**1. NATURE AND CONTINUANCE OF OPERATIONS**

Benjamin Hill Mining Corp. (formerly Mojave Gold Corp.) (the “Company”) was incorporated on August 21, 2014 under the Business Corporations Act of British Columbia. The head office of the Company is 1050 - 12471 Horseshoe Way, Richmond, BC, V7A 4X6. The registered and records office is Suite 1400, 1125 Howe Street, Vancouver, British Columbia, V6Z 2K8. The common shares of the Company are listed on the Canadian Securities Exchange (“CSE”) and trades under the symbol “BNN”.

The Company is in the business of the exploration and development of natural resource properties in Canada and Mexico.

These condensed consolidated interim financial statements have been prepared on a going concern basis, which assumes that the Company will be able to realize its assets and discharge its liabilities in the normal course of business. As at November 30, 2021 the Company has not generated any revenues from operations, has a working capital deficiency of \$1,567,724 and accumulated deficit of \$5,885,492.

The continued operations of the Company are dependent on its ability to generate future cash flows or obtain additional financing. Management assesses that sufficient working capital will be obtained from external financing to meet the Company's liabilities and commitments as they become due, although there is a risk that additional financing will not be available on a timely basis or on terms acceptable to the Company. These condensed consolidated interim financial statements do not reflect any adjustments that may be necessary if the Company is unable to continue as a going concern. These conditions indicate the existence of a material uncertainty that may cast significant doubt on the Company's ability to continue as a going concern.

If the going concern assumption is not appropriate for these condensed consolidated interim financial statements, then adjustments would be necessary to the carrying value of assets and liabilities, the reported expenses, and the classifications used could be material.

In March 2020 the World Health Organization declared coronavirus COVID-19 a global pandemic. This contagious disease outbreak, which has continued to spread, and any related adverse public health developments, have adversely affected workforces, economies, and financial markets globally, potentially leading to an economic downturn. It is not possible for the Company to predict the duration or magnitude of the adverse results of the outbreak and its effects on the Company's business or results of operations at this time. The Company may not be able to access its mineral properties if travel restrictions are mandated by the Mexican government.

These condensed consolidated interim financial statements were authorized for issue on January 27, 2022 by the directors of the Company.

**2. BASIS OF PREPARATION**

These condensed consolidated interim financial statements have been prepared using accounting policies with International Accounting Standards (“IAS”) 34, Interim Financial Reporting using the principles of International Financial Reporting Standards (“IFRS”) issued by the International Accounting Standards Board (“IASB”), Interpretations of the International Financial Reporting Interpretations Committee (“IFRIC”).

These condensed consolidated interim financial statements include the accounts of the Company and its wholly owned subsidiary. The Company's subsidiary is Mojave Gold SA De CV, which was incorporated in Mexico on October 14, 2020. A subsidiary is any entity controlled by the Company. Control exists when the Company has the power to govern the financial and operating policies of an entity; is exposed to variable returns in connection with its interest in the entity; and a linkage exists between this power and exposure to variable returns. Subsidiaries are included in the consolidated financial results of the Company from the effective date of acquisition up to the effective date of disposal or loss of control.

All intra-group transactions, balances, income and expenses are eliminated, in full, on consolidation.

The condensed consolidated interim financial statements are presented in Canadian Dollars, which is also the Company and its subsidiary’s functional currency, unless otherwise indicated.

**3. SIGNIFICANT ACCOUNTING JUDGMENTS, ESTIMATES AND ASSUMPTIONS**

The preparation of the condensed consolidated interim financial statements in conformity with IFRS requires management to make estimates, judgments and assumptions that affect the application of accounting policies and the reported amounts of assets, liabilities, income and expenses. Actual results may differ from these estimates.

**10. FINANCIAL INSTRUMENTS AND RISKS**

*Fair Value*

The Company's financial instruments consist of cash, amounts receivable, accounts payable, loans payable and due to related parties. The fair value of all financial instruments approximate their carrying values. Cash is classified as fair value through profit and loss and amounts receivable is classified at amortized cost. Accounts payable, due to related parties and loans payable are classified as amortized cost.

The Company's financial instrument is exposed to a number of risks that are summarized below:

*Liquidity Risk*

Liquidity risk is the risk that the Company will not be able to meet its financial obligations as they become due or can do so only at excessive cost. The Company is exposed to the risk that it may not have sufficient liquid assets to meet its commitments associated with these financial liabilities.

The Company's approach to managing liquidity is to ensure that it will always have sufficient cash to meet its liabilities when due, without incurring unacceptable losses or risking damage to the Company's reputation. To the extent that the Company does not believe it has sufficient liquidity to meet these obligations, management will consider securing additional funds through equity transactions. The Company manages its liquidity risk by continuously monitoring cash flow requirements relating to its anticipated exploration and evaluation activities as well as general overhead requirements. Liquidity risk is assessed as high.

**10. FINANCIAL INSTRUMENTS AND RISKS (CONTINUED)**

*Interest Rate Risk*

Interest rate risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in market interest rates. As the Company's cash is currently held in non-interest bearing bank account, management considers the interest rate risk to be minimal. The interest rates on loans payable are at fixed rates. The Company is not exposed to interest rate fluctuations.

*Commodity Price Risk*

The ability of the Company to finance the exploration and development of its properties and the future profitability of the Company is directly related to the market price of the primary minerals identified in its mineral properties. Mineral prices fluctuate on a daily basis and are affected by a number of factors beyond the Company's control. A sustained, significant decline in the prices of the primary minerals or in the share prices of junior mineral exploration companies in general, could have a negative impact on the Company's ability to raise additional capital. Sensitivity to commodity price risk is remote since the Company has not established any reserves or production.

*Foreign Exchange Risk*

Foreign exchange risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in the foreign currency exchange rates. The Company's Mexican subsidiary is exposed to currency risk as it incurs expenditures that are denominated in Mexican Pesos and United States Dollars while its functional currency is the Canadian Dollar. The Company does not hedge its exposure to fluctuations in foreign exchange rates. The following is an analysis of Canadian dollar equivalent of financial assets and liabilities that are denominated in Mexican pesos:
