

FORGE RESOURCES CORP.

(FORMERLY BENJAMIN HILL MINING CORP.)

Management's Discussion and Analysis of Results of
Operations and Financial Condition
For the year ended August 31, 2024
(Expressed in Canadian Dollars)

Introduction

The following Management Discussion and Analysis ("MD&A") of Forge Resources Corp. (formerly Benjamin Hill Mining Corp.) (the "Company") has been prepared by management, in accordance with the requirements of National Instrument 51-102 ("NI 51-102") as of December 23, 2024 and should be read in conjunction with the audited consolidated financial statements for year ended August 31, 2024 and the related notes contained therein which have been prepared under International Financial Reporting Standards ("IFRS"). The information contained herein is not a substitute for detailed investigation or analysis on any particular issue. The information provided in this document is not intended to be a comprehensive review of all matters and developments concerning the Company. The Company is presently a "Venture Issuer" as defined in NI 51-102. Additional information relevant to the Company's activities can be found on SEDAR+ at www.sedarplus.ca.

All financial information in this MD&A has been prepared in accordance with IFRS and all dollar amounts are quoted in Canadian dollars, the reporting and functional currency of the Company, unless specifically noted.

Overview

Forge Resources Corp. (formerly Benjamin Hill Mining Corp.) (the "Company") was incorporated on August 21, 2014 under the Business Corporations Act of British Columbia. The head office of the Company is 1050 - 12471 Horseshoe Way, Richmond, BC, V7A 4X6. The registered and records office is Suite 700, 401 W Georgia St, Vancouver, BC V6B 5A1. The common shares of the Company are listed on the Canadian Securities Exchange ("CSE") under the symbol "FRG", on the OTCQB under the symbol "FRGGF" and on the Frankfurt Stock Exchange ("FSE") under the symbol "5YZ".

The Company is in the business of the exploration and development of natural resource properties in Canada and Colombia.

Exploration Activities

Alotta Project, Yukon, Canada

In January 2023, the Company announced that Strategic Metals Ltd. (TSXV: SMD) (the "Optionor") has signed an agreement (the "Agreement") granting the Company an optional right (the "Option") to earn an undivided 60% joint venture interest in the Alotta Project located in the Whitehorse Mining District, Yukon Territory.

The Alotta Project hosts an un-drilled porphyry prospect that is situated in a similar geological setting and in close proximity to Western Copper and Gold's Casino Deposit. Alotta is marked by a pronounced magnetic low that coincides with a strong, multi-element soil geochemical anomaly. The core of the geochemical anomaly is enriched in copper, gold and molybdenum and measures 4 kilometres by 1 kilometre. It is surrounded by a distal halo with high lead, zinc and silver values. The Alotta soil geochemical signature exhibits classic features common associated by large porphyry deposits.

In November 2023, the Company completed two NQ size diamond drill holes ALT-23-01/02 for a total of 842 metres at the Alotta project. Both holes exhibited multiple intrusive phases including intrusive breccias displaying strong biotite alteration, carbonate veining, and pyrrhotite, pyrite, chalcopyrite and molybdenite mineralization as interstitial clots and stringers.

Holes ALT-23-01 and ALT-23-02 tested the south-central portion of an induced polarization chargeability high with coincident copper-in-soil and gold-in-soil anomalies. The drill program recommenced in late May, 2024, with camp construction and diamond drilling upon completion of the camp construction.

In February 2024 the Company released assay results from the inaugural diamond drill holes that intercepted 211.65 metres of 0.46 gram per tonne gold in extensive porphyry-style mineralization at the Alotta gold-copper-molybdenum target in west-central Yukon.

In July 2024, the Company's Phase 1 diamond drilling program that started in November 2023 is now complete with the successful completion of 6 holes, each ranging between 420-502 metres in length.

In August 2024, the Company announced the assay results from the completion of the 2024 1,815-metre diamond drilling program at the previously untested Payoff and Severance areas. These holes represent 500-metre and 1,000-metre step outs from the inaugural successful 2023 drilling program, which intersected 211.65 metres grading 0.46 g/t gold from drill hole ALT-23-001.

