MKM ENGINEERING
Oil and Gas Consulting Services
3905 Sagamore Hill Court
Plano, Texas 75025

September 10, 2023

Mr. Mehran Ehsan
Permex Petroleum Corporation
100 Crescent Court, Suite 700
Dallas, Texas 75201

Dear Mr. Ehsan:

As requested, an estimate has been made of certain hydrocarbon reserves owned by Permex Petroleum Corporation (hereinafter referred to as "Permex"). The appraised properties are located in Eddy and Lea Counties, New Mexico, Williams County, North Dakota, and Atascosa, De Witt, Howard, La Salle, Martin, Midland, Nacogdoches, Reeves, Shelby, Stonewall, and Upton Counties, Texas. This appraisal evaluates Permex's Proved Developed Producing (PDP), Proved Shut In (PSI), Proved Non-Producing (PDNP), Proved Undeveloped (PUD), Probable Shut In (PrSI), Probable Non-Producing (PrNP), and Probable Undeveloped (PrUD) reserves. The effective date of this report is September 30, 2022.

The table below summarizes Permex's net oil and gas reserves and cash flows generated using the requested price deck. Results shown below are presented for your information and should not be construed as our estimate of fair market value. As of September 30, 2022, Permex's net total proved and probable reserves have been estimated to be as follows:

Reserve Category	Net Reserves as of Sept. 30, 2022			Present Worth	Present Worth
	Light and Medium Oil (Bbl)	Natural Gas (Mcf)	Future Net Income, \$	of FNI Discounted @ 10%/Annum, \$	of FNI Discounted @ 15%/Annum, \$
<u>Forecast Price</u>					
-					
Proved Developed Producing	417,020	254,160	19,838,620	9,350,540	7,048,420
Proved Shut-In	18,120	13,560	268,980	176,580	122,540
Proved Non-Producing	686,690	558,350	46,329,780	28,647,790	24,076,180
Proved Undeveloped	<u>5,079,310</u>	<u>2,130,410</u>	<u>296,974,550</u>	<u>118,189,390</u>	<u>85,694,440</u>
Total Proved	6,201,140	2,956,480	363,411,930	156,364,300	116,941,580
Probable Producing	1,730	9,650	92,790	40,490	30,700
Probable Shut-In	88,300	6,250	6,529,220	2,356,680	1,654,590
Probable Non-Producing	29,380	0	2,083,140	514,550	313,350
Probable Undeveloped	<u>7,334,860</u>	<u>10,307,110</u>	<u>459,561,820</u>	<u>174,046,920</u>	<u>123,554,990</u>
Total Probable	7,454,270	10,323,010	468,266,970	176,958,640	125,553,630
Total Proved + Probable	13,655,410	13,279,490	831,678,900	333,322,940	242,495,210

Totals shown above may not add to the summary cash flow tables due to rounding.

FNI is after deducting estimated operating and future development costs, severance and ad valorem taxes, but before Federal income taxes. Total net Proved and Probable Reserves are defined as those natural gas and hydrocarbon liquid Reserves to Permex's interests after deducting all shrinkage, royalties, overriding royalties, and reversionary interests owned by outside parties that become effective upon payout of specified monetary balances. All Reserves estimates have been prepared using standard engineering practices generally accepted by the petroleum industry and conform to those classifications defined in the Canadian Oil and Gas Evaluation Handbook ("COGEH"). All hydrocarbon liquid Reserves are expressed in United States barrels ("Bbl") of 42 gallons. Natural gas Reserves are expressed in thousand standard cubic feet ("Mcf") at the contractual pressure and temperature bases. All monies are expressed in United States dollars ("USD").

RESERVE ESTIMATE METHODOLOGY

The Reserves estimates contained in this report have been prepared using standard engineering practices generally accepted by the petroleum industry. Decline curve analysis was used to estimate the remaining Reserves of pressure depletion reservoirs with enough historical production data to establish decline trends. Reservoirs under non-pressure depletion drive mechanisms and non-producing Reserves were estimated by volumetric analysis, research of analogous reservoirs, or a combination of both. The maximum remaining Reserves life assigned to wells included in this report is 40 years. This report does not include any gas sales imbalances.

FUTURE PRODUCTION RATES

Initial production rates are based on current producing rates for those wells now on production. If a decline trend has been established, this trend was used as the basis for estimating future production rates. For reserves not yet on production, test data and other related information were used to estimate anticipated initial production rates and sales were estimated to commence at a date deemed reasonable based on our experience and judgment.

RESERVE CLASSIFICATION

The Reserves estimates included in this report conform to the guidelines specified by the COGEH. For more information regarding reserve classification definitions see Appendix I.

COMMODITY PRICES

Future hydrocarbon revenues were estimated using the prices outlined below:

<u>Dates</u>	<u>FORECAST PRICES</u>	
	<u>Light and Medium Oil Price \$/Bbl</u>	<u>Gas Price \$/MMBtu</u>
2022	80.00	6.75
2023	80.00	5.50
2024	76.50	4.39
2025	72.83	4.37
2026	74.28	4.46
2027	75.77	4.55
2028	77.29	4.64
2029	78.83	4.73
2030	80.41	4.82
2031	82.02	4.92
2032	83.66	5.02
Thereafter	2%/yr increase	2%/yr increase

Historical hydrocarbon liquid prices were indexed to the monthly average of the daily closing prices received at the Cushing, Oklahoma delivery point. The average difference between the wellhead oil price and the NYMEX price represents adjustments for crude quality, marketing fees, BS&W, transportation costs and purchaser bonuses. These adjustments were applied to the NYMEX prices listed in table above.

Historical natural gas prices were indexed to the monthly Henry Hub prices posted in the Inside FERC publication. Historical prices were indexed for each month of available accounting data. The average difference between the wellhead price and the NYMEX price represents adjustments for BTU content, marketing, and transportation costs. These adjustments were applied to the NYMEX prices listed in table above.

OPERATING EXPENSES & CAPITAL COSTS

In most cases, the lease operating costs used in this evaluation represent the average of recent historical monthly operating costs. In cases where historical costs were not available or deemed to be unreliable, operating costs were estimated based on knowledge of analogous wells producing under similar conditions. The lease operating expenses in this report represent field level operating costs and do not include COPAS charges.

