Supplemental Cash Flow Information (Note 18)

Notes to the Condensed Interim Consolidated Financial Statements Six Months Ended December 31, 2018 and 2017 (Unaudited – Prepared by Management) (Expressed in Canadian dollars)

1. Corporate Information

Green 2 Blue Energy Corp (Formerly Brigade Resource Corp.) (the "Company") was incorporated on October 9, 2014 in British Columbia under the Business Corporations Act. The Company was previously engaged in the business of mineral exploration and the acquisition of mineral property assets in Ontario through its subsidiary, Brigadier. The Company has since terminated all of its mineral property interests.

On January 16, 2017, the Company entered into a Share Exchange Agreement with G2BE Canada Inc. ("G2BE"), a private British Columbia company incorporated on May 30, 2014 for a reverse-takeover transaction whereby the Company would acquire all of the issued and outstanding common shares in the capital of G2BE (the "Transaction").

On July 21, 2017, the Company completed the Acquisition with G2BE by issuing 47,000,002 common shares to the G2BE shareholders on the basis of one common share for every one G2BE common share. Upon completion of the Acquisition, the G2BE shareholders held approximately 87% of the issued and outstanding company shares of the Company. As the shareholders of G2BE hold a majority of the common shares of the Company and will continue its existing business, G2BE is considered to have acquired the Company on an accounting basis, and the transaction was accounted for as a reverse takeover.

Accordingly, the Company is now in the business of manufacturing, marketing, and distributing softwood pellets and shavings for consumer and industrial customers and arranging transactions between buyers and sellers of alternative energy products. The Company's registered office is located at Suite 1080, 789 West Pender Street, Vancouver BC.

These interim consolidated financial statements have been prepared on a going concern basis, which assumes that the Company will be able to realize its assets and discharge its liabilities in the normal course of business. As at December 31, 2018, the Company had a negative cash flow from operations, had an accumulated deficit of \$11,350,078. Furthermore, the Company incurred a net loss of \$784,350 during the six months ended December 31, 2018. To obtain future profitability, the Company will need to increase the volume of production and sales, and is reliant on the co-operation of creditors to pay outstanding amounts on a timely basis. Management believes that the proceeds from additional equity and debt financing activities that it is currently pursuing, combined with revenue that the Company expects to generate in subsequent periods, will provide the Company with sufficient working capital to satisfy its liabilities and commitments as they become due for the foreseeable future. There can be no assurances that sufficient equity or debt can be raised on a timely basis or on terms that are acceptable to the Company. These factors, however, indicate the existence of a material uncertainty that casts significant doubt on the ability of the Company to continue as a going concern or in its present form. These interim consolidated financial statements do not reflect any adjustments that may be necessary if the Company is unable to continue as a going concern.

2. Basis of Presentation

(a) Statement of Compliance and Principles of Consolidation

These interim consolidated interim financial statements have been prepared in accordance with International Financial Reporting Standards ("IFRS") as issued by the International Accounting Standards Board ("IASB") applicable to the preparation of interim financial statements, including IAS 34, *Interim Financial Reporting*. The interim consolidated financial statements should be read in conjunction with the annual consolidated financial statements for the year ended June 30, 2018, which have been prepared in accordance with IFRS as issued by the IASB. The Company uses the same accounting policies and methods of computation as in the annual consolidated financial statements.

The interim consolidated financial statements were authorized for issue by the Board of Directors on March 1, 2019.

Notes to the Condensed Interim Consolidated Financial Statements Six Months Ended December 31, 2018 and 2017 (Unaudited – Prepared by Management) (Expressed in Canadian dollars)

2. Basis of Presentation (continued)

(a) Statement of Compliance and Principles of Consolidation (continued)

The interim consolidated financial statements include the accounts and results of operations of the Company and its wholly owned subsidiaries listed in the following table:

Name of Subsidiary	Place of Incorporation	Ownership Interest
G2BE Canada Inc. ("G2BE")	Canada	100%
G2BE Europe Ltd. ("G2BEEL")	Malta	100%
G2BE Poland Sp z o.o. ("G2BE PL")	Poland	99% owned by G2BEEL
G2BE Production Sp. z.o.o. ("G2BEP")	Poland	99.5% owned by G2BE PL
G2BE Zaklad 2 Sp. z o.o. ("G2BE Z2")	Poland	99% owned by G2BE PL
G2BE Sino Limited ("G2BESL)	Hong Kong	65%

(b) Basis of Measurement

These interim consolidated financial statements have been prepared on a historical cost basis, modified where applicable. In addition, these interim consolidated financial statements have been prepared using the accrual basis of accounting, except for cash flow information.

The interim consolidated financial statements are presented in Canadian dollars, except where otherwise indicated. The functional currency of each entity is measured using the currency of the primary economic environment in which the entity operates. The functional currency of the Company, G2BE, G2BEL and G2BESL is Canadian dollars and G2BE Production, G2BE Zaklad 2 and G2BE Poland's functional currency is Polish zloty ("PLN\$").

