

GLORIOUS CREATION LIMITED.
Management Discussion and Analysis
For the Six Months Ended June 30, 2019

This management discussion and analysis of financial condition and results of operations (the “MD&A”) for Glorious Creation Limited (“Glorious Canada” or the “Company”) is prepared as of August 6, 2019 and is intended to assist in the understanding and assessment of trends and significant changes in the results of operations and financial condition of the Company. The information herein should be read in conjunction with the unaudited condensed interim consolidated financial statements for the six months ended June 30, 2019 and in conjunction with the audited consolidated financial statements for the year ended December 31, 2018, which have been prepared under International Financial Reporting Standards (“IFRS”). The information contained herein is not a substitute for detailed investigation or analysis on any particular issue. The information provided in this document is not intended to be a comprehensive review of all matters and developments concerning the Corporation.

All financial information in this MD&A has been prepared in accordance with IFRS and all dollar amounts are quoted in Canadian dollars, the reporting and functional currency of the Corporation, unless specifically noted.

This discussion contains forward-looking statements that involve risks and uncertainties. Such information, although considered to be reasonable by the Company’s management at the time of preparation, may prove to be inaccurate and actual results may differ materially from those anticipated in the statements made.

Forward-Looking Statements

Certain information included in this discussion may constitute forward-looking statements. Readers are cautioned not to put undue reliance on forward-looking statements. These statements relate to future events or the Company’s future performance, business prospects or opportunities. All statements other than statements of historical fact may be forward-looking statements. Forward-looking statements are often, but not always, identified by the use of words such as “seek”, “anticipate”, “plan”, “continue”, “estimate”, “expect”, “may”, “will”, “project”, “predict”, “potential”, “targeting”, “intend”, “could”, “might”, “should”, “believe” and similar expressions. Forward-looking statements are subject to a variety of risks and uncertainties which could cause actual events or results to differ from those reflected in the forward-looking statements, including, without limitation, risks and uncertainties relating to internet and social media industry (see section “Business Risks” herein). Forward-looking information is, in addition, based on various assumptions including, without limitation, the expectations and beliefs of management, that the Company can access financing, appropriate equipment and sufficient labour. Should one or more of these risks and uncertainties materialize, or should underlying assumptions prove incorrect, actual results may vary materially from those described in forward-looking statements.

Proposed sales of subsidiaries

The Company was incorporated under the *Canada Business Corporations Act* (“CBCA”) on December 24, 2015 and was registered as an extra-provincial company in British Columbia on January 28, 2016. Through a share exchange arrangement (the “Share Exchange”). On September 5, 2017, the Company completed its initial public offering (“IPO”) and trading of the Company’s common shares commenced on the Canadian Securities Exchange (“CSE”) under the symbol “GCIT”.

Since the Company’s IPO, the Company has focused its efforts and resources on facilitating trade between China and Vietnam and other Southeast Asian countries. Through its Asian subsidiaries, the Company commenced the development of an e-commerce platform which was intended to facilitate the trading and settlement of products between small to medium sized businesses initially in China and Vietnam. Once trade between China and Vietnam was established, the Company then intended to expand its e-commerce platform to connect Chinese and Vietnamese businesses with businesses in other Southeast Asian countries. Over the past two years, the Company has made

some progress, including setting up offices and infrastructure in Ho Chi Minh City, Vietnam and Shenzhen City, China, obtaining necessary import and export licenses in Vietnam and China, developing blockchain technology required to support the e-commerce platform, and building up connections with numerous businesses in China, Vietnam, Cambodia and Malaysia. However, since late 2018, the Company has encountered a series of unexpected difficulties which have thwarted its ability to move forward, including: the trade war between China and United States, the technology ban imposed on Chinese technology companies like Huawei, the political instability of Hong Kong, the breakdown of Chinese-Canadian relations, and Mr. Kong's health issues. All of these issues, as well as others, have cast doubt on the feasibility of success for the Company's long-term development plan in China and Southeast Asia. The Company's subsidiaries in Asia had a total loss of \$1.2 million in 2017 and \$1.5 million in 2018, and a net liability of \$1.8 million as of December 31, 2018. Mr. Kong was the key person involved in the IT development of the platform, and was personally engaged in liaising with businesses and government officials in China and Vietnam. Without these relationships and Mr. Kong's ability to continue with his efforts, the Company is unable to continue advancing its business in Asia at this time. The Company has laid off most of its employees in Asia; however, it continues to accrue costs. Consequently, in light of all of these issues, upon considered review and evaluation, the Board has determined that it's not financially feasible to continue with its current business. The Board believes that it is in the best interests of the Company to cut its losses and divest itself of the business in Asia, through the sale of its Asian subsidiaries. It is proposing to sell its Hong Kong subsidiary, which holds its Vietnamese and Chinese subsidiaries, to Mr. Kong at nominal cost, with all related liabilities being assumed by Mr. Kong, so as to divest the Company of the ongoing financial losses. On July 31, 2019, the Company entered into a sales and purchase agreement with Mr. Kong to sell 100% of shares of Glorious IT which includes all subsidiaries in Asia for a consideration of \$200. As this will be a sale of substantially all of its assets, the Company will seek shareholder approval to this sale at its upcoming Annual General Meeting to be held on September 10, 2019.

The Board has started to evaluate new opportunities and projects to vend in to the Company as its new business, with a view to enhancing shareholder value. The Board will provide shareholders with updates on the status of these opportunities if and when material information becomes available.

