FINANCIAL STATEMENTS

(Expressed in Canadian dollars)
For the years ended August 31, 2016 and 2015

DALE MATHESON CARR-HILTON LABONTE LLP

CHARTERED PROFESSIONAL ACCOUNTANTS

Independent Auditor's Report

To the Shareholders of Zanzibar Gold Inc. (formerly Moshi Mountain Industries Ltd.):

We have audited the accompanying financial statements of Zanzibar Gold Inc. (formerly Moshi Mountain Industries Ltd.), which comprise the statements of financial position as at August 31, 2016 and 2015, and the statements of loss and comprehensive loss, changes in shareholders' equity and cash flows for the years then ended, and a summary of significant accounting policies and other explanatory information.

Management's Responsibility for the Financial Statements

Management is responsible for the preparation and fair presentation of these financial statements in accordance with International Financial Reporting Standards, and for such internal control as management determines is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

Auditor's Responsibility

Our responsibility is to express an opinion on these financial statements based on our audits. We conducted our audits in accordance with Canadian generally accepted auditing standards. Those standards require that we comply with ethical requirements and plan and perform the audit to obtain reasonable assurance about whether the financial statements are free from material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the financial statements. The procedures selected depend on the auditor's judgment, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error. In making those risk assessments, the auditor considers internal control relevant to the entity's preparation and fair presentation of the financial statements in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the entity's internal control. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of accounting estimates made by management, as well as evaluating the overall presentation of the financial statements.

We believe that the audit evidence we have obtained in our audits is sufficient and appropriate to provide a basis for our audit opinion.

Opinion

In our opinion, the financial statements present fairly, in all material respects, the financial position of Zanzibar Gold Inc. (formerly Moshi Mountain Industries Ltd.) as at August 31, 2016 and 2015, and its financial performance and its cash flows for the years then ended in accordance with International Financial Reporting Standards.

Emphasis of Matter

Without qualifying our opinion, we draw attention to Note 1 in the financial statements which describe certain conditions that indicate the existence of a material uncertainty that may cast significant doubt about Zanzibar Gold Inc.'s ability to continue as a going concern.

The accompanying notes are an integral part of these financial statements.

Notes to the Financial Statements For the Years Ended August 31, 2016 and 2015 (Expressed in Canadian Dollars)

1. NATURE AND CONTINUANCE OF OPERATIONS

Zanzibar Gold Inc. (formerly Moshi Mountain Industries Ltd.) (the "Company") was incorporated on August 21, 2014 and Moshing Capital Inc. was incorporated on August 22, 2014 under the Business Corporations Act of British Columbia. Under the plan of arrangement (Note 10), the companies amalgamated on March 2, 2015 to form an amalgamated company. The head office of the Company is 700-595 Howe Street, Vancouver, B.C. V6C 2T5. The Company is in the exploration and development of natural resource properties in Tanzania.

These financial statements have been prepared on a going concern basis, which assumes that the Company will be able to realize its assets and discharge its liabilities in the normal course of business. As at August 31, 2016, the Company has not generated any revenues from operations, has a working capital deficiency of \$208,278 and accumulated deficit of \$264,673.

The continued operations of the Company are dependent on its ability to generate future cash flows or obtain additional financing. Management assesses that sufficient working capital will be obtained from external financing to meet the Company's liabilities and commitments as they become due, although there is a risk that additional financing will not be available on a timely basis or on terms acceptable to the Company. These financial statements do not reflect any adjustments that may be necessary if the Company is unable to continue as a going concern. These conditions indicate the existence of a material uncertainty that may cast significant doubt on the Company's ability to continue as a going concern.

If the going concern assumption is not appropriate for these financial statements, then adjustments would be necessary to the carrying value of assets and liabilities, the reported expenses, and the classifications used could be material.

These financial statements were authorized for issue on November 29, 2016 by the directors of the Company.

2. BASIS OF PREPARATION

These financial statements have been prepared using accounting policies consistent with International Financial Reporting Standards ("IFRS") as issued by the International Accounting Standards Board ("IASB"). The significant accounting policies applied in these financial statements are based on the IFRS issued and effective as of August 31, 2016.

