MANAGEMENT'S DISCUSSION AND ANALYSIS

SIX MONTHS ENDED MARCH 31, 2023

The following Management's Discussion & Analysis ("MD&A") is intended to assist in the understanding of the trends and significant changes in the financial condition and results of the operations of Pushfor Tech Inc. ("PUSH" or the "Company") for the six months ended March 31, 2023.

On June 9, 2022, the Company changed its name to Pushfor Tech Inc. and consolidated its outstanding common shares on a 10 to 1 basis. On January 16, 2023, the Company further consolidated its common shares on a 2-to-1 basis. The presentation of shares, options, warrants, and related information have been presented retroactively.

This MD&A should be read in conjunction with the Company's financial statements for the most recent year ended September 30, 2022, and for the same six-month period ended March 31, 2023, which are presented in Canadian dollars and have been prepared in accordance with International Financial Reporting Standards ("IFRS") issued by the International Accounting Standards Board ("IASB") and Interpretations of the International Financial Reporting Interpretations Committee ("IFRIC"). All monetary amounts, unless otherwise indicated, are expressed in Canadian dollars. The Company's financial statements and other important information of the Company are available at www.sedar.com. This MD&A has been prepared effective as of May 29, 2023.

FORWARD-LOOKING STATEMENTS

The information set forth in this MD&A contains statements concerning future results, future performance, intentions, objectives, plans and expectations that are, or may be deemed to be, forward-looking statements. These statements concerning possible or assumed future results of operations of the Company are preceded by, followed by or include the words 'believes,' 'expects,' 'anticipates,' 'estimates,' 'intends,' 'plans,' 'forecasts,' or similar expressions. Forward-looking statements are not guarantees of future performance. These forward-looking statements involve a number of risks and uncertainties, including the impact of general economic conditions, industry conditions, and changes in Canadian and foreign laws and regulations, increased competition, foreign exchange, and interest rates and stock market volatility. Assumptions relating to the foregoing involve judgments with respect to, among other things, future economic, competitive and market conditions and future business decisions, all of which are difficult or impossible to predict accurately and while many of which underlying the forward-looking statements are reasonable, any of the assumptions could prove inaccurate. These factors should be considered carefully, and readers should not place undue reliance on forward-looking statements. The Company is not obligated to update or revise any forward-looking information, whether as a result of new information, future events or otherwise, except as required by applicable securities laws.

CORPORATE DEVELOPMENT

Options

On January 19, 2023, the Company announced to grant 900,000 stock options at an exercise price of \$0.10 per share. These options were not issued and the Company decided to cancel the issuance during the three months ended March 31, 2023

Private placement

On February 1, 2023, the Company closed the first tranche of a non-brokered private placement for the issuance of 2,950,000 units for gross proceeds of \$221,250. Each unit is comprised of one common share and one share purchase warrant. Each warrant can be exercised into one common share at \$0.10 per share in two years after issuance.

(ii) During 2022, the Company incurred \$42,375 software development expenditures after an acquisition of a subsidiary which was in the industry of software development. The Company decided to terminate this line of business at the year ended September 30, 2022. As a result, software development expenditures decreased in 2023.

(iii) Share-based compensation varies from time to time depending on the timing of options granted and vesting.

LIQUIDITY AND CAPITAL RESOURCES

As of March 31, 2023, the Company had a working capital deficiency of \$95,774 (September 30, 2022 – working capital deficiency of \$374,327). The Company is not subject to external working capital requirements.

Management realizes the liquidity on hand will not be adequate to finance the Company's operations to achieve its long-term business objectives. The Company intends to eliminate the working capital deficiency by equity financing and/or long term debt financing.

While the Company was able to raise financing when needed in the past, there is no guarantee that the Company can do so in the future.

		2023	2022
		\$	\$
Officers	Consulting	84,584	152,956

During the three months ended December 31, 2022, the Company issued 200,000 common shares and paid cash of USD 20,000 to settle amounts payable to two former officers/directors. As a result, the Company recorded a gain of settlement of \$224,832 accordingly.

The CEO of the Company participated in the private placement completed in February 2023 and subscribed 2,000,000 common shares for \$150,000.

As of March 31, 2023, the Company had a balance of \$13,300 (September 30, 2022 - \$279,045) owing to a formal officer of the Company.

OUTSTANDING SHARE DATA

As of the date of this MD&A, the Company has 12,210,986 common shares issued and outstanding.

OFF-BALANCE SHEET ARRANGEMENTS

The Company does not have off-balance sheet arrangements.

PROPOSED TRANSACTIONS

The Company does not have proposed transactions that have material effects to the Company to discuss at this time.

SIGNIFICANT ACCOUNTING POLICIES AND CHANGES IN ACCOUNTING POLICIES

The Company has not adopted new accounting policies since its recent year ended September 30, 2022. See Note 2 of the Company's annual financial statements for the year ended September 30, 2022, for details.

FINANCIAL INSTRUMENTS AND CAPITAL MANAGEMENT

The Company is exposed in varying degrees to a variety of financial instrument related risks. The Board of Directors approves and monitors the risk management processes, inclusive of documented investment policies, counterparty limits and controlling and reporting structures. The type of risk exposure and the way in which such exposure is managed is provided as follows:

Market Risk

Market risk is the risk that the fair value of, or future cash flows from the Company's investment in marketable securities will significantly fluctuate because of changes in marketplaces. The Company is exposed to market risk or equity risk or equity price risk in trading its investment and unfavorable market conditions could result in dispositions of investments at less than favorable prices. Additionally, the Company marks its investments to market in accordance with accounting policies at each reporting period. This process could result in significant write-downs of the Company's investment over one or more reporting periods, particularly during periods of declining markets.