On July 10, 2019, Mr. Kong resigned from the CEO and director position of the Company. Mr. Norm Yurik has been appointed as the CEO and a director of the Company on the same day. Mr. Yurik is a CPA and former tax partner at Deloitte LLP, where he had worked from 1979 to 2017. Mr. Yurik led the Merger and Acquisition Group of Deloitte LLP in British Columbia for 20 years and was responsible for both tax planning and structuring and client service for some of Deloitte's most significant clients in Vancouver. Mr. Yurik has extensive experience working with public companies, family offices and high net worth individuals. He has worked in jurisdictions such as the US, UK, Australia, Barbados, Africa, Luxembourg, Jersey Islands plus various other countries. He has served on various Institute Boards and Charitable Boards over the past 20 years. Mr. Yurik is currently a director of Russell Breweries Inc. and Asian Mineral Resources Limited.

Corporate Structure

Currently, the Company owns 100% of Glorious IT, who directly owns 3 subsidiaries, 100% of Glorious Shenzhen in China, and 86% of Glorious Vietnam and 72% of VnTrans in Vietnam.

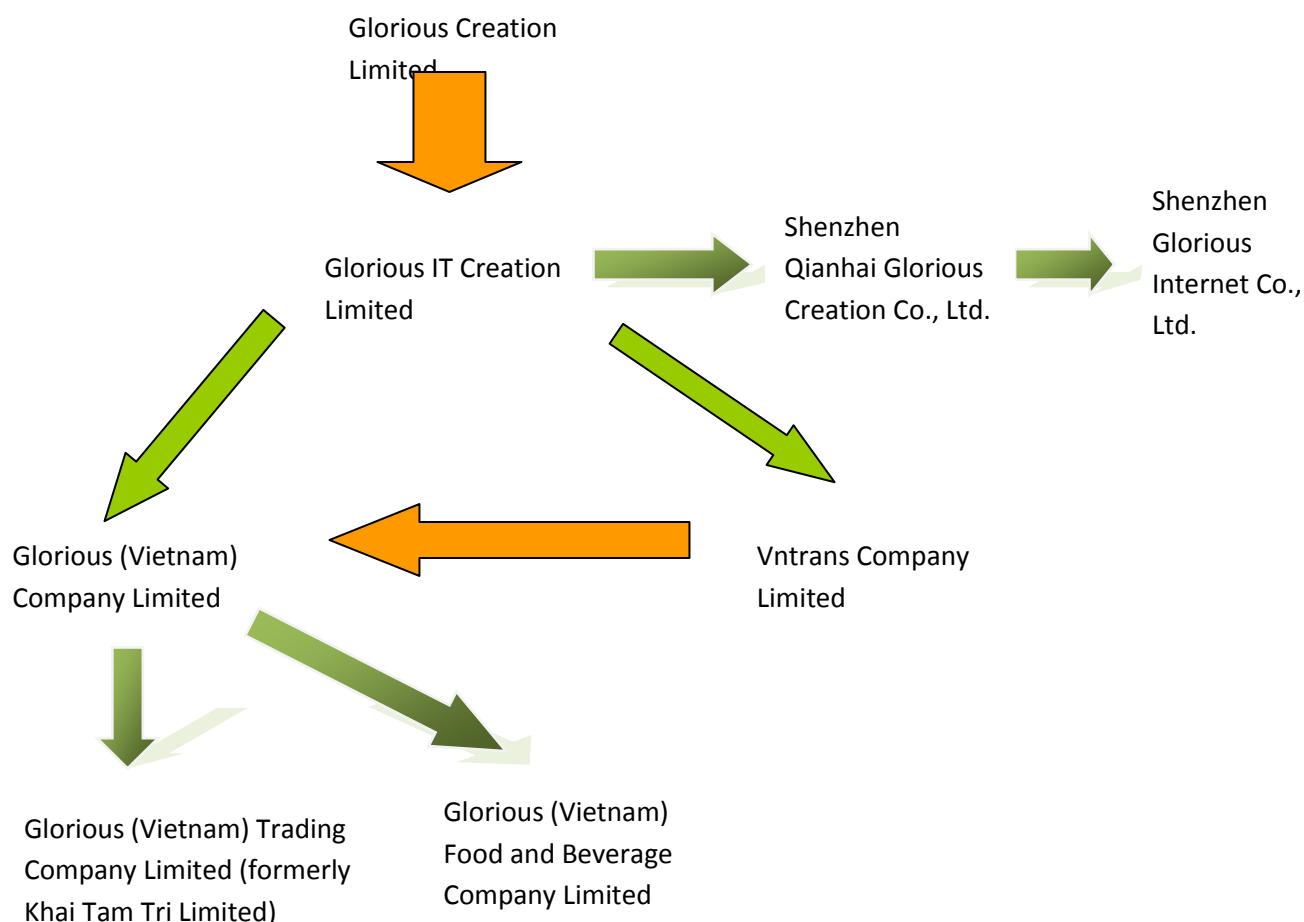

In November 2017, Glorious (Vietnam) Company Limited ("Glorious Vietnam") acquired 100% of Glorious (Vietnam) Trading Company Limited (formerly Khai Tam Tri Limited) ("KTT") by paying VND120,000,000 (\$6,600). KTT holds retail licenses in Vietnam and will focus on trading related business. In June 2018, Glorious Vietnam set up a wholly-owned subsidiary, Glorious (Vietnam) Food and Beverage Company Limited ("F&B"). F&B focuses on food and beverage import and export, and wholesale and retail.

In October 2017, Shenzhen Qianhai Glorious Creation Co., Ltd. (“Glorious SZ”) incorporated a 100% owned subsidiary in Shenzhen, China, Shenzhen Glorious Internet Co., Ltd. (“Glorious Internet”). Glorious Internet will focus on technology development and Glorious SZ will focus on trading related business between China and Vietnam.