Drilling -- Payoff Area

Hole ALT-24-001 was collared 560 m to the north of ALT-23-001 to test below rock samples at the Payoff zone that returned up to 8.73 g/t gold and an underlying geophysical chargeability high anomaly. Hole ALT-24-001 reached a depth of 402 m. The hole intersected widespread silicification and sericite alteration cut by millimetre-scale to centimetre-scale quartz veins hosting pyrite. Stronger silicification and veining were observed locally in the top portion of the hole, which corresponds to more substantial gold grades.

Hole ALT-24-002 was collared 150 m to the southeast of ALT-24-001 to further test below the Payoff zone and test deeper into the underlying chargeability anomaly. Hole ALT-24-002 was drilled to a final depth of 501 m and intersected similar lithologies as ALT-24-001. Silicification and sericite alteration were not as abundant as found in ALT-24-001 and are more localized to the upper parts of the hole and correspond with elevated gold grades.

Drilling -- Severance area

Holes ALT-24-003/004 were collared approximately 1,200 metres east of Payoff area drill holes ALT-24-001/002, ending at 405 and 507 metres, respectively. The primary purpose of these holes was to test an area of anomalous molybdenum, copper and gold-in-soil geochemistry. Both holes encountered mineralization throughout their entire lengths and in several intrusive phases; however, silicification and sericite alteration that appears to be associated with high-grade gold values were sporadic.

FORGE RESOURCES CORP (FORMERLY BENJAMIN HILL MINING CORP.)

Management's Discussion & Analysis

For the year ended August 31, 2024

In September 2024, the Company announced the commissioning of a detailed structural analysis study based on the diamond drilling completed to date. The purpose of the study is to identify structural relationships and preferred structural orientations to higher grade gold mineralization. The completion of this study will help determine the proper drill orientations for testing both disseminated and fracture controlled gold mineralization at Alotta. The study was completed in November and has indicated several areas that require additional diamond drilling. The highest priority target occurs in the area of our 2023 drilling with an induced polarization, chargeability anomaly over 1.0 kilometres in length.

Aion Mining Corp.

In December 2023, the Company signed a definitive agreement with Aion Mining Corp. ("Aion") to complete the Company's acquisition of a 20% interest in Aion. Pursuant to the agreement, the Company acquired common shares of Aion representing a 20% interest, calculated on a fully diluted basis. In consideration, the Company provided Aion aggregate amount of \$1,125,000: \$500,000 in cash on closing (paid); and 1,602,565 common shares (issued) of the Company at a deemed price of \$0.39 per share, subject to CSE policies. The Company was also issued a special warrant of Aion, exercisable into additional common shares of Aion, at no additional consideration to the Company, to allow the Company to maintain its 20% interest in Aion for a period of 6 months. Aion is a non-arm's length party to the Company by reason of sharing a common director, Cole McClay.

In April 2024, the Company entered into a formal agreement with Aion Mining Corp. whereby the Company will acquire a further interest in Aion to bring the Company's total interest to 40%. Pursuant to the formal agreement, the Company will acquire common shares of Aion in order to bring the total ownership of the Company to 40% of the post-issuance common shares of Aion, calculated on a fully-diluted basis. In consideration, the Company provided Aion aggregate amount of \$1,875,000: \$1,000,000 in cash on closing (paid); and 1,508,621 common shares (issued) of the Company at a deemed price of \$0.58 per share, subject to CSE policies. The Company was also granted a right of first refusal for two-years, allowing it to purchase common shares in Aion to offset any further issuances by Aion of securities, to allow the Company the opportunity to maintain its 40% interest.

In May 2024, the Company commenced comprehensive soil studies and pilot drilling at La Estrella, fully permitted coal project in Santander, Colombia.

In August 2024, the Company announced the start of the pilot drilling to guide underground development of a 170-meter decline at their, followed by a crosscut to access all coal seams to provide sufficient resources for the bulk sampling program.

In August 2024, the Company announced a Business Acquisition Report has been filed on SEDAR+ related to the 40% position the Company holds in Aion Mining Corp, fully permitted coal project in Santander, Colombia.

In August 2024, the Company announced the completion of the pilot hole drilling to guide underground development of its 170-meter decline and other key advancements at its fully licensed coal project located in Colombia.

