

3D IP Survey Underway on Black Tusk's Mckenzie East Gold Project, Quebec

VANCOUVER, BC / ACCESSWIRE / August 10, 2020 / Black Tusk Resources Inc. ("Black Tusk" or the "Company") (CSE:TUSK)(OTC PINK:BTKRF)(Frankfurt:0NB) is pleased to announce that the 3D Induced Polarization Survey (IP) is underway on the McKenzie East gold property located north of Val d'Or. The company contracted Abitibi Geophysics in Val d'Or Quebec to undertake their advanced technology OreVision® IP survey over the main target zone on the property. The survey is designed to use the most advanced geophysical applications to produce high resolution results through the thick overburden that is expected to be encountered on the property.

The IP survey will be located within the northwest area of the McKenzie East property in order to trace possible gold-bearing structures as discovered on the McKenzie Break property located 2 kilometres west of the Black Tusk claims. A series of 1.5 kilometre long lines will be tested by the IP survey, for a total of 9 kilometres. The results of the IP survey will be combined with the results of MMI soil sample results and magnetometer surveying completed earlier this year in order to locate the best targets for diamond drilling.

The company has acquired a permit that allows for the construction of 18 drill pads with supporting water supply stations and access trails. Black Tusk plans to conduct this upcoming drill program at the McKenzie East Gold Project in the 2020 Summer exploration season, following the completion of ground surveys.

Perry Grunenberg, P.Geo, a "Qualified Person" as that term is defined under NI 43-101, has reviewed and approved the technical information contained in this news release. Mr. Grunenberg is also a Director of the Company.

About Black Tusk Resources Inc.

Black Tusk Resources is a gold-focused Canadian exploration company with operations primarily based in the world-class Abitibi greenstone belt region of Quebec. Black Tusk currently holds 100-per-cent ownership in six separate gold and platinum/palladium properties in Canada.

Cautionary Statement

This press release contains forward-looking statements based on assumptions as of that date. These statements reflect management's current estimates, beliefs, intentions and expectations; they are not guarantees of future performance. The Company cautions that all forward-looking statements are inherently uncertain and that actual performance may be affected by a number of

material factors, many of which are beyond the Company's control. Such factors include, among other things: risks and uncertainties relating to exploration and development; the ability of the Company to obtain additional financing; the Company's limited operating history; the need to comply with environmental and governmental regulations; fluctuations in the prices of commodities; operating hazards and risks; competition and other risks and uncertainties, including those described in the Company's Prospectus dated September 8, 2017 available on www.sedar.com. Accordingly, actual and future events, conditions, and results may differ materially from the estimates, beliefs, intentions, and expectations expressed or implied in the forward-looking information. Except as required under applicable securities legislation, the Company undertakes no obligation to publicly update or revise forward-looking information.