Details of the Company’s subsidiaries are as follows:

Name	Date of incorporation or acquisition	Location	Principal activities	Ownership	
				June 30, 2019	December 31, 2018
Glorious IT Creation Limited (“Glorious HK”)	July 19, 2011	Hong Kong, China	Asian head office	100%	100%
Shenzhen Qianhai Glorious Creation Co., Ltd. (“Glorious SZ”)	January 3, 2017	Shenzhen, China	Virtual cross-border business platform	100%	100%
Shenzhen Glorious Internet Co., Ltd. (“Glorious Internet”)	October 23, 2017	Shenzhen, China	IT development	100%	100%
Glorious (Vietnam) Company Limited (“Glorious Vietnam”)	January 18, 2012	Ho Chi Minh City, Vietnam	Internet technology services	86%	86%
Glorious (Vietnam) Trading Company Limited (formerly Khai Tam Tri Limited) (“KTT”)	December 7, 2017	Ho Chi Minh City, Vietnam	Retail	86%	86%
Glorious (Vietnam) Food and Beverage Company Limited (“F&B”)	July 6, 2018	Ho Chi Minh City, Vietnam	Food and beverage import and export, wholesale and retail	86%	86%
VnTrans Limited (“VnTrans”)	September 29, 2014	Ho Chi Minh City, Vietnam	Transportation and logistic management	72%	72%

On July 31, 2019, the Company entered into a sales and purchase agreement with the former CEO, Mr. Kong, to sell 100% of shares of Glorious IT which includes all subsidiaries in Asia for a consideration of \$200. This transaction is subject to regulatory and shareholders’ approval.

Overall Performance

Proposed sales of Glorious IT and all subsidiaries

On July 31, 2019, the Company entered into a sales and purchase agreement with the former CEO, Mr. Kong, to sell 100% of shares of Glorious IT which includes all subsidiaries in Asia for a consideration of \$200. This transaction is subject to regulatory and shareholders' approval.

Change of director and officer

On July 10, 2019, Mr. Kong resigned from the CEO and director position of the Company. Mr. Norm Yurik has been appointed as the CEO and a director of the Company on the same day. Mr. Yurik is a CPA and former tax partner at Deloitte LLP, where he had worked from 1979 to 2017. Mr. Yurik led the Merger and Acquisition Group of Deloitte LLP in British Columbia for 20 years and was responsible for both tax planning and structuring and client service for some of Deloitte's most significant clients in Vancouver. Mr. Yurik has extensive experience working with public companies, family offices and high net worth individuals. He has worked in jurisdictions such as the US, UK, Australia, Barbados, Africa, Luxembourg, Jersey Islands plus various other countries. He has served on various Institute Boards and Charitable Boards over the past 20 years. Mr. Yurik is currently a director of Russell Breweries Inc. and Asian Mineral Resources Limited.

Management cease trade order (“MCTO”)

The Company’s annual financial statements, the related management’s discussion and analysis and the related officer certifications for the financial year ended December 31, 2018 (collectively, the “Annual Filings”) was delayed beyond the filing deadline of April 30, 2019. The Company’s application for a management cease trade order (the “MCTO”) was approved and the MCTO has been issued effective May 1, 2019.

The Annual Filing is completed on May 24, 2019 and the MCTO is revoked on May 27, 2019 as a result.

Loans

In April and May 2019, the Company received loan of \$150,000. The loans bear no interest and mature on demand by the lenders. The Company provides all of its currently held and after-acquired assets as security for the loans. On July 4, 2019, the Company received an additional loan of \$25,000.

Private Placement

In March 2018, the Company closed a non-brokered private placement by issuing 1,000,000 share units at the price of \$0.45 per unit for total proceeds of \$450,000. Each unit consists of one common share and one share purchase warrant. Each warrant can be exercised into one common share of the Company at the price of \$0.75 per share for a period of two years. In connection with the offering, the Company paid total finders fees of \$1,125.

Results of Operations

Six months ended June 30, 2019 and 2018

During the six months ended June 30, 2019, the Corporation incurred a net loss of \$412,390, compared with \$741,996 for the six months ended June 30, 2018. The Corporation currently has generated revenue from sales of electronic products and other products, installation and implementation services, staff training, and monthly access and maintenance services. However, it has only a few customers and has not developed a mature line of business. The Corporation is in the development stage and its revenue and expense are not consistent each period.

The losses are mainly comprised of the following items:

- During the six months ended June 30, 2019, the Company generated revenue of \$2,075 (2018 - \$12,119) from maintaining the energy saving system and providing other IT services; \$4,117 (2018 - \$11,779) from selling electronic products in Vietnam and selling agricultural products in China. The Company also incurred selling expenses of \$17,910 (2018 - \$34,449) on renting and maintaining a showroom in Ho Chi Minh City, and \$14,044 (2018 - \$32,134) on hiring and training sales persons and hosting marketing events;
- Amortization costs of \$32,882 (2018 - \$41,311) are mainly from amortizing computers and office equipment, office furniture, and leasehold improvement.
- Accounting and auditing fees have a credit balance of \$12,180 (2018 – debit balance of \$6,718) was due to over accrual of yearend audit fee.
- Consulting fee of \$17,738 during the six months ended June 30, 2018 was paid for advice on building up blockchain based trading platform. There was no such fee in the six months ended June 30, 2019.
- Directors fee of \$12,000 (2018 - \$18,000) was paid or accrued to two (2018 – three) directors at \$1,000 per month for each director.
- Legal fees of \$10,936 (2018 - \$19,359) was for corporate work.