(c) Use of Estimates and Judgments

The preparation of these interim consolidated financial statements requires management to make certain estimates, judgments, and assumptions that affect the reported amounts of assets and liabilities at the date of the interim consolidated financial statements and reported amounts of expenses during the period. These estimates are, by their nature, uncertain. The impacts of such estimates are pervasive throughout the interim consolidated financial statements and may require accounting adjustments based on future occurrences. Revisions to accounting estimates are recognized in the period in which the estimate is revised and future periods if the revision affects both current and future periods. These estimates are based on historical experience, current and future economic conditions, and other factors including expectations of future events that are believed to be reasonable under the circumstances.

Significant assumptions about the future and other sources of estimation uncertainty that management has made at the reporting date that could result in a material adjustment to the carrying amounts of assets and liabilities.

Significant areas of estimation and judgment include the collectability of accounts receivable, useful life and recoverability of long-lived assets, measurement of provisions, valuation of inventory, fair value of derivative liabilities, fair value of share-based payments, application of the going concern assumption, and deferred income tax asset valuation allowances.

Notes to the Condensed Interim Consolidated Financial Statements Six Months Ended December 31, 2018 and 2017 (Unaudited – Prepared by Management) (Expressed in Canadian dollars)

2. Basis of Presentation (continued)

(c) Use of Estimates and Judgments (continued)

The Company's policy for property and equipment requires judgment in determining whether the present value of future expected economic benefits exceeds capitalized costs. The policy requires management to make certain estimates and assumptions about future economic benefits related to its operations. Estimates and assumptions may change if new information becomes available. If information becomes available suggesting that the recovery of capitalized cost is unlikely, the capitalized cost is written off to the consolidated statement of operations.

The assessment of whether the going concern assumption is appropriate requires management to take into account all available information about the future, which is at least, but is not limited to, 12 months from the end of the reporting period. The Company is aware that material uncertainties related to events or conditions may cast significant doubt upon the Company's ability to continue as a going concern.

(d) Restatement

Certain comparative amounts for the prior period have been restated to conform with the basis of presentation in the current year. Such restatement had no effect on shareholders' equity.

3. Accounting Policies Implemented on July 1, 2018

The Company has adopted new accounting standard IFRS 9 – Financial Instruments, effective for annual periods beginning on or after January 1, 2018. The adoption of IFRS 9 did not result in any changes to the classification, measurement or carrying amounts of the Company's existing financial instruments on transition date. The new standard brings together the classification and measurement, impairment and hedge accounting phases of the IASB's project to replace IAS 39 – Financial instruments: recognition and measurement. The standard retains but simplifies the mixed measurement model and establishes two primary measurement categories for financial assets: amortized cost and fair value. The Company continues to classify and measure its financial instruments at fair value through profit or loss with changes in fair value recognized in profit or loss as they arise ("FVTPL"), unless restrictive criteria regarding the objective and contractual cash flows of the instrument are met for classifying and measuring at either amortized cost or fair value through other comprehensive income. Cash and cash equivalents, and trade receivables continue to be recorded at FVTPL. Trade and other payables are classified and measured as financial liabilities, initially at FVTPL, and subsequently at amortized cost using the effective interest rate method.

The Company has adopted new accounting standard IFRS 15 *Revenue from Contracts with Customers*, effective for annual periods beginning on or after January 1, 2018 using the cumulative effective basis, with no restatement of the comparative period. IFRS 15 establishes a five-step model to account for revenue arising from contracts with customers.

The Company principally generates revenue from the production and sale of residential and commercial wood pellets. The Company has reviewed its sources of revenue from the sale of products using the guidance found in IFRS 15 and determined that there are no material changes to the timing and measurement of the Company's revenue from these sources as compared to the previous standards

Notes to the Condensed Interim Consolidated Financial Statements Six Months Ended December 31, 2018 and 2017 (Unaudited – Prepared by Management) (Expressed in Canadian dollars)

4. Accounting Standards Issued But Not Yet Effective

Certain pronouncements were issued by the IASB or the IFRS Interpretations Committee that are mandatory for annual periods beginning after January 1, 2019 or later periods.

On January 13, 2016, the IASB published a new standard, IFRS 16, *Leases*, eliminating the current dual accounting model for lessees, which distinguishes between on-balance sheet finance leases and off-balance sheet operating leases. Under the new standard, a lease becomes an on-balance sheet liability that attracts interest, together with a new right-of-use asset. In addition, lessees will recognize a front-loaded pattern of expense for most leases, even when cash rentals are constant. IFRS 16 is effective for annual periods beginning on or after January 1, 2019, with earlier adoption permitted. The Company is currently assessing the impact of the new standard including the optional exemptions available. The recognition of all leases on balance sheet is expected to increase the assets and liabilities on the Consolidated Statement of Financial Position upon adoption. The increase primarily relates to property leases currently accounted for as operating leases. The Company does not intend to early adopt the standard.

