1. Presentation of Financial Statements

Description of the Business and Going Concern

Ortho Regenerative Technologies Inc. ("the Corporation" or "Ortho") was incorporated under the Canada Business Corporations Act on February 5, 2015 and on September 17, 2015 articles of amendment were approved to change the authorized shares. On April 26, 2016, pursuant to a Certificate of Amendment, the Corporation (i) removed the restrictions on the transfer of its common shares, (ii) added a legal French version of its name being Technologies Ortho Régénératives inc. and (iii) added a provision to have the ability to appoint one or more additional directors between shareholders' meetings. The Corporation's head office, principal address and registered office is located at 16667 Hymus Blvd., Kirkland, Quebec, Canada. As of October 10, 2017, the Corporation's shares are listed on the Canadian Securities Exchange ("CSE") under the symbol ORTH.

The Corporation specializes in research on innovative medical products which stimulate the regeneration of joint tissues.

These interim condensed financial statements ("financial statements") are prepared on the assumption that the Corporation is a going concern, which contemplates the realization of assets and the settlement of liabilities in the normal course of operations. In its assessment to determine if the going concern assumption is appropriate, management takes into account all data available regarding the future for at least, without limiting, the next twelve months. The Corporation has yet to generate revenue and has relied upon the issuance of debt and equity instruments to fund operations. As at October 31, 2017, the Corporation has a deficit of $ 3,996,866 and working capital of $ 431,310. During the nine-month period, the Corporation closed several private placements for an amount of $2,137,500, as described in Note 11. The ability of the Corporation to fulfill its obligations and finance its future activities depends on the ability to raise capital and the continuous support of its creditors. The Corporation believes its efforts to raise sufficient funds to support its activities, however, there is no assurance that funds will continue to be raised on acceptable terms. This indicates the existence of material uncertainties that may cast a significant doubt about the ability of the Corporation to continue its operations and subsequently, usefulness of using accounting principles applicable to a going concern company. Such adjustment could be material.

Failure to obtain such additional financing could result in delay or indefinite postponement of the Corporation's strategic goals. These financial statements do not include any adjustments relative to the carrying values and classifications of assets and liabilities that would be necessary should the Corporation be unable to continue as a going concern.

These financial statements were approved and authorized for issuance by the Board of Directors on December 15, 2017.

2. Summary of Significant Accounting Policies

a) Basis of measurement

These financial statements have been prepared on a going-concern basis, under the historical cost convention, except for the revaluation of certain financial assets and financial liabilities to fair value.

b) Functional and presentation currency

These financial statements are presented in the Canadian dollar, which is also the functional currency of the Corporation.

Transactions denominated in foreign currencies are initially recorded in the functional currency of the related entity using the exchange rates in effect at the date of the transaction. Monetary assets and liabilities denominated in foreign currencies are translated using the closing exchange rates. Any resulting exchange difference is recognized in income. Non-monetary assets and liabilities denominated in foreign currencies and measured at historical cost are translated using historical exchange rates, and those measured at fair value are translated using the exchange rate in effect at the date the fair value is determined. Revenues and expenses are translated using the average exchange rates for the period or the exchange rate at the date of the transaction for significant items.

c) Statement of Compliance

These unaudited condensed interim consolidated financial statements have been prepared using accounting policies consistent with International Financial Reporting Standards ("IFRS") and in accordance with International Accounting Standard ("IAS") 34, Interim Financial Reporting. The unaudited condensed interim consolidated financial statements do not include all of the information required for full annual financial statements, and should be read in conjunction with the annual financial statements for the year ended January 31, 2017 as they follow the same accounting policies and methods of application except for the accounting change described in note 4 of these financial statements.

d) Future accounting pronouncements

The Corporation has not yet applied the following new standards, interpretations or amendments to standards that have been issued but are not yet effective. Unless otherwise stated, the Corporation does not plan to early adopt any of these new or amended standards and interpretations.