- Management fees of \$51,000 (2018 - \$91,235) includes \$Nil (2018 - \$49,235) paid or accrued to the former CEO and \$51,000 (2018 - \$42,000) to company controlled by the CFO.
- Office and miscellaneous of \$31,879 (2018 - \$56,945) includes meals and entertainment, gift and promotion, preparation of business plan, office supplies, etc.
- Rent fees of \$31,879 (2018 - \$44,996) are for two offices in Ho Chi Minh City, and one office in Shenzhen city.
- Salary and benefits of \$71,417 (2018 - \$100,915) were paid to employees in Ho Chi Minh City and Shenzhen City.
- Share-based compensation of \$106,052 (2018 - \$233,361) is the amortization of the fair value of 3,320,000 stock options granted in August 2017.
- Travel expenses of \$544 (2018 - \$33,173) was mainly for trips made by the former CEO between Hong Kong, China and Vietnam and visiting Vancouver. The travel expense decreased significantly due to health issue of the former CEO and also reduced business activities.
- Registration and filing fees of \$14,444 (2018 - \$10,417) included fees paid to CSE and transfer agent and for SEDAR filing.
- During the six months ended June 30, 2019, the Company disposed certain capital assets in Shenzhen office and one of its Ho Chi Minh city office and incurred a loss of \$27,366 (2018- \$Nil).

Three months ended June 30, 2019 and 2018

During the three months ended June 30, 2019, the Company incurred a net loss of \$188,557, compared with \$378,908 for the three months ended June 30, 2018. The Company currently has generated revenue from sales of electronic products and other products, and monthly access and maintenance services. However, it has only a few customers and has not developed a mature line of business. The Company is in the development stage and its revenue and expense are not consistent each period.

The losses are mainly comprised of the following items:

- During the three months ended June 30, 2019, the Company generated revenue of \$Nil (2018 - \$6,168) from maintaining the energy saving system and providing other IT services; \$Nil (2018 - \$11,319) from selling electronic products in Vietnam and selling Vietnamese agricultural products in China. The Company incurred marketing fee of \$Nil (2018 - \$17,050) on renting and maintaining a showroom in Ho Chi Minh City, and \$Nil (2018 - \$16,013) on hiring and training sales persons and hosting marketing events;
- Amortization costs of \$14,278 (2018 - \$20,968) are mainly from amortizing computers and office equipment, office furniture, and leasehold improvement.
- Accounting and auditing fees have a credit balance of \$13,538 (2018 – debit balance of \$5,470) was due to over accrual of yearend audit fee.
- Consulting fee of \$17,738 during the three months ended June 30, 2018 was paid for advice on building up blockchain based trading platform. There was no such fee in the three months ended June 30, 2019.
- Directors fee of \$6,000 (2018 - \$9,000) was paid or accrued to two (2018 – three) directors at \$1,000 per month for each director.
- Legal of \$10,520 (2018 - \$4,076) was for corporate work.
- Management fees of \$21,000 (2018 - \$43,823) includes \$Nil (2018 - \$22,823) paid or accrued to the CEO and \$21,000 (2018 - \$21,000) to company controlled by the CFO.
- Office and miscellaneous of \$9,563 (2018 - \$28,063) includes meals and entertainment, gift and promotion, preparation of business plan, office supplies, etc.
- Rent fees of \$27,162 (2018 - \$20,051) are for two offices in Ho Chi Minh City, and one office in Shenzhen city.

- Salary and benefits of \$31,443 (2018 - \$50,516) were paid to employees in Ho Chi Minh City and Shenzhen City.
- Share-based compensation of \$53,319 (2018 - \$117,325) is the amortization of the fair value of 3,320,000 stock options granted in August 2017.
- Travel expenses during the three months ended June 30, 2018 was mainly for trips made by the former CEO between Hong Kong, China and Vietnam and visiting Vancouver. There was no such activity during the three months ended June 30, 2019.
- Registration and filing fees of \$12,494 (2018 - \$6,412) included transfer agent fee, CSE maintenance fee and SEDAR filing fee.
- During the three months ended June 30, 2019, the Company disposed certain capital assets in Shenzhen office and one of its Ho Chi Minh city office and incurred a loss of \$13,978 (2018- \$Nil).

Liquidity and Capital Resources

The Company commenced fiscal 2019 with working capital deficiency of \$481,108 and cash of \$34,820. As at June 30, 2019, the Company had a working capital deficiency of \$706,323 and cash of \$7,989.

Net cash used in operating activities for the current period was \$194,397 (2018 - \$574,468). The net cash used in operating activities for the six-month period consisted primarily of the operating loss and a change in non-cash working capital items.

Net cash provided by investing activities during the current six month period was from proceeds of \$7,248 from disposing capital assets. In the comparative six-month period, net cash used in investing activities was \$5,762 due to purchasing computers and office furniture.

Net cash from financing activities during the current period ended June 30, 2019 was \$162,840 (2018 - \$516,773). During the six months ended June 30, 2019, the Company received \$150,000 loan from certain individuals in Canada and \$22,767 (HK\$134,000) of loan from former CEO (HK\$98,000) and certain shareholders in Hong Kong (HK\$36,000). During the six months ended June 30, 2018, the Company completed a non-brokered private placement in March by issuing 1,000,000 share units at \$0.45 per unit for gross proceeds of \$450,000. Also, the Company received \$76,751 (HK\$470,000) of loan from HSBC in June 2018.

The Company will need to raise funds through debt or equity offerings in order to have sufficient working capital to sustain its operations for the next 12 months.

Related Party Transactions

- a) During the six months ended June 30, 2019, the Company paid or accrued fees of \$Nil (2018 - \$49,235) to the former CEO of the Company. As of June 30, 2019, \$16,585 (December 31, 2018 - \$10,336) was owed to the former CEO.

During the six months ended June 30, 2019, the Company received HK\$98,000 from the former CEO. As of June 30, 2019, the loan balance was HK\$288,000 (\$48,240) (December 31, 2018 - HK\$190,000 (\$33,060)).