In September 2024, the Company entered into a non-binding letter of intent (the "LOI") with Aion outlining the general terms and conditions of a proposed transaction whereby the Company will acquire a further interest in Aion to bring the Company's total shareholdings in Aion to 60% on a post-closing, fully-diluted basis (the "Proposed Transaction"). In consideration of additional shares of Aion, the Company will pay \$5,000,000, comprised of the following: (i) \$4,000,000 in cash on closing; and (ii) \$1,000,000 in common shares of the Company at a price per share equal to the closing of the share price of the Company on the

FORGE RESOURCES CORP (FORMERLY BENJAMIN HILL MINING CORP.)

Management's Discussion & Analysis

For the year ended August 31, 2024

closing date of the Proposed Transaction.

In October 2024, the Company completed its portal design, and additional environmental advancements at the fully permitted La Estrella Coal Project in Santander, Colombia.

In November 2024, the Company commenced the construction on the mine portal at Aion Mining Corp's La Estrella project located in Santander, Colombia.

In November 2024, the Company announced a significant milestone in the development of its mining operations, highlighted by the successful groundbreaking of the decline portal at Aion Mining Corp's La Estrella coal project in Colombia.

In November 2024, the Company announced the overview of the design plans (Figure 1) for the construction of a mine portal at the La Estrella Coal Project, located in Santander, Colombia. The new mine portal will be a critical development milestone for the project, providing essential infrastructure to support the future decline ramp and soil stability necessary for advancing underground bulk sampling mining exploration.

About Aion Mining Corp.

Aion Mining controls the FLG-111 concession that covers 548 Ha in a region of historic and current coal mining. Historical exploration within this concession area has determined the property to host several coking and thermal coal seams. Aion holds a recent NI 43-101 dated March 17, 2024 and Annual CRIRSCO technical reports. The project is road accessible, water, electricity, and phone signal on site. Current coal stockyards approximately 40 kilometres away on main highway to Atlantic ports for export.

Qualified Person and Quality Control/Quality Assurance Lorne Warner P.Geo, President, a qualified person as defined by National Instrument 43-101 – Standards of Disclosure for Mineral Projects (“NI 43-101”), has supervised the preparation of the scientific and technical information that forms the basis in this MD&A and has reviewed and approved the disclosure herein.

Selected Annual Information

The following financial information represents selected information of the Company for the three most recently completed financial years:

	August 31, 2024	August 31, 2023	August 31, 2022
Total revenue	\$ -	\$ -	\$ -
Loss and comprehensive loss for the year	(3,121,532)	(7,997,969)	(2,163,859)
Basic and diluted loss per share	(0.04)	(0.14)	(0.04)
Total assets	7,318,985	635,161	7,669,321
Total long term liabilities	-	-	-

During the year ended August 31, 2024, the Company recorded marketing of \$929,855, stock-based compensation of \$1,338,995 and share of loss from associate of \$135,002.

During the year ended August 31, 2023, the Company wrote-down exploration and evaluation assets of \$3,834,558 and a loss from discontinued operations of \$3,762,584 on the termination of the Sonora Gold

FORGE RESOURCES CORP (FORMERLY BENJAMIN HILL MINING CORP.)

Management's Discussion & Analysis

For the year ended August 31, 2024

Property option agreements.

During the year ended August 31, 2022, the Company recorded a loss on settlement of debt of \$756,835.

Results of Operations

Revenues

Due to the Company's status as an exploration and development stage mineral resource company and a lack of commercial production from its properties, the Company currently does not have any revenues from its operations.

General and administrative expenses

For year ended August 31, 2024 and 2023

The Company had a net loss of \$3,121,532 for year ended August 31, 2024, compared to \$7,997,969 for year ended August 31, 2023.

Expense details are as follows:

- a) Consulting of \$348,824 (2023 - \$132,000) – the variance is due to addition of new consultants in the current year.
- b) Marketing expenses of \$929,855 (2023 - \$Nil) – the increase is due to the addition of new marketing consultants and campaigns in the current year to raise the Company's profile.
- c) Stock-based compensation of \$1,338,995 (2023 - \$37,008) – during the current year the Company issued 4,790,000 stock options valued using the Black Scholes Pricing Model.
- d) Write-off of exploration and evaluation assets of \$Nil (2023 - \$3,834,558) and income from discontinued operations of \$3,709 (2023 – loss of \$3,762,584) – the variances are due to the disposal of its subsidiary, Benjamin Hill Mining Company SA de CV.