IFRS 9 Financial Instruments

The final version of IFRS 9, Financial instruments ("IFRS 9"), was issued by the IASB in July 2014 and will replace IAS 39 Financial Instruments: Recognition and Measurement. IFRS 9 introduces a model for classification and measurement, a single, forward-looking expected loss impairment model and a substantially reformed approach to hedge accounting. The new single, principle-based approach for determining the classification of financial assets is driven by cash flow characteristics and the business model in which an asset is held. The new model also results in a single impairment model being applied to all financial instruments, which will require more timely recognition of expected credit losses. It also includes changes in respect of an entity's own credit risk in measuring liabilities elected to be measured at fair value, so that gains caused by the deterioration of an entity's own credit risk on such liabilities are no longer recognized in profit or loss. IFRS 9, which is to be applied retrospectively, is effective for annual periods beginning on or after January 1, 2018 and is available for early adoption. In addition, an entity's own credit risk changes can be applied early in isolation without otherwise changing the accounting for financial instruments. The Corporation is currently assessing the impact, if any, of adopting IFRS 9.

IFRS 15 Revenue from Contracts with Customers

In May 2014, the IASB issued IFRS 15, Revenue from Contracts with Customers. The objective of this new standard is to provide a single, comprehensive revenue recognition framework for all contracts with customers to improve comparability of financial statements of companies globally. This new standard contains principles that an entity will apply to determine the measurement of revenue and timing of when it is recognized. The underlying principle is that an entity will recognize revenue to depict the transfer of goods or services to customers at an amount that the entity expects to be entitled to in exchange for those goods or services. This new standard is effective for annual periods beginning on or after January 1, 2018. The Corporation is currently assessing the impact, if any, of adopting IFRS 15.

IFRS 16 Leases

In January 2016, IFRS 16 Leases ("IFRS 16") was issued, which replaces IAS 17 Leases, and related interpretations. IFRS 16 sets out the principles for the recognition, measurement, presentation and disclosure of leases for both lessees and lessors. For lessees, IFRS 16 removes the classification of leases as either operating or financing and requires that all leases be recognized on the statement of financial position, with certain exemptions that include leases of 12 months or less. The accounting for lessors is substantially unchanged. The standard is effective for annual periods beginning on or after January 1, 2019, to be applied retrospectively, or on a modified retrospective basis. The Corporation is currently assessing the impact of adopting this standard.

IAS 7 Statement of Cash Flows

In January 2016, amendments to IAS 7 Statement of cash flows were issued to improve information provided to users of financial statements about an entity's changes in liabilities arising from financing activities, including both changes from cash flows and non-cash changes. The amendment shall be applied by way of prospective application for annual reporting periods beginning on January 1, 2017 or thereafter. The Corporation is currently evaluating the impact of adopting this standard.

2. Summary of Significant Accounting Policies *(Continued from previous page)*

d) Future accounting pronouncements *(Continued from previous page)*

IAS 12 Income Taxes

IAS 12 - Income Taxes was amended in January 2016 to clarify that, among other things, unrealized losses on debt instruments measured at fair value and measured at cost for tax purposes give rise to a deductible temporary difference regardless of whether the debt instrument's holder expects to recover the carrying amount of the debt instrument by sale or by use; the carrying amount of an asset does not limit the estimation of probable future taxable profits; and estimates for future taxable profits exclude tax deduction resulting from the reversal of deductible temporary differences. The amendments are effective for annual reporting periods beginning on or after January 1, 2017. The Corporation is currently evaluating the impact of adopting this standard.

3. Use of Estimates and Judgements

The preparation of the unaudited condensed interim consolidated financial statements requires management to undertake a number of judgments, estimates and assumptions about recognition and measurement of assets, liabilities, income and expenses. The actual results may differ from these judgments and estimates. These estimates and judgments are based on management’s best knowledge of the events or circumstances and actions the Company may take in the future. The estimates are reviewed on an ongoing basis. Information about the significant judgments, estimates and assumptions that have the most significant effect on the recognition and measurement of assets, liabilities, income and expenses are discussed in Note 3 of the Corporation’s 2017 annual financial statements and are still applicable for the period ended October 31, 2017, except the judgment relating to intangible assets since Management changed its accounting policy as describe in note 4.

