

VALOREM RESOURCES INC.

MANAGEMENT DISCUSSION AND ANALYSIS

For The Six Months Ended October 31, 2021

OVERVIEW

The following management discussion and analysis (“MD&A”), prepared on December 23, 2021, should be read in conjunction with the audited consolidated financial statements for the six months ended October 31, 2021. All amounts are stated in Canadian dollars unless otherwise indicated. These financial statements together with this MD&A are intended to provide investors with a reasonable basis for assessing the financial performance of Valorem Resources Inc.

FORWARD LOOKING STATEMENTS

Certain statements in this report may be forward-looking statements, which reflect our management’s expectations regarding our future growth, results of operations, performance and business prospects and opportunities including statements related to the development of existing and future property interests, availability of financing and projected costs and expenses. Forward-looking statements consist of statements that are not purely historical, including any statements regarding beliefs, plans, expectations or intentions regarding the future. Such statements are subject to risks and uncertainties that may cause actual results, performance or developments to differ materially from those contained in the statements. No assurance can be given that any of the events anticipated by the forward-looking statements will occur or, if they do occur, what benefits we will obtain from them. These forward-looking statements reflect management’s current views and are based on certain assumptions and speak only as of the date of this report. These assumptions, which include management’s current expectations, estimates and assumptions about our current mineral property interests, the global economic environment, the market price and demand for commodities and our ability to manage our property interests and operating costs, may prove to be incorrect. A number of risks and uncertainties could cause our actual results to differ materially from those expressed or implied by the forward-looking statements, including: (1) a downturn in general economic conditions, (2) a decreased demand or price of minerals, (3) delays in the start of projects with respect to our property interests, (4) inability to locate and acquire additional property interests, (5) the uncertainty of government regulation and politics in North America regarding mining and mineral exploration, (6) potential negative financial impact from regulatory investigations, claims, lawsuits and other legal proceedings and challenges, and (7) other factors beyond our control, such as the current COVID-19 pandemic.

Additional information relating to Valorem Resources Inc. is available by accessing the SEDAR website at www.sedar.com.

DESCRIPTION OF BUSINESS

Valorem Resources Inc. (“VALU”, “Valorem” or the “Company”) is an exploration stage junior mining company engaged in the identification, acquisition, evaluation and exploration of gold, precious metals, and base metal properties. VALU was incorporated on May 9, 2014. On September 14, 2020, the Company changed its name from JDF Explorations Inc. to Valorem Resources Inc. Trading of the Company’s shares under the new name and symbol commenced on September 15, 2020.

The head office, principal address and registered and records office of the Company is located at 810 – 789 West Pender Street, Vancouver, British Columbia, V6C 1H2.

DESCRIPTION OF BUSINESS (CONTINUED)

The Company is currently evaluating its exploration and evaluation assets and has not determined whether its projects contain reserves that are economically recoverable. The recoverability of amounts recorded for the exploration and evaluation assets are dependent upon the discovery of economically recoverable reserves. The Company's future capital requirements depend on many factors, including costs of exploration and development of the exploration and evaluation assets, cash flow from operations, costs to complete additional exploration, competition and global market conditions.

On February 12, 2021, the Company acquired 100% of 1267818 B.C. Ltd. ("1267818"), a British Columbia based exploration corporation focused on the acquisition of precious metal properties in Canada, via a three-cornered amalgamation. The Company issued 30,000,000 common shares with a fair value of \$5,100,000. In accordance with the Company's significant accounting policy, the Company recorded the consideration paid in excess of the net assets acquired to the Statement of Loss and Comprehensive Loss.

COVID-19

In March 2020, the World Health Organization declared, the outbreak of the novel strain of coronavirus, specifically identified as "COVID-19", a pandemic. This has resulted in governments worldwide enacting emergency measures to limit the spread of the virus, including closure of non-essential businesses. As of the date of this MD&A, the majority of the Company's operations are considered essential in all jurisdictions in which the Company operates. As such, to date the Company has been able to continue operating with no material impact to operations.

There have been no material revisions to the nature and number of estimates and judgments made in respect of the Company's financial statements of prior periods. However, the effects of COVID-19 have required significant judgements and estimates to be made in the preparation of the Company's financial statements.

Additionally, the effects of COVID-19 may require revisions to estimates of expected credit losses attributed to accounts receivable. To date no revisions to managements' estimates and judgements used in the preparation of the Company's financial statements have been necessary.

Due to rapid developments and uncertainty surrounding COVID-19 or the possible ending of COVID-19, it is not possible to predict the impact that COVID-19 will have on the Company's operations or financial results in the future, its suppliers, and its customers. Additionally, it is possible the Company's operations and consolidated financial results will change in the near term as a result of COVID-19 or the ending of COVID-19.

SUMMARY OF BUSINESS ACTIVITIES – MATERIAL ACQUISITION OF 1267818 B.C. LTD.

On February 12, 2021, the Company acquired 100% of 1267818, a British Columbia based exploration corporation focused on the acquisition of precious metal properties in Canada, via a three-cornered amalgamation.

Pursuant to the terms of the amalgamation, the Company issued 30,000,000 common shares with a fair value of \$5,100,000 to the shareholders of 1267818 in exchange for all of the issued and outstanding shares of 1267818. 1267818 holds a 100% interest in the following Mineral Claims located in BC, collectively "BC Cariboo Property":

- 100% ownership of the Cariboo Gold Property;
- 100% ownership of the Lac La Hache Gold Property; and,
- 100% ownership of the Pinto Gold Property.

SUMMARY OF BUSINESS ACTIVITIES – MATERIAL ACQUISITION OF 1267818 B.C. LTD. (CONTINUED)

Accounting Treatment:

In accordance with IFRS 3 Business Combinations, a business combination is a transaction in which an acquirer obtains control of a business which is defined as an integrated set of activities and assets that is capable of being conducted and managed to provide a return to investors. For an integrated set of activities and assets to be considered a business, the set needs to contain inputs and processes. This acquisition does not meet the definition of a business combination as the primary assets are only the Mineral Claims. Consequently, the transaction has been recorded as an acquisition of an asset. The transaction price was negotiated and entered into at arm's length. As the transaction was entered into at arm's length, the consideration is presumed to be equal to the fair value of the net assets acquired unless there is evidence to the contrary. On the date of acquisition, there was no evidence to suggest that the fair value of the net assets acquired did not equal the consideration paid. The consideration's fair value was determined using a level 1 (valuations based on quoted prices (unadjusted) in active markets for identical assets or liabilities) input, and the Company's share price on the date of issuance, totaling \$5,100,000. The Company's significant accounting policy is to expense all exploration and evaluation acquisition cost and expenditures, unless commercial feasibility has been met. On the date of acquisition, commercial feasibility was not met and based on the Company's historical significant accounting policy, rather, the Company expensed the difference between the consideration paid and the net assets acquired to the Consolidated Statement of Loss and Comprehensive Loss to exploration and evaluation expense.

The following table summarizes the consideration paid and the allocation to the assets and liabilities acquired as at the date of acquisition:

Purchase price:	\$
Total consideration paid - 30,000,000 common shares issued at \$0.17 per share	5,100,000
<hr/>	
Net liabilities assumed:	
Exploration and evaluation asset	-
Accounts payable	(63,514)
Due to MegumaGold Corp.	(47,795)
Loan payable	(100,000)
<hr/>	
Net liabilities assumed – charged to the statement of operations.	(211,309)
<hr/>	
Excess of consideration over net liabilities assumed	5,100,000
<hr/>	

In accordance with the Company's significant accounting policy for exploration and evaluation assets, all acquisition, exploration and development of exploration and evaluation assets are expensed unless such mineral properties are placed into commercial production, at which time they are capitalized. Based on this accounting policy, the Company recorded the excess consideration paid over net liabilities acquired to the statement of loss and comprehensive loss of \$5,100,000.

Accounting impact on financial statements

Pursuant to the Company's accounting policy, the Company recorded an expense of \$5,100,000 to the statement of loss and comprehensive loss for the year ended April 30, 2021. This transaction was completed using equity of the Company and is a non-cash transaction. The Company's net loss for the year ended April 30, 2021 was \$7,143,486 (Year ended April 30, 2020 - \$527,557), representing an increase of \$6,615,929, year over year. In total, non-cash transactions for share-based compensation of \$490,035 (Year ended April 30, 2020 - \$Nil) and the acquisition of 1267818 of \$5,100,000 (Year ended April 30, 2020 - \$Nil), accounted for 85% of the increase. The acquisition of 1267818 is an infrequent transaction.

SUMMARY OF BUSINESS ACTIVITIES – MATERIAL ACQUISITION OF 1267818 B.C. LTD. (CONTINUED)

Business rationale and judgements:

1267818 holds claim to several British Columbia projects which includes projects with multiple tenure blocks totaling more than 4,000 ha (“Claims”), located in the Cariboo District. The Cariboo District Claims strategically target the Transitional or Basalt Siltstone of the Barkerville Terrain and are centered around three historic mining communities of Wells, Barkerville and Stanley. The northern boundary of the Company’s claims is immediately adjacent to the Barkerville Gold Mines Ltd. Cariboo Gold Project that hosts an orogenic gold deposit. The Company acquired these Claims as the leadership team saw an opportunity to acquire gold Claims situated next to historical gold deposits. Subject to accessing sufficient funding, the Company is looking to explore these Claims and conduct further work to identify any potential gold deposits.