For the three months ended August 31, 2024 and 2023

The Company had a net loss of \$331,813 for the three months ended August 31, 2024, compared to \$65,763 for the three months ended August 31, 2023.

Expense details are as follows:

- a) Marketing expenses of \$127,900 (2023 - \$Nil) – the increase is due to the addition of new marketing consultants and campaigns in the current period to raise the Company's profile.
- b) Stock-based compensation of \$268,719 (2023 - \$37,008) – during the current period the Company issued 390,000 stock options valued using the Black Scholes Pricing Model.

During the three months ended August 31, 2024, the Company recorded marketing fees of \$127,900 and stock-based payments of \$268,719.

During the three months ended May 31, 2024, the Company recorded marketing fees of \$142,883 and stock-based payments of \$268,719.

During the three months ended February 29, 2024, the Company recorded marketing fees of \$297,770.

During the three months ended November 30, 2023, the Company recorded share-based payments of \$898,709.

During the three months ended February 28, 2023, the Company terminated the option agreements on the Sonora copper and Sonora gold properties and accordingly wrote-down \$7,504,566 of exploration and evaluation assets.

Liquidity and Capital Resources

The Company will continue to require funds for exploration work on its properties, as well as to meet its ongoing day-to-day operating expenses and will continue to rely on equity financing during such period. There can be no assurance that financing will be available to the on terms satisfactory to the Company.

The Company does not have any other commitments for material capital expenditures over the near and

FORGE RESOURCES CORP (FORMERLY BENJAMIN HILL MINING CORP.)

Management's Discussion & Analysis

For the year ended August 31, 2024

long term other than as disclosed above plus normal operating expenses.

Since incorporation, the Company's capital resources have been limited. The Company relied upon the issue of equity securities to acquire interest in mineral properties acquisition payments and to pay operating expenses.

During the year ended August 31, 2024 the Company:

- Issued 3,996,205 common shares from the exercise of warrants for proceeds of \$1,218,013.
- Issued 350,000 common shares from the exercise of stock options for proceeds of \$91,000 and transferred a fair value of \$79,319 from reserves to share capital in relation to the exercise.
- Closed a non-brokered private placement comprising of 2,480,000 flow-through units ("FT Unit") at \$0.25 per FT Unit for proceeds of \$620,000 and 840,000 non-flow-through units ("NFT Unit") at \$0.25 per NFT Unit for proceeds of \$210,000. Each FT Unit consists of one flow-through common share and one non-flow-through share purchase warrant ("NFT Warrant"). Each NFT Warrant entitles the holder to acquire an additional non-flow-through common share of the Company at a price of \$0.28 per share for a period of three years from the date of issuance. Each NFT Unit consists of one common share and one NFT Warrant which will enable the holder to purchase one common share of the Company at a price of \$0.28 per share for a period of three years from the date of issuance. The Company paid \$18,919 of cash share issuance costs in relation to the financing.
- Entered into debt settlement agreements to settle a total of \$741,868 in debt for the issuance of 1,159,167 shares of the Company.
- Closed a private placement comprising of 8,352,750 units at \$0.64 per unit for proceeds of \$5,345,760. Each unit consists of one common share and one share purchase warrant. Each warrant entitles the holder to acquire an additional common share of the Company at a price of \$0.80 per share for a period of three years from the date of issuance. Upon closing of the private placement, the Company paid to the agent a cash commission of \$305,746 and issued 500,727 non-transferrable compensation warrants exercisable at \$0.64 for two years from the closing date at a fair value of \$135,136 calculated using the Black Scholes Pricing Model. Each compensation warrant consists of one common share and one share purchase warrant of the Company. Each warrant entitles the holder to acquire an additional common share of the Company at a price of \$0.80 per share for a period of three years from the date of issuance of the compensation warrants. The Company paid an additional \$215,901 in cash share issuance costs in relation to the financing.
- Issued 100,000 common shares at a fair value of \$52,000 in connection with finder's fee agreement for the Company's Alotta property (Note 5) of which \$6,500 was recorded as an obligation to issue shares during the year ended August 31, 2023.
- Issued 200,000 common shares at a fair value of \$96,000 in connection with a finder's fee agreement.
- Issued 3,111,186 shares at a fair value of \$1,598,531 for an investment in associate.
- Closed a non-brokered private placement comprising of 687,500 flow-through units ("FT Unit") at \$0.80 per FT Unit for proceeds of \$550,000. Each FT Unit consists of one flow-through common share and one non-flow-through share purchase warrant ("NFT Warrant"). Each NFT Warrant entitles the holder to acquire an additional non-flow-through common share of the Company at a price of \$1.10 per share for a period of one year from the date of issuance. The Company paid \$30,000 of cash share issuance costs in relation to the financing and 37,500 finder's warrant under the same terms at a fair value of \$7,892 calculated using the Black Scholes Pricing Model.