- b) During the six months ended June 30, 2019, the Company paid or accrued fees of \$51,000 (2018 - \$42,000) to a company controlled by the CFO of the Company. As of June 30, 2019, \$87,000 (December 31, 2018 - \$55,500) was owed to the company controlled by the CFO.
- c) During the six months ended June 30, 2019, the Company paid or accrued directors' fees of \$12,000 (2018 - \$18,000) to the directors. As of June 30, 2019, \$18,900 (December 31, 2018 - \$6,300) was owed to the directors.

Shareholders' equity (deficiency)	
Share capital	2,831,023
Reserve	769,961
Deficit	(4,023,773)
Total shareholders' equity (deficiency)	(255,315)
Total liabilities and shareholders' equity (deficiency)	20,180

Financial and Capital Risk Management

The Company has measured its accounts payable and accrued liabilities, due to related parties, due to association and short-term loans at amortized cost. The Company measure its financial assets, receivables, also at amortized cost. The Company's carrying values of these items approximate their fair value due to the relatively short periods to maturity of the instruments.

Credit risk

Credit risk is the risk of an unexpected loss if a customer or third party to a financial instrument fails to meet its contractual obligations. As of June 30, 2019, the Company's maximum exposure to credit risk is limited to its cash. The Company limits exposure to credit risk by maintaining its cash with large financial institutions in Hong Kong and Canada. The Company wires funds to Vietnamese subsidiaries according to a detailed budget and maintains a low level of cash balances in its Vietnamese banks.

The Company is exposed to credit risk on trade receivables. The Company regularly reviews the collectability of its trade and other receivables and establishes an allowance account for credit losses based on its best estimate of any potentially uncollectible amounts. As of June 30, 2019 and December 31, 2018, the Company has minimal trade receivables.

Currency risk

The Company has raised funds in Canadian dollars and Hong Kong dollars. A portion of the Company's expenses are incurred in Hong Kong dollars, Chinese RMB and the Vietnamese Dong and financial instrument balances are held in these currencies. A change in the currency exchange rates between Canadian dollars, Hong Kong dollars, Chinese RMB and Vietnamese Dong could have a negative effect on the Company's results of operations, financial position or cash flows. However, as the Company does not maintain significant cash balances in foreign currencies and settles any transactions in foreign currencies quickly, its exposure to currency risk is considered insignificant as at June 30, 2019 and December 31, 2018. As such, the Company has not hedged its exposure to currency fluctuations.

Liquidity risk

Liquidity risk is the risk that the Company will not be able to meet its financial obligations as they fall due. As at June 30, 2019, the Company had a cash balance of \$7,989 to settle current liabilities of \$843,511. All of the Company's financial liabilities have contractual maturities of 30 days or are due on demand and are subject to normal trade terms. The Company needs further funding to meet its short-term and long-term cash requirements.

Interest rate risk

Interest rate risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in market interest rates. The Company currently has no interest-bearing financial instruments other than cash and loans, so its exposure to interest rate risks is insignificant. Loans bear a fixed interest rate.

Capital management

The Company's objectives when managing capital are to safeguard the Company's ability to continue as a going concern in order to pursue the identification and evaluation of assets or a business and once identified or evaluated, to negotiate an acquisition or participation in a business subject to receipt of shareholder approval and acceptance by regulatory authorities. The Company relies mainly on equity issuances and loans from related parties to raise new capital. In the management of capital, the Company includes the components of shareholders' equity (deficiency). The Company prepares annual estimates of operating expenditures and monitors actual expenditures compared to the estimates in an effort to ensure that there is sufficient capital on hand to meet ongoing obligations. The Company's investment policy is to negotiate premium interest rates on savings accounts or to invest its cash in highly liquid short-term deposits with terms of one year or less and which can be liquidated at any time without interest penalty. The Company will require additional financing in order to provide working capital to fund costs for the current year. These financing activities may include issuances of additional debt or equity securities.

The Company currently is not subject to externally imposed capital requirements. There were no changes in the Company's approach to capital management.

Significant Accounting Policies, Critical Judgments and Estimates

The preparation of financial statements in conformity with IFRS requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. Actual results may differ from those estimates. Estimates are reviewed on an ongoing basis based on historical experience and other factors that are considered to be relevant under the circumstances. Revisions to estimates on the resulting effects of the carrying amounts of the Company's assets and liabilities are accounted for prospectively.

All of the Company's significant accounting policies and estimates are included in Notes 3 and 4 of its unaudited condensed interim consolidated financial statements for the six months ended June 30, 2019 and its audited

consolidated financial statements for the year ended December 31, 2018.

Adoption of accounting policies

The Company adopted IFRS 16, Lease, starting January 1, 2019. The adoption of the standard has no significant impact on the measurement or presentation of balances or transactions as reported in these financial statements.

Outstanding Share Data

The following table summarizes the Company's outstanding share data as of the date of this MD&A:

	Number of shares Issued or issuable
Common shares	39,222,001
Stock options	2,920,000
Warrants	1,209,480

Risks and Uncertainties

The Company, through its subsidiaries in Hong Kong, Vietnam and China, and a network of business partners, provides commercial services for foreign enterprises seeking ready access to the growing market for consumer and industrial goods in Vietnam. The Company helps its clients to develop Southeast Asian market by providing a range of services including access to the Maritime Silk Road online marketplace, shipping logistics, payment processing, warehousing and distribution of goods, marketing, promotion and sales support. The Company provides a low cost, fast, effective and reliable bridge for small and medium sized enterprises ("SMEs") to enter Vietnam and other ASEAN (Association of South East Asian Nations) economies.