Where available, capital costs were estimated using recent historical information reported for analogous expenditures. Where recent historical information was not available, Authority for Expenditure ("AFE") documents was used to estimate capital costs. Abandonment and reclamation costs were included for the properties and are shown in the investment column.

Operating expenses and capital costs were escalated at 2% per year in the forecast price case in this evaluation.

DISCLAIMERS

A Representation Letter from Permex, confirming that to the best of their knowledge all the information they provided for our use in the preparation of this report was complete and accurate as of the effective date of the report, is attached in Appendix II. It was not considered necessary to make a field examination of the appraised properties. Data used in performing this appraisal were obtained from Permex, public sources, and our own files. Supporting work papers pertinent to the appraisal are retained in our files and are available to you or designated parties at your convenience.

It was beyond the scope of this MKM Engineering report to evaluate the potential environmental liability costs from the operation and abandonment of these properties. In addition, no evaluation was made to determine the degree of operator compliance with current environmental rules, regulations, and reporting requirements. Therefore, no estimate of the potential economic liability, if any, from environmental concerns is included in the forecasts presented herein.

The Proved and Probable Reserves presented in this report are estimates only and should not be construed as being exact quantities. They may or may not be actually recovered; and, if recovered, the revenues therefrom and the actual costs related thereto could be more or less than the estimated amounts. Because of governmental policies and uncertainties of supply and demand, the product prices and the costs incurred in recovering these Reserves may vary from the price and cost assumptions in this report. In any case, quantities of Proved and Probable Reserves may increase or decrease as a result of future operations.

Reserves estimates for individual properties included in this report are only valid when considered within the context of the overall report and should not be considered independently. The future net income and net present value estimates contained in this report do not represent an estimate of fair market values.

MKM Engineering is independent with respect to Permex Petroleum Corporation as provided in the Standards Pertaining to the Estimating and Auditing of Oil and Gas Reserves Information promulgated by the Society of Petroleum Engineers.

CONCLUSIONS

Attached are summary tables of economic analysis of predicted future performance. Other tables identify the properties appraised with summary Reserves and the economic factors applicable to each. A list of tables is included. Reserves identified for this report are not risked.

We appreciate this opportunity to have been of service and hope that this report will fulfill your requirements.

Respectfully submitted,

MKM ENGINEERING
F-009733

Michele K. Mudrone, P.E.

CERTIFICATE OF QUALIFICATION

I, Michele K. Mudrone, registered Professional Engineer in the State of Texas, hereby certify:

1. That I am a registered Professional Engineer in the State of Texas, a member of the Society of Petroleum Engineers, and I reside at 3905 Sagamore Hill Court, Plano, Texas.
2. That I graduated from the Colorado School of Mines with a Bachelor of Science degree in Petroleum Engineering in 1976.
3. That I have been employed in the petroleum industry since graduation in 1976. During the time of employment I have been directly involved in reservoir engineering, petrophysical analysis, reservoir simulation, and property evaluation.
4. That I am presently employed by MKM Engineering which prepared an evaluation effective September 30, 2022, for Permex Petroleum Corporation.
5. That the parameters and conditions employed in the evaluation of interests of Permex Petroleum Corporation, effective September 30, 2022, were examined by me and adopted as representative and appropriate in establishing true value of these properties.
6. That I have not received, nor do I expect to receive, any direct or indirect interest in the holdings discussed, or in the securities of the Company.
7. That I have not examined the chain of title for the properties discussed, but have relied on descriptions furnished by the client.
8. That the aforementioned report was not based on a personal field examination of the properties in question; however, such an examination was not deemed necessary in view of the information available from public sources and the files of Permex Petroleum Corporation.

Michele K. Mudrone, P.E.

REPORT ON RESERVES DATA BY INDEPENDENT QUALIFIED RESERVES EVALUATOR
OR AUDITOR

To the Board of Directors of Permex Petroleum Corporation hereinafter referred to as (the "Company"):

1. We have evaluated the Company's Reserves Data as at September 30, 2022. The reserves data are estimates of proved reserves and probable reserves and related future net revenue as at September 30, 2022, estimated using forecast prices and costs.
2. The Reserves Data are the responsibility of the Company's management. Our responsibility is to express an opinion on the Reserves Data based on our evaluation.

We carried out our evaluation in accordance with standards set out in the Canadian Oil and Gas Evaluation Handbook (the "COGE Handbook"), prepared jointly by the Society of Petroleum Evaluation Engineers (Calgary Chapter) and the Canadian Institute of Mining, Metallurgy & Petroleum (Petroleum Society).

3. Those standards require that we plan and perform an evaluation to obtain reasonable assurance as to whether the reserves data are free of material misstatement. An evaluation also includes assessing whether the reserves data are in accordance with principles and definitions presented in the COGE Handbook.
4. The following table sets forth the estimated net present value of future net revenue attributed to proved plus probable reserves, estimated using forecast prices and costs on a before tax basis and calculated using a discount rate of 10 percent, included in the reserves data of the Company evaluated by us as of September 30, 2022, and identifies the respective portions thereof that we have audited, evaluated, or reviewed and reported on to the Company's management and Board of Directors:

Independent Qualified Reserves Evaluator or Auditor	Description and Preparation Date of Evaluation Report	Location of Reserves (Country)	Net Present Value of Future Net Revenue Before Income Taxes (10% Discount Rate)			
			Audited (US\$)	Evaluated (US\$)	Reviewed (US\$)	Total (US\$)
MKM Engineering	Appraisal of the Permex Petroleum properties located in New Mexico, North Dakota, and Texas, as of September 30, 2022	USA		333,322,940		333,322,940
Total				333,322,940		333,322,940

