Notes to the Condensed Interim Consolidated Financial Statements

Six months ended December 31, 2020 and 2019

(Unaudited – Prepared by Management)

(Expressed in Canadian dollars)

1. Corporate Information

G2 Technologies Corp. (formerly Green 2 Blue Energy Corp.) (the “Company” or “GTOO”) was incorporated on October 9, 2014 in British Columbia under the Business Corporations Act.

On January 16, 2017, the Company entered into a Share Exchange Agreement with G2BE Canada Inc. (“G2BEC”), a private British Columbia company incorporated on May 30, 2014 resulting in a reverse-takeover transaction whereby the Company acquired all of the issued and outstanding common shares in the capital of GTOO (the “Transaction”).

Up until the disposition of all operating subsidiaries on March 31, 2020 (Note 2(a)), the Company was in the business of manufacturing, marketing, and distributing softwood pellets for consumer and industrial customers and arranging transactions between buyers and sellers of alternative energy products.

Since March 31, 2020, the Company has effectively been a shell company with no operations and is currently looking for other ventures to build value for its shareholders.

On October 25, 2020, the Company changed its name from Green 2 Blue Energy Corp. to G2 Technologies Corp. and change its ticker symbol to “GTOO”.

The Company’s registered office is located at 1105 -808 Nelson Street, Vancouver BC.

Going concern

These unaudited interim consolidated financial statements have been prepared on a going concern basis, which assumes that the Company will be able to realize its assets and discharge its liabilities in the normal course of business. As at December 31, 2020, the Company had a negative cash flow from operations, had an accumulated deficit of \$13,493,231 (June 30, 2020 - \$13,210,802). Furthermore, the Company incurred a net loss of \$282,429 during the period ended December 31, 2020 (2019 - \$393,409). Management believes that the proceeds from additional equity and debt financing activities that it is currently pursuing would provide the Company with sufficient working capital to satisfy its liabilities and commitments as they become due for the foreseeable future. However, there can be no assurances that sufficient equity or debt can be raised on a timely basis or on terms that are acceptable to the Company. These factors indicate the existence of a material uncertainty that casts significant doubt on the ability of the Company to continue as a going concern. These consolidated financial statements do not reflect any adjustments that may be necessary if the Company is unable to continue as a going concern.

Covid-19

During March 2020, there was a global outbreak of COVID-19 (coronavirus), which has had a significant impact on businesses through the restrictions put in place by the Canadian, provincial and municipal governments regarding travel, business operations and isolation/quarantine orders. At this time the extent of the impact the COVID-19 outbreak may have on the Company is unknown as this will depend on future developments that are highly uncertain and that cannot be predicted with confidence. These uncertainties arise from the inability to predict the duration of the outbreak, including the duration of travel restrictions, business closures or disruptions, and quarantine/isolation measures that are currently, or may be put, in place by Canada and other countries to fight the virus.

2. Basis of Presentation

(a) Statement of Compliance and Principles of Consolidation

These interim consolidated interim financial statements have been prepared in accordance with International Financial Reporting Standards (“IFRS”) as issued by the International Accounting Standards Board (“IASB”) applicable to the preparation of interim financial statements, including IAS 34, *Interim Financial Reporting*. The interim consolidated financial statements should be read in conjunction with the annual consolidated financial statements for the year ended June 30, 2020, which have been prepared in accordance with IFRS as issued by the IASB. The Company uses the same accounting policies and methods of computation as in the annual consolidated financial statements.

The interim consolidated financial statements were authorized for issue by the Board of Directors on February 24, 2021.

The interim consolidated financial statements include the accounts and results of operations of the Company and its wholly owned subsidiaries listed in the following table:

Name of Subsidiary	Place of Incorporation	December 31, 2020 Ownership Interest	June 30, 2020 Ownership Interest

Notes to the Condensed Interim Consolidated Financial Statements

Six months ended December 31, 2020 and 2019

(Unaudited – Prepared by Management)

(Expressed in Canadian dollars)

During the year ended June 30, 2020, the Company disposed of five of its subsidiaries as noted above for \$Nil consideration, resulting in the following assets and liabilities being deconsolidated as of the disposition dates:

	Disposition on March 31, 2020 (ii)	Disposition on November 29, 2019 (i)	TOTAL
Cash and cash equivalents	(1,541)	(2,232)	(3,773)

NCI	-	3,846	3,846
GAIN ON DISPOSITION	545,206	112,030	657,236

- i) On November 29, 2019, the Company transferred its ownership in the shares of G2BZ2 to an arm's length British Columbia private company due to its inability to provide financing for the repayment of its liabilities. Accordingly, as of November 29, 2019 the subsidiary was deconsolidated.
- ii) On February 19, 2020, a loan ("Default Loan") in G2BEEL was in default due to the cease trade order at the Company. On March 31, 2020, the Company entered into a Settlement Agreement ("Settlement Agreement") to settle the Default Loan of approximately \$301,594 in G2BEEL. Pursuant to the Settlement Agreement, the Company transferred the shares the Company held in G2BEEL, G2BEPL, G2BEC, G2BEP to the lender. Accordingly, as of March 31, 2020 these subsidiaries were deconsolidated.