Limited Operating History

The Company was incorporated in late 2015 and does not have an operating history or any established financing sources. The Company's wholly-owned subsidiary, Glorious IT, was incorporated in July, 2011, and has earned nominal revenues to date.

The Company has a history of operating losses and may not achieve or sustain profitability. It cannot guarantee investors that it will become profitable, and even if it achieves profitability, given the evolving nature of the industry in which it operates, it may not be able to sustain or increase profitability and its failure to do so could adversely affect its business, including its ability to raise additional funds.

The Company's financial statements have been prepared on a going concern basis under which an entity is considered to be able to realize its assets and satisfy its liabilities in the ordinary course of business. The Company's future operations are dependent upon the identification and successful completion of equity or debt financing and the achievement of profitable operations at an indeterminate time in the future. There can be no assurances that the Company will be successful in completing equity or debt financing or in achieving profitability. The financial statements do not give effect to any adjustments relating to the carrying values and classification of assets and liabilities that would be necessary should the Company be unable to continue as a going concern.

The Company's business and prospects must be considered in light of the risks, expenses and difficulties often encountered by early stage agency, distributor and/or commercial IT technology companies. Risks to consider include the unpredictability of the Company's business expansion, its ability to anticipate and adapt to the constantly evolving array of business opportunities presented to it and its ability to identify, attract, train and retain qualified personnel to assist it with its growth and diversity. The Company has limited experience in addressing the risks,

expenses and difficulties encountered by similar, same-stage companies, particularly companies that are as rapidly evolving in the ASEAN corridor as the Company.

The Company cannot assure that it can avoid net losses in the future or that there will not be any earning or revenue declines in the future. The Company expects that its operating expenses will increase as it grows its business. If the revenues do not increase to offset these expected increases in costs and operating expenses, the Company will not be profitable.

To increase its revenues, the Company must regularly add new customers, provide additional services and/or sell additional products to existing customers and encourage existing customers to increase their minimum commitment levels. There are no assurances that the Company will be able to attract new customers or retain existing customers in which case its operating results will be adversely affected.

The Company intends to expand its international trade agency and consulting business, as well as continue to establish and expand its e-commerce platform into a number of ASEAN countries, including Vietnam and China. In order to succeed with such expansions, the Company believes it will need to develop and manage new sales channels and distribution arrangements. Because the Company has limited experience in developing and managing such channels, it may not be successful in further penetrating target geographic regions or reaching a broader customer base. Failure to develop or manage additional sales channels effectively would limit the Company's ability to succeed in its target markets and could adversely affect the Company's ability to grow its customer base and revenue. Additionally, the Company expects to act as a distributor for the products and services sold through its e-commerce platform. If the Company fails to manage distribution of such products and services properly, if the financial condition or operations of its suppliers weaken, or if such suppliers fail to meet the applicable regulatory requirements of the jurisdictions in which they do business, the revenue and gross margins of the Company could be adversely affected.

Negative Operating Cash Flows

Since commencing its operations the Company has had negative operating cash flow and incurred losses. The Company may never achieve positive operating cash flow. To the extent the Company has negative operating cash flows in future, it may need to deploy a portion of its existing cash reserves or identify additional sources of financing to fund such negative cash flows. The Company may require additional financing in order to continue as a going concern, as well as to grow and expand its operations. It is possible that any required future financing will not be available or, if available, will not be available on favorable terms. If adequate funds are not available, or are not available on acceptable terms, the Company may not be able to take advantage of opportunities, respond to competitive pressures or remain in business.

International Operations

The Company provides international trade agency and consulting services to companies primarily in Vietnam, with recent expansion to China and proposed expansion to other ASEAN countries. In addition, the Company is in the process of setting up its online e-commerce portal to facilitate the purchase and sale of products initially between the Vietnamese and Chinese markets, with proposed expansion to other ASEAN countries. Certain risks are inherent in such international operations, including: vigorous regulation of the Internet; the challenge of compliance with a variety of continually updating foreign laws and regulations, some of which may conflict with one another; the possibility of new, or changing, tax laws applicable to the Company, its operations or those of its clients or customers; varying foreign laws and regulations for e-commerce; difficulty enforcing agreements, intellectual property rights and collecting receivables through certain foreign legal systems; complexities of managing a multinational organization; general economic and political conditions, natural disasters, social upheaval, war or terrorist activities in countries where the Company operates; movement in, or outlook on, interest rates and inflation rates in jurisdictions in which it operates; and differing payment cycles across jurisdictions. If the Company does not respond adequately to these risks, it could have a material adverse effect on the Company's business, results of operations and financial condition. The implementation of new laws or the modification of existing laws affecting any of the industries in which the Company carries on business are beyond the control of the Company and could have a material adverse impact on the Company and its business.

Foreign Exchange Rate Risk

Because the Company's business operations are centered in Hong Kong, Vietnam and China. All or part of the Company's revenue and expenses may be denominated in Canadian dollars, US dollars, Hong Kong dollars, Vietnamese Dong or Chinese Renminbi. Accordingly, foreign currency fluctuations may adversely affect the Company's financial position and operating results.

Potential Restrictions on Transfer with Subsidiaries

The Company is a holding company that conducts operations through subsidiaries, including foreign subsidiaries located in Hong Kong, Vietnam and China. Accordingly, any limitation on the transfer of cash or other assets between the Company and such entities, or among such entities, including the creation or increase of taxes over such transfers, could restrict the Company's ability to fund its operations efficiently or to fund dividends or other distributions to Shareholders. Any such limitations, or the perception that such limitations may exist now or in the future, could have an adverse impact on the Company's valuation and share price.

