**BLACK TUSK COMMENCES BEDROCK TRENCHING PROGRAM ON THE
GOLDSMITH PROPERTY**

September 19, 2018, Vancouver, BC – Black Tusk Resources Inc. (“Black Tusk” or the “Company”) (C:TUSK) is pleased to announce the commencement of its fall trenching program on the Goldsmith Property. The work program has been fully permitted and bonded as required by the BC Ministry of Energy, Mines and Petroleum Resources.

The trenching program has been designed to follow-up on historic work completed on the property, where mineralized zones returned significantly elevated gold values from bedrock sampling. The company plans to obtain large volume samples from several sites. Sites of interest include those where gold assays of bedrock have returned values greater than 20 grams per tonne from recent sampling (see News Release dated May 16, 2018), and where historic work has reported higher gold values from previous bedrock trenching and sampling.

“There have been some extremely high gold values obtained from bedrock sampling on the Goldsmith Property, and Black Tusk intends to further evaluate the continuation and extent of this mineralization” states CEO Richard Penn.

The company is now in consultation with various laboratories to establish the best way to process these samples. The larger volume samples will be amenable to “bench test” analysis, and the company desires to utilize the most advanced technologies available for this test. A process including a centrifugal gravity concentrate to collect the free “nugget” gold for further assay is being considered.

About Black Tusk Resources Inc.

Black Tusk is engaged in the acquisition and exploration of its mineral property located in British Columbia, Canada. Pursuant to the Goldsmith option agreement, the company currently has an option to acquire a 100-per-cent undivided interest in the Goldsmith property situated in the Kootenays, approximately 65 kilometres north of the city of Kaslo, BC.

Perry Grunenberg, P.Geo, a "Qualified Person" as that term is defined under NI 43-101, has reviewed and approved the technical information contained in this news release. Mr. Grunenberg is also a director of the company.