4. Change in Accounting Policy

During the second quarter, the Corporation changed its accounting policy with respect to its intangible assets, specifically its development costs and patent prosecution costs. Previously, the Corporation capitalized these costs, when the Corporation could demonstrate that all the specific criteria related to technical, market and financial feasibility were met.

Under the new policy, research and development expenditures are charged to operations as incurred. Management considers this new accounting policy to provide more reliable and relevant information to users of the financial statements in assessing the financial position of the Corporation and comparing its performance to other biotech companies.

As required by IAS 8, Accounting policies, changes in accounting estimates and errors, the Corporation has restated the comparative periods presented in these financial statements to reflect the new policy. Consequently, development costs and patent prosecution costs in the amount of $926,639 and $392,042 were charged to operations for the years ended January 31, 2017 and 2016 respectively, and $61,239 for the quarter ended April 30, 2017.

The restated line items on the statement financial position as at January 31, 2017, have been reconciled to the previously reported amounts as follows:

6. Operating Loan

The Corporation had a loan agreement with Manitex Capital Inc. ("Manitex"), a shareholder of the Corporation. Borrowing under this unsecured loan agreement bore interest at 8% per annum and was due on demand. On April 27, 2017, the Corporation entered into a debt conversion and convertible loan agreement with Manitex, which settled the amount due on the operating loan and a partial amount from the interest accrued. On April 27, 2017, the Corporation is indebted to Manitex in an aggregate amount of $1,219,050 and was settled as follow:

On April 27, 2017, the Corporation converted $600,000 into a first ranking, long-term convertible loan, bearing interest at an annual rate of 10%, to be paid repaid in full, principal and interest on February 1, 2019. Prior to the Maturity Date, Manitex, at any time, has the option to convert all or any part of the Convertible Loan amount, into shares of the Corporation at a deemed price of $1.00 per shares. If, prior to the Maturity Date, the Corporation's 20-day volume weighted average share price equals or exceed $1.50, the Corporation shall have the right, at any time, to require Manitex to convert all, or any part of the balance of the Convertible Loan at a deemed price of $1.00 per share of the Corporation.

9. Convertible Loan *(Continued from previous page)*

At the time of issue, the convertible loan was separated into liability and equity components using the residual method. The fair value of the liability component was calculated using discounted cash flows for the convertible loan assuming an effective interest rate of 18%. The effective interest rate was based on the estimated rate for a debenture with similar terms but without a conversion feature from comparable companies. The fair value of the equity component (conversion feature) was determined at the time of issue as the difference between the face value of the convertible loan and the fair value of the liability component. The liability component was subsequently measured at amortized cost using the effective interest rate method and was accreted up to the principal balance at maturity. The accretion is presented as a financial expense.

Transaction costs of $1,500 were incurred on the issuance of the convertible loan and were netted against the liability. The transaction costs allocated to the liability component will be amortized at the effective interest rate over the term of the convertible debentures and will be presented as a financial expense.

10. Class A shares liability

As per the shareholders' agreement all shares held by Polyvalor have a put right associated to them allowing Polyvalor to require that the Corporation redeem the shares if the Corporation has not listed its shares on a recognized stock exchange by June 19, 2022. On October 10th, 2017, the Corporation listed its shares on the CSE and therefore has derecognized the liability. Accordingly, as per IAS 39 the difference between the fair value and the accounting value is charged to comprehensive loss on the date of derecognition.