(b) Basis of Measurement

These consolidated financial statements have been prepared on a historical cost basis, modified where applicable. In addition, these consolidated financial statements have been prepared using the accrual basis of accounting, except for cash flow information.

The consolidated financial statements are presented in Canadian dollars, except where otherwise indicated. The functional currency of each entity is measured using the currency of the primary economic environment in which the entity operates. The functional currency of the Company, Arsenal, G2BEC, G2BEEL and G2BESL is Canadian dollars and G2BEP, G2BZ2 and G2BEPL 's functional currency is Polish zloty ("PLN\$").

(c) Use of Estimates and Judgments

The preparation of these consolidated financial statements requires management to make certain estimates, judgments, and assumptions that affect the reported amounts of assets and liabilities at the date of the consolidated financial statements and reported amounts of expenses during the period. These estimates are, by their nature, uncertain. The impacts of such estimates are pervasive throughout the consolidated financial statements and may require accounting adjustments based on future occurrences. Revisions to accounting estimates are recognized in the period in which the estimate is revised and future periods if the revision affects both current and future periods. These estimates are based on historical experience, current and future economic conditions, and other factors including expectations of future events that are believed to be reasonable under the circumstances.

G2 TECHNOLOGIES CORP. (FORMERLY GREEN 2 BLUE ENERGY CORP.)

Notes to the Condensed Interim Consolidated Financial Statements

Six months ended December 31, 2020 and 2019

(Unaudited – Prepared by Management)

(Expressed in Canadian dollars)

Significant assumptions about the future and other sources of estimation uncertainty that management has made at the reporting date could result in a material adjustment to the carrying amounts of assets and liabilities.

Significant areas of estimation and judgment include the collectability of accounts receivable, useful life and recoverability of long-lived assets, measurement of provisions, valuation of inventory, fair value of derivative liabilities, fair value of share-based payments, application of the going concern assumption, and deferred income tax asset valuation allowances.

The Company's policy for property and equipment requires judgment in determining whether the present value of future expected economic benefits exceeds capitalized costs. The policy requires management to make certain estimates and assumptions about future economic benefits related to its operations. Estimates and assumptions may change if new information becomes available. If information becomes available suggesting that the recovery of capitalized cost is unlikely, the capitalized cost is written off in the consolidated statement of comprehensive loss.

The assessment of whether the going concern assumption is appropriate requires management to take into account all available information about the future, which is at least, but is not limited to, 12 months from the end of the reporting period. The Company is aware that material uncertainties related to events or conditions may cast significant doubt about the Company's ability to continue as a going concern.

3. Accounting Policies Implemented on July 1, 2020

As at December 31, 2020, there were no new accounting pronouncements that were relevant and would result a material impact to the condensed interim consolidated financial statements.

4. Loans Payable

- a) On April 29, 2020, the Company was approved and received a \$40,000 line of credit ("CEBA LOC") with CIBC under the Canada Emergency Business Account ("CEBA") program funded by the Government of Canada. The CEBA LOC is non-interest bearing and can be repaid at any time without penalty.

On January 1, 2021, the outstanding balance of the CEBA LOC will automatically convert to a 2-year interest free term loan ("CEBA Term Loan"). The CEBA Term Loan may be repaid at any time without notice or the payment of any penalty. If 75% of the CEBA Term Loan, at the CEBA Term Loan Commencement Date, is repaid on or before December 31, 2022, the repayment of the remaining 25% of such CEBA Term Loan shall be forgiven. If on December 31, 2022, the Company exercises the option for a 3-year term extension, 5% interest during the term extension period will apply on any balance remaining.

The Company recorded the fair value of \$28,190 at the initial recognition date of the CEBA LOC using an effective interest rate of 10% per annum. The difference of \$11,810 between the fair value and the total amount of CEBA LOC received has been recorded as a government grant in finance income.

9. Capital Management

The Company manages its capital to maintain its ability to continue as a going concern and to provide returns to shareholders and benefits to other stakeholders. The capital structure of the Company consists of equity comprised of issued share capital, and reserves.

The Company manages its capital structure and makes adjustments to it in light of economic conditions. The Company, upon approval from its board of directors, will balance its overall capital structure through new equity issuances or by undertaking other activities as deemed appropriate under the specific circumstances.

The Company is not subject to externally imposed capital requirements and the Company's overall strategy with respect to capital risk management remains unchanged as at December 31, 2020.

10. Commitments

The Company had no significant commitments or contractual obligations with any parties related to executive compensation, consulting arrangements, or other matters other than disclosed below and disclosed in Note 5.

- (a) On April 1, 2020, the Company entered into a consulting agreement with ECMB Capital Partners Inc. ("ECMB"). Under the terms of the consulting agreement, ECMB will provide advisory services including identifying and negotiating development opportunities for the Company and support for ongoing advancement of the Company. The consulting agreement provides for a monthly retainer of \$4,000 payable in cash or equity, calculated each three months with the first payment due on signing and a finder's fee up to 10% of the value of a transaction brought to the Company.