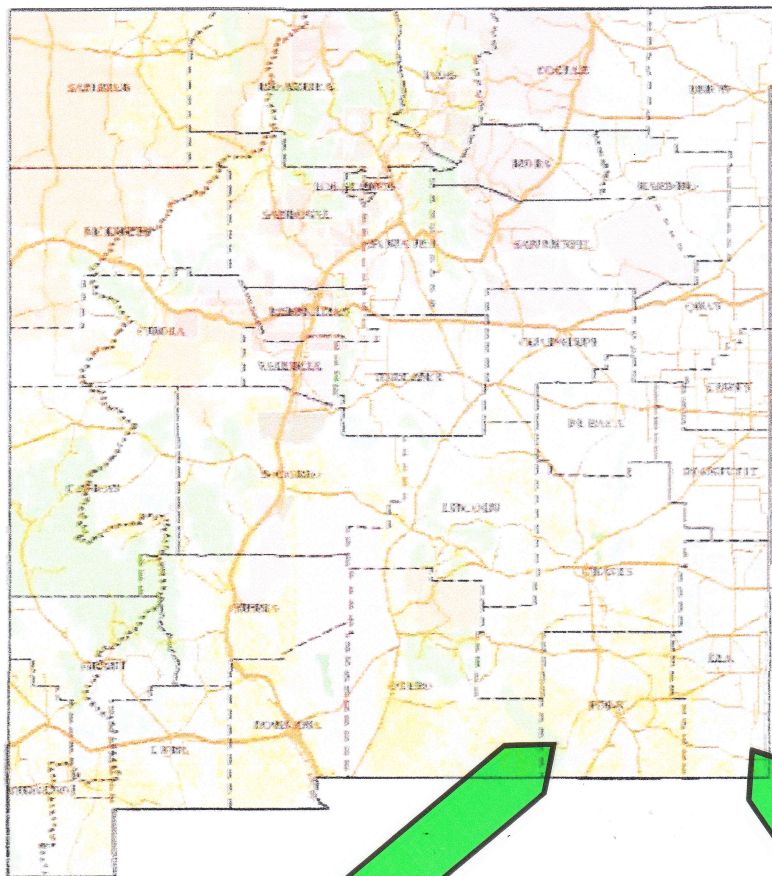

5. In our opinion, the reserves data evaluated by us have, in all material respects, been determined and are presented in accordance with the COGE Handbook, consistently applied.
6. We have no responsibility to update the report referred to in paragraph 4 for events and circumstances occurring after its preparation date.
7. Because the reserves data are based on judgments regarding future events, actual results will vary and the variations may be material.

Executed as to our report referred to above:

GEOLOGICAL DISCUSSION

OXY YATES

The Oxy Yates properties are located in Eddy County, New Mexico in the Delaware basin. Eddy County is in Southeast New Mexico. It is bounded by Chaves County to the north, Otero County to the east, Loving County, Texas to the south, and Lea County to the west. Eddy County covers 4,198 square miles.

The Oxy Yates properties cover 680 acres HBP. Current production is from the Yates sand of Permian age and is 50 to 60 feet thick. It is located at an average depth of 1,200 feet. The Yates formation overlies the Seven River formation and underlies the Tansill formation.

The Oxy Yates Fed wells were drilled in the late 1990s and early 2000s. Currently, there is one producing well and nine shut-in wells.

Permex plans to optimize production from the lease through acid treatments, clean-out of the wellbores and downhole pump replacements. Also, Permex will be evaluating the results of 10 acre downspacing in the Yates formation on the lands one mile to the east in order to start a drill program on the field within the Yates sands.

GEOLOGICAL DISCUSSION

WEST HENSHAW UNIT

The West Henshaw Unit is located in Eddy County, New Mexico in the Delaware basin. Eddy County is in Southeast New Mexico. It is bounded by Chaves County to the north, Otero County to the east, Loving County, Texas to the south, and Lea County to the west. Eddy County covers 4,198 square miles. The Unit is 12 miles northeast of Loco Hills, New Mexico.

The West Henshaw Unit covers 1,880 acres HBP. Current production is from the Premier or basal Grayburg sand of Permian age. It is located at an average depth of 2,850 feet. The producing reservoir is a stratigraphic trap. The initial spacing was 40 acres.

The West Henshaw Premier Unit was formed in January 1, 1966, with Mobil Oil Corporation as the operator. At unitization primary production was 1,735 MBO and included 41 producing oil wells. The waterflood began December 1, 1966 and lasted 14 years. Estimated waterflood production is 2,500 MBO. Currently, there is one producing well, nine shut-in wells, and four saltwater disposal wells.

The West Henshaw Unit is in the Delaware Basin where deeper potential in the Bone Springs and Wolfcamp zones are exploited. Several of the better target zones occur in the Northern Delaware Basin, e.g., Wolfcamp A-X, Y and Z sand intervals. The Bone Springs are also best developed in the Northern Delaware Basin.

Permex plans to restore production to the shut-in wells and improve production from the current producing wells with acid treatment stimulations. Permex also plans to explore and develop the Bone Springs and lower Wolfcamp potential on the West Henshaw Unit by drilling ten wells on the acreage in addition to the plans to drill additional Premier sand wells. Permex plans to downspace the West Henshaw to 10 acres for the Premier sand.

GEOLOGICAL DISCUSSION

BREEDLOVE FIELD

The Breedlove Field is located in northwest Martin County, Texas. Martin County is bounded on the north by Dawson County, on the east by Howard County, on the south by Glasscock and Midland Counties, and on the west by Andrews County. Martin County covers 916 square miles and is approximately 30 miles north of Midland. It is in the core of the Permian Basin.

The Permex acreage in the Breedlove Field includes 1,558 HBP acres in five properties and approximately 6,000 non-producing acres. The properties encompass over 12 contiguous sections and are productive in the Clearfork formation at a depth of approximately 7,200 feet. The productive Clearfork B intervals include the Upper, Middle, and Lower zones within the leases. The main trapping mechanism is stratigraphic.

The field was discovered in July 1951 by Pan American Production Company. The first well, on the acreage, was drilled in 1985 and cumulative production from the Clearfork B zone is over 1,200 MBO. There are currently sixteen producers, five shut-in wells and four saltwater disposal wells.

Permex plans to begin development of the acreage starting in the fourth quarter of 2022. There are 18 undeveloped locations on 40 acre spacing and 29 locations on 20 acre spacing in the Clearfork B interval. Operational projects to increase production by adding field compression and implementing a chemical program to control paraffin buildup are planned. Also, Permex plans to exploit the potential in the San Andres and Spraberry zones.