Class A shares consists of the following:

	October 31, 2017 **$**	January 31, 2017 $
833,334 shares issued on June 19, 2015, held in escrow	**333,334**	333,334

(1) On March 31, 2017, the Corporation entered into a shares for debt agreements, with Polytechnique and Polyvalor, where the Corporation issued 240,000 of its common shares to Polyvalor at a deemed price of $0.50 per common share to satisfy $120,000 of outstanding amounts owing to them. The amount represents the commitment of a non-refundable fee of $100,000 as per the Assignment and Transfer Agreement, an interest of $10,000 (notwithstanding any provision of the Assignment and Transfer Agreement), plus a premium of $10,000 to the Principal Amount such that the total amount owed by the Corporation to Polytechnique equals $120,000. The shares were issued on March 31, 2017 having an aggregate fair value at that date of $96,000, based on the private placement recently closed. Accordingly, a gain of $24,000 was charged to the statement of loss as a gain on settlement of debt.

(2) As at July 31, 2017, management reviewed the fair value and determined that the value of the common shares is $0.39 based on the offered private placement which was closed on July 28, 2017, which resulted in a change in fair value of $10,734 charge to comprehensive loss.

Details of the assumptions used are as follows for the respective dates:

	July 31, 2017	**March 31, 2017**	January 31, 2017
Weighted average risk-free interest rate	**1.28%**	**0.72%**	0.82%

(b) Share option and compensation expense:

The Corporation implemented an incentive stock option plan for directors, officers, employees and consultants to participate in the growth and development of the Corporation by providing such person with the opportunity, through stock options, to purchase common shares of the Corporation. The Stock Option Plan which provides that the aggregate number of Shares reserved for issuance, set aside and made available for issuance may not exceed 10% of the number of issued Shares at the time the options are to be granted. The maximum number of options which may be granted to any one beneficiary shall not exceed 5% of the issued Shares, calculated at the date the option is granted.

The Stock Option Plan is administered by the Board of Directors of the Corporation and it has full and final authority with respect to the granting of all options thereunder. Options may be granted under the Stock Option Plan to such directors, officers, employees or consultants of the Corporation and its affiliates, if any, as the Board of Directors may from time to time designate. The exercise price of any options granted under the Stock Option Plan shall be determined by the Board of Directors, subject to any applicable regulations or policies. The term and vesting of any options granted under the Stock Option Plan shall be determined by the Board of Directors at the time of grant, however, subject to earlier termination in the event of dismissal for cause, termination other than for cause or in the event of death, the term of any options granted under the Stock Option Plan may not exceed 5 years.

Options granted under the Stock Option Plan are not to be transferable or assignable other than by will or other testamentary instrument or pursuant to the laws of succession to a qualified successor. In the event of death of an option holder, options granted under the Stock Option Plan expire upon the earlier of the normal expiry date of the options or one year from the date of death of the option holder. Subject to certain exceptions, in the event that an employee, director, officer, consultant or individual conducting investor relations activities ceases to hold office, options granted to such a holder under the Stock Option Plan will expire 90 days after the holder ceases to hold office or such earlier date as the Board of Directors may decide at the date the options were granted. Notwithstanding the foregoing, in the event of a termination for cause of an option holder, all unexercised options held by such option holder shall immediately terminate.

The following options were granted in the respective reporting periods:

Number of options	Issue date	Expiry date	Exercise price $	Fair Value of options $	Total Compensation

14. Financial Instruments *(Continued from previous page)*

The fair value hierarchy of financial instruments measured at fair value on the Statements of Financial position as at January 31, 2017 is as follows:

	Level 1 $	Level 2 $	Level 3 $
Financial Assets			
Cash	7,366	-	-
Financial Liabilities			
Class A shares liability	-	-	333,334

The fair value of financial assets and liabilities not traded in active markets that are based on unobservable inputs are classified as Level 3. A fair value measurement developed using a present value technique might be categorized within Level 3, depending on the inputs that are significant to the entire measurement and the level of the fair value hierarchy within which those inputs are categorized. If an observable input requires an adjustment using an unobservable input and that adjustment results in a significantly higher or lower fair value measurement, the resulting measurement would be categorized within Level 3 of the fair value hierarchy. As described in Note 10, the liability was derecognize on October 10, 2017, therefore no fair value measurement was required as at October 31, 2017
For assets and liabilities that are recognized in the financial statements on a recurring basis, the Corporation determines whether transfers have occurred between levels in the hierarchy by assessing categorization (based on the lowest level input that is significant to the fair value measurement as a whole) at the end of reporting period. During the periods ended October 31, 2017 and January 31, 2017, there were no transfer between Levels 1, 2 and 3 of the fair value hierarchy.