Other accounting standards or amendments to existing accounting standards that have been issued but have future effective dates are either not applicable or are not expected to have a significant impact on the Company's consolidated financial statements.

8. Land and Buildings (continued)

On June 19, 2018, the Company exercised its option to purchase its leased premises and buildings in Rzeczenica, Poland, that was negotiated at time of signing the original lease in November 2016 with the court appointed receiver Seeger-Dach Sp. z o.o. ("Seeger-Dach"). The Company will pay Seeger-Dach a cash payment of \$670,000 (PLN \$1,903,494) plus applicable (23%) Value Added Tax ("VAT"). The Property Purchase agreement includes 17 acres of land, all buildings, and existing infrastructure. Closing will not occur until the Company has received its VAT opinion from the Polish courts and tax authority. As at December 31, 2018, the transaction has not yet closed.

9. Loans Payable

- (a) As at December 31, 2018, the Company owed \$1,821 (PLN\$5,000) (June 30, 2018 \$1,758 (PLN\$5,000)) to an unrelated third party, which is unsecured, bears interest at 10% per annum, and was due on July 31, 2016.

10. Obligations Under Finance Lease

The Company entered into an agreement to lease machinery used in the production of wood pellets. The equipment lease is classified as a finance lease. The interest rate underlying the obligation in the finance lease is 26% per annum. The Company ceased making payments in September 2017. On December 31, 2018, the Company owed \$396,427 (PLN 1,088,546) and entered into a settlement agreement to purchase the equipment for \$257,566 as described in Note 16(a). At December 31, 2018, the Company had classified the total amount owing on the lease as current.

The Company entered into an agreement to lease machinery used in the production of wood pellets. The equipment lease is classified as a finance lease. The interest rate underlying the obligation in the finance lease is 2% per annum.

The following is a schedule by years of future minimum lease payments under the remaining finance lease together with the present value of the net minimum lease payments as of December 31, 2018:

Total:	248,733

17. Financial Instruments and Risk Management

The Company is exposed in varying degrees to a variety of financial instrument and related risks. Those risks and management's approach to mitigating those risks are as follows:

(a) Fair Values

The fair values of other financial instruments, which include accounts receivable, accounts payable and accrued liabilities, loans payable, amounts due from and to related parties, and obligations under finance lease, approximate their carrying values due to the relatively short-term maturity of these instruments.

(b) Credit Risk

Credit risk is the risk that one party to a financial instrument will fail to discharge an obligation and cause the other party to incur a financial loss. The Company's exposure to credit risk is in its cash and accounts receivables. Cash is held with major banks in Canada, which are high credit quality financial institutions as determined by rating agencies. The carrying amount of financial assets represents the maximum credit exposure.

Accounts receivable consists of trade receivables and input tax credits. The following table represents the customers that represented 10% or more of total trade receivables as of:

	December 31,	June 30,	
	2018	2018	
Customer A	67%	37%	
Customer B	8%	19%	
Customer C	8%	20%	
Customer D	4%	10%	

The following table represents the customers that represented 10% or more of total revenue for the six months ended December 31:

	2018	2017	
Customer A	99%	97%	-

17. Financial Instruments and Risk Management (continued)

(c) Currency Risk

The Company's functional currencies are the Canadian dollar and Polish zloty. Currency risk is the risk that the fair value of the Company's financial instruments will fluctuate because of changes in foreign currency exchange rates. The Company's head office and some operating expenses are denominated in Canadian dollars. The Company's revenue and a large portion of operating expenses are denominated in Polish zloty. If the Polish zloty depreciates compared to the Canadian dollar, revenue would decrease in Canadian dollars. A 10% change in the foreign currency exchange rate would have an approximate impact of \$41,000 on net loss. The Company manages its exposure to foreign currency fluctuations by maintaining foreign currency bank accounts to offset foreign currency payables where possible. Management relies on the natural hedge created by this matching process and thus has chosen not to otherwise hedge its foreign exchange risk.

(d) Interest Rate Risk

The Company's exposure to interest rate risk relates to its ability to earn interest income on cash balances at variable rates and its short-term term deposits at prescribed market rates. The fair value of the Company's cash is not significantly affected by changes in short-term interest rates. The income earned from the bank accounts and short-term term deposits is subject to movements in interest rates.

(e) Liquidity and Funding Risk

Liquidity risk arises through the excess of financial obligations over available financial assets due at any point in time. The Company's objective in managing liquidity risk is to maintain sufficient readily available capital in order to meet its liquidity requirements. Management maintains sufficient cash to satisfy short-term liabilities in highly liquid investments.

Funding risk is the risk that market conditions will impact the Company's ability to raise capital through equity markets under acceptable terms and conditions.
