

NuRAN to Present its Multi Standard Platform at MWC 2019 in Barcelona, Spain

Quebec City, Canada, February 19th, 2019

NuRAN Wireless (“NuRAN Wireless” or the “Company”) (CSE: NUR) (OTC: NRRWF) (FSE: 1RN) a leading supplier of mobile and broadband wireless solutions is pleased to announce that it will be participating at the Mobile World Congress (“MWC”) 2019 in Barcelona, Spain.

The Company will be present from Monday February 25th 2019 to Thursday February 28th 2019. The team will be meeting with current clients, potential new clients, partners and investors at the Company’s exhibition booth located in Hall 7 Stand 7M21.

Moreover, during the event, NuRAN Wireless will be presenting its first version of the LiteCell xG; its much anticipated multi-standard 2G, 3G, 4G (LTE) base station all within a single unit. NuRAN will present how Mobile Network Operators can maximize their return on investment by providing seamlessly evolutive services from 2G all the way to 5G to their subscribers thanks to the future-proof multi-standard, software-defined LiteCell xG

On September 25, 2018, NuRAN had announced that the LiteCell xG is an innovative carrier-grade tower-mount mobile radio access equipment which may be operated in any combination of 2G, 3G, and 4G (LTE) to maximize network access to subscribers through the simultaneous support of different technologies. Built from the ground up as a software-defined radio, LiteCell xG provides the flexibility and upgradability which operators are seeking in order to deliver the most appropriate services and evolve those services as needs arise with minimal intervention.

NuRAN expects its multi-standard solution to significantly widen its market base from strictly rural to rural and suburban greenfield deployments, as well as qualifying for infrastructure upgrade programs.

Highlights of the the LiteCell xG include;

- Expands portfolio to address a broader marker
- Maximizes operator revenues and minimizes costs
- Evolves with the operator’s needs; future-proofs network

“The progress in the NuRAN Wireless roadmap of next generation products positions the company to take advantage of the enormous growth in rural broadband rollouts planned for both the Middle East and Africa. The next generation products developed by NuRAN are being developed with specific customer needs in mind therefore we are very confident about the future demand for the LiteCell xG.” states Francis Létourneau, Vice-President of Sales and Marketing at NuRAN Wireless Inc.

“Mobile World Congress is one of the most important events on our Calendar. It was only a few years ago that we attended as an ‘under the radar’ visitor trying to carve out our place. In 2016, NuRAN was invited by Facebook as one of the founding members of the Telecom Infra Project (“TIP”); a major turning point for the company. Then in 2017, we unveiled alongside Facebook, Cavium and Keysight the first version of the Open Cellular 4G LTE solution. Last year we were selected by GSMA with Google, Ericsson and Nokia to feature the NuRAN LiteCell 1.5 in the Humanitarian Innovation Showcase. This year we will once again make our mark by presenting LiteCell xG, another great milestone proving our ability to quickly react to market needs and circumstances and solidify our recognition as an important player in the rural and remote mobile connectivity industry.” added Mr Létourneau.

Forward Looking Statements

This press release contains "forward-looking information" within the meaning of applicable Canadian securities legislation. Forward-looking information includes, without limitation, statements regarding the timing of the Offering, the use of proceeds from the Offering, and the future plans or prospects of the Company. Generally, forward-looking information can be identified by the use of forward-looking terminology such as "plans", "expects" or "does not expect", "is expected", "budget", "scheduled", "estimates", "forecasts", "intends", "anticipates" or "does not anticipate", or "believes", or variations of such words and phrases or state that certain actions, events or results "may", "could", "would", "might" or "will be taken", "occur" or "be achieved". Forward-looking information is subject to known and unknown risks, uncertainties and other factors that may cause the actual results, level of activity, performance or achievements of NuRAN Wireless Inc., as the case may be, to be materially different from those expressed or implied by such forward-looking information. Although the Company has attempted to identify important factors that could cause actual results to differ materially from those contained in forward-looking information, there may be other factors that cause results not to be as anticipated, estimated or intended. There can be no assurance that such information will prove to be accurate, as actual results and future events could differ materially from those anticipated in such statements. Accordingly, readers should not place undue reliance on forward-looking information. Other factors which could materially affect such forward-looking information are described in the risk factors in the Company's most recent annual management's discussion and analysis that is available on the Company's profile on SEDAR at www.sedar.com. The Company does not undertake to update any forward-looking information, except in accordance with applicable securities laws.
