### **1. NATURE AND GOING CONCERN**

Algernon Pharmaceuticals Inc. (the “Company” or “Algernon”) was incorporated on April 10, 2015 under the British Columbia *Business Corporations Act*. The registered office of Algernon is located at Suite 1500 – 1500 West Georgia Street, Vancouver, British Columbia, V6E 4N7.

Algernon is a clinical stage pharmaceutical development company focused on developing repurposed therapeutic drugs in the areas of non-alcoholic steatohepatitis (“NASH”), a type of liver disease, chronic kidney disease (“CKD”), inflammatory bowel disease (“IBD”), idiopathic pulmonary fibrosis (“IPF”) and chronic cough. Drug repurposing (also known as re-profiling, re-tasking or therapeutic switching) is the application of approved drugs and compounds to treat a different disease than what it originally developed for. All the research and development work are carried out by the Company’s 100% owned Canadian subsidiary, Nash Pharmaceuticals Inc. (“Nash Pharma”). On January 6, 2020, Nash Pharma acquired a 100% owned Australian subsidiary, Algernon Research Pty Ltd. (“AGN Research”). Through its ongoing research programs, Nash Pharma is seeking to minimize investment and drug development risk by taking advantage of regulatory approved drugs and discovering alternative clinical uses by accelerating entry into phase II clinical trials (human).

At present, the Company has no current operating income. The Company will need to raise sufficient working capital to maintain operations. Without additional financing, the Company may not be able to fund its ongoing operations and complete development activities. Management anticipates that the Company will continue to raise adequate funding through equity or debt financings, although there is no assurance that the Company will be able to obtain adequate funding on favorable terms. These uncertainties may cast significant doubt on the Company’s ability to continue as a going concern. These condensed interim consolidated financial statements have been prepared on a going concern basis, which assumes that the Company will be able to realize its assets and discharge its liabilities in the normal course of business. These condensed interim consolidated financial statements do not reflect adjustments, which could be material, to the carrying value of assets and liabilities, which may be required should the Company be unable to continue as a going concern.

### **2. BASIS OF PRESENTATION**

#### **(a) Statement of compliance**

These condensed interim consolidated financial statements have been prepared in accordance with International Accounting Standard 34, Interim Financial Reporting (“IAS 34”) using policies consistent with International Financial Reporting Standards (“IFRS”), as issued by the International Accounting Standards Board (“IASB”). They have been prepared on a historical cost basis, except for certain financial instruments, which are stated at fair value. In addition, these consolidated financial statements have been prepared using the accrual basis of accounting, except for the cash flow information.

These condensed interim consolidated financial statements have been prepared in accordance with the same accounting policies and methods of application as the most recent audited financial statements for the year ended August 31, 2019, except that they do not include all the disclosures required for the annual audited financial statements. These condensed interim financial statements should be read in conjunction with the audited consolidated financial statements for the Company for year ended August 31, 2019.

#### **(b) Approval of the condensed interim consolidated financial statements**

The condensed interim consolidated financial statements of the Company for the period ended May 31, 2020 were approved and authorized for issuance by the Board of Directors on July 29, 2020.

### **2. BASIS OF PRESENTATION (continued)**

#### **(c) Foreign currencies**

The reporting currency is the Canadian dollar (“CAD”), which is the functional currency of Algernon and Nash Pharma. The functional currency of AGN Research is the Australian dollar (“AUD”). Transactions in currencies other than the functional currency are recorded at the rate of exchange prevailing on the date of the transaction, except amortization, which is translated at the rates of exchange applicable to the related assets. Monetary assets and liabilities that are denominated in foreign currencies are translated at the rate prevailing at each reporting date. Non-monetary items that are measured at historical cost in a foreign currency are translated at the exchange rate on the date of the initial transaction. Non-monetary items that are measured at fair values are reported at the exchange rate on the date when fair values are determined. Foreign currency translation differences are recognized in profit or loss, except for differences on the translation of foreign entities to reporting currency on consolidation, which are recognized in other comprehensive income.

On consolidation, the assets and liabilities of entities are translated into the reporting currency at the rate of exchange at the reporting date and the consolidated statements of loss and comprehensive loss are translated at the average exchange rates for the year. The exchange differences arising on translation for consolidation purposes are recognized in other comprehensive income.

#### **(d) Use of accounting estimates and judgements**

The preparation of condensed interim consolidated financial statements in accordance with IFRS requires management to make estimates that affect the reported amounts of assets and liabilities and the disclosure of contingent assets and liabilities at the date of the consolidated financial statements and the reported amounts of revenues and expenses during the reporting period.