The Company is required to make significant judgements on the feasibility of these mineral Claims on an on-going basis and there are no guarantees that commercially available quantities of precious metals will be discovered. There are no further commitments to acquire these Claims.

Business Acquisition Report (“BAR”) filing:

The Company filed the Material Contracts on August 6, 2021 and the BAR on SEDAR on August 10, 2021.

Determination of transaction price:

The transaction price was negotiated at arm’s length, and was based on a variety of considerations, including: publicly available information about the purchase price previously paid for the BC Cariboo Property by one of the previous owners; market price per ounce of gold at the time of negotiations; increased appreciation of the price per ounce of gold (compared to recent years); significant market demand for exploration-stage gold projects through the winter of 2020/2021; and, the corresponding impact of the appreciation of the price of gold on the economics of exploring these types of projects. The resulting negotiated transaction price was 30,000,000 common shares.

SUMMARY OF BUSINESS ACTIVITIES

The following financial and operational highlights occurred during the six months ended October 31, 2021:

- On May 5, 2021, the Company issued 712,500 common shares with a fair value of \$306,375 pursuant to the Wings Shear Agreement.
- On May 27, 2021, the Company granted 4,700,000 stock options to three directors and an officer. Each option is exercisable at \$0.29 per share until May 27, 2026. All of the options vested upon date of grant. The estimated fair value of the options was \$1,396,582 measured using the Black-Scholes Option Pricing Model with the following assumptions: share price \$0.30; exercise price - \$0.29; expected life - 5 years; volatility – 516%; dividend yield - \$0; and risk-free rate – 0.90%.
- On August 4, 2021, the Company issued 500,000 common shares with a fair value of \$117,500 pursuant to the Black Dog Agreement.
- On September 3, 2021, the Company issued 1,425,000 common shares with a fair value of \$206,625 pursuant to the Wings Shear Agreement.

SUMMARY OF BUSINESS ACTIVITIES (CONTINUED)

- During the six months ended October 31, 2021, the Company received a total of \$220,505 from the exercise of 1,688,500 warrants.
- During the six months ended October 31, 2021, 350,000 share purchase warrants and 78,400 finder's warrants with an exercise price of \$0.15 expired without being exercised. On expiry of the finder's warrants, the Company transferred \$5,265 recorded in contributed surplus to deficit relating to the fair value of the finder's warrants.
- Additionally, the Company incurred \$104,619 in total exploration costs on the Black Dog Lake Gold property, thereby satisfying the Black Dog Agreement obligation to incur \$50,000 on the property by August 4, 2021. The Company also paid \$45,000 to the Optionor for the 1st anniversary Black Dog Lake property payment.

Trading halt and expiry

On April 16, 2021, the Company's management team learned that the Company had been the target of false statements being made by financialnews.com about the nature of the Company's assets. We understood from an article published by the Globe & Mail, that the offending website had previously targeted another exploration company with an almost identically worded post about that particular company.

The Company's management clarified that it had no involvement with this website before nor in connection with the false article about the Company's assets. The Company has never had any communications with this website, is not associated with this website in any manner whatsoever, nor do we know who they are.

On April 30, 2021, the British Columbia Securities Commission (the "BCSC") issued a halt trade order on the securities of Company until the end of May 21, 2021 (the "Order"). In the Order, the BCSC indicated that it became aware of unsubstantiated information about the Company posted by a third-party online on or about April 15th and 29th, 2021, and that the information included unsupported claims about the Company's future share price and mining reserves for its Black Dog Lake Gold Property ("False Information"). The Order also acknowledged that on April 16, 2021, the Company issued a news release stating that the information disseminated by the third-party was false and that the Company had been the target of those false statements.

On May 21, 2021, the Order issued by the BCSC expired. The Company confirms that it will continue to work with the BCSC to assist in its efforts to review the unauthorized third-party claims about the Company's assets.

At the request of the BCSC, the Company also confirms that it has had no involvement with any promotional activities conducted by Latitude Media, and has never had any communications with Latitude Media nor been associated with them in any manner whatsoever.

The Company strongly disclaims any statements made about us by these third-parties.

On August 12, 2021, the cease trade order (the "CTO") issued by the British Columbia Securities Commission (the "BCSC") was revoked.

The CTO was issued by the BCSC on June 11, 2021, as a result of the failure of the Company to file a Form 51-102F4 Business Acquisition Report for the significant acquisition of 1267818 B.C. Ltd. (the "BAR"), and the material contracts in relation to the acquisition of 1267818 B.C. Ltd. (the "Material Contracts"). The Company filed the Material Contracts on August 6, 2021 and the BAR on SEDAR on August 10, 2021.

Appointments and resignations

On June 1, 2021, Mr. Robert Metcalfe was appointed as Director of the Company.

SUMMARY OF BUSINESS ACTIVITIES (CONTINUED)

Appointments and resignations (Continued)

On November 17, 2021, Mr. Robert Metcalfe resigned as a Director of the Company and Mr. Young Yuen was appointed to the Board of Directors.

Mr. Young Yuen has been a private electrical engineering consultant for the last 18 years, after an extensive and distinguished career in the consulting engineering industry spanning 15 years covering many mining and pulp & paper projects throughout BC and Alberta and across the United States. Some of Mr. Yuen's more significant accomplishments include the Canada Line rapid transit system and a number of facility expansions/upgrades at Vancouver General Hospital.

Mr. Yuen has extensive experience in all facets of the engineering construction industry, including feasibility studies, project costing, design execution, contract administration, facility start-ups and quality assurance. His wide-ranging expertise include power distribution, lighting, emergency communications, fire alarms and life-safety systems.

He is a graduate of the prestigious Engineering Physics program at the University of British Columbia. Mr. Yuen is a retired professional engineer in good standing, registered in both BC and Alberta.

EXPLORATION AND EVALUATION EXPENDITURES

All technical aspects of the Company for this MD&A report, have been reviewed and approved by Dr. Stewart A Jackson, P.Geo., a Qualified Person under NI 43-101 and independent of the Company.

Acquisition and exploration expenditures for the six months ended October 31, 2021 were as follows:

	Black Dog Lake Project	Wings Shear Property	Total Costs
Acquisition costs	162,500	513,000	675,500
Camp costs	1,173	-	1,173
Claim staking and renewals	3,370	-	3,370
Demobilization	7,945	-	7,945
Equipment rental	1,350	15,275	16,625
Field expenditures	5,002	1,330	6,332
Field personnel	9,863	15,525	25,388
Geological	16,457	27,215	43,672
Geophysical	47,514	-	47,514
Line- cutting	1,500	-	1,500
Mobilization	7,945	-	7,945
Sampling	2,000	10,475	12,475
Transportation	500	-	500
Total acquisition and exploration expenditures, October 31, 2021	267,119	582,820	849,939

EXPLORATION AND EVALUATION EXPENDITURES (CONTINUED)

BC Cariboo Property, British Columbia

On February 12, 2021, the Company issued 30,000,000 common shares with a fair value of \$5,100,000 to the shareholders of 1267818 in exchange for all of the issued and outstanding shares of 1267818. The primary asset held by 1267818 was the BC Cariboo property.

The BC Cariboo Property includes the:

- BC Gold Project which is comprised of multiple tenure blocks (the East, Central, and West) which strategically target the Transitional or Basalt Siltstone of the Barkerville Terrain located in the Cariboo District, British Columbia.
- Lac La Hache Gold Project which is located on the north shore of Spout Lake in the Cariboo gold district northeast of 100 Mile House.
- Pinto Gold-Copper Project just north of the historic Franklin Mining Camp located 50 km north of Grand Forks in south central British Columbia

BC Cariboo Property exploration update

As shown on Figure 2 below, the Central claims group is located in the red rectangle to the southwest of the town of Barkerville. The Central claims group shares boundaries with the mineral claims of Osisko Development's Barkerville area holdings in the heart of the Barkerville Gold District. Osisko's Barkerville property was acquired by Osisko Gold Royalties Ltd. ("Osisko") in 2019 and restructured as Osisko Development.

The location of the Central group of claims, making up a part of the BC Cariboo Property, in addition to its location relative to the Osisko property, has hosted historical gold production and offers potential exploration targets. The Central group of claims is located near the Mostique Creek and Lightning Creek placer areas (see B.C. Minfile No. 093G009 and No. 093G060, respectively). In addition, it covers the Gem gold showing, a turbidite-hosted gold target (see B.C. Minfile No. 093G073).

Figure 1. Location of the three groups of claims of the Valorem property (in black) and the Osisko Development claims (in pink) overlain on the regional geology showing the two belts. (Inset) Major cities and Project area shown.