These financial statements have been prepared on a historical cost basis, modified where applicable. In addition, these financial statements have been prepared using the accrual basis of accounting.

The financial statements are presented in Canadian Dollars, which is also the Company's functional currency, unless otherwise indicated.

Notes to the Financial Statements For the Years Ended August 31, 2016 and 2015 (Expressed in Canadian Dollars)

3. SIGNIFICANT ACCOUNTING JUDGMENTS, ESTIMATES AND ASSUMPTIONS

The preparation of these financial statements in conformity of IFRS requires management to make judgments, estimates and assumptions that affect the reported amounts of assets, liabilities and contingent liabilities at the date of the financial statements and reported amounts of revenues and expenses during the reporting period. Estimates and assumptions are continuously evaluated and are based on management's experience and other factors, including expectations of future events that are believed to be reasonable under the circumstances. However, actual outcomes can differ from these estimates

a) Significant judgments

The preparation of financial statements in accordance with IFRS requires the Company to make judgments, apart from those involving estimates, in applying accounting policies. The most significant judgments in applying the Company's financial statements include the assessment of the Company's ability to continue as a going concern and whether there are events or conditions that may give rise to significant uncertainty and the classification / allocation of expenditures as exploration and evaluation expenditures or operating expenses.

b) Significant estimates and assumptions

The Company makes estimates and assumptions about the future that affect the reported amounts of assets and liabilities. Estimates and judgments are continually evaluated based on historical experience and other factors, including expectations of future events that are believed to be reasonable under the circumstances. In the future, actual experience may differ from these estimates and assumptions.

The effect of a change in an accounting estimate is recognized prospectively by including it in comprehensive income in the period of the change, if the change affects that period only, or in the period of the change and future periods, if the change affects both.

Estimates and assumptions where there is significant risk of material adjustments to assets and liabilities in future accounting periods include the recoverability of the carrying value of exploration and evaluation assets, fair value measurements for financial instruments, the recoverability and measurement of deferred tax assets and provisions for restoration and environmental obligations.

4. SIGNIFICANT ACCOUNTING POLICIES

a) Foreign Currency Translation

The Company's presentation currency and the functional currency of all of its operations is the Canadian dollar as this is the principal currency in which funds from financing activities are generated and receipts from operating activities are usually retained.

Transactions in foreign currencies are initially recorded in the Company's functional currency at the exchange rate at the date of the transaction. Monetary assets and liabilities denominated in foreign currencies are translated at the currency rate of exchange at the end of each reporting period. Non-monetary items that are measured in terms of historical cost in a foreign currency are translated using the exchange rates as at the dates of the initial transactions. Non-monetary items measured at fair value in a foreign currency are translated using the exchange rates at the date when fair value is determined.

All gains and losses on translation of these foreign currency transactions are included in profit or loss.

Notes to the Financial Statements For the Years Ended August 31, 2016 and 2015 (Expressed in Canadian Dollars)

4. SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)

b) Cash

Cash includes cash on hand, deposits held with financial institutions and other short-term, highly liquid investments with original maturities of three months or less that are readily convertible to known amount of cash and subject to an insignificant risk of change value.

c) Exploration and Evaluation Assets

The Company's exploration and evaluation assets consist of mineral rights acquired and exploration and evaluation expenditure capitalized in respect of projects that are at the exploration and evaluation stage.

No amortization charge is recognized in respect of exploration and evaluation assets. These assets are transferred to mine development assets in property, plant and equipment upon the commencement of mine development.

Exploration and evaluation expenditures in the relevant area of interest comprises costs which are directly attributable to:

- Acquisition;
- Surveying, geological, geochemical and geophysical;
- Exploratory drilling;
- Land maintenance;
- Sampling; and
- Assessing technical feasibility and commercial viability.

Exploration and evaluation expenditures related to an area of interest where the Company has tenure are capitalized as intangible assets and are initially recorded at cost less impairment.