The Company had a working capital of \$764,138 as at August 31, 2024.

Financial Instruments and Risks

Please refer to the August 31, 2024 consolidated financial statements on www.sedarplus.ca.

Off Balance Sheet Arrangements

There are no off-balance sheet arrangements to which the Company is committed.

Transactions with Related Parties

During the year ended August 31, 2024, the Company incurred \$124,000 (2023 - \$84,000) in consulting fees from a company controlled by a director of the Company. As at August 31, 2024, \$18,257 (August 31, 2023 - \$22,290) was owing to this company.

During the year ended August 31, 2024, the Company incurred professional fees of \$60,000 (2023 - \$48,500) to a firm where an officer of the Company is a partner. As at August 31, 2024, \$5,250 (August 31, 2023 - \$50,925) was owing to this firm.

As at August 31 2024, \$Nil (August 31, 2023 - \$10,500) was owing to a company controlled by a director of the Company.

During the year ended August 31, 2024, the Company incurred exploration and evaluation expenses of \$72,000 (2023 - \$Nil) from a company controlled by the president of the Company. As at August 31, 2024, \$28,400 (August 31, 2023 - \$36,000) was owing to this company.

During the year ended August 31, 2024, the Company granted stock options to key management members valued at \$589,229 (2023 - \$Nil).

Critical Accounting Estimates

The preparation of financial statements in accordance with IFRS requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenue and expenses during the reporting period. Actual reports could differ from management's estimates.

Adoption of new and amended accounting standards

Corporate Activities

In January 2024, the Company appointed Russell Ball, former executive vice-president and chief financial officer at Newmont Mining Corp. and Goldcorp Inc., as a senior adviser to the company.

In September 2024, the Company appointed Peter Jonathan (PJ) Murphy as Chairman and Director of the Company.

In December 2024, the Company appointed PJ Murphy, the current Chairman of the Board, as the new Chief Executive Officer (CEO), and Cole McClay, the current CEO, transitioned to the role of Chief Operating Officer (COO).

Forward-looking information

This MD&A contains "forward-looking statements". Forward-looking statements reflect the Company's current views with respect to future events, are based on information currently available to the Company

FORGE RESOURCES CORP (FORMERLY BENJAMIN HILL MINING CORP.)

Management's Discussion & Analysis

For the year ended August 31, 2024

and are subject to certain risks, uncertainties, and assumptions, including those discussed above. Forward-looking statements include, but are not limited to, statements with respect to the success of mining exploration work, title disputes or claims, environmental risks, unanticipated reclamation expenses, the estimation of mineral reserves and resources and capital expenditures. In certain cases, forward-looking statements can be identified by the use of words such as "intends", "plans", "expects" or "does not expect", "is expected", "budget", "scheduled", "estimates", "forecasts", "anticipates" or "does not anticipate", or "believes", or variations of such words and phrases or state that certain actions, events or results "may", "could", "would", "might" or "will be taken", "occur" or "be achieved". Forward looking statements involve known and unknown risks, uncertainties and other factors which may cause the actual results, performance or achievements expressed or implied by the forward-looking statements. Such factors include, among others, risks related to international operations, fluctuation of currency exchange rates, actual results of current exploration activities, changes in project parameters as plans are refined over time, the future price of gold and other precious or base metals, possible variations in mineral resources, grade or recovery rates, accidents, labour disputes and other risks of the mining industry, delays in obtaining, or inability to obtain, required governmental approvals or financing, as well as other factors discussed under "Risks and Uncertainties". Although the Company has attempted to identify material factors that could cause actual actions, events or results to differ materially from those described in forward-looking statements, there may be other factors that cause actions, events or results to differ from those anticipated, estimated or intended. The Company has made numerous assumptions about the forward-looking statements and information contained herein, including among other things, assumptions about the Company's anticipated costs and expenditures and its ability to achieve its goals. Even though the Company's management believes that the assumptions made and the expectations represented by such statements or information are reasonable, there can be no assurance that the forward-looking statements statement or information will prove to be accurate. Forward-looking statements contained in this MD&A are made as of the date of this report. There can be no assurance that forward-looking statements will prove to be accurate, as actual results and future events could differ materially from those anticipated in such statements. Accordingly, readers should not place undue reliance on forward-looking statements. The Company will update forward-looking statements in its management discussion and analysis as required by applicable law.