EXPLORATION AND EVALUATION EXPENDITURES (CONTINUED)

BC Cariboo Property exploration update (continued)

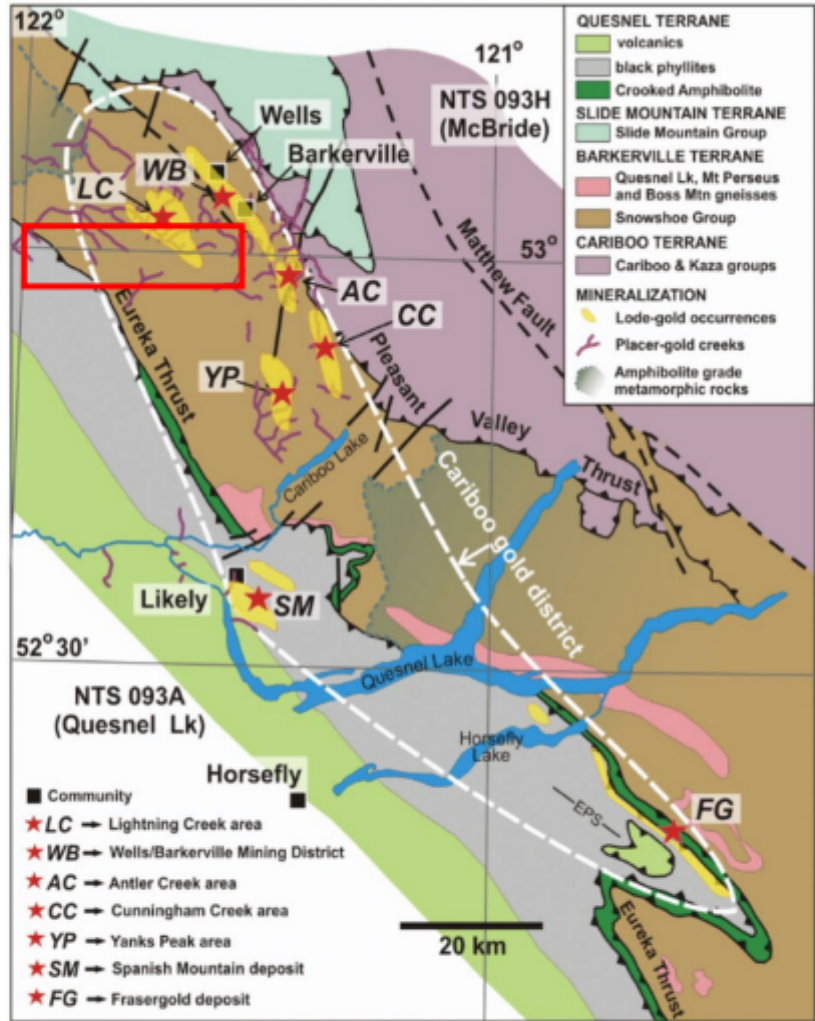

Figure 2. Regional geological setting of the Cariboo Gold District, east-central British Columbia, showing principal terranes and major lithological packages. Areas of known lode-gold occurrences are shaded in yellow, and placer-gold producing creeks are indicated by thick purple lines. Principal known gold-producing areas in the Barkerville Terrane are in areas of greenschist-grade metamorphism and do not extend into amphibolite-grade domains. The Valorem property claims in the Lightning Creek and Barkerville areas are represented by a red rectangle.

The acquisition of the BC Cariboo Property creates material exposure to the historic Cariboo gold district by establishing our presence in a premier historic gold camp in BC and providing an entry into the historical Franklin Mining Camp, located in southern BC.

EXPLORATION AND EVALUATION EXPENDITURES (CONTINUED)

BC Cariboo Property exploration update (continued)

The first two properties, the BC Gold Project and the Lac La Hache Gold Project, are located in the Cariboo District near the historical and currently active mining town of Barkerville in central British Columbia, while the third property, the Pinto Gold-Copper Project, is in the historical Franklin Mining Camp north of the town of Grand Forks in south central British Columbia.

The BC Gold Project is located southwest of the main Barkerville District (see red square on Figure 2 above), and the Lac La Hache Gold Project is located northeast of 100 Mile House on the north shore of Spout Lake.

BC Gold Project

The BC Gold Project, totaling 4,000 hectares, is comprised of three claim groups, the West, Central and East, extending for approximately 9-15 kms southwest of the Osisko Development Cariboo Gold Project. As shown on Figure 2 above, the property area is located in the red rectangle to the southwest of the town of Barkerville.

The reader is cautioned that the presence of a deposit on the adjoining Osisko Development ground does not necessarily indicate that any such mineralization may be present on the Company's holdings in the area, or that if discovered, any such mineralization may be economically extracted.

The Western claims of the BC Gold Project are located near the Mostique Creek and Lightening Creek placer areas (see B.C. Minfile No. 093G009 and No. 093G060, respectively). In addition, it covers the Gem gold showing, a turbidite hosted gold target (see B.C. Minfile No. 093G073). Exploration planned for the Western claim group containing the two placer showings and the one bedrock showing in black phyllites will consist of in-depth prospecting and sampling of previously excavated pits on the gold showing in bedrock black phyllites, and compilation of all existing Min files on this area. Encouraging geochemical values of gold are noted in Min files from bedrock sources sampled by previous prospecting.

The Central claims contain the Sovereign nickel-talc-magnesite showing (Assessment File Sovereign Creek deposit, 093A 013). Also within the Central unit are the Peters Creek surficial Placers and the Wormwold Creek surficial placers. Exploration work planned for the Central claims include a re-evaluation of all work done on the nickel and talc zones prospected by historical work to follow up the potential for disseminated nickel values occurring as pentlandite (Property file-Findlay, 1971). Creek bottom geochemical sampling and ridgeline geochemical sampling and bedrock sampling for both nickel and gold, and prospecting will be conducted throughout the Central claims.

The Eastern claims cover several potentially economic target types. The prime targets are the potential for orogenic gold deposits in the Snowshoe Group of rocks that host many gold occurrences in the Barkerville district, plus potential for nickel in serpentinized ultramafic rocks within the property. Also in this claim group are the Emerald Valley showings of quartz-tourmaline pegmatite veins that host very large quartz and plagioclase feldspar crystals of possible value as gem material or specimen material for potential sale to mineral collectors (Assessment Report 33212).

Both geochemical sampling on creeks and ridges, and prospecting in both the nickel and specimen crystal areas will be undertaken on the Eastern claims. There is no resource delineated on any of the claim groups in the BC Gold Project holdings.

EXPLORATION AND EVALUATION EXPENDITURES (CONTINUED)

BC Cariboo Property exploration update (continued)

Lac La Hache Gold Property

The second property, the Lac La Hache Gold Project, comprises 180 hectares on the north shore of Spout Lake in the Cariboo gold district located northeast of 100 Mile House. To the south of Spout Lake, Engold Mines Ltd. has been drilling a deposit variously characterized as skarn, carbonate replacement, or porphyry copper deposit containing a modest tonnage of copper-magnetite mineralization. Garibaldi Resources Corp. has also been exploring a similar discovery in this area.

The upcoming program for the Company's property in this area will consist of geological, geophysical and geochemical surveying to seek a significant deposit in this prospective area. The property is in the early stage of exploration and no resource has yet been established on the property. The Company will compile the data and based on the results design the next phase of exploration.

Pinto Gold Project

The third property holding, the Pinto Gold-Copper Project, covers 80.9 hectares just north of the historic Franklin Mining Camp located 50 km north of Grand Forks in south central British Columbia. This property is in an area which has been subject to historical exploration interest by multiple majors during the 1980s, including both Noranda Exploration Company Ltd. and Inco Ltd. (see B.C. Minfile No. 082ENE19).

Several old workings and historical adits and shallow open pits are scattered in the area. A grab sample by Inco in 1989 assayed 6.829 g/t gold, and a chip sample from a one-meter width of stockwork assayed 4.6 g/t gold (B.C. Minfile No. 082ENE19 and B.C. Assessment report 19385).

The Pinto property covers portions of an intrusive complex that contains multiple showings of gold and copper that have been compared to and may be analogous to the historical Phoenix Mining Camp located south of Greenwood, B.C., some 70 km to the southwest of the Franklin Camp.

The former Phoenix Mine produced 25.5 million tonnes of ore averaging 0.9% copper and 1.1 grams gold per tonne. It was mined both from underground and as an open pit from 1900-19 and again from 1956-78 (Northern Miner Press, March 12, 2021). Current VTEM surveying is being conducted in the vicinity of the Phoenix Mine in the search for additional copper-gold deposits.

The presence of copper-gold deposits in the analogous Phoenix Mine does not infer that any such mineralization may be present on the Company's holdings, or that if discovered that any such deposit may be economically recoverable.

Exploration on the Pinto Property will consist of re-evaluation of all available data, prospecting and possibly airborne geophysical VTEM surveying to detect the potential for an intrusive-related porphyry copper style deposit. Upon re-evaluation the Company will design the next phase of exploration.

Qualified Person: This information for the BC Cariboo Property was prepared by, supervised by and approved by Dr. Stewart A Jackson, PGeo, a Qualified Person under National Instrument 43-101, and independent of the Company.

