1. NATURE AND CONTINUANCE OF OPERATIONS

Oceanside Capital Corp. (formerly 1031216 B.C. Ltd.) ("the Company") was incorporated on March 23, 2015 pursuant to the BCBCA. The Company is a wholly owned subsidiary of Eyecarrot Innovations Corp. (formerly Nanton Nickel Corp.). The address of its head office is located at Suite 800-1199 West Hastings Street, Vancouver, British Columbia, V6E 3T5 and its registered office is at Suite 2080-777 Hornby Street, Vancouver, BC, V6Z 1S4.

The Company is required to facilitate separate fund-raising, exploration and development strategies to achieve its business objectives and it expects to commence these strategies as soon as practicable following the Effective Date of the Arrangement.

The Company is an exploration stage company with no producing properties and consequently has no current operating income cash flow or revenues. There is no assurance that a commercially viable mineral deposit exists on any of its properties. The Property is currently in the exploration stage.

These condensed interim financial statements have been prepared on a going concern basis in accordance with International Financial Reporting Standards ("IFRS") with the assumption that the Company will be able to realize its assets and discharge its liabilities in the normal course of business.

The Company's continuing operations, as intended, are dependent upon its ability to identify, evaluate and negotiate an acquisition of or participation in an interest in properties, assets or businesses.

2. BASIS OF PRESENTATION

Statement of compliance

(a) These condensed interim financial statements are prepared in accordance with IFRS, as issued by the International Accounting Standards Board ("IASB"). Therefore, these financial statements comply with International Accounting Standard ("IAS") 34 "Interim Financial Reporting".

2. BASIS OF PRESENTATION (CONTINUED)

(c) New accounting pronouncements

The following new standard has been issued by the IASB, but is not yet effective:

IFRS 9 *Financial Instruments*

IFRS 9 is part of the IASB's wider project to replace IAS 39 *Financial Instruments: Recognition and Measurement*. IFRS 9 retains, but simplifies, the mixed measurement model and establishes two primary measurement categories for financial assets: amortized cost and fair value. The basis of classification depends on the entity's business model and the contractual cash flow characteristics of the financial asset. IASB has indefinitely postponed the mandatory adoption date of this standard. The Company is in the process of evaluating the impact of the new standard.

3. SIGNIFICANT ACCOUNTING POLICIES

(a) Financial instruments

(i) Financial assets

The Company classifies its financial assets as fair value through profit or loss (“FVTPL”). The classification depends on the purpose for which the financial assets were acquired. Management determines the classification of financial assets at recognition.

Fair value through profit or loss

Financial assets are classified as FVTPL when the financial asset is held-for-trading or it is designated as FVTPL. A financial asset is classified as FVTPL when it has been acquired principally for the purpose of selling in the near future; it is a part of an identified portfolio of financial instruments that the Company manages and has an actual pattern of short-term profit-taking or if it is a derivative that is not designated and effective as a hedging instrument. Upon initial recognition, attributable transaction costs are recognized in profit or loss when incurred. Financial instruments at FVTPL are measured at fair value, and changes therein are recognized in profit or loss. Cash is included in this category of financial assets.

(ii) Fair value hierarchy

Fair value measurements of financial instruments are required to be classified using a fair value hierarchy that reflects the significance of inputs used in making the measurements. The levels of the fair value hierarchy are defined as follows:

Level 1 - Quoted prices (unadjusted) in active markets for identical assets or liabilities.

Level 2 - Inputs other than quoted prices included within Level 1 that are observable for the asset or liability, either directly or indirectly.

Level 3 - Inputs for assets or liabilities that are not based on observable market data.

(b) Capital stock

Financial instruments issued by the Company are classified as equity only to the extent that they do not meet the definition of a financial liability or financial asset. The Company's common shares are classified as equity instruments.

4. RISK MANAGEMENT AND FINANCIAL INSTRUMENTS

The Company classifies its financial instrument as follows:

- Cash is classified as a financial asset at FVTPL

The carrying value of this financial asset approximates its fair value.

The Company's risk exposure and the impact on the Company's financial instrument is summarized below:

Liquidity risk

Liquidity risk is the risk that the Company will encounter difficulty in satisfying financial obligations as they become due. The Company manages its liquidity risk by forecasting cash flows from operations and anticipated investing and financing activities. The Company's objective in managing liquidity risk is to maintain sufficient readily available reserves in order to meet its liquidity requirements. The Company is not exposed to significant liquidity risk.

Market risk

Market risk is the risk that the fair value or future cash flows of a financial instrument will significantly fluctuate due to changes in market prices. The value of financial instruments can be affected by changes in interest rates, foreign currency rates and other price risk.

Interest rate risk

The Company is not subject to significant interest rate risk with respect to its financial instruments.

Currency risk

The Company is not exposed to significant currency risk, as the majority of financial instruments and expenditures incurred by the Company are denominated in Canadian dollars.