GEOLOGICAL DISCUSSION

MARY BULLARD LEASE

Stonewall County is in Northwest Texas, in the central part of the North Central Plains. It is bounded on the north by King County, on the east by Haskell County, on the south by Fisher and Jones Counties, and on the west by Kent County. The county seat is approximately 60 miles north-northwest of Abilene. Stonewall County covers 926 square miles.

The Bullard lease covers 241 acres HBP and is productive in the Clearfork formation at a depth of approximately 3,200 feet. The productive Clearfork horizons are the Upper and Lower Tannehill. The Tannehill sands, Upper and Lower, are channel deposits trending from east to west. Typical characteristics are high permeability and high porosity medium to coarse grained sands with minimal amounts of calcite cementation. They are water drive reservoirs with excellent waterflood potential.

The Bullard lease was drilled in 1980 and cumulative production from the Tannehill is 177 MBO and 28 MMCF. There is currently one producing well, four shut-in wells, and two water injection wells.

Permex plans to return the four shut-in wells to production and drill three new wells before initiating a waterflood project on the lease.

GEOLOGICAL DISCUSSION

PITTCOCK NORTH LEASE

Stonewall County is in Northwest Texas, in the central part of the North Central Plains. It is bounded on the north by King County, on the east by Haskell County, on the south by Fisher and Jones Counties, and on the west by Kent County. The county seat is approximately 60 miles north-northwest of Abilene. Stonewall County covers 926 square miles.

The Pittcock North lease covers 320 acres HBP and is productive in the Clearfork formation at a depth of approximately 2,900 feet. The productive Clearfork horizons are the Upper and Lower Tannehill.

The Pittcock North lease was drilled in 1982 and cumulative production from the Tannehill is 239 MBO and 20 MMCF. There are currently ten shut-in wells, two saltwater disposal wells, and a water injection well.

Permex initiated a waterflood EOR as of February 2016, and shut down in October 2019. The waterflood was designed to move water across the lease west to east towards a shale pinch-out in the Northeast part of the lease. The plans are restart the waterflood and increase the daily water injection to a total of 1000 BW, return six shut-in wells to production, re-enter four shut-in wells, and drill eight new wells.

GEOLOGICAL DISCUSSION

PITTCOCK SOUTH LEASE

Stonewall County is in Northwest Texas, in the central part of the North Central Plains. It is bounded on the north by King County, on the east by Haskell County, on the south by Fisher and Jones Counties, and on the west by Kent County. The county seat is approximately 60 miles north-northwest of Abilene. Stonewall County covers 926 square miles.

The Pittcock South lease covers 498 acres in four tracts and is productive in the Clearfork formation at a depth of approximately 2,900 feet. The productive Clearfork horizons are the Upper and Lower Tannehill which consist of dolomites, anhydrites and silts.

The Pittcock South lease was drilled in 1996 and cumulative production from the Tannehill is 270 MBO. There are currently sixteen shut-in wells and two saltwater disposal wells.

Permex plans to return six shut-in wells to production, re-enter the remaining ten shut-in wells and drill twelve new wells. All wells will be completed in the Upper and Lower Tannehill. Also, Permex plans to initiate a waterflood on the acreage, as the reservoir is similar and contiguous to the Pittcock North lease.

GEOLOGICAL DISCUSSION

ROYALTY INTERESTS

The Royalty interests are located primarily in the Permian Basin of West Texas and Southeast New Mexico. The oil and gas wells are located in Lea County, New Mexico, Williams County, North Dakota, and Atascosa, De Witt, Howard, La Salle, Midland, Nacogdoches, Reeves, and Upton Counties, Texas.

The producing formations include the Bakken, Eagle Ford Shale, Spraberry, Wolfbone Shale, and Wolfcamp. There are currently 70 horizontal and vertical producing wells.

The properties are operated by major oil companies, i.e. Apache, Burlington Resources, Marathon, and Pioneer Natural Resources. There are four permitted locations on the acreage.

Appendix

1.3.8 DEFINITIONS OF RESERVES

The following Reserves definitions and guidelines are designed to assist evaluators in making Reserves estimates on a reasonably consistent basis and assist users of evaluation reports in understanding what such reports contain and, if necessary, in judging whether evaluators have followed generally accepted standards. The guidelines outline:

- general criteria for classifying Reserves,
- procedures and methods for estimating Reserves,
- confidence levels of individual entity and aggregate Reserves estimates,
- verification and testing of Reserves estimates.

The following definitions apply to both estimates of individual Reserves entities and the aggregate of Reserves for multiple entities.

1.3.8.1 RESERVES CATEGORIES

Reserves are categorized according to the probability that at least a specific volume will be produced. In a broad sense, Reserves categories reflect the following expectations regarding the associated estimates:

<u>Reserves Category</u>	<u>Confidence Characterization</u>
Proved (1P)	Low Estimate, Conservative
Proved + Probable (2P)	Best Estimate
Proved + Probable + Possible (3P)	High Estimate, Optimistic

1.3.8.1.1 PROVED RESERVES

Proved Reserves are those Reserves that can be estimated with a high degree of certainty to be recoverable. It is likely the actual remaining quantities recovered will exceed the estimated Proved Reserves.

1.3.8.1.2 PROBABLE RESERVES

Probable Reserves are those additional Reserves that are less certain to be recovered than Proved Reserves. It is equally likely that the actual remaining quantities recovered will be greater or less than the sum of the estimated Proved + Probable Reserves.

1.3.8.1.3 POSSIBLE RESERVES

Possible Reserves are those additional Reserves that are less certain to be recovered than Probable Reserves. It is unlikely the actual remaining quantities recovered will exceed the sum of the estimated Proved + Probable + Possible Reserves.