EXPLORATION AND EVALUATION EXPENDITURES (CONTINUED)

Black Dog Lake Gold Project, Quebec

On August 4, 2020, the Company signed a property option agreement (the “Black Dog Agreement”) to purchase the Black Dog Lake Gold property, which comprises 16 contiguous mineral claims covering 1,002 hectares, located in the James Bay region, Quebec.

Pursuant to the terms of the Black Dog Agreement, the Company can earn a 100% interest in the Black Dog Gold Project by making the following payments to the Optionors:

Cash Payment Amount to Optionor	Shares to be issued to Optionor	Minimum exploration requirements
\$35,000 due within 5 business days of the effective date (paid)	500,000 shares (issued at a fair value of \$50,000) and due upon execution of the Black Dog Agreement	\$Nil
\$45,000 due on 1 st anniversary date of the effective date (paid)	500,000 shares (issued at a fair value of \$117,500) on or before one year from signing the Black Dog Agreement	\$50,000 to be spent on or before the 1 st anniversary date of the effective date
\$55,000 due on 2 nd anniversary of the effective date	750,000 shares to be issued on or before two years from signing the Black Dog Agreement	\$200,000 to be spent on or before the 2 nd anniversary of the effective date
\$60,000 due on the 3 rd anniversary date of the effective date	1,000,000 shares to be issued on or before three years from signing the Black Dog Agreement	\$500,000 to be spent on or before the 3 rd anniversary date of the effective date
\$195,000	2,750,000 shares	\$750,000

The Optionors retain a 2% Net Smelter Return Royalty (“NSR”) on all metals recovered from the Black Dog Lake Gold Project. The Company has the right at any time to acquire 50% of the NSR for \$1,000,000.

In the event that the Company declares a proven reserve supported by a 43-101 Technical Report, an additional 1,000,000 common shares are to be issued to the Optionors.

Black Dog Lake Gold Project exploration update

During the year ended April 30, 2020, the Company completed a Technical Report, in accordance with National Instrument 43-101, for the Black Dog Lake Project and has filed on it on www.SEDAR.com. The Technical Report was prepared by Darren L. Smith, M.Sc., P.Geo., of Dahrouge Geological Consulting Ltd., and titled “Technical Report on the Black Dog Lake Property, Quebec, Canada”, effective date December 8, 2020.

The Black Dog Lake Project is an early stage exploration project, which has been the subject of several exploration campaigns by multiple companies since the 1970s. Appreciable gold mineralization has been confirmed to be present on the Property within a sulphide-facies banded iron formation (the “Black Dog Zone”) and represents the primary exploration target on the project. In addition, a series of east-west trending conductors, IP anomalies, and magnetic trends are prevalent across the southern half of the property and parallel the northern contact of the Mistumish Batholith. Collectively, these features demonstrate additional exploration potential on the property. A total of five (5) target areas have been identified on the property, highlighted by the Black Dog Zone.

EXPLORATION AND EVALUATION EXPENDITURES (CONTINUED)

Black Dog Lake Gold Project, Quebec (Continued)

Black Dog Lake Gold Project exploration update (continued)

The mineralization at the Black Dog Zone has a current interpreted extent of least 600 m in length and extends at least 100 m down dip, is steeply dipping, and has an apparent thickness of 0.6 to 3.6 m. The zone remains open along strike and at depth and has been tested at wide drill spacings. The grades of drill core intercepts include; 15.2 g/t Au over 0.6 m (in LH-88-01); 5.6 g/t Au over 1.1 m (in LH-88-02); and 4.3 g/t Au over 0.88 m (in LH-88-03), and indicate a fertile environment for mineralization, and therefore, potential to extend to other areas of the property. The zone is coincident with local EM conductors, magnetic trends, and anomalous gold in surface samples, which collectively indicate additional strike potential is present.

The Company intends to carry-out the recommended exploration work on the property, which includes a Phase I program of prospecting, trenching, mapping, and potentially ground geophysics (completed), followed by a Phase II program focused on diamond drilling. Pursuant to the Black Dog Agreement, the Company will incur the minimum \$250,000 exploration expenditures by carrying out Phase I program followed by the Phase II program describe above.

Darren L. Smith, M.Sc., P.Geo., Dahrouge Geological Consulting Ltd., a Permit holder with the Ordre des Géologues du Québec and Qualified Person as defined by National Instrument 43-101, has approved the December 15, 2020 update.

As part of the Phase I program, a high-definition ground Magnetometer and Induced Polarization (IP) survey covered the previously drilled Black Dog target which has returned gold geochemical anomalies, and multiple gold intercepts in diamond drilling in previous campaigns.

The Black Dog east extension had a 14 hole diamond drill program which produced these interesting returns, 1.13g/t gold over 1.24 m. and 1.19g/t gold over 0.75 m.

The previous intersections reflect gold in sulphide rich portions of bedded banded iron formation, a style of mineralization that is manifested in many prominent gold deposits such as Musselwhite, Lupin, Cullaton Lake and Meliadine in Canada and the Homestake deposit of South Dakota, USA.

The exploration potential in such Archean iron formations can reach several tens of millions of ounces of gold. The reader is cautioned that the exploration target is conceptual in nature and that there are no known reserves or resources on the subject property, and if discovered there can be no assurance that any such discoveries may be economically produced.

The iron formations are extensive on the Black Dog Lake Project, returning widespread gold geochemical anomalies, gold in outcrops at the initial prospect, and multiple drill hole gold intersections. The renewed geophysical exploration will assess the potential for and design of additional testing of the prospective banded iron formation underlying much of the 1,003 hectare claim block.

EXPLORATION AND EVALUATION EXPENDITURES (CONTINUED)

Black Dog Lake Gold Project exploration update (continued)

The project is accessed from the Quebec highway and all- season road system. Potential power sources are close, and terrain is quite flat and low elevation allowing for efficient exploration and if warranted development.

The January 18, 2021 update was prepared by Dr. Stewart A Jackson, a Qualified Person under National Instrument 43-101, and independent of the Company.

On March 18, 2021, a field crew of two prospectors were mobilized to the property for seven days to locate, explore and rock sample the main target area of Black Dog Lake Gold property. By April 25, 2021, initial exploration rock samples were submitted to the chemical lab in Val d'Or. The best result received by the Company on April 27, 2021 was 6.3 g/t gold, from rock sample # B00376054 from the main Black Dog prospect.

The Black Dog Zone is described as an auriferous (i.e. gold-bearing) horizon of "silicified and carbonatized sulphide facies iron formation." The zone is sheared, banded, and locally brecciated with up to 30% pyrrhotite, 5% pyrite, and trace chalcopyrite, and magnesium-rich carbonate in veinlets and disseminations. The host is a sequence of felsic and mafic volcanics and banded felsic to mafic tuffs. The gold mineralization from the iron formation also contains anomalous zinc and copper.

Numerous gold producers occur within lithologies similar to the sequence described above, most significantly the Homestake Mine in South Dakota, USA, and the Lupin deposit in Canada. (Graton-Sales Aime 1968).

On March 18, 2021, On Track Exploration Ltd. submitted an exploration proposal to the Company on the Black Dog gold target.

On June 24th, 2021, a field crew of a geologist and a prospector were mobilized to the property for two days. The Company expects that a comprehensive geological report will be completed soon, based on all previous work on the property, all recent sampling, and the results of the Abitibi geophysical survey are also expected.

The geophysical survey consisted of OreVision® and MAG-GPS. The OreVision® can reveal targets at a greater depth than conventional IP without compromising near-surface resolution. OreVision® technology enables Abitibi Geophysics to read a large number of dipoles spacings along individual survey lines and combine the results into a 3D interpretation. The MAG-GPS survey will be completed immediately prior to the OreVision survey. The OreVision and the Mag-GPS surveys to be conducted by Abitibi Geophysics Inc. will cover the area shown on the map in Image 1 below.

Image 1: Black Dog Lake Property Survey Area Map

The ground geophysical surveys provided new targets for the drilling (See Image 2). The grid yields a 7.2 line-km covering a zone 800 metres long by 400 metres wide grid on 50 metres spaced lines, to capture the easterly trending significant regional structure that controls the Black Dog Lake gold target.

On July 26, 2021, the property owner on behalf of Valorem acquired an additional claim CDC 2615530, located close to the main target area of Black Dog target, which becomes part of the optioned property.

On August 27, 2021, the Company prepared a property renewal application number # 1829165 to be submitted to MRN in Quebec for the purpose of renewing the property for two more years subject to the completion of the 2021 geophysical and the geological surveys.

Image 2: Black Dog Property Target Location Map

Black Dog Lake Gold Project, Quebec (Continued)

Black Dog Lake Gold Project exploration update (continued)

As of the date of this MD&A, the Company added six (6) additional claims adjacent to the Property to the Option without additional consideration paid to the Property owner, other than the payment of the cost of staking. The Property is now comprised of 25 claims for a total of 1,319.4 hectares (see Figure 1). The original terms of the Option for the Property, which now includes the additional six (6) claims, remain unchanged.

