

CannaVcell Naturally Produces Cannabis' Active Ingredients Without Growing the Plant Itself

Webinar with Dr. Zaki Rakib, Co-Founder and CEO of CannaVcell and Dr. Yochi Hagay, CTO. Wednesday October 2, 2019.
8:00 AM - 9:00 AM Pacific Daylight Time

Vancouver, British Columbia--(Newsfile Corp. - September 30, 2019) - CannaVcell Sciences Inc. (CSE: CNVC) ("CannaVcell") announced last Thursday, the first production of Cannabis cells in suspension, with a cannabinoid profile identical to that of the original cannabis plant - without the need to grow the plant itself. The achievement was possible using the breakthrough and patented BioHarvest's technology (CannaVcell is the worldwide exclusive licensee of the technology for cannabis application). (See NR: www.cannavcell.com).

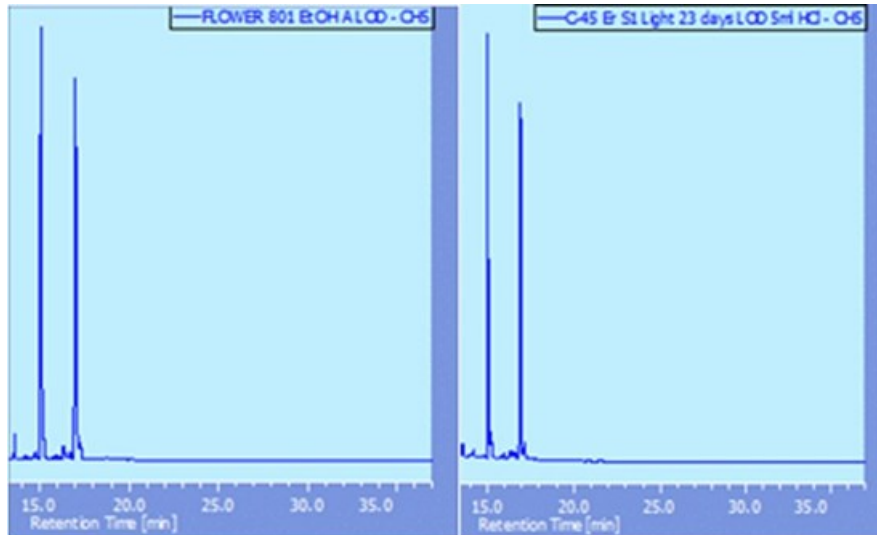

Figure 1 presents identical THCA and CBDA profiles for cannabis cells grown in liquid suspension as those found in actual cannabis flowers.

The Bioharvest technology, called biofarming, mirrors nature without any solvent extraction, genetic modification or synthetic molecular processing. In regard to Cannabis, biofarming end result is a cannabis powder with the identical composition of cannabinoids as those found in the cannabis plant. The original plant is used only once to collect its cannabis cells with the active ingredients that are subsequently perpetually reproduced with the same quality and consistency.

Dr. Yochi Hagay, CTO of BioHarvest. Dr. Hagay added, "We are the first company in the world that has been able to grow cannabis cells that produce six (6) different types of cannabinoids THCA, THC, CBDA, CBD, CBN, CBC, all of which are identical to the cannabinoids produced in the relevant Cannabis flower."

Dr. Zaki Rakib, Co-Founder & CEO: "This achievement marks a turning point in the Cannabis Community. The revolution is here, is now! I invite the public and the Cannabis Industry, to join me for a live webinar this Wednesday October 2nd, 2019 at 8:00 AM Pacific Daylight Time."

About Canna-V-Cell Sciences Inc.

Based in Vancouver BC, Canna-V-Cell Sciences Inc. (CNVC) is the exclusive Cannabis worldwide licensee of the proprietary and patent protected BioHarvest technology. It is the first and only industrial large-scale plant cell growth technology capable of directly and constantly producing the active plant ingredients without the necessity to grow the plant itself. By adopting this technology and building adequate cells production capacity, Canna-V-Cell's objective is to become the leading supplier of Cannabis for both the medicinal and recreational legal use.

Canna-V-Cell Sciences Inc.