Stand-alone Possible Reserves may be assigned to a property for which no Proved or Probable Reserves volumes have been assigned but would be rare. Circumstances for doing so could include any one or more of the following:

- Project economics are such that no Proved or Probable Reserves can be assigned, but on a Proved + Probable + Possible Reserves basis, the project is economically viable, and a development decision has been made (e.g., adding compression, expanding facilities, offshore development of a structure delineated mainly with seismic with only limited well control).
- Only minor expenditure is required to develop the Possible Reserves and development is likely to proceed in the near future (e.g., behind-pipe zones in a well, which have Proved or Probable Reserves in another interval).
- Possible Reserves may be assigned to an accumulation that is being evaluated if Proved or Probable Reserves have been assigned to an adjacent part of the same accumulation that is not part of the evaluation for which a report is being prepared.

In all these situations, there should be an intention to develop the stand-alone Possible Reserves within a reasonable time. A report should contain an explanation of the reason for the assignment of stand-alone Possible Reserves.

1.3.8.2 DEVELOPMENT AND PRODUCTION STATUS

1.3.8.2.1 DEVELOPED RESERVES

Developed Reserves are those Reserves that are expected to be recovered from existing wells and installed facilities or, if facilities have not been installed, that would involve a low expenditure (e.g., when compared to the cost of drilling and completing a well) to put the Reserves on production. The developed category may be sub-divided into Producing and Non-Producing.

- **Developed Producing Reserves** are those Reserves that are expected to be recovered from completion intervals open at the time of the estimate. These Reserves may be currently producing or, if shut-in, they must have previously been on production, and the date of resumption of production must be known with reasonable certainty.

- **Developed Non-Producing Reserves** are those Reserves that either have not been on production or have previously been on production but are shut-in and the date of resumption of production is unknown.

1.3.8.2.2 UNDEVELOPED RESERVES

Undeveloped Reserves are those Reserves expected to be recovered from known accumulations where a significant expenditure (e.g., when compared to the cost of drilling and completing a well) is required to render them capable of production. They must fully meet the requirements of the Reserves category (Proved, Probable, Possible) to which they are assigned and expected to be developed within a limited time (see Section 1.4.7.2.1.8 – *Timing of Production and Development*).

In multi-well pools, it may be appropriate to allocate total pool Reserves between the Developed and Undeveloped Sub-classes or to sub-divide the Developed Reserves for the pool between Developed Producing and Developed Non-Producing. This allocation should be based on the estimator’s assessment as to the Reserves that will be recovered from specific wells, facilities, and completion intervals in the pool and their respective development and production status.

1.3.8.3 LEVELS OF CERTAINTY FOR REPORTED RESERVES

The qualitative certainty levels contained in the definitions are applicable to “individual Reserves entities”, which refers to the lowest level that Reserves calculations are performed, and to “Reported Reserves”, which refers to the highest-level sum (aggregated quantity) of individual entity estimates for which Reserves estimates are presented. Reported Reserves should target the following levels of certainty under a specific set of economic conditions.

- At least a 90 percent probability that the quantities actually recovered will equal or exceed the estimated Proved Reserves.
- At least a 50 percent probability that the quantities actually recovered will equal or exceed the sum of the estimated Proved + Probable Reserves.
- At least 10 percent probability that the quantities actually recovered will equal or exceed the sum of the estimated Proved + Probable + Possible Reserves.

A quantitative measure of the certainty levels pertaining to estimates prepared for the various Reserves categories is desirable to provide a clearer understanding of the associated risks and uncertainties. However, most Reserves estimates are prepared using deterministic methods that do not provide a mathematically derived quantitative measure of probability. In principle, there should be no difference between estimates prepared using probabilistic or deterministic methods. Additional clarification of certainty levels associated with Reserves estimates and the effect of aggregation is provided in Section 5.7.1.6 *The Portfolio Effect*.

Appendix II

FORM 51-101F1
STATEMENT OF RESERVES DATA
AND OTHER OIL AND GAS INFORMATION

Oil and Gas Reserves and Net Present Value of Future Net Revenue

In accordance with National Instrument 51-101 – Standard of Disclosure for Oil and Gas Activities, MKM Engineering (“**MKM**”), independent petroleum engineering consultants, prepared a report (the “**MKM Report**”) dated September 10, 2023. This statement of reserves data and other oil and gas information in this Statement is in US dollars (“\$”). This statement was prepared on September 10, 2023 and is effective September 30, 2022.

The MKM Report evaluated, as of September 30, 2022, Permex Petroleum Corporation’s (the “**Company**”) New Mexico and Texas conventional light and medium oil and natural gas reserves. The tables below are a summary of the convention light and medium oil and natural gas reserves, as evaluated in the MKM Report utilizing forecast price and cost assumptions. The tables summarize the data contained in the MKM Report and as a result may contain slightly different numbers due to rounding. The net present value of future net revenue attributable to the Company’s reserves is stated without provision for interest costs and out of the country general and corporate administrative costs, but after providing for estimated royalties, production costs, development costs, other income, future capital expenditures, and well abandonment costs for only the wells assigned reserves by MKM. It should not be assumed that the undiscounted or discounted net present value of future net revenue attributable to the Company’s reserves estimated by MKM represent the fair market value of those reserves. Other assumptions and qualifications relating to the costs, prices for future production and other matters are summarized herein. The recovery and reserve estimates of the Company’s light and medium oil and natural gas reserves provided herein are estimates only and there is not guarantee that the estimated reserves will be recovered. Actual reserves may be greater than or less than the estimates provided herein.

The MKM report is based on certain factual data supplied by the Company and MKM’s opinion of reasonable practice in the industry. The extent and character of ownership and all factual data pertaining the Company’s petroleum properties and contracts (except for certain information residing in the public domain) were supplied by Permex Petroleum to MKM and accepted without any further investigation. MKM accepted this data as presented and neither title searches nor filed inspections were conducted.

