In accordance with the Arrangement, Fox River was created to hold:
(i) PhosCan's Martison phosphate project;
(ii) a 71.6 acre parcel of land located in the City of Brandon, Manitoba; and
(iii) all of PhosCan's other assets, with the exception of $45.4 million of cash and cash equivalents and short term investments, and all of PhosCan's liabilities, including PhosCan's obligations to pay to those shareholders of PhosCan who had dissented in respect of the Arrangement the fair value of their PhosCan shares.

Prior to closing of the Arrangement, the Company was advanced $200,000 in cash by Baltic, and $64,000 in marketable securities by PhosCan during the period ended January 31, 2016.

These condensed interim consolidated financial statements have been prepared in accordance with International Accounting Standard 34, Interim Financial Reporting ("IAS 34") on the basis of International Financial Reporting Standards ("IFRS") as issued by the International Accounting Standards Board ("IASB"). Accordingly, they do not include all of the information required for full annual financial statements as required by IFRS. These condensed interim consolidated financial statements have been prepared on the basis of a going concern, which contemplates the realization of assets and liquidation of liabilities in the normal course of business, and on a historical cost basis except for the revaluation of certain financial instruments. In addition, these condensed interim consolidated financial statements have been prepared using the accrual basis of accounting except for cash flow information.

The Board of Directors approved the condensed interim consolidated financial statements and authorized their issuance on September 20, 2017.

IFRS 9 Financial Instruments was issued in final form in July 2014 by the IASB and will replace IAS 39 Financial Instruments: Recognition and Measurement. IFRS 9 uses a single approach to determine whether a financial asset is measured at amortized cost or fair value, replacing the multiple rules in IAS 39. The approach in IFRS 9 is based on how an entity manages its financial instruments in the context of its business model and the contractual cash flow characteristics of the financial assets. Most of the requirements in IAS 39 for classification and measurement of financial liabilities were carried forward unchanged to IFRS 9. The new standard also requires a single impairment method to be used, replacing the multiple impairment methods in IAS 39. IFRS 9 is effective for annual periods beginning on or after January 1, 2018.

In January 2016, the IASB issued IFRS 16 Leases, which requires lessees to recognize assets and liabilities for most leases. Application of the standard is mandatory for annual reporting periods beginning on or after January 1, 2019.In January 2016, the IASB issued IFRS 16 Leases, which requires lessees to recognize assets and liabilities for most leases.