Changes in Laws

Changes to any of the laws, rules, regulations or policies to which the Company is subject in any jurisdiction in which it carries on business could have a significant impact on the Company's business. There can be no assurance that the Company will be able to comply with any future laws, rules, regulations and policies. Failure by the Company to comply with applicable laws, rules, regulations and policies may subject it to civil or regulatory proceedings, including fines or injunctions, which may have a material adverse effect on the Company's business, financial condition, liquidity and results of operations. In addition, compliance with any future laws, rules, regulations and policies could negatively impact the Company's profitability and have a material adverse effect on its business, financial condition, liquidity and results of operations.

Competition

While there is significant competition in the online advertisement industry generally; the Company is unaware of any direct competitors at this time, as to the Company's knowledge, it is the first company to construct a total solution to help to connect the Vietnam and China markets. This is due, in part, to the fact that the Company currently has access to an Internet advertising license in Vietnam which is rare. However, it is anticipated that the Company will be competing with a range of local and foreign-owned competitors in the future as more companies try to infiltrate the China – ASEAN marketplace.

There is risk that a change in law or policy (refer to "Changes in Laws" above) could result in a loss of some or all of the licenses the Company has acquired which would have a material adverse effect on the Company's business, financial condition and results of operations.

There is no assurance that future competitors will not succeed in obtaining the necessary licenses or developing products that are more effective or economic than the products developed by the Company, or which would render the Company's products obsolete and/or otherwise uncompetitive.

A large number of market participants could complicate customers' discrimination between competitors, increasing the difficulty of achieving market share and revenue. The Company may be unable to compete successfully against future competitors where aggressive policies are employed to capture market share. Such competition could result in price reductions, reduced gross margins and loss of market share, any of which could materially adversely affect the Company's future business, operating results and financial position. There may be competitors that have greater name recognition, access to larger customer bases and substantially greater resources, including sales and marketing, financial and other resources, which could enable such competitors to absorb costs associated with providing their products and services at lower prices, devote more resources to new customer acquisitions, respond to evolving market needs more quickly than the Company and/or finance more development activities to develop better products and services, any or all of which could have a material adverse effect on the Company's business and revenues.

Consumer Acceptance

The Company expects that a substantial portion of its future revenue will be derived from use of its e-commerce portal. Broad market acceptance of the e-commerce portal is, therefore, critical to the Company's future success and its ability to continue to generate revenues and to increase revenues. Failure to achieve broad market acceptance of the e-commerce portal could significantly harm the Company's business. The Company's future financial performance could depend on the successful market acceptance of its e-commerce portal and on the development, introduction and market acceptance of any future enhancements. There can be no assurance that the Company will be successful in marketing its current product offerings or any new product offerings, applications or enhancements, and any failure to do so could significantly harm its business.

Merchant Acceptance

The Company expects to generate a significant portion of its revenues through the sale of memberships on its e-commerce platform and the sale of additional solutions to its merchants. Such membership plans are for fixed periods of time, and the merchants have no obligation to renew their memberships after their subscription term expires. As a result, even though the Company believes there is significant interest among merchants to use the Company's e-commerce platform, there can be no assurance that a significant number of merchants will subscribe to the e-commerce platform, or that once subscribed, that the Company will be able to retain these merchants. Many such merchants may be small and thus more susceptible than larger businesses to general economic conditions and other risks affecting their businesses. In addition, many such small merchants may be in the entrepreneurial stage of their own development and thus there is no guarantee that their businesses will succeed.

The Company's costs associated with subscription renewals are expected to be substantially lower than costs associated with generating revenue from new merchants or costs associated with generating sales of additional solutions to existing merchants. Therefore, if the Company is unable to retain merchants, even if such losses are offset by an increase in new merchants or an increase in other revenues, the Company's operating results could be adversely impacted.

The Company may also fail to attract new merchants, retain existing merchants or increase sales to both new and existing merchants as a result of a number of other factors, including:

- (a) reductions in its current or potential merchants' spending levels;
- (b) increasing competition through the introduction of e-commerce platforms, discount pricing and other strategies that may be implemented by competitors;
- (c) a decline in the Company's merchants' level of satisfaction with the e-commerce platform and merchants' usage of the platform; and
- (d) changes in relationships with third parties, including the Company's partners, referral sources and payment processors.

Pricing

The Company has limited experience determining the optimal prices for its agency consulting services, as well as for membership fees for its e-commerce platform. The Company expects to change its pricing model from time to time in the future. Given its limited experience with selling its services, products and new solutions, it may not be offering its services/products or new solutions at an optimal price, which may result in a loss of profitability. As competitors introduce new businesses and products that compete with the Company's businesses and products, the Company may be unable to attract new customers or merchants at the same prices or based on the same pricing models as it has historically charged, which could have a negative impact on its overall revenue. Moreover, if small merchants comprise the majority of merchants using the e-commerce platform, they may be quite sensitive to price increases or prices offered by competitors. As a result, in the future the Company may be required to reduce its prices, which could adversely affect its revenue, gross profit, profitability, financial position and cash flows.

Advertising and Sales

The Company's future growth and profitability will depend on the effectiveness and efficiency of advertising and promotional expenditures, including its ability to (i) create greater awareness of its products and services; (ii) determine the appropriate creative message and media mix for future advertising expenditures; and (iii) effectively manage advertising and promotional costs in order to maintain acceptable operating margins. There can be no assurance that advertising and promotional expenditures will result in revenues in the future or will generate awareness of the Company's technologies or services. In addition, no assurance can be given that the Company will be able to manage its advertising and promotional expenditures on a cost-effective basis.

