BioMark Receives NSERC Engage Grant for Raman Enhancement with Dr. SAFIEDDIN SAFAVI-NAEINI

Vancouver, British Columbia – (April 7, 2015)–BioMark Diagnostics Inc. (CSE: BUX, FSE: 20B, OTCQB : BMKDF) is pleased to announce that it has received a grant from NSERC to partner with Dr. Safieddin Safavi-Naeini for further enhancement of its Raman Spectroscopy system.

Rashid Ahmed, President and CEO, comments: “Our goal is to expand the global utility of BioMark’s surface enhanced Raman system by incorporating important technical features that could increase our capability to help transfer data from our worldwide studies. Dr Safavi-Naeini’s team at the University of Waterloo is a perfect group to help BioMark in this critical project.”

Dr. Safieddin Safavi-Naeini, Ph.D. is Professor in the Electrical and Computer Engineering Department and holds NSERC/Blackberry Industrial Research Chair in Intelligent Integrated Radio and Photonics at the University of Waterloo. Dr. Safavi-Naeimi is a leading hardware expert.

BioMark is very thankful for the continued support from the Canadian government.

About National Sciences and Engineering Research Council of Canada (NSERC) Engage Grants

NSERC Engage Grants are intended to foster the development of new research partnerships between academic researchers and companies and supports research and development projects aimed at addressing a company-specific problem.

About BioMark Diagnostics Inc.

BioMark is developing proprietary, non-invasive, and accurate cancer diagnostic solutions which can help detect, monitor and assess treatment for cancer, early and cost effectively. BioMark is currently conducting Phase 3 multi site clinical trial for lung, breast, gastro intestinal and prostate cancers. Additionally trials related to assess response to lung cancer treatment and surgical interventions are being established.