The Property is located within the Middle and Lower Eastmain Greenstone Belt (the “Eastmain Greenstone Belt”), which is part of the La Grande Subprovince in the James Bay Region of Quebec. The Property hosts the Black Dog Zone, which is described as an auriferous (i.e. gold-bearing) horizon of “*silicified and carbonatized sulphide facies iron formation.*” The zone is sheared, banded, and locally brecciated with up to 30% pyrrhotite, 5% pyrite, and trace chalcopyrite, and has magnesium rich carbonate present as veinlets and disseminations. The zone is hosted in a sequence of felsic and mafic volcanics and banded felsic to mafic tuffs. The gold mineralization from the iron formation is also accompanied by anomalous levels of zinc and copper, and is further described as conductive, magnetic, and stratabound. The best drill result is reported by Eastmain Resources Inc. from their 1988 drill program with 15.2 g/t Au, 22.3 g/t Ag, 0.10% Cu, and 0.52% Zn over 0.6 m (LH-88-01) (Shelp, 1989 - GM49584).

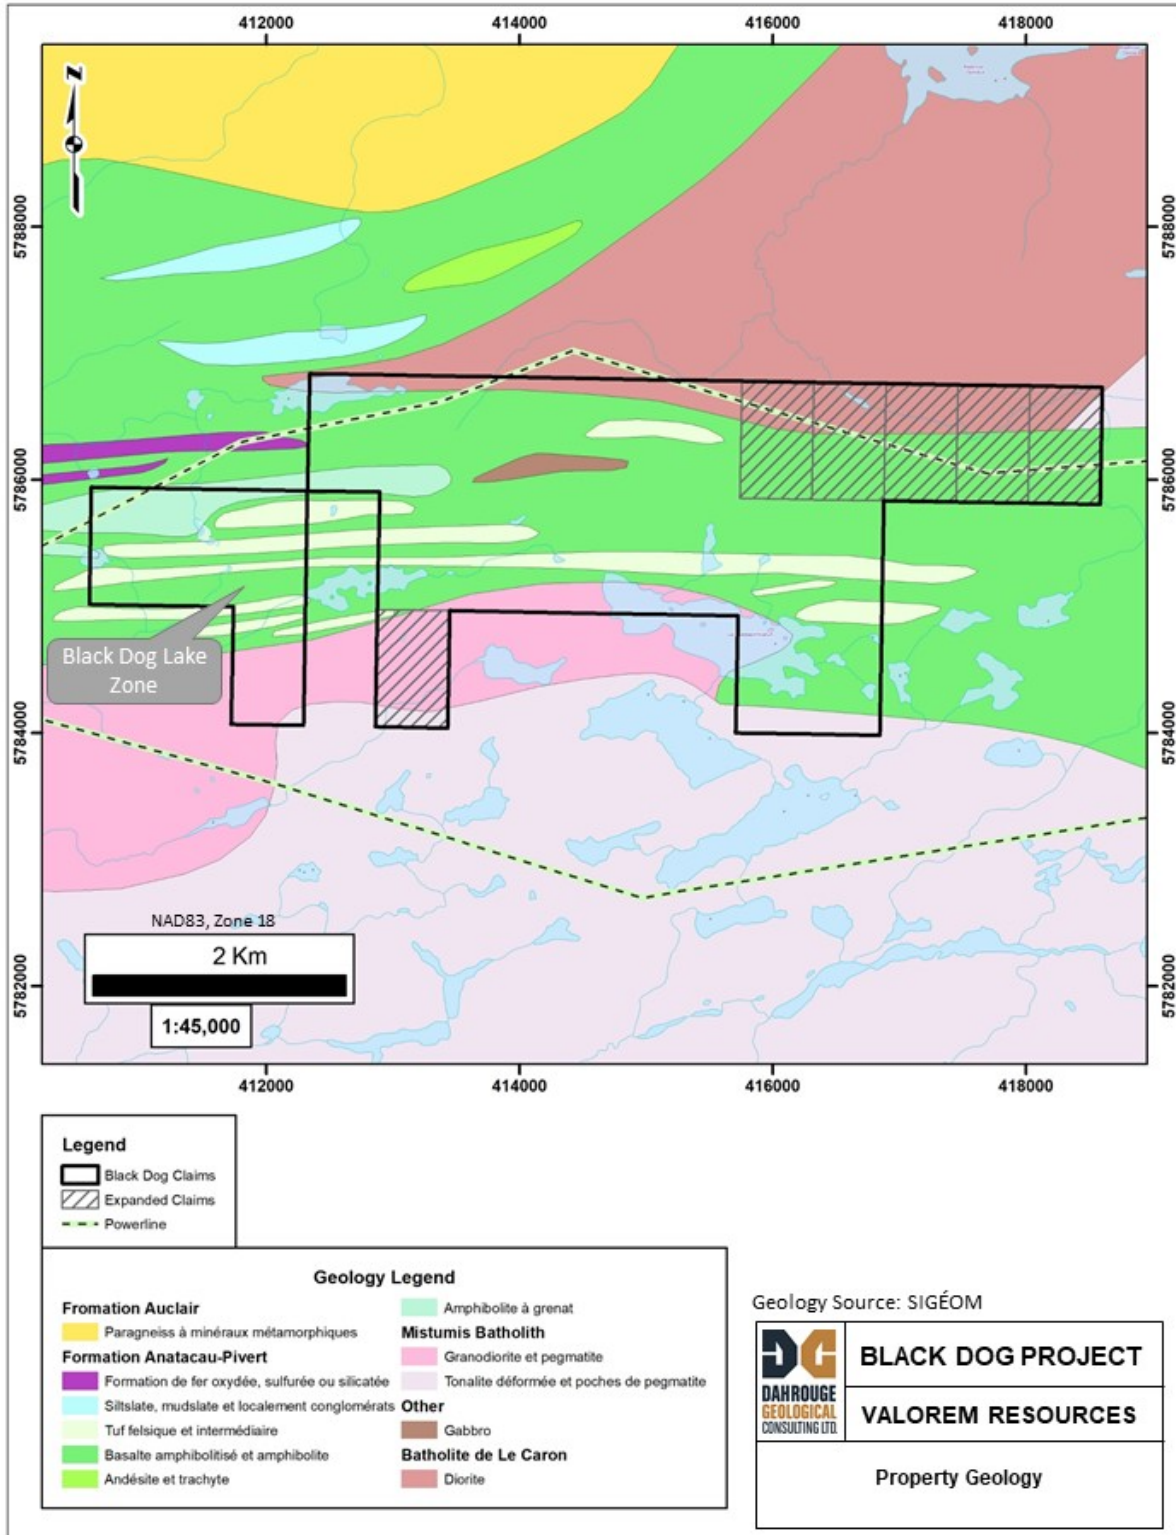

Figure 1: Black Dog Lake Property

EXPLORATION AND EVALUATION EXPENDITURES (CONTINUED)

Black Dog Lake Gold Project, Quebec (Continued)

Black Dog Lake Gold Project exploration update (continued)

The Company filed an updated National Instrument 43-101 technical report for its Black Dog Lake Property with an effective date of November 18, 2021.

Qualified Person: The aforementioned Black Dog Project update has been reviewed and approved by Darren L. Smith, M.Sc., P.Geo., Dahrouge Geological Consulting Ltd., a Permit holder with the Ordre des Géologues du Québec, a Qualified Person as defined under National Instrument 43-101, and independent of the Company.

Wings Shear Property, Newfoundland and Labrador

On January 4, 2021, the Company entered into a mineral property option agreement (the “Wings Shear Agreement”), to acquire a 100% interest in the Wings Shear Property. The property is comprised of 280 claim units covering 7,000 hectares located 32 kilometers northeast of Gander, Newfoundland and Labrador.

Pursuant to the terms of the Wings Shear Agreement, the Company can earn a 100% interest in the Wings Shear Property by making the following payments to the Optionor:

Cash Payment Amount to Optionor	Shares to be issued to Optionor	Minimum work commitment
\$45,000 within 5 business days from the effective date (paid)	750,000 shares (issued at a value of \$123,750) to be issued on same day of 1 st cash payment (payment date)	\$250,000 prior to the 1 st year anniversary of the effective date
Reimburse \$13,130 of staking fees on the effective date (paid)	750,000 shares to be issued 4 months from the payment date (37,500 shares issued at fair value of \$6,188 in prior fiscal year and 712,500 shares issued at fair value of \$306,375 in current fiscal year)	An additional \$500,000 prior to the 2 nd year anniversary of the effective date
	1,500,000 shares (75,000 shares issued at fair value of \$12,375 issued in prior fiscal year and 1,425,000 issued at fair value of \$898,370 in current fiscal period) to be issued 8 months from payment date	A final \$2,250,000 prior to the 3 rd year anniversary of the effective date
	1,500,000 shares (75,000 shares issued at fair value of \$12,375 in prior fiscal year) to be issued 12 months from payment date	
\$58,130	4,500,000 shares	\$3,000,000

Of the 3,750,000 shares to be issued 4 – 12 months subsequent to the effective date, 187,500 shares with a fair value of \$30,938 were issued at the effective date.