Actual results could differ from these estimates, and as such, the estimates and underlying assumptions are reviewed on an ongoing basis.

In preparing these condensed interim consolidated financial statements, the significant judgments made by management in applying the Company’s accounting policies and key sources of estimation uncertainty were the same as those that were applied to the audited consolidated financial statements for the Company for years ended August 31, 2019 and 2018.

### **3. SIGNIFICANT ACCOUNTING POLICIES**

The company has applied the same accounting policies and methods of computation in its condensed interim consolidated financial statements as in its audited consolidated financial statements for the year ended August 31, 2019, except for those that relate to new standards and interpretations effective for the first time for periods beginning on or after January 1, 2020, and will be adopted in the 2020 annual financial statements.

#### **(a) Basis of consolidation**

The condensed interim consolidated financial statements include the accounts of the Company and its wholly owned subsidiaries, Nash Pharma and AGN Research. Subsidiaries are fully consolidated from the date of acquisition being the date that the Company obtains control. All intercompany transactions and balances have been eliminated on consolidation.

A wholly owned subsidiary is an entity over which the Company has control. The Company controls an entity when the Company is exposed to, or has rights to, variable returns from its involvement with the entity and has the ability to affect those returns through its power over the entity.

### **3. SIGNIFICANT ACCOUNTING POLICIES**

(b) New accounting policy

#### **IFRS 16 Leases**

The company adopted IFRS 16 – Leases effective September 1, 2019. This new standard sets out the principles for the recognition, measurement, presentation and disclosure of leases for both the lessee and the lessor. The new standard introduces a single lessee accounting model that requires the recognition of all assets and liabilities arising from a lease.

The main features of the new standard are as follows:

- An entity identifies as a lease a contract that conveys the right to control the use of an identified asset for a period of time in exchange for consideration.
- A lessee recognizes an asset representing the right to use the leased asset, and a liability for its obligation to make lease payments. Exceptions are permitted for short-term leases and leases of low-value assets.
- A lease asset is initially measured at cost, and is then depreciated similarly to property, plant and equipment. A lease liability is initially measured at the present value of the unpaid lease payments.
- A lessee presents interest expense on a lease liability separately from depreciation of a lease asset in the statement of profit or loss and other comprehensive income.
- A lessor continues to classify its leases as operating leases or finance leases, and to account for them accordingly.
- A lessor provides enhanced disclosures about its risk exposure, particularly exposure to residual-value risk.

The new standard supersedes the requirements in IAS 17 *Leases*, IFRIC 4 *Determining whether an Arrangement contains a Lease*, SIC-15 *Operating Leases – Incentives* and SIC-27 *Evaluating the Substance of Transactions Involving the Legal Form of a Lease*.

The Company has reviewed the impact of IFRS 16 and concluded that the adoption of this standard did not have a material effect on the Company's consolidated financial statements.

### **4. FINANCIAL INSTRUMENTS AND RISK MANAGEMENT**

The Company's risk exposure and the impact on the Company's financial instruments are summarized below:

#### **Credit risk**

Credit risk is the risk of loss associated with a counter party's inability to fulfill its payment obligations. The Company's credit risk is primarily attributable to its cash and cash equivalents and accounts receivable. The Company's accounts receivable is mainly comprised of GST receivable, accrued interest receivable from GIC's held with bank, and accrued Australia R&D tax credit receivable. GST receivable and Australia R&D tax credit receivable are not financial instruments as they do not arise from contractual obligations. The Company limits exposure to credit risk on bank deposits by holding demand deposits in high credit quality banking institutions in Canada. Management believes that the credit risk with respect to receivables is minimal.

#### **Liquidity risk**

Liquidity risk is the risk that the Company will encounter difficulty in satisfying financial obligations as they become due. The Company manages its liquidity risk by forecasting cash flows from operations and anticipated investing and financing activities. The Company's objective in managing liquidity risk is to maintain sufficient

### **4. FINANCIAL INSTRUMENTS AND RISK MANAGEMENT (continued)**

#### **Liquidity risk (continued)**

readily available reserves in order to meet its liquidity requirements. All of the Company's financial obligations are due within one year.

At May 31, 2020, the Company had a working capital of \$8,263,270 compared to working capital deficit at August 31, 2019 of \$86,601. This included cash and cash equivalents of \$8,389,922 (August 31, 2019 - \$207,812) available to meet short-term business requirements and current liabilities of \$1,109,919 (August 31, 2019 - \$365,464).

