

DCS Launches MiFleet + Vision with UScellular

San Diego, California--(Newsfile Corp. - April 8, 2021) - DCS (OTCQX: DCSX) (CSE: DCSI) announced today that its MiFleet + Vision has been approved for use on UScellular's 4G-LTE network. The launch of MiFleet + Vision will allow small, medium and enterprise businesses to efficiently operate and protect their vehicles and drivers by providing real-time video within the MiFleet platform. Combining robust fleet management and real-time video allows fleet managers to take advantage of multiple points of vehicle and driver behavior. MiFleet + Vision allows fleet managers to coach and train drivers based on key performance indicators ("KPIs"), in addition to providing video intelligence in the event of an accident or potential litigation from an incident.

"When you look at the fleet management industry, bringing multiple data points together in one platform is where fleet managers really start to realize the benefits of using technology to manage their fleets," said Mike Lawless, EVP of DCS. "MiFleet + Vision does just that - it provides all the tools to efficiently manage fleets at a cost-effective price point - by combining video with telematics data."

"MiFleet + Vision is a great addition to our portfolio of fleet management solutions we can offer our business customers," said Kimberly Green-Kerr, senior vice president of enterprise sales and operations at UScellular. "With our high-quality network and personalized service, we can ensure that fleet operators of all sizes have access to the innovative technology they need to make their business more efficient and successful."

DCS and the DCS logo are among the trademarks of DCS in the United States. Any other trademarks or trade names mentioned are the property of their respective owners.

Forward-Looking Statements

This release contains forward-looking statements, which reflect management's current views of future events and operations. These statements are based on current expectations and assumptions that are subject to risks and uncertainties that could cause actual results to differ materially. We believe that these potential risks and uncertainties include, without limitation: the Company's dependence on third-party manufacturers, suppliers, technologies and infrastructure; risks related to intellectual property; industry risks including competition, online security, government regulation and global economic conditions; and the Company's financial position and need for additional funding. Statements in this release should be evaluated in light of these factors. These risk factors and other important factors that could affect our business and financial results are discussed in our Management's Discussion and Analysis, periodic reports and other public filings with the Canadian securities regulatory authorities which are available on SEDAR at www.sedar.com. DCS undertakes no duty to update or revise any forward-looking statements.
