ABOUT GEOLOGICA RESOURCE CORP.

Geologica Resource Corp. is a mineral explorer, building shareholder value through the acquisition of projects with significant technical merit. The Company has an option agreement and purchase agreements for 100% of the mineral claims known as the Topley Project, located in central British Columbia. The Company continues to evaluate additional properties to explore.

TOPLEY CLAIMS

- Geochemistry has identified high priority exploration target areas and a kilometer-scale VMS target area
- The region is known for its large porphyry, copper/gold, and copper/molybdenum deposits including past producing copper mines, Granisle and Bell
- The property is located in central BC, is Road Accessible, Cost effective to explore
- BC Hydro power lines transect the property and several water sources are available on the property
- Porphyries contain the largest reserves of Cu and close to 50% of Au reserves in BC
- Topley Property consists of 7 mineral claims totaling 2,669 Ha with known prospects and showings
- The recent acquisition expands the Company's land position by 707.9 hectares to total 3,414 hectares

CLAIMS HISTORICAL WORK

Previous drilling on the claims has indicated intense epithermal alteration with Ag, Pb, and Zn mineralization. Sporadic regional till samples in the area are in the 90th percentile for As, Sb, Pb and Zn. These claims have been mapped as mostly light grey FS phytic andesites, maroon FS phytic andesites with disseminated magnetite and monazite. Monazite stocks with in andesites is similar geology to Mount Milligan.

The accuracy of the technical content of this overview has been reviewed by John Buckle P.Geo., who is a Qualified Person as defined under NI 43-101, and a member of the Company's board of directors.