Market risk includes price risk, interest rate risk and currency risk as well as factors specific to an individual investment or its issuer or risk specific to a certain market. Market risk is managed principally through diversification of investments. Management monitors the overall market risk position on a quarterly basis.

Price Risk

The Company is exposed to price risk in relation to listed marketable securities held as FVTPL investment.

Currency Risk

Currency risk is the risk that the fair values of future cash flows of a financial instrument will fluctuate because they are denominated in currencies that differ from the respective functional currency. The Company is exposed to currency risk on cash and note receivable denominated in United States dollars. A change of 10% of the foreign exchange rate between US\$ and Canadian \$ will have an impact of \$1,170 to the Company's statements of loss and comprehensive loss.

Financial instruments denominated in USD	March 31, 2023	September 30, 2022
	\$	\$
Cash	1,640	4,755
Accounts payable	(13,300)	(203,578)
	(11,660)	(198,823)

Interest Rate Risk

Interest rate risk is the risk that the fair values or future cash flows of a financial instrument will fluctuate because of changes in market interest rates. The Company's exposure to interest rate risk is minimal as the Company does not have variable interest-bearing asset or debt.

Credit Risk

Credit risk is the risk that one party to a financial instrument will fail to discharge an obligation and cause the other party to incur a financial loss. The Company's risk is its cash and note receivable. The Company evaluates the creditworthiness of the counterparty, the value of any collateral, and the fair value of the credit loss of the note receivable. The Company is not subject to material credit risk as at March 31, 2023.

Liquidity Risk

Liquidity risk is the risk that the Company may be unable to meet its financial obligations as they fall due. The Company reviews its working capital position regularly to ensure there is sufficient capital to meet short-term business requirements, taking into account its anticipated cash flows from operations and its holding of cash.

Classification of Financial Instruments

Financial assets and liabilities included in the statement of financial position are as follows:

	March 31, 2023	September 30, 2022
Financial assets	\$	\$
FVTPL:		
Cash	40,270	10,896
Investments, current	680	907
Financial liabilities- amortized		
Accounts payable and accrued liabilities	61,724	386,130
Note payable	76,000	-

Fair Value

The fair value of the Company's financial assets and liabilities approximate the carrying amount whether due to their short-term nature or because the interest rates applied to measure their carrying amount approximate current market rates.

MANAGEMENT'S DISCUSSION AND ANALYSIS
SIX MONTHS ENDED MARCH 31, 2023

Financial instruments measured at fair value are classified into three levels in the fair value hierarchy according to the relative reliability of the inputs used to estimate the fair values. The three levels of the fair value hierarchy are:

- | | |
|---------|--|
| Level 1 | Unadjusted quote prices in active markets for identical assets or liabilities; |
| Level 2 | Inputs other than quoted prices that are observable for the asset or liability, either directly or indirectly; and |
| Level 3 | Inputs that are not based on observable market data. |

Investments consist of common shares of Canadian public companies. Investments in common shares are measured using level 1 fair value measurements.

The Company does not have any financial instruments subject to level 2 or level 3 fair value measurements.

RISK FACTORS

Equity Investment Risks

An investment in the common shares of the Company should be considered highly speculative, not only due to the Company's limited business history but also due to the consideration that equity investments are always subject to varying degrees of risk. These risks may include changes in general economic conditions such as the availability and cost of financing capital; changes in local conditions, such as employment, changes to tax laws, and changes to incentive programs related to the areas in which the Company intends to invest. In addition, financial difficulties of other equity investors result in distress sales, which may depress the stocks in which the Company operates.

Dilution to the Existing Shareholders

The Company is very likely to issue its common stock to raise for additional capital. The issuance of additional equity securities by the Company could result in a significant dilution in the equity interests of existing shareholders.

Reliance on Management's Expertise

The Company strongly depends on the business acumen and investing expertise of its management team and there is little possibility that this dependence will decrease in the near term. The loss of the services of any member of such team could have a material adverse effect on the Company. The Company does not have any key person insurance in place for management.

FINANCIAL AND DISCLOSURE CONTROLS AND PROCEDURES

Venture issuers are not required to include representations relating to the establishment and maintenance of disclosure controls and procedures ("DC&P") and internal control over financial reporting ("ICFR"), as defined in National Instrument 52-109 Certification of Disclosure in Issuer's Annual and Interim Filings ("NI-52-109"). In particular, the Company's certifying officers are not making any representations relating to the establishment and maintenance of:

- i) Controls and other procedures designed to provide reasonable assurance that information required to be disclosed by the Company in its annual filings, interim filings or other reports filed or submitted under securities legislation is recorded, processed, summarized, and reported within the time periods specified in securities legislation; and
- ii) A process to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with the Company's generally accepted accounting principles.

The Company's certifying officers are responsible for ensuring that processes are in place to provide them with sufficient knowledge to support the representations they make. Investors should be aware that inherent limitations on

the ability of the Company's certifying officers to design and implement on a cost effect basis DC&P and ICFR as defined in NI 52-109 may result in additional risks to the quality, reliability, transparency and timeliness of interim and annual filings and other reports provided under securities legislation.
