Stock Options and Other Compensation Securities

10% “rolling” Stock Option Plan

At the Company’s annual and general and special meeting held on December 12, 2016, shareholders approved the adoption of the Company’s 10% “rolling” stock option plan dated for reference October 31, 2016 (the “2016 Plan”). Under the 2016 Plan, options totaling a maximum of 10% of the Common Shares outstanding from time to time are available for grant. The 2016 Plan is administered by the Board and the term of any options granted under the 2016 Plan. The purpose of the 2016 Plan is to allow the Company to grant options to directors, officers, consultants, employees and management company employees as additional compensation and as an opportunity to participate in the profitability of the Company. The granting of such option is intended to align the interests of such persons with that of the Company.

The following is a brief description of the Company’s 2016 Plan:

- (a) the 2016 Plan provides that up to 10% of the issued and outstanding common shares from time to time may be reserved for issue, less any common shares reserved for issuance under any other share compensation arrangement. The options are non-assignable and may be granted for a term not exceeding ten years;
- (b) the exercise price shall not be lower than the greater of the closing market price of the common shares on (a) the trading day prior to the date of grant of the stock options; and (b) the date of grant of the stock options;
- (c) the maximum number of options which may be granted to any one option holder under the 2016 Plan within any 12 month period shall be 5% of the outstanding issue on the date of grant (unless the Company has obtained disinterested shareholder approval, if required by Regulatory Rules);

- (d) if required by Regulatory Rules, disinterested shareholder approval is required to the grant to Insiders, within a 12 month period, of a number of options which, when added to the number of outstanding incentive stock options granted to Insiders within the previous 12 months, exceed 10% of the issued shares;
- (e) the maximum number of options which may be granted to any one consultant within any 12 month period must not exceed 2% of the outstanding issue;
- (f) the maximum number of options which may be granted within any 12 month period to employees or consultants engaged in investor relations activities must not exceed 2% of the outstanding Issue and such options must vest in stages over 12 months with no more than 25% of the options vesting in any three month period;
- (g) options granted under the 2016 Plan are non-assignable, and non-transferable;
- (h) if an option holder dies, any vested option held by him or her at the date of death will become exercisable by the option holder's lawful personal representative and shall be exercisable by the personal representative on or before the date which is the earlier of one year following the date of death of the option holder;
- (i) in the event that the option holder holds his or her option as an employee or consultant and such option holder ceases to hold such position other than by reason of death or disability, the expiry date of the option shall be, unless otherwise determined by the Board (or a committee of the Board) and expressly provided for in the option certificate, the 30th day following the date the option holder ceases to hold such position; and
- (j) the vesting schedule for an option, if any, shall be determined by the Board (or a committee of the Board) and shall be set out in the Option Certificate issued in respect of the option.

The following table sets forth incentive stock options (option-based awards) pursuant to the Company's stock option plan that were outstanding to NEOs and directors of the Company as at December 31, 2018.

Employment, Consulting and Management Agreements

There are no compensatory plans or arrangements, with respect to any Director or NEO resulting from the resignation, retirement or any other termination of employment of an officer or director or from a change of a director's or a NEO's responsibilities following a change in control.

Oversight and Description of Director and Named Executive Officer Compensation

The Company does not have a compensation program other than paying consulting fees and incentive bonuses. The compensation of the executive officers is determined by the Board, based in part on recommendations from the Chief Executive Officer. The Board recognizes the need to provide a compensation package that will attract and retain qualified and experienced executives, as well as align the compensation level of each executive to that executive's level of responsibility. The objectives of the Company's compensation policies and practices are:

1. to reward individual contributions in light of the Company's performance;
2. to be competitive with the companies with whom the Company competes for talent;
3. to align the interests of the executives with the interests of the shareholders; and
4. to attract and retain executives who could help the Company achieve its objectives.

During the most recent financial year ended December 31, 2018, neither the Chief Executive Officer nor the President was paid a salary.

The basic component of executive compensation has consisted only of a consulting fee component and going forward, the Company may include performance-based variable incentive compensation, which may be comprised of cash bonuses or stock option grants. The allocation of value to these different compensation elements will not be based on a formula, but rather will be intended to reflect market practices as well as the Board's discretionary assessment of an executive officer's past contribution and the ability to contribute to future short and long-term business results.

Specifically, the objectives of consulting fees are to recognize market pay and acknowledge the competencies and skills of individuals. The rate established for each executive officer is intended to reflect each individual's responsibilities, experience, prior performance and other discretionary factors deemed relevant by any compensation committee that may be formed in future. In deciding on the consulting fee portion of the compensation of the executive officers, major consideration is given to the fact that the Company is an early stage exploration company and does not generate any material revenue and must rely exclusively on funds raised from equity financings. In the future, the objectives of incentive bonuses in the form of cash payments will be designed to add a variable component of compensation, based on corporate and individual performances for executive officers and employees. The objectives of the stock option will be to reward achievement of long-term financial and operating performance and focus on key activities and achievements critical to the ongoing success of the Company. The Company has no other forms of compensation, other than payments made from time to time to individuals or companies they control for the provision of consulting services. Such consulting services are paid for by the Company, to the best of its ability, at competitive industry rates for work of a similar nature by reputable arm's length service providers. Actual compensation will vary based on the performance of the executives relative to the achievement of goals and the price of the Company's securities, as well as the financial condition of the Company.

The Board evaluates individual executive performance with the goal of setting compensation at levels that it believes is comparable with executives in other companies of similar size and stage of development operating in the same industry. In connection with setting appropriate levels of compensation, members of the Board base their decisions on their general business and industry knowledge and experience and publicly available information of comparable companies while also taking into account the Company's relative performance and strategic goals.