#### **Market risk**

Market risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate due to changes in market prices. Market risk comprises three types of risk: interest rate risk, foreign currency risk and other price risks. The Company is not exposed to significant interest rate risk and other price risk.

##### **a) Interest rate risk**

Interest rate risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in market interest rates. The risk that the Company will realize a loss as a result of a decline in the fair value of the cash is limited because of the short-term investment nature. The Company's financial asset exposed to interest rate risk consists of cash and cash equivalents and restricted cash equivalents.

##### **b) Other price risk**

Other price risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate due to changes in market prices, other than those arising from interest rate risk or foreign currency risk. The Company is not exposed to significant other price risk.

##### **c) Foreign currency risk**

Foreign currency risk is related to fluctuations in foreign exchange rates. The Company has certain expenditures that are denominated in US dollars ("US\$"), Australian dollars ("AUD\$") and other operating expenses that are mainly in Canadian dollars ("CAD\$"). The Company funds cash calls to its foreign subsidiary in Australia in AUD\$. The Company's exposure to foreign currency risk arises primarily on fluctuations in the exchange rate of the CAD\$ relative to the US\$ and the AUD\$.

As at May 31, 2020, the Company had monetary assets of US\$64,123 or \$88,406 (August 31, 2019 - US\$47,113 or \$62,637) at the CAD equivalent and monetary liabilities of US\$181,692 or \$250,499 (August 31, 2019 - US\$125,398 or \$166,717) at the CAD equivalent. The Company's sensitivity analysis suggests that a change in the absolute rate of exchange in US\$ by 10% will increase or decrease other comprehensive loss by approximately \$25,050 (August 31, 2019 - \$10,408).

As at May 31, 2020, the Company had monetary assets of AUD\$503,531 or \$461,436 (August 31, 2019 - AUD\$nil or \$nil) at the CAD equivalent and monetary liabilities of AUD\$341,512 or \$312,962 (August 31, 2019 - AUD\$nil or \$nil) at the CAD equivalent. The Company's sensitivity analysis suggests that a change in the absolute rate of exchange in AUD\$ by 10% will increase or decrease other comprehensive loss by approximately \$14,847 (August 31, 2019 - \$nil).

(Expressed in Canadian dollars)

### 4. FINANCIAL INSTRUMENTS AND RISK MANAGEMENT (continued)

The Company has not entered into any foreign currency contracts to mitigate this risk. Foreign currency risk is considered low relative to the overall financial operating plan.

#### Fair Value

Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. Financial instruments measured at fair value are classified into one of three levels in the fair value hierarchy according to the relative reliability of the inputs used to estimate the fair values.

- Level 1 – fair values are based on quoted prices (unadjusted) in active markets for identical assets or liabilities;
- Level 2 – fair values are based on inputs other than quoted prices included in Level 1 that are observable for the asset or liability, either directly (as prices) or indirectly (derived from prices); or
- Level 3 – fair values are based on inputs for the asset or liability that are not based on observable market data (unobservable inputs).

The Company classified its financial instruments at Level 1 and as follows:

	<b>Financial Assets</b>		<b>Loans and Receivables</b>		<b>Financial Liabilities</b>	
	Fair Value Through Profit		Measured at Amortized Cost		Measured at Amortized Cost	
<b>May 31, 2020</b>						
Cash and cash equivalents	\$	8,389,922	\$	-	\$	-
Accounts receivable		-		17,025		-
Accounts payable and accrued liabilities	\$	-	\$	-	\$	(1,109,919)

	<b>Financial Assets</b>		<b>Loans and Receivables</b>		<b>Financial Liabilities</b>	
	Fair Value Through Profit		Measured at Amortized Cost		Measured at Amortized Cost	
<b>August 31, 2019</b>						
Cash and cash equivalents	\$	207,812	\$	-	\$	-
Accounts receivable		-		754		-
Accounts payable and accrued liabilities	\$	-	\$	-	\$	(364,464)

The carrying value of receivables and accounts payable and accrued liabilities approximate their fair value due to the short-term nature of these instruments.

### 10. SHARE CAPITAL AND RESERVES (continued)

#### Stock options

Stock options to purchase common shares have been granted to directors, employees, contractors and consultants at exercise prices determined by reference to the market value on the date of the grant. The number of shares available for options to be granted under the Company's rolling stock option plan is 10% of the number of shares outstanding (the "Plan"). Options granted under the Plan vest immediately or over a period of time at the discretion of the Board of Directors.