The Optionors retain a 2% Net Smelter Return Royalty (“NSR”) on any commercial production from the Wings Shear Property. The Company has the right at any time to acquire 1.5% of the NSR for \$1,000,000.

EXPLORATION AND EVALUATION EXPENDITURES (CONTINUED)

Wings Shear Property, Newfoundland and Labrador (Continued)

Wings Shear Property exploration update

The Company also paid \$4,500 cash, and issued 450,000 common shares valued at \$74,250 as finder's fees for the Wings Shear Property.

Highlights of the Wings Shear Property include:

- Regional scale land package covering deep seated structural zone parallel to the structural trend underlying Newfoundland Gold's Queensway Project.
- Greenfield project with drill targets identified.
- No prior drilling completed on the showing.
- The Wings Shear Property has values from grab samples of up to 12.2 g/t Au.
- The Wings' Pond mineralized trend has been traced for a strike length of 1.0 km and channel sampling returned values of up to 9.8 g/t Au over 1.0 metres from the main Wings' Pd showing.
- Additional gold mineralization was found associated with brecciated quartz veins within the Indian Bay-Big Pond Formation. This formation is 14 km long and 1.2 km wide.
- Channel sample from this area assayed up to 1.49 g/t Au, and 0.92 g/t Au over 1.0 m.

EXPLORATION AND EVALUATION EXPENDITURES (CONTINUED)

Wings Shear Property, Newfoundland and Labrador (Continued)

Wings Shear Property exploration update (continued)

Geology

Situated in the Gander Tectono-Stratigraphic Geological Zone, the Property is underlain by the Indian Bay Big Pond and the Johnathan's Pond formations. It hosts the regionally significant Wing's Pond shear zone which extends for 40-km in a north northeast direction and is associated with a number of historic gold showings. The gold is generally associated with arsenopyrite, stibnite, and base metal sulphides hosted in quartz/breccia veins.

Figure 2: Residual Mag of Prospect area, the eastern mag high boundary is on the property

Local exploration service company Planet X Exploration Services Ltd. was retained through a local group of prospectors as the project operator. The Company looks forward to advancing the property in the near future with the local Newfoundland partnership.

Wayne Reid, P. Geo., a qualified person as defined in National Instrument 43-101, is responsible for aforementioned information.

During the year ended April 30, 2021, the Company received permits to begin exploration work on its Wings Shear property. The scope of the permit provided exploration approval for ground geophysics, geochemical survey, and prospecting on the property.

Initial work consisted of geological mapping, prospecting and a preliminary till-sampling program, commissioned through Overburden Drilling Management of Nepean, Ontario. Exploration commenced at the time in preparation for an inaugural drilling campaign later in the year.

During the period ended July 31, 2021, the Company submitted the application for approval of diamond drilling on its Wings Shear property. As at the date of this MD&A, the Company is still waiting for the approval of the diamond drilling permits.

EXPLORATION AND EVALUATION EXPENDITURES (CONTINUED)

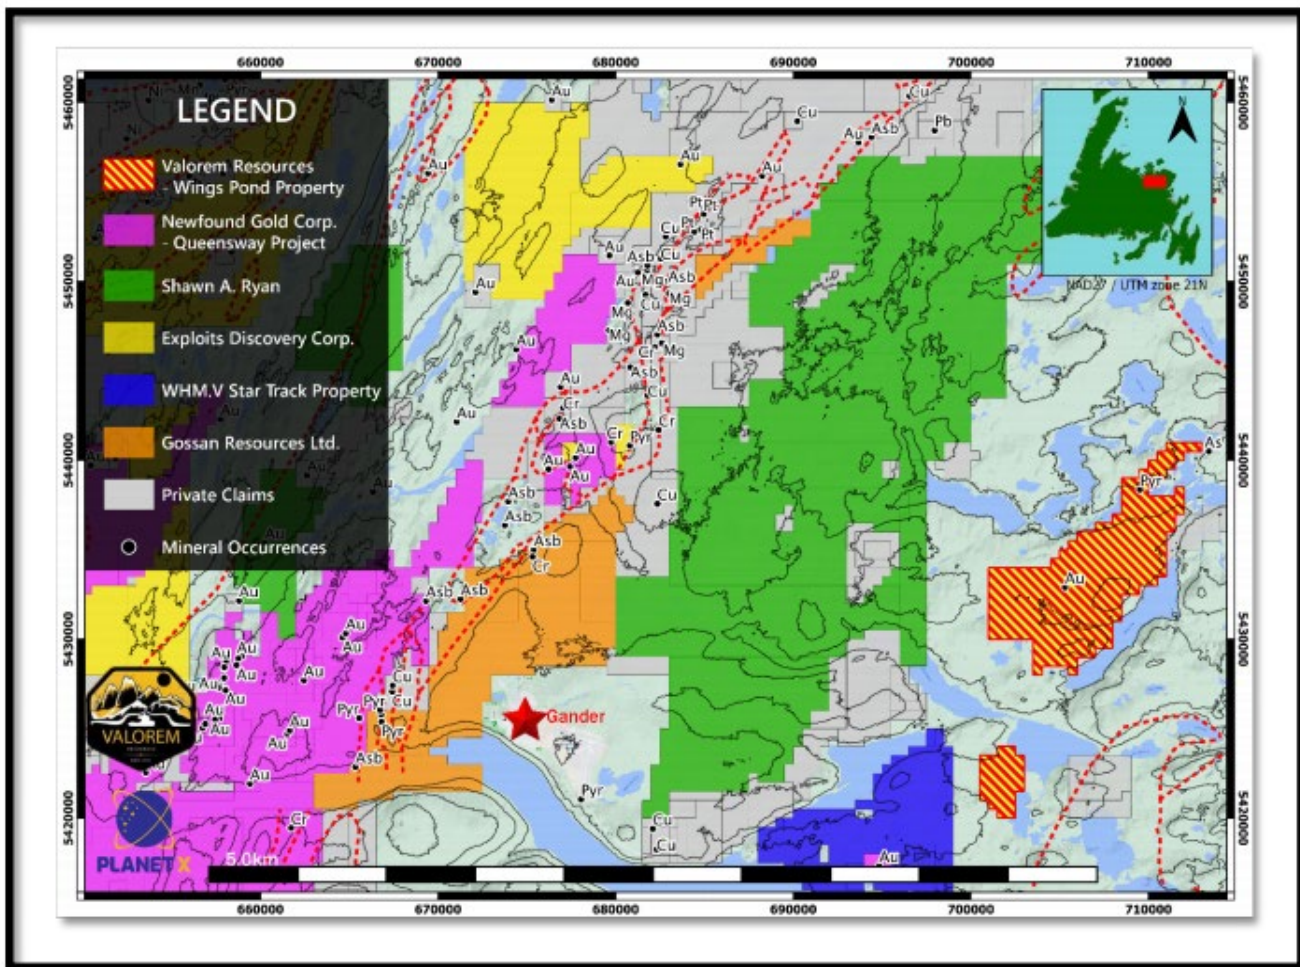

Wings Shear Property, Newfoundland and Labrador (Continued)

Wings Shear Property exploration update (continued)

Highlights

- The Company has planned an initial diamond drilling program of 1,000 meters of diamond drilling over 6 holes focusing on the historically trenching and drill-ready Wings Shear Property.
- The drilling program is set to begin, pending permit approval and drilling contractor availability.
- Surface sampling has been conducted during the ongoing surface exploration program in 2021, and assays are expected in the near future.
- A till survey consisting of 100 samples approximately ten kilograms in size are currently being collected under the guidance of Dr. Steve Amor P. Geo. The till samples will be processed into heavy-mineral concentrates and examined for gold and other pathfinder indicator minerals by Over Burden Drilling Management.

The Wings Shear Property covers a 1 km zone of enhanced gold potential. This feature is shear-zone hosted (the Wings' Pond Shear Zone) and previous sampling is reported with assays up to 12.2 g/t Au from grab samples. There has been no previous drilling in this area.