Obsolescence

The e-commerce industry is characterized by rapid changes in technology and customer demands. As a result, the Company's e-commerce products, including the VCB Business Platform and its agency-related internet marketing products, may quickly become obsolete and unmarketable. The Company's future success will depend on its ability to adapt to technological advances, anticipate customer demands, develop new products and enhance its current offered products on a timely and cost-effective basis. Further, its products must remain competitive with those of other companies with substantially greater resources. The Company may experience technical or other difficulties that could delay or prevent the development, introduction or marketing of new products or enhanced versions of existing products.

Technical Operations Infrastructure

It is anticipated that the Company's online e-commerce platform will serve a large number of clients and customers. The infrastructure required to maintain such platform may not provide satisfactory service in the future if it is not adequately updated, particularly if the number of customers navigating the platform increases. The Company may be required to upgrade its technology infrastructure to keep up with the increasing traffic, such as increasing the capacity of its hardware servers and the sophistication of its software. The Company is already in the process of porting over its VCB Business Platform currently based on the Mongo database to HBase (refer to "*Business of the Company – Products, Technologies and Services – (ii) VCB (Virtual Cross Border) Business Platform & MSR Business Center*"). If the crossover to HBase fails, the Company will revert to its original system. However, if the Company ultimately fails to adapt its technology infrastructure to accommodate greater traffic or customer requirements, users and customers may become dissatisfied with the online services provided and switch to those offered by competitors, which will negatively affect the Company's profitability.

Internet Infrastructure

The success of the Company's online platform will depend largely on the development and maintenance of the Internet infrastructure. This includes maintenance of a reliable network backbone with the necessary speed, data capacity, and security, as well as timely development of complementary products, for providing reliable Internet access and services.

The Internet has experienced, and is likely to continue to experience, significant growth in the numbers of users and amount of traffic, and its infrastructure may be unable to support growing demand. As such, the speed and performance of the Internet may be negatively affected by issues including increasing numbers of users, increasing bandwidth requirements, and viruses, malware or spam. In its history, the Internet has experienced a variety of outages and other delays as a result of damage to portions of its infrastructure, and it could face outages and delays in the future. These outages and delays could reduce the level of Internet usage generally as well as the level of usage of the Company's services and reduce the Company's revenues.

Staffing and Reliance on Key Management

The responsibility of successfully implementing the Company's business strategy depends substantially on its senior management and its key personnel, in particular, Kong Yuk Kan, the Company's CEO. The Company does not currently have any "key-man" insurance policy on Mr. Kong or on any other key employee of the Company, therefore there is a risk that the death or departure of Mr. Kong or any one or more other key employee could have a material adverse effect on the Company.

Further, the Company currently needs to acquire sales and technical staff to execute its business strategy. If the Company does not secure the appropriate funding to acquire the staff it needs, or if it is unable to attract and retain sufficiently qualified staff, its ability to successfully develop and sell its products and services could be significantly compromised.

There is also a risk to the business where there is a turnover of development staff that have knowledge of the Company's technology and business. This loss of knowledge could result in leakage or misappropriation of confidential information. While the Company aims to mitigate this risk by imposing contractual restraints on use and ownership of the Company's confidential information, there could also be increased costs for the Company in having to replace the implicit knowledge and skills of departing employees.

Disclosure Controls and Procedures

The Chief Executive Officer ("CEO") and Chief Financial Officer ("CFO") are responsible for designing internal controls over financial reporting in order to provide reasonable assurance regarding the reliability of financial reporting and the preparation of the Company's financial statements for external purposes in accordance with IFRS. The design of the Company's internal control over financial reporting was assessed as of the date of this Management Discussion and Analysis.

Based on this assessment, it was determined that certain weaknesses existed in internal controls over financial reporting. As indicative of many small companies, the lack of segregation of duties and effective risk assessment were identified as areas where weaknesses existed. The existence of these weaknesses is to be compensated for by senior management monitoring, which exists. The officers will continue to monitor very closely all financial activities of the Company and increase the level of supervision in key areas. It is important to note that this issue would also require the Company to hire additional staff in order to provide greater segregation of duties. Since the increased costs of such hiring could threaten the Company's financial viability, management has chosen to disclose the potential risk in its filings and proceed with increased staffing only when the budgets and work load will enable the action. The Company has attempted to mitigate these weaknesses, through a combination of extensive and detailed review by the CFO of the financial reports, the integrity and reputation of senior accounting personnel, and candid discussion of those risks with the audit committee.

The Company believes that any disclosure controls and procedures or internal control over financial reporting, no matter how well conceived and operated, can provide only reasonable, not absolute, assurance that the objectives of the control system are met. Further, the design of a control system must reflect the fact that there are resource constraints, and the benefits of controls must be considered relative to their costs. Because of the inherent limitations in all control systems, they cannot provide absolute assurance that all control issues and instances of fraud, if any, within the Company have been prevented or detected. These inherent limitations include the realities that judgments in decision making can be faulty, and that breakdowns can occur because of simple error or mistake. Additionally, controls can be circumvented by the individual acts of some persons, by collusion of two or more people, or by unauthorized override of the control. The design of any control system also is based in part upon certain assumptions about the likelihood of future events, and there can be no assurance that any design will succeed in achieving its stated goals under all potential future conditions. Accordingly, because of the inherent limitations in a cost effective control system, misstatements due to error or fraud may occur and not be detected.

Corporate Governance

The Company's Board of Directors follows recommended corporate governance guidelines for public companies to ensure transparency and accountability to shareholders. The Audit Committee of the Company fulfills its role of ensuring the integrity of the reported information through its review of the interim and audited annual financial statements prior to their submission to the Board of Directors for approval.

The Audit Committee, comprised of three directors, all of whom are independent, meets with management of the Company on a quarterly basis to review the financial statements, including the MD&A, and to discuss other financial, operating and internal control matters as required.