Under the plan, the number of shares reserved for issuance to any one optionee will not exceed 5% of the then issued and outstanding shares and the number of shares reserved for issuance to consultants will not exceed 2% of the then issued and outstanding shares. The options are non-assignable and non-transferable and will be exercisable up to 10 years from the date of grant. The minimum exercise price of an option granted under the Plan must not be less than the discounted market price, as such term is defined in the policies of the CSE and other applicable regulatory authorities.

During the nine months ended May 31, 2020:

- On September 26, 2019, a total of 100,000 incentive stock options expired following the resignation of an officer. The stock options expired had a weighted average exercise price of \$0.39 per share.
- On February 13, 2020, the Company granted a total of 4,375,000 incentive stock options to certain directors, officers and consultants of the Company with an exercise price of \$0.10 per share. The options expire on February 13, 2025.
- On April 13, 2020, the Company granted a total of 4,550,000 incentive stock options to certain directors, officers and consultants of the Company with an exercise price of \$0.29 per share. The options expire on April 13, 2025.

- On May 13, 2020, the Company closed a private placement for 19,605,285 special warrants ("Special Warrants") of the Company at a price of \$0.35 per Special Warrant for gross proceeds of \$6,861,850. Each Special Warrant is exercisable, for no additional consideration at the option of the holder, into one unit of the Company. Each unit will consist of one common share and one common share purchase warrant. Each warrant will entitle the holder to acquire one common share at the price of \$0.55 for a period of 24 months after the closing date until May 13, 2022. The share purchase warrants in connection with this private placement will not be tradeable on the CSE. All unexercised Special Warrants will be automatically exercised on the Qualification Date that is the earlier of:

(i) four months and a day following the closing date on May 13, 2020;

(ii) 3 business days following the date on which receipt is issued by the BC Securities Commission for a final short form prospectus qualifying the distribution of the units underlying the Special Warrants.

### 10. SHARE CAPITAL AND RESERVES (continued)

#### Special Warrants (continued)

In addition, a total of 1,505,293 of Agent Warrant Units (also referred as Compensation Options) were issued. Each Agent Warrant Unit entitles the holder to purchase one unit of the Company at a price of \$0.35 per unit until May 13, 2022. Each unit consists of one common share and one common share purchase warrant entitling the holder to acquire an additional common share at the price of \$0.55. These share purchase warrants are not tradeable on the CSE.

The Agent Warrant Units were valued using a Geske compound options pricing model with the following inputs on date of issuance: allocated share price of \$0.350 for the share component of the unit; allocated price of \$0.0001 for the warrant component of the unit; exercise price of the warrant of \$0.55; expected life of 2.0 years for both the share component and warrant component of the unit; expected volatility of 143.79%; risk-free rate of return of 0.28%; and expected dividend yield of 0%. The fair value of the Agent Warrant Units was determined to be \$678,887.

The fair value per share on date of issuance was \$0.355. As it was higher than the exercise price of the Agent Warrants Units at \$0.350, the option on the share component of the unit was in the money. Hence the total exercise price of the unit, \$0.350, was allocated to the share component of the unit and minimal amount of \$0.0001 was allocated to the warrant portion of the unit.

- Subsequent to the period ended May 31, 2020, on June 12, 2020, the Company received a receipt for the Company's final short form prospectus dated June 11, 2020, to qualify the securities underlying the 19,605,285 Special Warrants that were issued by the Company on May 13, 2020.

In accordance with the terms of a special warrant indenture dated May 13, 2020, on June 17, 2020, each Special Warrant was automatically converted into one common share of the Company and one common share purchase warrant. Each warrant is exercisable for one common share of the Company on or before May 13, 2022 at an exercise price of \$0.55 per common share.

#### Agent warrant units

### 13. RISK AND CAPITAL MANAGEMENT

The Company manages its capital structure and makes adjustments to it based on the funds available to the Company in order to support future business opportunities. The Company defines its capital as shareholders' equity. The Board of Directors does not establish quantitative return on capital criteria for management, but rather relies on the expertise of the Company's management to manage its capital to be able to sustain the future development of the Company's business. The Company currently has no source of revenues, and therefore, is dependent upon external financings to fund activities. In order to carry future projects and pay Management reviews its capital management approach on an ongoing basis and believes that this approach, given the relative size of the Company, is reasonable. There were no changes in the Company's approach to capital management during the period ended May 31, 2020. The Company is not subject to externally imposed capital requirements.