Exploration and evaluation expenditures also includes the costs incurred in acquiring mineral rights, the entry premiums paid to gain access to areas of interest and amounts payable to third parties to acquire interests in existing projects. Capitalized costs, including general and administrative costs, are only allocated to the extent that those costs can be related directly to operational activities in the relevant area of interest.

Where the Company has entered into option agreements to acquire interests in mineral properties that require periodic share issuances, amounts un-issued are not recorded as liabilities since they are issuable entirely at the Company's option. Option payments are recorded as mineral property costs when the payments are made and share issuances are recorded as mineral property costs using the fair market value of the Company's common shares at the date of the issuance.

All capitalized exploration and evaluation expenditure is assessed for impairment if sufficient data exists to determine technical feasibility and commercial viability or facts and circumstances suggest that the carrying amount exceeds the recoverable amount. The following circumstances indicate that an entity should test exploration and evaluation assets for impairment:

- The period for which the entity has the right to explore in the specific area has expired during the period or will expire in the near future, and is not expected to be renewed;
- Substantive expenditures on further exploration and evaluation of mineral resources in the specific area is neither budgeted nor planned;
- Exploration and evaluation of mineral resources in the specific area have not led to the discovery of commercially
 viable quantities of mineral resources and the Company has decided to discontinue such activities in the specific
 area:
- Sufficient data exist to indicate that, although a development in the specific area is likely to proceed, the carrying
 amount of the exploration and evaluation asset is unlikely to be recovered in full from successful development or
 by sale; and
- In circumstances where a property is abandoned, the cumulative capitalized costs relating to the property are written off in the period.

Notes to the Financial Statements For the Years Ended August 31, 2016 and 2015 (Expressed in Canadian Dollars)

4. SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)

d) Impairment of Non-Financial Assets

At the end of each reporting period, the carrying amounts of the Company's assets are reviewed to determine whether there is any indication that those assets are impaired. If any such indication exists, the recoverable amount of the asset is estimated in order to determine the extent of the impairment, if any. The recoverable amount is the higher of fair value less costs to sell and value in use. Fair value is determined as the amount that would be obtained from the sale of the asset in an arm's length transaction between knowledgeable and willing parties. In assessing value in use, the estimated future cash flows are discounted to their present value using a pre-tax discount rate that reflects current market assessments of the time value of money and the risks specific to the asset. If the recoverable amount of an asset is estimated to be less than its carrying amount, the carrying amount of the asset is reduced to its recoverable amount and the impairment loss is recognized in the profit or loss for the period. For an asset that does not generate largely independent cash inflows, the recoverable amount is determined for the cash generating unit to which the asset belongs.

When an impairment loss subsequently reverses, the carrying amount of the asset (or cash generating unit) is increased to the revised estimate of its recoverable amount, but to an amount that does not exceed the carrying amount that would have been determined had no impairment loss been recognized for the asset (or cash generating unit) in prior years. A reversal of an impairment loss is recognized immediately in profit or loss.

e) Financial Instruments

Financial assets

Financial assets are classified as into one of the following categories based on the purpose for which the asset was acquired. All transactions related to financial instruments are recorded on a trade date basis. The Company's accounting policy for each category is as follows:

Fair value through profit or loss – This category comprises derivatives, or assets acquired or incurred principally for the purpose of selling or repurchasing it in the near term. They are carried in the statements of financial position at fair value with changes in fair value recognized in profit or loss.

Loans and receivables – These assets are non-derivative financial assets with fixed or determinable payment that are not quoted in an active market. They are carried at cost less any provision for impairment. Individually significant receivables are considered for impairment when they are past due or when other objective evidence is received that a specific counterparty will default.

Held-to-maturity investments – These assets are non-derivative financial assets with fixed or determinable payments and fixed maturities that the Company's management has the positive intention and ability to hold to maturity. These assets are measured at amortized cost using the effective interest method. If there is objective evidence that the investment is impaired, determined by reference to external credit ratings and other relevant indicators, the financial asset is measured at the present value of estimated future cash flows. Any changes to the carrying amount of the investment, including impairment losses, are recognized in profit or loss.

