

ACME Lithium Sampling Program Provides New Lithium Values at Fish Lake Valley, Nevada

Carson City, Nevada--(Newsfile Corp. - October 7, 2021) - **ACME Lithium Inc. (CSE: ACME) (OTCQB: ACLHF) (the "Company", or "ACME")** is pleased to report that its recent geological field review and sampling program at Fish Lake Valley, Nevada has resulted in surface lithium values up to 410 ppm lithium to indicate a mineral process was active during deposition of the underlying sediments. In addition, barium analyses to 1,800 ppm support that the mineral process was active during deposition of the underlying sediments. See results in link to table below.

https://acmelithium.com/divi_mega_pro/acme-lithium-sampling-program-table/

ACME holds a 1,620-acre FLV lode mining claim block in Fish Lake Valley, Esmeralda County, Nevada. The property had previously been mapped and sampled with more anomalous analyses of 200 to 260 ppm lithium towards the bottom of the washes along the range front of the claim area. It is believed that the current erosion surface could be exposing the top of a stratigraphic deposit with active lithium mineralization, which is significant in the context of neighbouring Ioneer's Rhyolite Ridge Lithium-Boron project 4 miles to the northeast where the lithium-boron mineralization is in one layer of the rocks filling the valley.

Having shown that fine sediments the same age as Clayton Valley, the epicenter of lithium development in the United States, this study confirms occurrences are on the Property and that some beds are enriched in lithium. Further analysis and evaluation will be done to determine appropriate drilling potential as only the visually uppermost 25 feet of the lithified fine sediments are exposed in the washes.

About ACME Lithium Inc.

Backed by a successful track record on finding and developing global resources, ACME Lithium has two projects located in a highly prospective region for lithium development and production in the Clayton Valley region of Esmeralda County, Nevada. The Company has acquired, or under option to acquire, a 100-per-cent interest in 122 claims encompassing approximately 2,440 acres, comprising the CC, CCP, JR and SX placer lithium claims, located in Clayton Valley, Esmeralda county, Nevada. ACME also holds a 100-per-cent interest in the FLV claims, being 81 lode mining claims totaling approximately 1,620 acres, in Esmeralda county, Nevada, which are prospective for lithium contained in tertiary claystones.

Neither the CSE nor its regulations service providers accept responsibility for the adequacy or accuracy of this news release. This news release may contain forward-looking information within the meaning of applicable securities laws ("forward-looking statements"). Forward-looking statements are statements that are not historical facts and are generally, but not always, identified by the words "expects," "plans," "anticipates," "believes," "intends," "estimates," "projects," "potential" and similar expressions, or that

events or conditions "will," "would," "may," "could" or "should" occur and in this news release include but are not limited to the attributes of, timing for and expected benefits to be derived from the drilling program to be carried out on the Clayton Valley or FLV property. Information inferred from the interpretation of drilling and other sampling results may also be deemed to be forward-looking statements, as it constitutes a prediction of what might be found to be present when and if a project is actually developed. These forward-looking statements are subject to a variety of risks and uncertainties which could cause actual events or results to differ materially from those reflected in the forward-looking statements, including, without limitation: risks related to fluctuations in metal prices; uncertainties related to raising sufficient financing to fund the planned work in a timely manner and on acceptable terms; changes in planned work resulting from weather, logistical, technical or other factors; the possibility that results of work will not fulfill expectations and realize the perceived potential of the Company's properties; risk of accidents, equipment breakdowns and labour disputes or other unanticipated difficulties or interruptions; the possibility of cost overruns or unanticipated expenses in the work program; the risk of environmental contamination or damage resulting from the Company's operations and other risks and uncertainties. Any forward-looking statement speaks only as of the date it is made and, except as may be required by applicable securities laws, the Company disclaims any intent or obligation to update any forward-looking statement, whether as a result of new information, future events or results or otherwise.