Reserves Data – Forecast Prices and Costs

Notes:

1. The crude oil and natural gas reserve estimates presented in the MKM Report have been based on the definitions and guidelines prepared by the Standing Committee on Reserves Definitions of the CIM (Petroleum Society) as presented in the Canadian Oil and Gas Evaluation (the “**COGE Handbook**”). A summary of those definitions is presented below.
2. Reserves are estimated remaining quantities of oil and natural gas and related substances anticipated to be recoverable from known accumulation, from a given date forward, based on (i) analysis of drilling, geological, geophysical and engineering data, (ii) the use of established technology, and (iii) specified economic conditions, which are generally accepted as being reasonable, and shall be disclosed.
3. Reserves are classified according to the degree of certainty associated with the estimates:
 - (a) Proved reserves are those reserves that can be estimated with a high degree of certainty to be recoverable. It is likely that the actual remaining quantities recovered will exceed the estimated proved reserves.
 - (b) Probable reserves are those additional reserves that are less certain to be recovered than proved reserves. It is equally likely that the actual remaining quantities recovered will be greater or less than the sum of the estimated proved plus probable reserves.
 - (c) Other criteria that must also be met for the categorization of reserves are provided in Section 1.4 7.2.1 of the COGE Handbook.
4. Each of the reserve categories (proved and probable) may be divided into developed and undeveloped categories.
 - (a) Developed reserves are those reserves that are expected to be recovered from existing wells and installed facilities or, if facilities have not been installed, that would involve a low expenditure (for example, when compared to the cost of drilling a well) to put the reserves on production. The developed category may be subdivided into producing and non-producing.
 - (b) Developed producing reserves are those reserves that are expected to be recovered from completion intervals open at the time of the estimate. These reserves may be currently producing or, if shut in, they must have previously been on production, and the date of resumption of production must be known with reasonable certainty.
 - (c) Developed non-producing reserves are those reserves that either have not been on production, or have previously been on production, but are shut in, and the date of resumption of production is unknown.
 - (d) Undeveloped reserves are those reserves expected to be recovered from known accumulations where a significant expenditure (for example, when compared to the cost of drilling a well) is required to render them capable of production. They must fully meet the requirements of the reserves classification (proved, probable) to which they are assigned.
5. The qualitative certainty levels referred to in the definition above are applicable to individual reserves entities (which refers to the lowest level at which reserves calculations are performed) and to reported reserves (which refers to the highest level sum of individual entity estimates for which reserves estimate are presented). Reported reserves should target the following levels of certainty under a specific set of economic conditions.
 - a. at least a 90 percent probability that the quantities actually recovered will equal or exceed the estimated proved reserves; and
 - b. at least a 50 percent probability that the quantities actually recovered will equal or exceed the sum of the estimated proved plus probable reserves.
6. Additional clarification of certainty levels associated with reserves estimates and the effect of aggregation is provided in Section 5 of the COGE Handbook.
7. “Company Gross Reserves” are the total of the Company’s working and/or royalty interest share before deduction of royalties owned by others. It represents the Company’s percentage effective ownership interest in the property gross reserve.
8. “Company Net Reserves” are the total of the Company’s working interest share in reserves after deduction the amounts attributable to royalties plus the Company’s royalty interests in such reserves.

Additional Information Concerning Future Net Revenue – (Undiscounted)

Reserves Category	Revenue (M\$)	Royalties (M\$)	Operating Costs (M\$)	Development Costs (M\$)	Abandonment and Reclamation Costs (M\$)	Future Net Revenue Before Tax (M\$)	Income Tax (M\$)	Future Net Revenue After Tax (M\$)
Total Proved	2,372,135	1,823,6530	105,535	72,596	6,939	363,412	36,358	327,054

Future Net Income by Production Group

	Future Net Revenue Before Future Income Tax Expenses Discounted at 10% (M\$)	Net Unit Value Before Income Taxes Discounted at 10%, (\$/Bbl., \$/Mcf)
Proved		
Light and Medium Crude Oil	154,893	24.98
Conventional Natural Gas	4,027	1.36
Proved plus Probable		
Light and Medium Crude Oil	319,340	23.39
Conventional Natural Gas	16,539	1.25

Pricing Assumptions – Forecast Prices, Costs and Oil and Gas Sales

MKM employed the following oil and natural gas pricing and inflation rate assumptions as of September 30, 2022 in estimating the Company's reserves data using forecast prices and costs. The Company received an average oil price of \$96.18 in 2022.

Year	Light and Medium Oil WTI Cushing (\$/Bbl)	Natural Gas U.S. Henry Hub (\$/MMBtu)	Inflation Rate %/Year
2022	80.00	6.75	0
2023	80.00	5.50	0
2024	76.50	4.39	2
2025	72.83	4.37	2
2026	74.28	4.46	2
2027	75.77	4.55	2
2028	77.29	4.64	2
2029	78.83	4.73	2
2030	80.41	4.82	2
2031	82.02	4.92	2
2032	83.66	5.02	2
2033	85.33	5.12	2
Thereafter	2%/yr.	2%/yr.	2

RECONCILIATIONS OF CHANGES IN RESERVES AND FUTURE NET REVENUE

Reserves Reconciliation

The following table sets forth a reconciliation of Company Gross Reserves as at September 30, 2022 against the Company's gross reserves as at September 30, 2021.

Company Net Reserves Conventional Oil and Natural Gas

	Proved (MBO)	Probable (MBO)	Proved Plus Probable (MBO)	Proved (MMcf)	Probable (MMcf)	Proved Plus Probable (MMcf)
Reserves at Sept. 30, 2021	8,058	13,782	21,840	3,606	11,170	14,776
Improved Recovery	-	-	-	-	-	-
Technical revisions	(1,709)	(5,894)	(7,603)	(525)	875	350
Acquisitions						
Discoveries	-	-	-	-	-	-
Dispositions						
Economic factors	51	27	78	44	35	79
Production	(199)	(461)	(660)	(169)	(1,757)	(1,925)
Reserves at Sept. 30, 2022	6,201	7,454	13,655	2,956	10,323	13,279

On a Company Net Reserve basis, there has been a 23% decrease in proved conventional light and medium reserves with total conventional light and medium oil production of 11 Mbbl during the year. There has been a 37% decrease in the proved plus probable conventional light and medium oil reserves on a Company Gross Reserve basis from 21,840 Mbbl to 13,655 Mbbl.

On a Company Net Reserve basis, there has been a 18% decrease in proved conventional natural gas reserves with total conventional natural gas production of 12 MMcf during the year. There has been an 10% increase in the proved plus probable conventional natural gas reserves on a Company Gross Reserve basis from 14,776 MMcf to 13,279 MMcf.