Available-for-sale – Non-derivative financial assets not included in the above categories are classified as available-for-sale. They are carried at fair value with changes in fair value recognized directly in equity. Where a decline in the fair value of an available-for-sale financial asset constitutes objective evidence of impairment, the amount of the loss is removed from equity and recognized in profit or loss.

Impairment on financial assets

At each reporting date, the Company assesses whether there is any objective evidence that a financial asset or a group of financial assets is impaired. A financial asset or group of financial assets is deemed to be impaired, if and only if there is objective evidence of impairment as a result of one or more events, that has occurred after the initial recognition of the asset and that event has an impact on the estimated future cash flows of the financial asset or the group of financial assets.

Notes to the Financial Statements For the Years Ended August 31, 2016 and 2015 (Expressed in Canadian Dollars)

4. SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)

e) Financial Instruments (Continued)

Objective evidence of impairment could include the following:

- Significant financial difficulty of the issuer or counterparty;
- Default or delinquency in interest or principal payments; or
- It has become probable that the borrower will enter bankruptcy or financial reorganization.

For financial assets carried at amortized cost, the amount of the impairment is the difference between the asset's carrying amount and the present value of the estimated future cash flows, discounted at the financial asset's original effective interest rate.

The carrying amount of all financial assets is directly reduced by the impairment loss. For financial assets measured at amortized cost, if, in a subsequent period, the amount of the impairment loss decreases and the decrease can be related objectively to an event occurring after the impairment losses were recognized, the previously recognized impairment loss is reversed through profit or loss to the extent that the carrying amount of the asset at the date the impairment is reversed does not exceed what the amortized cost would have been had the impairment not been recognized.

Derecognition of financial assets

Financial assets are derecognized when the rights to receive cash flows from the assets expire or the financial assets are transferred and the Company has transferred substantially all the risks and rewards of ownership of the financial assets. On derecognition of a financial asset, the difference between the asset's carrying amount and the sum of the consideration received and receivable and the cumulative gain or loss that had been recognized directly in equity is recognized in profit or loss.

Financial liabilities

The Company classifies its financial liabilities into one of two categories, depending on the purpose for which the asset was acquired. The Company's accounting policy for each category is as follows:

Fair value through profit or loss – This category comprises derivatives or liabilities acquired or incurred principally for the purpose of selling or repurchasing it in the near term. They are carried in the balance sheet at fair value with changes in fair value recognized in profit or loss.

Other financial liabilities – This category includes accounts payables and accrued liabilities and due to related parties, which is recognized at amortized cost.

f) Provisions

Provisions are recorded when a present legal or constructive obligation exists as a result of past events where it is probable that an outflow of resources embodying economic benefits will be required to settle the obligation, and a reliable estimate of the amount of the obligation can be made.

The amount recognized as a provision is the best estimate of the consideration required to settle the present obligation estimated at the end of each reporting period, taking into account the risks and uncertainties surrounding the obligation. Where a provision is measured using the cash flows estimated to settle the present obligation, its carrying amount is the present value of those cash flows. When some or all of the economic benefits required to settle a provision are expected to be recovered from a third party, the receivable is recognized as an asset if it is virtually certain that reimbursement will be received and the amount receivable can be measured reliably.

Notes to the Financial Statements For the Years Ended August 31, 2016 and 2015 (Expressed in Canadian Dollars)

4. SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)

g) Income Taxes

Income tax on the profit or loss for the periods presented comprises current and deferred tax. Income tax is recognized in profit or loss except to the extent that it relates to items recognized directly in equity, in which case it is recognized in equity.

Current tax expense is the expected tax payable on the taxable income for the year, using tax rates enacted or substantively enacted at year end, adjusted for amendments to tax payable with regards to previous years.

Deferred tax is provided using the asset and liability method, providing for temporary differences between the carrying amounts of assets and liabilities for financial reporting purposes and the amounts used for taxation purposes.

