of \$0.10 per share for gross proceeds of \$450,000. In connection with the financing the Company entered in an Agency Agreement with Canaccord Genuity (the “Agent”). The Company has also granted the Agent an over-allotment option for up to 15% of the common shares being offered under the Offering on the same terms as the Offering. The Company will pay the agent a cash commission of 10% of the gross proceeds of the Offering and will pay corporate finance fee consisting of \$45,000 cash and 250,000 common shares along with all reasonable out-of-pocket costs. In addition, the Company has also agreed to grant non-transferable agent’s warrants to the Agent entitling the Agent to purchase 10% of the number of common shares sold under the Offering at a price of \$0.10 for a period of two years from the date of closing the offering. The Company has not completed the offering.