In the course of its deliberations, the Board considered the implications of the risks associated with adopting the compensation practices currently in place. The Board does not believe that its current compensation practices create a material risk that the NEOs or any employee would be encouraged to take inappropriate or excessive risks, particularly since the Company currently does not have a stock option plan in place, and no such risks have been detected to date. The Board will continue to include this consideration in its deliberations and believes that it would detect actions of management and employees of the Company that constitute or would lead to inappropriate or excessive risks.

The Company does not have a policy that would prohibit the NEOs or directors from purchasing financial instruments that are designed or would have the effect of hedging the value of equity securities granted to, or held by, these individuals.

Base Salary

In the Board's view, paying base salaries which are competitive in the markets in which the Company operates is a first step to attracting and retaining talented, qualified and effective executives. Competitive salary information on comparable companies within the industry is compiled from a variety of sources.

Financial Years ended December 31, 2018 and December 31, 2017

Amounts due to directors as at December 31, 2018 year-end financial statements are; \$4,092 (USD 3,000) (December 31, 2017 - \$3,763 (USD 3,000)) due to director B. Porterfield, \$49,750 (December 31, 2017 - \$110,000) due to

director, CFO and President, M. Polinsky, and \$44,750 (December 31, 2017 - \$95,000) due to director and CEO, M. Nye.

During the year ended December 31, 2018, management fees paid and accrued are; \$120,000 (2017 - \$130,000) to director and CEO, M. Nye, and \$120,000 (2017 - \$130,000) to director, CFO and President, M. Polinsky.

Compensation Review Process

The Board conducts reviews with regard to directors' compensation once a year. To make its recommendation on directors' compensation, the Board takes into account the types of compensation and the amounts paid to directors of comparable publicly traded Canadian companies and aligns the interests of directors with the return to shareholders. The Board decides the compensation of the Company's officers, based on industry standards and the Company's financial situation.

Bonus Incentive Compensation

The Company's objective is to achieve certain strategic objectives and milestones. The Board will consider executive bonus compensation dependent upon the Company meeting those strategic objectives and milestones and will ascertain if sufficient cash resources are available for the grant of bonuses. The Board approves executive bonus compensation dependent upon compensation levels based on recommendations of the Chief Executive Officer. Such recommendations are generally based on information provided by Companies that are similar in size and scope to the Company's operations.

Benefits and Perquisites

The Company does not, as of the date of this Form, offer any benefits or perquisites to its NEOs other than potential grants of incentive share options as otherwise disclosed and discussed herein.

The Company believes that encouraging its executives and employees to become shareholders is the best way of aligning their interests with those of its shareholders. Equity participation is accomplished through the Company's stock option plan. Share options are granted to executives and employees taking into account a number of factors, including the amount and term of options previously granted, base salary, bonuses and competitive factors. The amounts and terms of options granted are determined by the Board.

The Board has not considered the implications of the risks associated with the Company's compensation policies and practices.

The Company has not adopted a policy disallowing insiders from purchasing financial instruments designed to hedge or offset any decrease in market value of the Common Shares or options of the Company.

Risks Associated with the Company's Compensation Practices

The Board has not proceeded to a formal evaluation of the implications of risks associated with the Company's compensation policies and practices. At least once annually the Board reviews the then current risks, if any, associated with the Company's compensation policies and practices at such time.

Executive compensation is comprised of short-term compensation in the form of a base salary and long-term ownership through the Company's stock option plan. This structure ensures that a significant portion of executive compensation (share options) is both long-term and "at risk" and, accordingly, is directly linked to the achievement of business results and the creation of long-term shareholder value. As the benefits of such compensation, if any, are not realized by officers until a significant period of time has passed, the ability of officers to take inappropriate or excessive risks that are beneficial to their compensation at the expense of the Company and the shareholders is extremely limited. Furthermore, the short-term component of the executive compensation (base salary) represents a relatively small part of the total compensation. As a result, it is unlikely that an officer would take inappropriate

or excessive risks at the expense of the Company or the shareholders that would be beneficial to their short-term compensation when their long-term compensation might be put at risk from their actions.

Due to the small size of the Company and the current level of the Company's activity, the Board is able to closely monitor and consider any risks which may be associated with the Company's compensation policies and practices. Risks, if any, may be identified and mitigated through regular meetings of the Board during which financial and other information of the Company are reviewed. No risks have been identified arising from the Company's compensation policies and practices that are reasonably likely to have a material adverse effect on the Company.

Hedging by Named Executive Officers or Directors

The Company has not, to date, adopted a policy restricting its executive officers and directors from purchasing financial instruments, including, for greater certainty, prepaid variable forward contracts, equity swaps, collars, or units of exchange funds, which are designed to hedge or offset a decrease in market value of equity securities granted as compensation or held, directly or indirectly, by executive officers or directors. As of the date of this Form, entitlement to grants of incentive share options under the Company's share option plan is the only equity security element awarded by the Company to its executive officers and directors.

Option-Based Awards

The incentive stock option portion of the compensation is intended to provide the executive officers of the Company with a long-term incentive in developing the Company's business. Options granted under the 2016 Plan (defined above) are approved by the Board, and if applicable, its subcommittees, after consideration of the Company's overall performance and whether the Company has met targets set out by the executive officers in their strategic plan. All previous grants of option-based awards will be taken into account when considering new grants.

Pension Disclosure

The Company has no pension plan arrangements or benefits with respect to any of its NEOs, directors or employees.