The amount of deferred tax provided is based on the expected manner of realization or settlement of the carrying amount of assets and liabilities, using tax rates enacted or substantively enacted at the financial position reporting date applicable to the period of expected realization or settlement. A deferred tax asset is recognized only to the extent that it is probable that future taxable profits will be available against which the asset can be utilized.

Deferred tax assets and liabilities are offset when there is a legally enforceable right to set off current tax assets against current tax liabilities and when they relate to income taxes levied by the same taxation authority and the Company intends to settle its current tax assets and liabilities on a net basis.

h) Share-Based Payment

The Company may grant stock options to buy common shares of the Company to directors, officers, employees and consultants. The board of directors grants such options for periods of up to five years, with vesting periods determined at its sole discretion.

The fair value of the options is measured at grant date, using the Black-Scholes Option Pricing Model, and is recognized over the vesting period that the employees earn the options. The fair value is recognized as an expense with a corresponding increase in equity. The amount recognized as expense is adjusted to reflect the number of share options expected to vest.

Where the terms of a stock option is modified, the minimum expense recognized is the expense as if the terms had not been modified. An additional expense is recognized for any modification which increases the total fair value of the stock-based compensation arrangement, or is otherwise beneficial to the employee as measured at the date of modification over the remaining vesting period. The Company did not grant any stock options during the years ended August 31, 2016 and 2015.

i) Earnings (Loss) Per Share

The Company presents basic and diluted earnings/loss per share data for its common shares, calculated by dividing the loss attributable to common shareholders of the Company by the weighted average number of common shares outstanding during the period. Diluted earnings/loss per share does not adjust the loss attributable to common shareholders or the weight average number of common shares outstanding when the effect is anti-dilutive.

j) New standards, amendments and interpretations not yet effected

New standard IFRS 9 "Financial Instruments" - This new standard is a partial replacement of IAS 39 "Financial Instruments: Recognition and Measurement". IFRS 9 introduces new requirements for the classification and measurement of financial assets, additional changes relating to financial liabilities, a new general hedge accounting standard which will align hedge accounting more closely with risk management. The new standard also requires a single impairment method to be used, replacing the multiple impairment methods in IAS 39. IFRS 9 is effective for annual periods beginning on or after January 1, 2018 with early adoption permitted.

Notes to the Financial Statements For the Years Ended August 31, 2016 and 2015 (Expressed in Canadian Dollars)

4. SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)

j) New standards, amendments and interpretations not yet effected

New standard IFRS 16 "Leases" - This new standard was issued on January 13, 2016, and will be effective for accounting periods beginning on or after January 1, 2019. Early adoption is permitted, provided the Company has adopted IFRS 15. This standard sets out a new model for lease accounting.

The Company has not early adopted these revised standards and is currently assessing the impact that these standards will have on its financial statements.

Other accounting standards or amendments to existing accounting standards that have been issued but have future effective dates are either not applicable or are not expected to have a significant impact on the Company's financial statements.

Kwedilima Cheetah Property, Tanzania

The Company entered into a sub-option agreement with AFGF Holdings (Tanzania) Ltd. ("AFGF") and True Zone Resources Inc. ("True Zone") dated September 26, 2014. AFGF is a private company existing under the laws of Tanzania. AFGF represented and warranted that it had acquired a 100% legal and beneficial interest in a prospecting licenses 6903/2011 & 6905/2011 located in the Handeni Kilindi Regional district of Tanzania. The prospecting licenses were issued February 28, 2011 and transferred in June 2011 to AFGF and grants rights for a period of 48 months to carry on prospecting operations. The prospecting licenses have been renewed for a further 36 months.