EXPLORATION AND EVALUATION EXPENDITURES (CONTINUED)

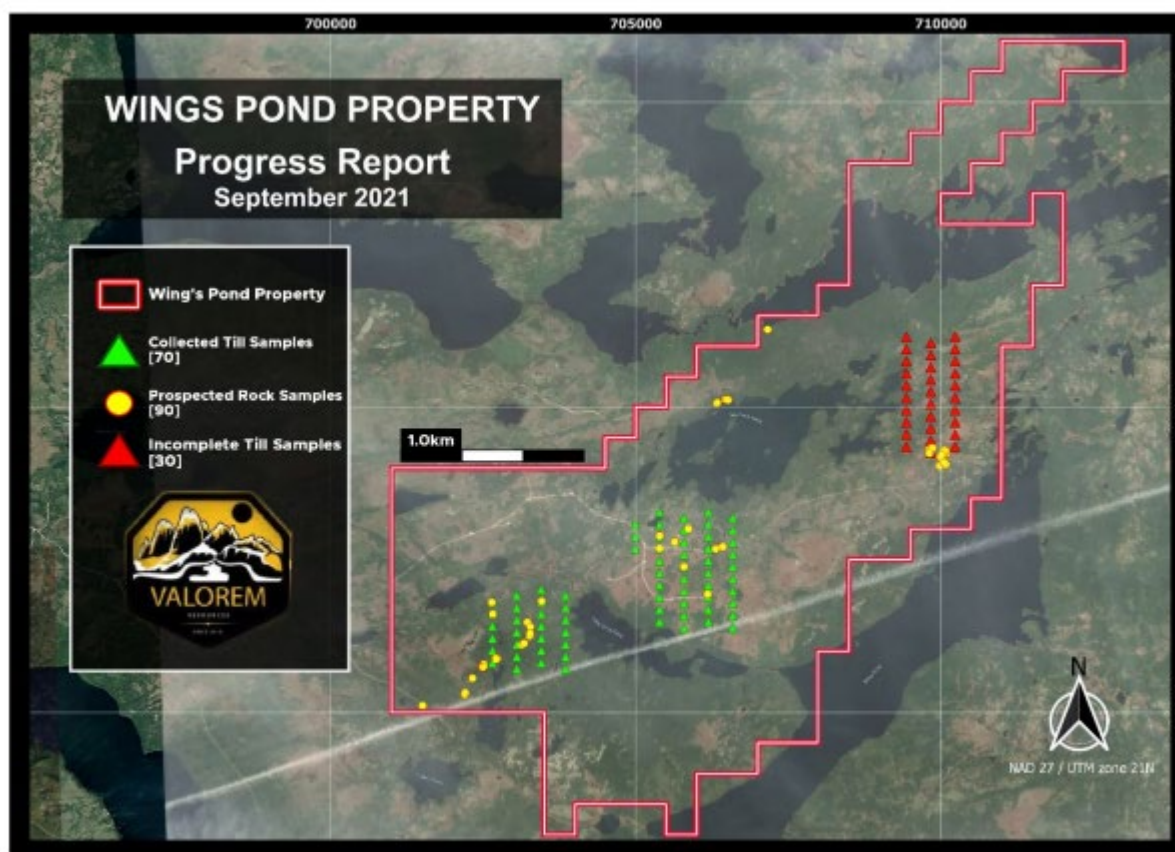

Wings Shear Property, Newfoundland and Labrador (Continued)

Wings Shear Property exploration update (continued)

On September 20, 2021, the Company reported that it resumed field exploration and remains on track for a fall drilling program on its Wings Shear property.

Highlights

- Stage one of exploration consisting of prospecting, bedrock mapping and till sampling is ongoing and set to conclude in the coming weeks.
- 70 of 100 till samples have been collected to date with several unrecorded mineralized zones being observed and sampled.

Map 1: Wings Shear Sample Completion Map Sept 2021

Qualified Person:

Dr. Stephen Amor, PhD, P. Geo., technical advisor to the Company, is the Qualified Person as defined by National Instrument 43-101 who has reviewed and approved the technical data for the Wings Shear Property.

RESULTS OF OPERATIONS

Six months ended October 31, 2021

During the six months ended October 31, 2021 (“2022”), and the six months ended October 31, 2020 (“2021”), the Company recorded a net loss and comprehensive loss of \$3,008,354 (2021 - \$347,248) which is mainly attributed to:

- i) Promotion expenses of \$501,226 (2021 - \$171,117) as the Company continued on a marketing campaign that commenced in September 2020 to raise investor awareness about the Company. To date, the Company has received strategic planning, financial consulting, media and market development, market awareness, marketing analysis, business development, digital media services, vendor management marketing, web development, and data analytics services from various marketing and consulting firms in an effort to inform investors about the Company’s plans to explore and develop its mineral properties.
- ii) Share-based compensation of \$1,396,582 (2021 - \$Nil) was recognized on the grant of 4,700,000 (2021 – Nil) stock options to three directors and an officer. Each option is exercisable at \$0.29 per share until May 27, 2026. All of the options vested upon date of grant. The estimated fair value of the options was measured using the Black-Scholes Option Pricing Model with the following assumptions: share price \$0.30; exercise price - \$0.29; expected life - 5 years; volatility – 516%; dividend yield - \$0; and risk-free rate – 0.90%.
- iii) Acquisition and exploration expenditures of \$849,939 were incurred in 2022 (2021 - \$1,329). The reader is advised to refer to the table in the beginning of the acquisition and exploration expenditures section of this MD & A for a detailed breakdown of these costs.

Six months ended October 31, 2021 (continued)

- iv) Consulting fees in 2022 decreased \$49,612, from \$107,992 in 2021 to \$58,380 in 2022. Consulting fees are comprised of \$57,000 (2021 - \$48,000) for the current CEO’s management fees, \$Nil (2021- \$48,000) for the former CEO’s management fees, and \$1,380 (2021 - \$11,992) for other consulting fees. The CEO fees in 2021 are higher as a result of increased business activities.
- v) Professional fees increased \$122,364, from \$47,000 in 2021 to \$169,364 in 2022. The professional fees consist of \$96,514 (2021 - \$14,000) for legal services, \$12,000 (2021 - \$22,000) for CFO fees, \$18,000 (2021 - \$10,000) for accounting services, \$30,025 (2021 - \$Nil) for corporate services, \$12,825 (2021 - \$1,000) for audit fees. Legal fees were the most significant component of professional fees and were primarily attributed to resolving the British Columbia Securities Commission’s halt trade order on April 30, 2021.
- vi) During the six months ended October 31, 2021, the Company did not report any cost of sales or gross profit from operations.

As at October 31, 2021, the Company had no continuing source of operating revenues. The Company has not paid any dividends on its common shares and has no present intention of paying dividends, as it anticipates that all available funds for the foreseeable future will be used to finance its business and exploration activities.

RESULTS OF OPERATIONS (CONTINUED)

Three month period ended October 31, 2021

During the three month period ended October 31, 2021 (“Q2-2022”), and the three month period ended October 31, 2020 (“Q2-2021”), the Company recorded a net loss and comprehensive loss of \$769,936 (Q2-2020 - \$271,060) which is primarily attributed to:

- i) Promotion expenses of \$235,972 (Q2-2021 - \$171,117) were incurred in Q2-2022. In September 2020, the Company embarked on a marketing campaign to raise investor awareness about the Company. To date, the Company has received strategic planning, financial consulting, media and market development, market awareness, marketing analysis, business development, digital media services, vendor management marketing, web development, and data analytics services from various marketing and consulting firms in an effort to inform investors about the Company’s plans to explore and develop its exploration and evaluation assets.
- ii) Professional fees in Q2-2022 were \$68,798 (Q2-2021 – \$25,000), a \$43,798 increase. The professional fees consist of \$6,000 (Q2-2021 - \$12,000) for CFO fees, \$9,000 (Q2-2021 - \$6,000) for accounting services, \$13,175 (Q2-2021 - \$Nil) for corporate services, \$37,623 (Q2-2021 - \$6,000) for legal services, and \$6,000 (Q2-2021 - \$1,000) for audit fees.
- iii) Exploration and acquisition expenditures of \$420,852 (Q2-2021 - \$1,329). The reader is advised to refer to the table in the beginning of the acquisition and exploration expenditures section of this MD & A for a detailed breakdown of these costs.

SUMMARY OF QUARTERLY FINANCIAL RESULTS

The following is a summary of selected financial information compiled from the condensed interim and audited financial statements:

	Three month period ended October 31, 2021 -\$-	Three month period ended July 31, 2021 -\$-	Three month period ended April 30, 2021 -\$-	Three month period ended January 31, 2021 -\$-

SUMMARY OF QUARTERLY FINANCIAL RESULTS (CONTINUED)

On February 12, 2021, the Company acquired 100% of 1267818, a British Columbia based exploration corporation focused on the acquisition of precious metal properties in Canada, via a three-cornered amalgamation. Pursuant to the terms of the amalgamation, the Company issued 30,000,000 common shares with a fair value of \$5,100,000 to the shareholders of 1267818 in exchange for all of the issued and outstanding shares of 1267818. The Company recorded an exploration and acquisition expense of \$5,100,000 based on the Company's significant accounting policy in Q4 ended April 30, 2021.

Working capital peaked at \$308,187 during Q3 ended January 31, 2021 during the last eight quarters as a result of the completing private placements. In Q2 ended October 31, 2020, the Company completed a private placement of 3,300,000 Units at \$0.10 per Unit for gross proceeds of \$330,000. A second 1st tranche private placement of 8,889,998 Units at \$0.10 per Unit for gross proceeds of \$889,000 was completed in Q3 ended January 31, 2021.

On March 26, 2021, the Company completed the 2nd tranche of a non-brokered private placement. The Company issued 1,100,000 units at \$0.115 per unit for gross proceeds of \$126,500.

The Company received a total of \$419,345 from the exercise of 2,731,660 warrants during the past eight quarters.

