

Liquid Biopsy Company BioMark to Present at the 3rd Annual Congress of the International Society of Liquid Biopsy to Be Held October 22, 2021

Vancouver, British Columbia--(Newsfile Corp. - October 18, 2021) - BioMark Diagnostics Inc. (CSE: BUX) (FSE: 20B) (OTC Pink: BMKDF) ("BioMark") an advanced stage liquid biopsy company with a focus on hard to detect and treat cancers is pleased to announce that it will hold a virtual stand at the III annual Congress of the International Society of Liquid Biopsy to showcase its innovative technology to a key audience with compelling data from previous studies that demonstrates the ability of its assays to detect early-stage lung cancer at very high levels of sensitivity and specificity.

"BioMark is proud to participate in this premiere event that aims to address the principal advances in the world of the liquid biopsy. The conference to be held virtually on October 22, 2021, will present the best clinical practices related to liquid biopsy and the latest advanced on cellular and molecular diagnostic technologies. BioMark is a proud sponsor of the event and will have Dr. Wishart, Director at The Metabolomics Innovation Centre (TMIC) present on the role of metabolomics in liquid biopsy with highlights on our dynamic and clinically applicable early lung cancer liquid biopsy assay," says Rashid Bux, CEO of BioMark.

"The company intends to expand its visibility and cultivate collaborations with key opinion leaders and institutions as it prepares for a large clinical study intended to validate clinical utility of its early lung cancer detection. This study is expected to start later this fall with pivotal results expected early in 2022 that could establish the foundation of our blood-based assay for lung cancer screening," says Rashid Bux.

About BioMark Diagnostics Inc.

BioMark is developing proprietary, non-invasive, and accurate cancer diagnostic solutions which can help detect, monitor and assess treatment early for hard to detect and treat cancers using liquid biopsy. The technology can also be used for measuring response to treatment and potentially for serial monitoring for cancer survivors.

Further information about BioMark is available under its profile on the SEDAR website www.sedar.com and on the CSE website <https://thecse.com/>.