Risks and Uncertainties

The common shares should be considered highly speculative due to the nature of the Company's business and the present stage of its development. In evaluating the Company and its business, investors should carefully consider, in addition to the other information contained in the MD&A, the following risk factors. These risk factors are not a definitive list of all risk factors associated with an investment in the Company or in connection with the Company's operations. There may be other risks and uncertainties that are not known to the Company or that the Company currently believes are not material, but which also may have a material adverse effect on its business, financial condition, operating results or prospects. In that case, the trading price of the Company's common shares could decline substantially, and investors may lose all or part of the value of the common shares held by them.

An investment in securities of the Company should only be made by persons who can afford a significant or total loss of their investment. There is currently no market through which these securities may be sold and purchasers may not be able to resell securities purchased.

No Ongoing Operations and No Production History

The Company is a mineral exploration company and has no operations or revenue.

Limited Operating History

The Company has no history of earnings. There are no known commercial quantities of mineral reserves on the Company's Property. There is no assurance that the Company will ever discover any economic

FORGE RESOURCES CORP (FORMERLY BENJAMIN HILL MINING CORP.)

Management's Discussion & Analysis

For the year ended August 31, 2024

quantities of mineral reserves.

Negative Operating Cash Flow

Since inception, the Company has had negative operating cash flow. The Company has incurred losses since its founding. The losses and negative operating cash flow are expected to continue for the foreseeable future as funds are expended on the exploration program on the Property and administrative costs. The Company cannot predict when it will reach positive operating cash flow.

Requirement for Further Financing

The Company has limited financial resources and may need to raise additional funds to carry out exploration of its Property. There is no assurance the Company will be able to raise additional funds or will be able to raise additional funds on terms acceptable to the Company. If the Company's exploration programs are successful and favourable exploration results are obtained, the Property may be developed into commercial production. The Company may require additional funds to place the Property into production. The only sources of future funds presently available to the Company are the sale of equity capital, debt, or offering of interests in its Property to be earned by another party or parties by carrying out development work. There is no assurance that any such funds will be available to the Company or be available on terms acceptable to the Company. If funds are available, there is no assurance that such funds will be sufficient to bring the Company's Property to commercial production. Failure to obtain additional financing on a timely basis could have a material adverse effect on the Company, and could cause the Company to forfeit its interest in its Property and reduce or terminate its operations. There is no assurance the Company will be able to raise additional funds.

Exploration

At present, there are no bodies of ore, known or inferred, on the Property and there are no known bodies of commercially recoverable ore on the Property. There is no assurance that the Company's mineral exploration activities will result in any discoveries of commercial bodies of ore on the Property.

Development

The business of exploration for precious metals involves a high degree of risk. Few exploration properties are ultimately developed into producing properties. The Company's Property is at the exploration stage.

Title to Properties

Acquisition of title to mineral properties is a very detailed and time-consuming process. Title to, and the area of, mineral properties may be disputed. Although the Company has investigated its title to the Property for which it holds an option to acquire concessions or other mineral leases or licenses and the Company is satisfied with its review of the title to the Property, the Company cannot give an assurance that title to the Property will not be challenged or impugned. Mineral properties sometimes contain claims or transfer histories that examiners cannot verify, and transfers under foreign law often are complex. The Company does not carry title insurance on the Property. A successful claim that the Company does not have title could cause the Company to lose its rights to the Property, perhaps without compensation for its prior expenditures relating to the Property.