UNDEVELOPED RESERVES

The following table sets forth the Company's undeveloped reserves for the years ended September 30, 2018, 2019, 2020, 2021, and 2022.

As of September 30, 2022

PROVED UNDEVELOPED RESERVES

Period	Light and		Medium Oil		Natural Gas	
			(Mbbl)		(MMcf)	
	First	Booked at	First	Booked at	First	Booked at
	Attributed	Year End	Attributed	Year End	Attributed	Year End
2018	6,530	3,343	1,741	677		
2019	8,148	3,855	936	395		
2020	9,814	4,028	2,378	768		
2021	17,881	7,461	6,677	3,189		
2022	0	5,079	0	2,130		

PROBABLE UNDEVELOPED RESERVES

Period	Light and		Medium Oil		Natural Gas	
			(Mbbl)		(MMcf)	
	First	Booked at	First	Booked at	First	Booked at
	Attributed	Year End	Attributed	Year End	Attributed	Year End
2018	4,724	3,309	10,277	7,382		
2019	5,764	3,578	10,738	7,500		
2020	5,516	3,473	10,607	7,445		
2021	18,640	13,660	15,403	11,164		
2022	0	7,335	0	10,307		

Note: Booked refers to reserves assigned as undeveloped in the MKM report.

The following discussion generally describes the basis on which the Company attributes proved and probable undeveloped reserves and its plans for developing those undeveloped reserves.

Proved Undeveloped Reserves

None of the Company's proved undeveloped reserves have been developed as of September 30, 2022.

Probable Undeveloped Reserves

None of the Company's probable undeveloped reserves have been developed as of September 30, 2022.

SIGNIFICANT FACTORS OR UNCERTANTIES AFFECTING RESERVES DATA

The process of estimated reserves is complex. It requires significant judgments and decisions based on available geological, geophysical, engineering, and economic data. These estimates may change substantially as additional data from ongoing development activities and production performance becomes available and as economic conditions impacting oil and gas prices and costs change. The reserve estimates contained herein are based on current production forecasts, prices, and economic conditions. The Company's reserves are evaluated by MKM, an independent petroleum engineering firm.

As circumstances change and additional data become available, reserve estimates also change. Estimates made are reviewed and revised, either upward or downward, as warranted by the new information. Revisions are often required due to changes in well performance, prices, economics conditions, and governmental restrictions.

Although every reasonable effort is made to ensure that reserve estimates are accurate, reserve estimation is an inferential science. As a result, the subjective decisions, new geological or production information and a changing environment may impact these estimates. Revisions to reserve estimates can arise from changes in year-end oil and gas prices, and reservoir performance. Such revisions can be positive or negative.

FUTURE DEVELOPMENT COSTS

The table below sets of the Company's share of the development costs deducted in the estimation of future net revenues attributable to proved and probable reserves using forecast prices and costs.

	Future Forecast	Development Prices and Costs	Costs
	-	-	-
		Proved	Proved Plus Probable
Year	-	M\$	M\$
2022		2,709	2,709
2023		15,207	45,807
2024		10,8774	36,512
2025		8,422	15,929
2026		12,318	17,448
2027		11,275	17,526
2028		6,357	16,655
Remaining Years		5,431	33,525
Total		72,596	186,112

The 2022 and beyond future development costs include workovers, re-completions of the existing wells, return to production of shut-in wells, and drilling of the undeveloped acreage. The Company expects to fund its estimated future development costs through a combination of internally generated cash flow and debt or equity funding.

Land Holdings

The following table sets out the developed and undeveloped land holdings in acres of the Company as at September 30, 2022.

	Developed		Undeveloped		Total	
	Gross	Net	Gross	Net	Gross	Net
Unites States	5,117	3,942	6,000	4,800	11,117	8,742
Totals	5,117	3,942	6,000	4,800	11,117	8,742

Notes:

1. "Gross" refers to the total acres of the properties in which the Company has an interest.
2. "Net" refers to the total acres of the properties in which the Company has an interest, multiplied by the Company's ownership in each of the properties.

OIL AND GAS PROPERTIES AND WELLS

The following table summarizes the Company's interest as at September 30, 2022 in wells that are producing and non-producing.

Producing Wells		Non-Producing Wells	
Oil and Natural Gas		Oil and Natural Gas	
Gross	Net	Gross	Net
92	15	53	17

Notes:

1. "Gross" refers to the aggregate number of the wells in which the Company has an interest.
2. "Net" refers to the total number of the wells in which the Company has an interest, multiplied by the Company's ownership in each of the wells.

Producing Wells

As at September 30, 2022, there is one producing well on the OXY Yates acreage and one producing well on the West Henshaw Unit, both properties are located in New Mexico. In Texas, there are sixteen producing wells on the Breedlove properties, one producing well on the Mary Bullard property, and seventy-three producing wells on the Royalty properties.

Non-Producing Wells

As at September 30, 2022, there are nine non-producing wells on the OXY Yates acreage and nine non-producing wells on the West Henshaw Unit, both properties are located in New Mexico. In Texas, there are five non-producing wells on the Breedlove properties, four non-producing wells on the Mary Bullard property, and twenty-six non-producing wells on the Pittcock N. & S.

PROPERTIES WITH NO ATTRIBUTED RESERVES

The Windy Jones lease, located in Stonewall County, Texas have no attributed Reserves as at September 30, 2022. The Company's land holdings in this property are 40 gross acres and 40 net acres.

Significant Factors or Uncertainties Relevant to Properties with No Attributed Reserves

No reserves have been attributed to the above property and wells, as this property is only utilized for the injection of water to facilitate waterflooding on the Pittcock North Property and Pittcock South Property, located in Texas.

EXPLORATION AND DEVELOPMENT ACTIVITY

The Company did not conduct any drilling activities for the year ended September 30, 2021.

ADDITIONAL INFORMATION CONCERNING ABANDONMENT AND RECLAMATION COSTS

The following table summarizes the Company's abandonment and reclamation costs for the properties included in the MKM Report. Abandonment costs (excluding salvage value) and well site reclamation costs associated with wells to which reserves were attributed were deducted in estimating future net revenue and value in the MKM Report.

