MINING CORP

FOR IMMEDIATE RELEASE

CSE: BNN

OCTOBER 1, 2021

BENJAMIN HILL UPDATES ON CONTINUITY OF MINERALIZATION TREND SOUTH OF CARACAHUI N (EL FIERRO) AREA CONNECTING WITH LAS ANTENAS, SAMPLING 2.4% Cu, 1.5 g/t Au, 34.1 g/t Ag

Vancouver, British Columbia (October 1, 2021) - Benjamin Hill Mining Corp. (CSE: BNN) (OTCBB: BNNHF) (“BHM” or the “Company”) reports the Las Antenas exploration area which lies directly south of the Caracahui Norte exploration area was discovered during the stream sediment sampling campaign. Rock chip samples from the Las Antenas area returned good copper values as high as 2.4 % and gold values of up to 1.5 g/t. The hydrothermally mineralized and gold and copper enriched structures in the Caracahui Norte (aka El Fierro) area are now known to extend southward into the Las Antenas area and thus explain the elevated gold and copper assays seen there. (Table. 1, Figure. 1, Figure. 2)

BNN geologists have now mapped mineralized hydrothermal breccias in Las Antenas area extending up to 1300m in length and 400m in width. The combined length of mineralized structures that pass through the Caracahui Norte and Las Antenas areas can be traced for 3400m in length.

The newly discovered mineralization in the Las Antenas area is currently undergoing a second round of mapping and sampling. The results of this pending work will further illuminate the magnitude and extent of mineralization in this area.

Greg Bronson, President of Benjamin Hill Mining states: *"The application of modern scientific rigor to guide our systematic exploration of the property has rewarded us with yet another significant gold and copper mineral occurrence to further investigate".*

As the extent of known mineralization on the property keeps expanding, and the connection between the Caracahui Norte area and the Las Antenas area has now been established, the Caracahui Norte area and Las Antenas areas will now be combined and renamed the 'El Fierro' exploration area. Renaming the area was done in order to better describe the exploration area and avoid confusion when referring to the northern part of the main Caracahui area, which lies further to the east.

LOCATION	SAMPLE	EAST	NORTH	Au g/t	Cu %	Ag g/t	Au Equi
Las Antenas	1689	497903	3345288	1.5	0	9.2	1.6
Las Antenas	1695	497669	3345201	0	2.4	12.1	0.2
Las Antenas	2164	497969	3344503	0	2.3	8.7	0.1
Las Antenas	2166	498118	3344573	0	2.3	8.4	0.1
Las Antenas	1694	497609	3345190	0.1	1.8	12.4	0.3
Las Antenas	1684	497693	3345080	0	0.9	3.9	0.1
Las Antenas	1692	497571	3345053	0.1	0.6	34.1	0.6

About Benjamin Hill Mining Corp.

Benjamin Hill Mining Corp. is a Canadian-listed junior gold exploration company focused on exploring and developing projects in Mexico. The Company's Sonora Gold project covers 6,000 ha of highly prospective mineral concessions in the Caborca gold belt of Sonora, Mexico in close proximity to Magna Gold Corp's San Francisco mine.

Qualified Person

Greg Bronson, P. Geo, President and Director of the Company is a qualified person as defined by National Instrument 43-101 and has reviewed and approved the scientific and technical disclosure in this news release.

On behalf of the Board of Directors

"Cole McClay", CEO Benjamin Hill Mining Corp.