The Company's interest in the Property is by way of an option agreement only: (i) the Company does not own the Property, rather the Company has the right to acquire an interest in the Property by issuing common shares, incurring the expenditures and meeting the certain obligations; (ii) the exploration expenditures under the Option Agreement are optional to the Company, such that if the Company determines the Property to be without sufficient merit at any time prior to exercising its option it is not obligated to incur any further expenditures; (iii) if the Company fails to incur expenditures in accordance with the Option Agreement, it

FORGE RESOURCES CORP (FORMERLY BENJAMIN HILL MINING CORP.)

Management's Discussion & Analysis

For the year ended August 31, 2024

will lose all of its interest in the Property; (iv) the Company is dependent on the optionor to perform its obligations under the Option Agreement and if the optionor fails to perform its obligations thereunder the Company's interest in the Property may be lost. There is no guarantee the Company will be able to raise sufficient funding in the future to incur all expenditures under the Option Agreement.

Surface Rights

The Company does not own the surface rights to the Property. The Company understands that it is necessary, as a practical matter, to negotiate surface access, and the Company is continuing to do so. However, there is a risk that local communities or affected groups may take actions to delay, impede or otherwise terminate the contemplated activities of the Company. There can be no guarantee that the Company will be able to negotiate a satisfactory agreement with any such existing landowners/occupiers for such access, and therefore it may be unable to carry out significant exploration and development activities. In addition, in circumstances where such access is denied, or no agreement can be reached, the Company may need to rely on the assistance of local officials or the courts in such jurisdiction, which assistance may not be provided or, if provided, may not be effective. If the development of a mine on the Property becomes justifiable it will be necessary to acquire surface rights for mining, plant, tailings and mine waste disposal. There can be no assurance that the Company will be successful in acquiring any such rights.

Management

The success of the Company is largely dependent upon the performance of its management. The loss of the services of these persons may have a material adverse effect on the Company's business and prospects. There is no assurance that the Company can maintain the service of its management or other qualified personnel required to operate its business.

Requirement for Permits and Licenses

The Company will be applying for all necessary licenses and permits under applicable laws and regulations to carry on the exploration activities which it is currently planning in respect of the Property, and the Company believes it will comply in all material respects with the terms of such licenses and permits. However, such licenses and permits are subject to changes in regulations and in various operational circumstances. A substantial number of additional permits and licenses will be required should the Company proceed beyond exploration. There can be no guarantee that the Company will be able to obtain such licenses and permits.

Environmental Risks and other Regulatory Requirements

The current or future operations of the Company, including the exploration activities and commencement of production on the Property, will require permits from various federal and local governmental authorities, and such operations are and will be governed by laws and regulations governing exploration, development, production, taxes, labour standards, occupational health, waste disposal, toxic substances, land use, environmental protection, site safety and other matters. There can be no assurance that all permits which the Company may require for its facilities and conduct of exploration and development operations will be obtainable on reasonable terms or that such laws and regulations would not have a material adverse effect on any exploration and development project which the Company might undertake. Failure to comply with applicable laws, regulations and permitting requirements may result in enforcement actions including orders issued by regulatory or judicial authorities causing operations to cease or be curtailed and may include corrective measures requiring capital expenditures, installation of additional equipment or remedial actions. Parties engaged in exploration and development operations may be required to compensate those suffering loss or damage by reason of the exploration and development activities and may have civil or criminal fines or penalties imposed upon them for violation of applicable laws or regulations.

FORGE RESOURCES CORP (FORMERLY BENJAMIN HILL MINING CORP.)

Management's Discussion & Analysis

For the year ended August 31, 2024

Amendments to current laws, regulations and permits governing the operations and activities of mineral companies, or more stringent enforcement thereof, could have a material adverse impact on the Company and cause increases in capital expenditure or exploration and development costs or reduction in levels of production at producing properties or require abandonment or delays in development of new properties.