Total liabilities throughout the past eight quarters reached their highest level of \$705,905 during the most recent quarter ended October 31, 2021. Accounts payable and accrued liabilities represent a significant portion of the April 3, 2021 total liabilities. Amounts due to related parties of \$181,900 are included in the October 31, 2021 total liabilities. The Company's Interim CEO and former CFO provided consulting and professional fees and postponed payment for most of their services to help the Company preserve its cash. On February 12, 2021, the Company assumed debt of \$100,000 owed to a former Director of the Company's subsidiary, 1267818 B.C. Ltd. On February 25, 2021, the Company's former CEO agreed to permit the Company to write-off \$114,510 of outstanding consulting fees which helped improve the Company's financial position.

The most significant net loss and comprehensive loss during the past eight quarters was \$5,635,646, which occurred in Q4 ended April 30, 2021. Share-based compensation of \$490,035 was recognized on the grant of 2,250,000 stock options to three consultants. Promotion expenses of \$288,221 were also a significant component of the Q4-2021 net loss as the Company continues to embark on a marketing campaign to raise investor awareness about the Company. Quarterly expenditures increased due to the acquisition of 126718 BC Ltd.

LIQUIDITY AND CAPITAL RESOURCES

The Company has financed its operations to date through the issuance of common shares. The Company may continue to seek capital through various means including the issuance of equity and/or debt.

Net cash used in operating activities was \$280,905 during the six months ended October 31, 2021, compared to \$326,157 in the six months ended October 31, 2020. Cash used in operating activities were mainly attributed to \$501,226 (2020 - \$171,117) for promotion fees, \$58,380 (2020 - \$107,992) for consulting fees, and \$169,364 (2020 - \$47,000) for professional fees. The aforementioned expenditures were primarily offset by a \$497,110 decrease in prepaid expenses, \$16,655 decrease in GST receivable, \$41,902 increase in related party liabilities and a \$144,700 increase in accounts payable and accrued liabilities.

Net cash provided by financing activities during the six months ended October 31, 2021, was \$220,505 (2020 - \$353,908). The Company received a total of \$220,505 (2020 - \$Nil) from the exercise of 1,688,500 (2020 - Nil) warrants in the six months ended October 31, 2021. In the six months ended October 31, 2020, the Company received total cash of \$353,908 issued for shares pursuant to completion of a private placement.

LIQUIDITY AND CAPITAL RESOURCES (CONTINUED)

Although the Company has successfully completed equity financings in the past, historical transactions are not necessarily indicative of future performance. The Company completed the acquisition of 1267818 and acquired various mineral claims in British Columbia and based on the Company's accounting policy, expensed exploration and evaluation acquisition costs of \$5,100,000. The resulting increase in the Company's overall deficit may impact the Company's ability to finance in the future.

RELATED PARTY TRANSACTIONS

Key management personnel are the Directors and Officers of the Company. Certain key management personnel provide services through companies that they control. The following transactions are in the normal course of operations and are measured at their exchange amount, which is the amount agreed upon by the transacting parties.

The following amounts, which are unsecured and non-interest bearing, are reported in accounts payable and accrued liabilities, and related party liabilities:

	October 31, 2021 \$	October 31, 2020 \$
Tony Louie - Director and Interim CEO	160,300	139,998
Tammy Gillis – CFO	21,600	-
DR Financial Services - A company controlled by former Former CFO (Derick Sinclair) of the Company	82,215	108,215
	264,115	248,213

Loan payable

On February 12, 2021, the Company assumed debt of \$100,000 owed to Eugene Beukman, a former Director of the Company's subsidiary, 1267818. The debt is non-interest bearing, unsecured and due on demand.

The following are the transactions with related parties during the six months ended October 31, 2021, and 2020:

	Six months ended October 31, 2021 \$	Six months ended October 31, 2020 \$
Consulting fees to Tony Louie, Director and Interim CEO	57,000	48,000
Professional fees to Tammy Gillis, CFO	12,000	
Accounting and professional fees to DR Financial Services, a company controlled by Derick Sinclair, a former Director and former CFO of the Company	-	32,000
Consulting fees to Gregory Thomas, a former Director and CEO	-	48,000
	69,000	128,000

CRITICAL ACCOUNTING ESTIMATES

The preparation of the Company's annual consolidated financial statements in conformity with IFRS requires management to make judgments, estimates and assumptions that affect the reported amounts of assets, liabilities and contingent liabilities at the date of the consolidated financial statements and reported amounts of revenues and expenses during the reporting period. Estimates and assumptions are continuously evaluated and are based on management's experience and other factors, including expectations of future events that are believed to be reasonable under the circumstances; however, actual outcomes can differ from these estimates.

Information about critical judgments and estimates in applying accounting policies that have the most significant risk of causing material adjustment to the carrying amounts of assets and liabilities included in the preparation of these consolidated financial statements are discussed below:

Usage of the going concern assumption - The assessment of whether the going concern assumption is appropriate requires management to take into account all available information about the future, which is at least, but not limited to, twelve months from the end of the reporting period. The Company is aware that material uncertainties related to events or conditions may cast significant doubt upon the Company's ability to continue as a going concern.

FINANCIAL RISK MANAGEMENT

The Company is exposed to minimal financial instrument related risks. The Board of Directors approves and monitors the risk management processes, inclusive of documented investment policies, counterparty limits, and controlling and reporting structures. The type of risk exposure and the way in which such exposure is managed is provided as follows:

Credit risk

Credit risk is the risk that one party to a financial instrument will fail to discharge an obligation and cause the other party to incur a financial loss. The Company's primary exposure to credit risk is on its cash held in bank accounts and other receivables. The Company's cash is deposited in bank account held with major banks in Canada. As most of the Company's cash is held by a bank there is a concentration of credit risk. This risk is managed by using major banks that are high-quality financial institution as determined by rating agencies. Management believes that its credit risk is not significant.

Liquidity risk

Liquidity risk is the risk that the Company will not be able to meet its obligations as they become due. The Company's ability to continue as a going concern is dependent on management's ability to raise required funding through future equity issuances. The Company manages its liquidity risk by forecasting cash flows from operations and anticipating any investing and financing activities. Management and the Board of Directors are actively involved in the review, planning and approval of significant expenditures and commitments. On October 31, 2021, the Company had a cash balance of \$21,910 (April 30, 2021 - \$82,310) to settle current liabilities of \$705,905 (April 30, 2021 - \$519,303). All the Company's financial liabilities have contractual maturities of less than 30 days and are subject to normal trade terms.

Currency risk

The Company currently has minimal foreign exchange risk as it conducts the majority of its business within Canada and in Canadian dollars.

Interest rate risk

The Company is not currently exposed to significant interest rate risk.

FINANCIAL RISK MANAGEMENT (CONTINUED)

Capital Management

The Company manages its capital structure and adjusts it, based on the funds available to the Company, in order to support the acquisition, exploration, and development of resource properties. The aforementioned exploration and evaluation work will require additional financial resources. Management reviews its capital management approach on an ongoing basis and believes that this approach, given the relative size of the Company, is reasonable. The Board of Directors does not establish quantitative return on capital criteria for management, but rather relies on the expertise of the Company's management to sustain future development of the business.

The Company is not subject to externally imposed capital requirements. There were no changes in the Company's approach to capital management during the six months ended October 31, 2021.

MANAGEMENT'S RESPONSIBILITY FOR FINANCIAL INFORMATION

The Company's unaudited condensed interim consolidated financial statements and the other financial information included in this management report are the responsibility of the Company's management and have been examined and approved by the Board of Directors. The unaudited condensed interim consolidated financial statements were prepared by management in accordance with IFRS and include certain amounts based on management's best estimates using careful judgment. The selection of accounting principles and methods is management's responsibility.

Management recognizes its responsibility for conducting the Company's affairs in a manner to comply with the requirements of applicable laws and established financial standards and principles, and for maintaining proper standards of conduct in its activities. The Board of Directors supervises the financial statements and other financial information through its audit committee.

MANAGEMENT'S RESPONSIBILITY FOR FINANCIAL INFORMATION (CONTINUED)

This committee's role is to examine the financial statements and recommend that the Board of Directors approve them, to examine the internal control and information protection systems and all other matters relating to the Company's accounting and finances. In order to do so, the audit committee meets annually with the external auditors, with or without the Company's management, to review their respective audit plans and discuss the results of their examination. This committee is responsible for recommending the appointment of the external auditors or the renewal of their engagement.

RISKS AND UNCERTAINTIES

Risk is inherent in all business activities and cannot be entirely eliminated. Our goal is to enable the Company's business processes and opportunities by ensuring that the risks arising from our business activities, the markets and political environments in which we operate are mitigated. The risks and uncertainties described in the Annual MD&A are considered by management to be the most important in the context of the Company's business and are substantially unchanged as of the effective date of this MD&A. Those risks and uncertainties are not inclusive of all the risks and uncertainties the Company may be subject to and other risks may apply.

GLOBAL PANDEMIC

In March 2020, the World Health Organization declared coronavirus COVID-19 a global pandemic. This contagious disease outbreak, which has continued to spread, and any related adverse public health developments, has adversely affected workforces, economies, and financial markets globally, potentially leading to an economic downturn. The impact on the Company is not currently determinable but management continues to monitor the situation.
