CRITICAL ACCOUNTING ESTIMATES AND JUDGEMENTS

The preparation of these financial statements in conformity with IFRS requires management to make judgments, estimates and assumptions which affect the reported amounts of assets and liabilities and the disclosure of contingent assets and liabilities at the date of the financial statements and revenues and expenses for the periods reported. The estimates and associated assumptions are based on historical experience and various other factors that are believed to be reasonable under the circumstances, the results of which form the basis of making the judgments about carrying values of assets and liabilities that are not readily apparent from other sources. Significant areas requiring the use of management estimates include the determination of deferred income tax assets and liabilities, assumptions used in valuing options in share-based compensation calculations and assumptions used in determining the value of the convertible debentures. Actual results could differ from these estimates.

The estimates and underlying assumptions are reviewed on an ongoing basis. Revisions to accounting estimates are recognized in the year in which the estimate is revised if the revision affects only that period or in the period of the revision and further periods if the review affects both current and future periods.

Critical accounting judgements are accounting policies that have been identified as being complex or involve subjective judgments or assessments with a significant risk of material adjustment in the next year. A significant use of judgement is the ability of the Company to continue as a going concern.

FINANCIAL INSTRUMENTS

Classification and fair value

The Company's financial instruments consist of cash, amounts receivable - excluding GST recoverable, accounts payable and accrued liabilities, due to related parties and note payable. Financial instruments are classified into one of the following categories: FVTPL, FVTOC, or amortized cost. The carrying values of the Company's financial instruments are classified into the following categories:

The following table summarized the carrying values of the Company's financial instruments:

	December 31, 2023	September 30, 2023
	\$	\$
Financial assets at fair value through profit or loss (i)	61,349	174,283
Financial assets measured at amortized cost (ii)	-	-
Financial liabilities measured at amortized cost (iii)	132,365	181,700

(i) Cash

(ii) Amounts receivable excluding GST recoverable

(iii) Accounts payable and accrued liabilities, due to related parties and note payable

Financial instruments measured at fair value on a recurring basis are classified into one of three levels in the fair value hierarchy based on the degree to which the inputs used to determine the fair value are observable. The three levels of the fair value hierarchy are:

Level 1 - quoted prices (unadjusted) in active markets for identical assets or liabilities;

Level 2 - inputs other than quoted prices included in Level 1 that are observable for the asset or liability, either directly or indirectly; and

Level 3 - inputs for the asset or liability that are not based on observable market data (unobservable input).

Cash is classified as Level 1. The Company does not have any financial assets classified as Level 2 or 3.

The fair value of accounts payable, due to related parties, and note payable approximate their book values because of the short-term nature of these instruments.

Financial risk management

The Company's financial risks arising from its financial instruments are credit risk, liquidity risk, and interest rate risk. The Company's exposure to these risks and the policies on how to mitigate these risks are set out below. Management manages and monitors these exposures to ensure appropriate measures are implemented in a timely and effective manner.

Currency risk

Liquidity risk

Liquidity risk is the risk that the Company will not meet its obligations associated with its financial liabilities as they fall due. The Company manages liquidity risk through the management of its capital structure and financial leverage. Management closely monitors the liquidity position and expects to have adequate sources of funding to finance the Company's projects and operations. As at December 31, 2023, the Company had a working capital of \$15,321 (September 30, 2023 - \$76,363). As a result, the Company is not subject to any significant liquidity risk.
