

Nextleaf Completes First Shipment of Glacial Gold(TM) to the BC Liquor Distribution Branch

Glacial Gold(TM) Vape Cartridges and Bottled Oils Available in B.C.

Vancouver, British Columbia--(Newsfile Corp. - September 9, 2021) - Nextleaf Solutions Ltd. (CSE: OILS) (OTCQB: OILFF) ("Nextleaf", "OILS", or the "Company"), a federally regulated producer of cannabis oil that owns one of the largest portfolios of U.S. patents for the extraction and distillation of cannabinoids, is pleased to announce that the Company's wholly owned subsidiary has completed its first shipment of *Glacial Gold*TM CBD and THC products to the British Columbia Liquor and Distribution Branch, the sole wholesale distributor of non-medical cannabis in British Columbia. The debut product assortment under Nextleaf's award-winning prohibition-era consumer brand, *Glacial Gold*TM, is now available at B.C. Cannabis Stores and private cannabis retailers across British Columbia.

"We're excited to launch in our B.C. backyard first, with a portfolio of large format vape and oil products, all broadly appealing and validated formulations, at accessible price points. We put the emphasis where it counts. Product quality and consumption experience matter most, not excessive packaging, or elaborate promotions," said Emma Andrews, Director of Marketing at Nextleaf. "We're confident that value is a driving factor behind the majority of product decisions, particularly in the vape and bottled oil categories".

The initial vape lineup from *Glacial Gold*[™] is offered in two potency levels to match a consumer's tolerance level or consumption occasion. The *Session THC Vape* features a full potency THC profile for cannabis enthusiasts who seek a more elevated experience and connection. The *Anytime 1:1 Vape* is formulated with a balanced THC and CBD profile for consumers looking for a more moderate, go-to vape.

Both vapes will be initially available in flavour profiles inspired by natural aromas found throughout B.C. and terpenes found in cannabis. "We've intentionally formulated our custom blends without the use of excessive botanical terpenes allowing you to deeply enjoy every draw without being overpowering," said Andrews. "We've validated the desirability through extensive sensory studies with human participants under our Research Licence, which allowed us to develop an extended assortment of compelling flavour profiles to offer variety and adaptability to early customer and retailer feedback."

Flavours include Glacial Fresh Mint with refreshing alpine aromas found in the B.C. backcountry, and Berry Lemonade, reminiscent of fresh-picked berries from the Okanagan.

Glacial Gold[™] Distilled CBD 50 Oil, Distilled THC 30 Oil, and Distilled 30/30 Blend feature high-purity distillate in a base of organic MCT (medium chain triglycerides) oil for a premium consumption experience, without premium pricing. A clean tasting, and neutral oil allowing for the greatest flexibility in use and consumption occasions.

"By leveraging our patented high-efficiency ingredient processing technology, the *Glacial Gold*[™] brand is being positioned as a price-point and value leader in distillate focused product categories. Ensuring we honoured our roots in B.C. has been a personal mission as we expand into consumer products," said Paul Pedersen, Chief Executive Officer at Nextleaf.

Glacial Gold[™] distillate is produced through the Company's patented, automated closed-loop, chilled-alcohol extraction plant at Nextleaf Labs Ltd., a Health Canada licensed processing facility. Nextleaf's proprietary technology efficiently transforms cannabis and hemp grown in BC and throughout Canada into high-purity cannabinoid-rich distillate at an industrial scale.