Notes to the Financial Statements For the Years Ended August 31, 2016 and 2015 (Expressed in Canadian Dollars)

5. EXPLORATION AND EVALUATION ASSETS (CONTINUED)

Kwedilima Cheetah Property, Tanzania (Continued)

The grant of the sub-option was subject to an assignment agreement effective on the same date which provides that the right to earn an 80% interest shall be assigned to the Company upon the completion of a proposed plan of arrangement between True Zone and the Company. Following the grant by True Zone to the Company, the Company earned an 80% interest in the Kwedilima Cheetah Property free and clear of all encumbrances by paying \$25,000 to AFGF (paid) and satisfying the following:

- a) 500,000 shares are issued to True Zone on or before the date that is one year from the date of the sub-option agreement (issued at a value of \$15,000);
- b) \$75,000 in exploration expenditures are incurred within one year from the date of the sub-option agreement (incurred); and
- c) An additional \$75,000 in exploration expenditures within two years from the date of the sub-option agreement (incurred).

On March 2, 2015, the plan of arrangement became effective and True Zone transferred the sub-option to the Company (Note 10).

As at August 31, 2016, the Company has advanced aggregate funds of \$19,786 (2015 - \$19,786) to various third parties for future exploration work on the property.

6. CAPITAL STOCK

- (a) Authorized unlimited common and preferred shares without par value
- (b) Issued and outstanding common shares:

On September 29, 2014, the Company issued 1,600,000 common shares at a price of \$0.02 per share for total proceeds of \$32,000.

On March 2, 2015, the Company issued 457,753 shares to the True Zone shareholders on the basis of 1 common share for every 100 True Zone company shares referred to in the plan of arrangement (Note 10).

On March 16, 2015 the Company completed a private placement and issued 2,500,000 common shares at a price of \$0.03 for proceeds of \$75,000.

On March 16, 2015, the Company issued 500,000 shares at a fair value of \$15,000 in relation to a property payment (Note 5).

On June 3, 2015, the Company completed a private placement and issued 1,500,000 shares at a price of \$0.10 per share for proceeds of \$150,000.

Notes to the Financial Statements For the Years Ended August 31, 2016 and 2015 (Expressed in Canadian Dollars)

7. RELATED PARTY TRANSACTIONS

As at August 31, 2016, there is \$49,125 (2015 - \$21,625) due to a company controlled by a director of the Company. These amounts are non-interest bearing with no stated terms of repayment.

As at August 31, 2016, there is \$90,043 (2015 – \$35,500) due to a director of the Company and companies of which a director of the Company is the Chief Executive Officer. These amounts are non-interest bearing with no stated terms of repayment.

Included in loan payable is a balance of \$41,260 (2015 - nil)\$ due to a director of the Company. These amounts are non-interest bearing with no stated terms of repayment.

During the year ended August 31, 2016, the Company incurred \$52,500 (2015-\$60,000) in consulting fees and \$22,500 (2015 - \$30,000) in office fees for services from a director of the Company and companies of which a director of the Company is the Chief Executive Officer.

8. MANAGEMENT OF CAPITAL

The Company defines its capital as all components of shareholders' equity. The Company's objectives when managing capital are to safeguard its ability to continue as a going concern.

In order to maintain its capital structure, the Company, is dependent on equity funding and when necessary, raises capital through the issuance of equity instruments, primarily comprised of common shares. The Company manages its capital structure and makes adjustments to it in light of economic conditions. The Company, upon approval from its Board of Directors, will make changes to its capital structure as deemed appropriate under the specific circumstances.

The Company is not subject to any externally imposed capital requirements or debt covenants, and does not presently utilize any quantitative measures to monitor its capital. There were no changes to the Company's approach to managing capital during the year.

9. FINANCIAL INSTRUMENTS AND RISKS

Fair Value

The Company's financial instruments consist of cash, amounts receivable, accounts payable, and due to related parties. The fair value of all financial instruments approximate their carrying values. Cash and amounts receivable are classified as loans and receivables. Accounts payable, due to related parties and loan payable are classified as other financial liabilities.

The Company's financial instrument is exposed to a number of risks that are summarized below:

Liquidity Risk

Liquidity risk is the risk that the Company will not be able to meet its financial obligations as they come due or can do so only at excessive cost. The Company has significant financial liabilities outstanding including accounts payable and accrued liabilities and amounts due to related parties. The Company is exposed to the risk that it may not have sufficient liquid assets to meet its commitments associated with these financial liabilities.