11. Financial Instruments and Risk Management

The Company is exposed in varying degrees to a variety of financial instrument and related risks. Those risks and management's approach to mitigating those risks are as follows:

(a) Fair Values

The fair value of the Company's financial assets and liabilities approximates the carrying amount. Financial instruments measured at fair value are classified into one of three levels in the fair value hierarchy according to the relative reliability of the inputs used to estimate the fair values. The three levels of the fair value hierarchy are:

- Level 1 – Unadjusted quoted prices in active markets for identical assets or liabilities;
- Level 2 – Inputs other than quoted prices that are observable for the asset or liability either directly or indirectly; and
- Level 3 – Inputs that are not based on observable market data.

Cash and cash equivalents are carried at fair value using a level 1 fair value measurement. The carrying value of accounts receivable, accounts payable, customer deposits and loans payable approximate their fair value due of the short-term nature of these instruments and are recorded at amortised cost.

Fair value estimates of financial instruments are made at a specific point in time, based on relevant information about financial markets and specific financial instruments. As these estimates are subjective in nature, involving uncertainties and matters of significant judgment, they cannot be determined with precision. Changes in assumptions can significantly affect estimated fair values.

(b) Credit Risk

Credit risk is the risk that one party to a financial instrument will fail to discharge an obligation and cause the other party to incur a financial loss. The Company's exposure to credit risk is in its cash and accounts receivables. Cash is held with major banks in Canada, which are high credit quality financial institutions as determined by rating agencies. The carrying amount of financial assets represents the maximum credit exposure.

Accounts receivable consists of trade receivables and input tax credits. The following table represents the customers that represented 10% or more of total trade receivables as of:

	Dec. 31, 2020	Dec. 31 2019
Customer A	-	23%
Customer B	-	22%
Customer C	-	1%

The following table represents the customers that represented 10% or more of total revenue for the period ended December 31:

	2020	2019
Customer A	-	47%
Customer B	-	16%
Customer C	-	14%

(c) Currency Risk

The Company's functional currencies are the Canadian dollar and the Polish zloty. Currency risk is the risk that the fair value of the Company's financial instruments will fluctuate because of changes in foreign currency exchange rates. The Company's head office and some operating expenses are denominated in Canadian dollars. The Company's revenue and a large portion of operating expenses were denominated in Polish zloty. As of March 31, 2020, the Company had disposed of five of its operating subsidiaries and only had remaining activities in Canada subsequent to March 31, 2020. Accordingly the Company is currently not subject to foreign currency risk from March 31, 2020. The Company managed its exposure to foreign currency fluctuations by maintaining foreign currency bank accounts to offset foreign currency payables where possible. Management relied on the natural hedge created by this matching process and thus has chosen not to otherwise hedge its foreign exchange risk. Foreign exchange risk is assessed as low as at December 31, 2020 and June 30, 2020.

(d) Interest Rate Risk

The Company's exposure to interest rate risk relates to its ability to earn interest income on cash balances at variable rates and its short-term term deposits at prescribed market rates. The fair value of the Company's cash is not significantly affected by changes in short-term interest rates. The interest expenses accrued for loans payable and convertible debentures is subject to movement in interest rates (Notes 4 and 9). Interest rate risk is assessed as low.

(e) Liquidity Risk

Liquidity risk arises through the excess of financial obligations over available financial assets due at any point in time. At December 31, 2020, the Company's cash balance of \$1,111 is unable to settle current liabilities of \$997,799. The Company's objective in managing liquidity risk is to maintain sufficient readily available capital in order to meet its liquidity requirements. Accounts payable, loans payable and accrued liabilities and amounts payable to related parties are all current. As the Company has limited sources of revenue, it may require additional financing to accomplish its long-term strategic objectives. Liquidity risk is assessed as high.

All of the Company's revenue during the period ended December 31, 2019 were generated in Poland.

13. Contingencies

Civil Claim against the Company

On July 22, 2019, the Company served with a notice of civil claim, filed on July 11, 2019 with the Supreme Court of British Columbia, by Plaintiffs under the Class Proceedings Act, RSBC 1996, c 50, naming the Company as a defendant along with 86 additional defendants, in connection with allegations of the inappropriate use of the exemption from prospectus requirements contained in Section 2.12 of National Instrument 45-106 Prospectus Exemptions, and the disclosure records of the Company in respect of distributions of securities to consultants using such exemption. Honourable Madam Justice Adair has been assigned as the Judicial Management Judge in the above noted matter under the Class Proceedings Act. As of the date of approval of the financial statements, no legal decision has been made.

The Company also had a regulatory hearing submission before the B.C. Securities Commission ("BCSC") in respect of the allegation of misuse of the exemption from prospectus requirements contained in section 2.12 of National Instrument 45-106 and connected agreements with consultants of the Company. As at December 31, 2020 and the date of approval of the financial statements, no decision or update has been received.
