

Sixty North Gold Announces Extension of Warrants

Vancouver, British Columbia--(Newsfile Corp. - December 8, 2021) - Sixty North Gold Mining Ltd. (CSE: SXTY) (FSE: 2F4) (OTC Pink: SXNTF) (the "**Company**" or "**Sixty North Gold**"):

The board of directors of Sixty North Gold has approved an extension to August 30, 2024 of the expiry date of certain warrants to purchase up to 6,360,000 common shares of the Company exercisable at a price of \$0.10 per share, and previously extended to expire on December 31, 2021. The warrants were issued to investors in connection with a private placement completed by the Company on August 30, 2019. The extension will become effective as of December 21, 2021. The warrants continue to be subject to accelerated or forced conversion provisions.

About the Company

The Company is focused on bringing its Mon Mine back into production. The Mon Mine produced 15,000 ounces of gold from 15,000 tonnes of ore between 1989 and 1997, operating on a seasonal basis to a depth of 15 m below surface, with gold prices generally averaging between US\$350 and US\$400 per ounce. Permits to mine and mill at 100 tpd are in place, making the Mon Mine the only gold project permitted for production in the NWT. The Company is currently working to develop the second level below the historic stopes to commence mining. Management believes the similarity to the Discovery Mine, located to the north of the Mon Property where 1 million ounces were mined from 1 million tons of ore, indicates the potential for the Mon Mine.

Other targets on the property include recently discovered silver- and gold-rich volcanogenic massive sulphide (VMS) targets (NR October 17, 2019), as well as shear zone-hosted gold mineralization. The shear zones are similar in nature to, and hosted in the same rocks as, the world-class deposits at the Con and Giant Mines in Yellowknife which produced 14 million oz. gold.

The Company also has an option agreement to acquire a 100% interest in the highly prospective and contiguous 2,394 hectare Hangstone Property adjoining the Mon Property to the East and South from an independent prospector. The Mon Property shear zone and VMS targets can be projected onto the Hangstone Property.