Uninsurable Risks

Exploration of mineral properties involves numerous risks, including unexpected or unusual geological conditions, rock bursts, cave-ins, fires, floods, earthquakes and other environmental occurrences, and political and social instability. It is not always possible to obtain insurance against all such risks and the Company may decide not to insure against certain risks as a result of high premiums or other reasons. Should such liabilities arise, they could reduce or eliminate any further profitability and result in increasing costs and a decline in the value of the securities of the Company. The Company does not maintain insurance against environmental risks.

Competition

Significant and increasing competition exists for mineral opportunities. There are a number of large established mineral exploration companies with substantial capabilities and greater financial and technical resources than the Company. The Company may be unable to acquire additional mineral properties or acquire such properties on terms it considers acceptable. Accordingly, there can be no assurance that the Company's exploration programs will yield any reserves or result in any commercial mineral operations.

Economic Conditions

Unfavorable economic conditions may negatively impact the Company's financial viability as a result of increased financing costs and limited access to capital markets.

Conflicts of Interest

Directors of the Company may, from time to time, serve as directors of, or participate in ventures with other companies involved in natural resource development. As a result, there may be situations that involve a conflict of interest for such directors. Each director will attempt not only to avoid dealing with such other companies in situations where conflicts might arise but will also disclose all such conflicts in accordance with the *Business Corporations Act* (British Columbia) and will govern themselves in respect thereof to the best of their ability in accordance with the obligations imposed upon them by law.

Litigation

The Company and/or its directors may be subject to a variety of civil or other legal proceedings, with or without merit. The Company does not know of any such pending or actual material legal proceedings as of the date of the Prospectus.

No Cash Dividends

The Company has not declared any cash dividends to date. The Company intends to retain any future earnings to finance its business operations and any future growth. Therefore, the Company does not anticipate declaring any cash dividends in the foreseeable future.

Ore Reserves and Reserve Estimates

The Company's business relies upon the ability to determine whether a given property has commercial quantities of recoverable minerals. No assurance can be given that any discovered mineral reserves and

FORGE RESOURCES CORP (FORMERLY BENJAMIN HILL MINING CORP.)

Management's Discussion & Analysis

For the year ended August 31, 2024

resources will be recovered or that they will be recovered at the rates estimated. Mineral reserve and resource estimates are based on limited sampling and, consequently, are uncertain because the samples may not be representative. Mineral reserve and resource estimates may require revision (either up or down) based on actual production experience.

Proposed Transactions

There are no proposed transactions that have not been disclosed herein.

Contingencies

There are no contingent liabilities.

Additional Disclosure for Venture Issuers without Significant Revenue

Exploration and Evaluation Assets

The Company records its interests in exploration and evaluation assets and areas of geological interest at cost. All direct and indirect costs relating to the acquisition of these interests are capitalized on the basis of specific claim blocks or areas of geological interest until the assets to which they relate are placed into production, sold or management has determined there to be impairment. These costs will be amortized on the basis of units produced in relation to the proven reserves available on the related property following commencement of production.

The recorded cost of exploration and evaluation asset interests is based on cash paid, the assigned value of share considerations issued for exploration and evaluations and exploration and development costs incurred. The recorded amount may not reflect recoverable value as this will be dependent on the development program, the nature of the mineral deposit, commodity prices, adequate funding and the ability of the Company to bring its projects into production.

The Company defers all exploration expenses relating to exploration and evaluations assets and areas of geological interest until the properties to which they relate are placed into production, sold or abandoned or management has determined there to be impairment. These costs will be amortized over the proven reserves available on the related property following commencement of production.

Please refer to the August 31, 2024 consolidated financial statements on www.sedarplus.ca for details of the Company's exploration and evaluation assets.

Internal Controls over Financial Reporting

Changes in Internal Control over Financial Reporting ("ICFR")

In connection with National Instrument 52-109, Certification of Disclosure in Issuer's Annual and Interim Filings ("NI 52-109") adopted in December 2008 by each of the securities commissions across Canada, the Chief Executive Officer and Chief Financial Officer of the Company will file a Venture Issuer Basic Certificate with respect to financial information contained in the audited interim financial statements and the audited annual financial statements and respective accompanying Management's Discussion and Analysis. The Venture Issue Basic Certification does not include representations relating to the establishment and maintenance of disclosure controls and procedures and internal control over financial reporting, as defined in NI52-109.