15. Financial Risk Factors

The Corporation's activities expose it to financial risks: market risk specifically to cash flow and fair value interest rate risk and liquidity risk. The Corporation's overall risk management program focuses on the unpredictability of the financial market and seeks to minimize potential adverse effects on the Corporation's financial performance. The Corporation does not use derivative financial instruments to hedge these risks.

(a) Market risk

(i) Cash flow and fair value interest rate risk

The Corporation is exposed to fair value interest rate risk due to the unpaid amount on the research contract at the end of each month, its note payable, its short-term debt and its convertible loan negotiated at a fixed rate.

(b) Liquidity risk

Liquidity risk is the risk that the Corporation will not be able to meet its obligations as they fall due. The following are the contractual maturities of financial liabilities as at:

October 31, 2017	**Carrying Value $**	**Less than 30 days $**	**30 days to 3 months $**	**3 months to 12 months $**	**More than 12 months $**

(c) Capital risk management

The Corporation' objective when managing capital is to maintain its ability to continue as a going concern in order to provide returns for the shareholders and benefits for other stakeholders. The Corporation includes equity, comprised of issued common shares, warrants and contributed surplus, in the definition of capital. The Corporation's primary objective with respect to its capital management is to ensure that is has sufficient financial resources to meet its financial obligations. To secure the additional capital necessary to pursue these plans, the Corporation will attempt to raise additional funds through the issuance of equity or by securing strategic partners. The Corporation is not subject to any externally imposed capital requirements.

17. Commitments

On June 19, 2015, the Corporation entered into three long-term Research Service Agreements with Polytechnique, requiring disbursements for a total of $2,100,000. On October 10, 2017, with an effective date of August 1, 2017, both parties revised the monthly payments of the three Research Service Agreements for a revised remaining amount of $161,931. The revised monthly amounts are as follow:

i) Agreement 1: $6,940 monthly for the remaining 7 months
ii) Agreement 2: $9,253 monthly for the remaining 7 months
iii)Agreement 3: $6,940 monthly for the remaining 7 months

In the event that the Corporation fails to perform any of the payments provided in these Agreements, compound interest at an annual rate of 12% will be applied on any unpaid balance at the end of each month.

In the event that the Corporation is in breach of any of the Agreements, these agreements can be unilaterally terminated by Polyvalor. Any and all amounts owed will become payable immediately and the assigned Intellectual Property will immediately and automatically revert back to Polyvalor for a nominal amount of one dollar.

In addition, when the product is commercialized, the Corporation must make non-refundable payments to Polyvalor equal to 1.5% of Net Sales.

18. Subsequent Events

On December 11, 2017, the Corporation closed the second tranche of $160,000 for 320,000 units at a subscription price of $0.50 per unit, with each unit consisting of one Class A common share and one-half common share purchase warrant. A full warrant will entitle the holder to acquire one common share at an exercise price of $0.70 per share at any time on or before the close of business on a date that is eighteen months from the subscription date. If, during the eighteen months after that date, the Corporation's weighted average share price for 30 consecutive trading days equals or exceeds $1.00, the Corporation may give notice to the warrant holders that they must exercise their warrants within a period of 30-days from the date of receipt of the notice. An amount of $110,000 was completed by one authorized dealer, with a cash fees of $5,500 of the placement value and 11,000 of broker's warrants.

In addition, on December 8, 2017, the Corporation issued 19,112 shares by the exercised of 19,112 brokers warrants for gross proceeds of $9,556