	Future Forecast	Abandonment Prices and Costs	Costs
-	-	-	-
-	-	-	-
Year	Proved M\$	Proved Plus Probable M\$	
2022	0	0	
2023	9	30	
2024	34	10	
2025	3	3	
2026	0	0	
2027	36	33	
2028	0	0	
Remaining Years	6,856	11,547	
Total	6,938	11,623	

FORWARD CONTRACTS

The Company is not bound by an agreement directly or through an aggregator, under which it may be precluded from fully realizing, or may be protected from the full effect of, future market prices for oil and gas.

TAX HORIZON

The Company anticipates a small U.S. Federal income tax payable each year. However, this estimate is highly sensitive to variables such as commodity prices, production, and the timing of future capital spending.

COSTS INCURRED

The following table summarizes the Company's property acquisition costs, exploration costs, and development costs for the year ended September 30, 2022.

	Year ended September 30, 2022 <u>M\$</u>
Lease acquisition and retention	-
Geology and geophysical	-
Drilling and completion	-
Production equipment	-
Infrastructure	-
Capitalized general and administrative	-
Development	-

Acquisition of proved properties	-
Acquisition of unproved properties	-
Exploration costs	-
Development costs	-
Other costs	-
Company Gross	<u>-</u>

Further analysis of capital expenditures

The tables below summarize the Company's quarterly capital expenditures for the year ended September 30, 2022.

	Quarter ended			
	Dec. 30, 2021	Mar. 31, 2022	June 30 2022	Sept. 30, 2022
Property acquisition and retention	-	-	-	-
Geological and geophysical including Drilling and completion and production Equipment	-	-	-	-
Development and facilities	-	-	-	-
Power development	-	-	-	-
Total	-	-	-	-

PRODUCTION ESTIMATES

The following table discloses for each product type the total volume of production estimated by MKM for 2022 in the of future net revenue from proved and proved plus probable reserves disclosed above under the heading "Net Present Value of Future Net Revenue of Oil and Gas Reserves". Such volumes below reflect estimated production from Company Gross Reserves and Company Net Reserves (see notes 7 and 8 on page 2 above).

2022 Future Production

	Forecast Prices & Costs (Undiscounted)	
	Proved Reserves	Proved plus Probable Reserves
2022 Production (Gross)		
Light and Medium Oil(Mbbl)	592	592
Gas(MMcf)	2,775	2,775
NGL(Mbbl)	0	0
Mboe*	1,054	1,054
2022 Production (Net)		
Light and Medium Oil(Mbbl)	21	21
Gas(MMcf)	16	16
NGL(Mbbl)	0	0
Mboe*	24	24

Note:

- *Boe conversion ratio of 6 MCF to 1 barrel of crude oil is based on an energy equivalency conversion method primarily applicable at the burner tip and does not represent a value equivalency at the wellhead.

PRODUCTION HISTORY

The following tables disclose the Company's share of quarterly average gross daily production and the Company's net production for the year ended September 30, 2022.

		Q1 (Dec. 2021)	Q2 (Mar. 2022)	Q3 (June 2022)	Q4 (Sept. 2022)	Total

MKM Engineering
3905 Sagamore Hill Court
Plano, Texas
75025

Dear Madam:

Re: Company Representation Letter

Regarding the evaluation of our Company's oil and gas reserves (one report) and independent appraisal of the economic value of these reserves for the period ended September 30, 2021 (the effective date), we herein confirm to the best of our knowledge and belief as of the effective date of the reserves evaluation, and as applicable, as of today, the following representations and information made available to you during the conduct of the evaluation:

1. We, Permex Petroleum Corporation, (the Client) have made available to you, MKM Engineering (the Evaluator) certain records, information, and data relating to the evaluated properties that we confirm is, with the exception of immaterial items, complete and accurate as of the effective date of the reserves evaluation, including the following:
 - Accounting, financial, tax and contractual data
 - Asset ownership and related encumbrance information;
 - Details concerning product marketing, transportation and processing arrangements;
 - All technical information including geological, engineering and production and test data;
 - Estimates of future abandonment and reclamation costs.
2. We confirm that all financial and accounting information provided to you is, to the best of our knowledge, both on an individual entity basis and in total, entirely consistent with that reported by our Company for public disclosure and audit purposes.
3. We confirm that our Company has satisfactory title to all of the assets, whether tangible, intangible, or otherwise, for which accurate and current ownership information has been provided.
4. With respect to all information provided to you regarding product marketing, transportation, and processing arrangements, we confirm that we have disclosed to you all anticipated changes,

terminations, and additions to these arrangements that could reasonably be expected to have a material effect on the evaluation of our Company's reserves and future net revenues.

5. With the possible exception of items of an immaterial nature, we confirm the following as of the effective date of the evaluation:
- For all operated properties that you have evaluated, no changes have occurred or are reasonably expected to occur to the operating conditions or methods that have been used by our Company over the past twelve (12) months, except as disclosed to you. In the case of non-operated properties, we have advised you of any such changes of which we have been made aware.
 - All regulatory, permits, and licenses required to allow continuity of future operations and production from the evaluated properties are in place and, except as disclosed to you, there are no directives, orders, penalties, or regulatory rulings in effect or expected to come into effect relating to the evaluated properties.
 - Except as disclosed to you, the producing trend and status of each evaluated well or entity in effect throughout the three-month period preceding the effective date of the evaluation are consistent with those that existed for the same well or entity immediately prior to this three-month period.
 - Except as disclosed to you, we have no plans or intentions related to the ownership, development or operation of the evaluated properties that could reasonably be expected to materially affect the production levels or recovery of reserves from the evaluated properties.
 - If material changes of an adverse nature occur in the Company's operating performance subsequent to the effective date and prior to the report date, we will inform you of such material changes prior to requesting your approval for any public disclosure of reserves information.
6. We hereby confirm that our Company is in material compliance with all Environmental Laws and does not have any Environmental Claims pending.

Between the effective date of the report and the date of this letter, nothing has come to our attention that has materially affected or could affect our reserves and economic value of these reserves that has not been disclosed to you.

Yours very truly,

President and Chief Executive Officer

Chief Operating Officer, Director