The Company's approach to managing liquidity is to ensure that it will always have sufficient cash to meet its liabilities when due, without incurring unacceptable losses or risking damage to the Company's reputation. To the extent that the Company does not believe it has sufficient liquidity to meet these obligations, management will consider securing additional funds through equity transactions. The Company manages its liquidity risk by continuously monitoring cash flow requirements relating to its anticipated exploration and evaluation activities as well as general overhead requirements.

Notes to the Financial Statements For the Years Ended August 31, 2016 and 2015 (Expressed in Canadian Dollars)

9. FINANCIAL INSTRUMENTS AND RISKS (Continued)

Credit Risk

Credit risk is the risk of loss associated with a counter party's inability to fulfill its payment obligations. The Company's credit risk is primarily attributable to its cash balances. The Company manages its credit risk on bank deposits by holding deposits in high credit quality banking institutions in Canada.

Interest Rate Risk

Interest rate risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in market interest rates. As the Company's cash is currently held in non-interest bearing bank account, management considers the interest rate risk to be minimal.

Commodity Price Risk

The ability of the Company to finance the exploration and development of its properties and the future profitability of the Company is directly related to the market price of the primary minerals identified in its mineral properties. Mineral prices fluctuate on a daily basis and are affected by a number of factors beyond the Company's control. A sustained, significant decline in the prices of the primary minerals or in the share prices of junior mineral exploration companies in general, could have a negative impact on the Company's ability to raise additional capital. Sensitivity to commodity price risk is remote since the Company has not established any reserves or production.

Foreign Exchange Risk

Foreign exchange risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in the foreign currency exchange rates. The Company's functional currency is the Canadian dollar. All of the Company's financial instruments are denominated in Canadian dollars. The Company conducts some of its business in US dollars and is therefore exposed to variations in the foreign exchange rate. In management's opinion there is no material foreign exchange risk to the Company.

10. PLAN OF ARRANGEMENT

On October 20, 2014, the Company entered into an arrangement agreement with True Zone, the Company's parent company, that contemplated a plan of arrangement for the spinout of the Company as a separate legal entity along with four other subsidiaries of True Zone. Upon completion of the plan of arrangement, the Company was granted the sub-option to earn an 80% interest in the Kwedilima Cheetah Property in Tanzania from True Zone in consideration for the Company's shares equal to 1% of the total issued and outstanding True Zone shares as of the share distribution record date. The number of True Zone shares outstanding on the share record distribution date was 45,775,300 and as such, the consideration for the sub-option agreement was 457,753 shares to True Zone shareholders. On October 20, 2014, the Company executed an amalgamation agreement for the amalgamation of the Company with Moshing Capital Inc. following the completion of such plan of arrangement. The amalgamation of the two foregoing companies formed an amalgamated company that retained the name of the Company as the business name and continued as one company under the Business Corporations Act of British Columbia. On March 2, 2015, the Company amalgamated with Moshing Capital Inc. to form an amalgamated company under the name "Moshi Mountain Industries Ltd."

The amalgamation was not accounted for as a business combination as the Company was not considered to be a business for accounting purposes. As the amalgamation resulted in the shareholders of Moshing Capital Inc. having control of the amalgamated company, the transaction was accounted for as if Moshing Capital Inc. acquired the net assets of the Company. As the Company had nominal net assets, the consideration of \$13,733, being the fair value of the 457,753 shares issued to True Zone shareholders, was attributed to the assignment of the option agreement and recorded to exploration and evaluation assets.

Notes to the Financial Statements For the Years Ended August 31, 2016 and 2015 (Expressed in Canadian Dollars)

11. SEGMENTED INFORMATION

The Company operates in one reportable operating segment, being the acquisition, exploration and development of exploration and evaluation assets.

The Company operates in both Canada and Tanzania. The Company's exploration and evaluation asset is located in Tanzania.

12. INCOME TAX

A reconciliation of the expected income recovery to the actual income tax recovery is as follows:
