KOOTENAY ZINC CORP. GRAVITY SURVEY COMPLETED AND NEW DRILL PROGRAM BEGINS AT SULLY

Vancouver, B.C., November 15, 2016 – Kootenay Zinc Corp. (the "Company") is pleased to announce that Excel Geophysics Inc. has recently completed a detailed gravity survey over the EAST target at the Sully property located near Kimberley, British Columbia. These new measurements have been added to the site dataset resulting in an updated residual gravity map providing new targeting criteria in the area. As a result, the Company also announces that FB Drilling Ltd. of Cranbrook, B.C. has mobilized and commenced a new drilling program at the Sully property.

Objectives and Results

The new gravity map provides higher resolution of the previously identified Sully EAST mass anomaly, now labeled "E1" comprising a well-defined north-trending feature up to 700 m long. E1 appears to dip steeply to the east and is parallel to the stratigraphic grain of the Hughes Range. This anomaly is within the upper portion of Hughes Range Aldridge stratigraphic unit A1c that correlates with the Sullivan Time horizon. Drill hole SY16-10, now underway, will test the highest amplitude area in the southern part of the elongate E1 anomaly, best explained by the presence of a stratabound (possibly SEDEX) mass coincident with Sullivan Time. Permits are in place for this drill program and the proposed trajectory is intended to provide an intercept of Sullivan-equivalent Time horizon for the first time in the history of the project. Temperature and mag field readings in a 2014 hole (SU14-09) also suggest proximity to massive sulphide mass in this area.

The gravity survey has also identified two new mass anomalies (numbered E2 and E3) expanding the potential of the greater EAST target area and providing a new understanding of faulting of a theorized SEDEX mass. E2 and E3 include higher magnitude mass anomalies occurring in en-echelon steps to the northeast that together constitute another +700 m of strike extent. The E2 and E3 anomalies are also inferred to coincide with the upper portion of Hughes Range Aldridge stratigraphic unit A1c that contains the Sullivan Time horizon, and to be beneath a low angle normal fault that effectively blinds the targets to surface. Based on preliminary interpretation of the gravity results these may be comparatively shallow targets.

The Sully project team will continue to review how this information fits with current understanding of the local geology mapping and assessment of structures based on information from drill holes completed in 2014. The EAST anomalies are open to the north and the east, and another target to the north (E4) requires additional surveying to delineate. As a result of this new information additional gravity stations are proposed.

The WEST mass anomaly remains essentially untested and the project team will determine opportunities and methods to further advance that target area with additional surveys in the future.

About the Company

Kootenay Zinc Corp. is a mineral exploration and development company based in Vancouver, British Columbia that is presently targeting the Sully Property. The Company is focused on discovering large-scale sedimentary-exhalative ("SEDEX") deposits.

The Sully Property comprises 1375 ha located approximately 30km east of Kimberley, B.C. and overlies rocks of similar age and origin as those which host the world-class Sullivan Deposit, owned by Teck Resources Limited. Sullivan was discovered in 1892 and is known to be one of the largest sedimentary-exhalative ("SEDEX") deposits in the world. Over its 100-year lifetime, Sullivan produced approximately 150 million tonnes of ore, including three billion ounces of silver, eight million tonnes of zinc and eight million tonnes of lead. The equivalent level of strata as at Sullivan and that formed on the margin of that same basin are present at the Sully Property. The Company cautions that past results or discoveries on proximate land are not necessarily indicative of the results that may be achieved on the Sully Property.

The scientific and technical information contained in this news release has been reviewed and approved by the Company's Project Manager, Paul Ransom, P.Geo., a "Qualified Person" as defined in National Instrument 43-101 – *Standards of Disclosure for Mineral Projects*.

On behalf of the Board of Directors

David Schmidt
President and Chief Executive Officer

Forward Looking Information

This news release includes certain statements that constitute "forward-looking information" within the meaning of applicable securities law, including without limitation, statements that address the Sully Property, comments regarding the timing and content of upcoming work programs, geological interpretations, costs and timing of future exploration and development, requirements for additional capital, other statements relating to the financial and business prospects of the Company and other matters. Forwardlooking statements address future events and conditions and are necessarily based upon a number of estimates and assumptions. These statements relate to analyses and other information that are based on forecasts of future results, estimates of amounts not yet determinable and assumptions of management. Any statements that express or involve discussions with respect to predictions, expectations, beliefs, plans, projections, objectives, assumptions or future events or performance (often, but not always, using words or phrases such as "expects" or "does not expect", "is expected", "anticipates" or "does not anticipate", "plans", "estimates" or "intends", or stating that certain actions, events or results "may", "could", "would", "might" or "will" be taken, occur or be achieved), and variations of such words, and similar expressions are not statements of historical fact and may be forward-looking statements. Forward-looking statement are necessarily based upon a number of factors that, if untrue, could cause the actual results, performances or achievements of the Company to be materially different from future results, performances or achievements express or implied by such statements. Such statements and information are based on numerous assumptions regarding present and future business strategies and the environment in which the Company will operate in the future, including the price of zinc and other metals. anticipated costs and the ability to achieve goals. While such estimates and assumptions are considered reasonable by the management of the Company, they are inherently subject to significant business, economic, competitive and regulatory uncertainties and risks. Forward-looking statements are subject to a variety of risks and uncertainties, which could cause actual events, level of activity, performance or results to differ materially from those reflected in the forward-looking statements, including, without limitation: (i) risks related to zinc, base metal and other commodity price fluctuations; (ii) risks and uncertainties relating to the interpretation of exploration results; (iii) risks related to the inherent uncertainty of exploration and cost estimates and the potential for unexpected costs and expenses; (iv) that resource exploration and development is a speculative business; (v) that the Company may lose or abandon its property interests or may fail to receive necessary licences and permits; (vi) that environmental laws and regulations may become more onerous; (vii) that the Company may not be able to raise additional funds when necessary; (viii) the possibility that future exploration, development or mining results will not be consistent with the Company's expectations; (ix) exploration and development risks, including risks related to accidents, equipment breakdowns, labour disputes or other unanticipated difficulties with or interruptions in exploration and development; (x) competition; (xi) the potential for delays in exploration or development activities or the completion of geologic reports or studies; (xii) the uncertainty of profitability based upon the Company's history of losses; (xiii) risks related to environmental regulation and liability; (xiv) risks associated with failure to maintain community acceptance, agreements and permissions (generally referred to as "social licence"); (xv) risks relating to obtaining and maintaining all necessary government permits, approvals and authorizations relating to the continued exploration and development of the Company's projects; (xvi) risks related to the outcome of legal actions; (xvii) political and regulatory risks associated with mining and exploration; (xix) risks related to current global financial conditions; and (xx) other risks and uncertainties related to the Company's prospects, properties and business strategy. These risks, as well as others, could cause actual results and events to vary significantly. There can be no assurance that planned exploration will be completed as proposed or at all, or that economic resources will be discovered or developed at the Sully Property. Accordingly actual results may differ materially from those currently anticipated in such statements. Factors that could cause actual results to differ materially from those in forward looking statements include, but are not limited to, continued availability of capital and financing and general economic, market or business conditions, the loss of key directors, employees, advisors or consultants and fees charged by service providers. Investors are cautioned that forward-looking statements are not guarantees of future performance or events and, accordingly are cautioned not to put undue reliance on forward-looking statements due to the inherent uncertainty of such statements. The forward-looking statements included in this news release are made as of the date hereof and the Company disclaims any intention or obligation to update or revise any forward-looking statements, whether as a result of new information, future events or otherwise, except as expressly required by applicable securities legislation. Neither the CSE nor its regulation services provider accepts responsibility for the adequacy or accuracy of this news release.
