

# ACME Lithium to Exhibit at Fastmarkets Lithium Supply and Battery Raw Materials Conference

Vancouver, British Columbia--(Newsfile Corp. - June 17, 2024) - **ACME Lithium Inc. (CSE: ACME) (OTCQB: ACLHF)** (the "Company", or "ACME") is pleased to announce that the Company will be exhibiting at the 16<sup>th</sup> Annual Fast Markets Lithium Supply and Battery Raw Materials Conference June 24<sup>th</sup> - 27<sup>th</sup>, 2024 in Las Vegas, Nevada.

The Fastmarkets Lithium Supply and Battery Raw Materials Conference, a three-day event, is the largest global forum for lithium and battery raw materials, with keynote speakers and attendees from around the world's top producers, to end users as well as participants along the entire supply chain. Fastmarkets is the most trusted cross-commodity price reporting agency (PRA) in the agriculture, forest products, metals and mining, and energy transition markets.

## About ACME Lithium Inc.

ACME Lithium is a mineral exploration company focused on acquiring, exploring, and developing battery metal projects in partnership with leading technology and commodity companies in North America. ACME is advancing and developing a lithium brine resource at Clayton Valley, Nevada and has entered into strategic exploration agreements with leading partners at its Fish Lake Valley, Nevada lithium claystone project, and a group of projects in the pegmatite region of Shatford, Birse and Cat-Euclid Lakes in southeastern Manitoba. Backed by strategic investors and led by an experienced management team, the building blocks of the future are our focus today.

Neither the CSE nor its regulations service providers accept responsibility for the adequacy or accuracy of this news release. This news release contains certain statements which may constitute forward-looking information within the meaning of applicable securities laws ("forward-looking statements"). Forward-looking statements are statements that are not historical facts and are generally, but not always, identified by the words "expects," "plans," "anticipates," "believes," "intends," "estimates," "projects," "potential" and similar expressions, or that events or conditions "will," "would," "may," "could" or "should" occur and in this news release include but are not limited to the attributes of, timing for and expected benefits to be derived from exploration, drilling or development at ACME's project properties. Information inferred from the interpretation of drilling, sampling and other technical results may also be deemed to be forward-looking statements, as it constitutes a prediction of what might be found to be present when and if a project is actually developed. ACME's project location adjacent to or nearby lithium projects does not guarantee exploration success or that mineral resources or reserves will be defined on ACME's properties. Exploration, development, and activities conducted by regional companies provide assistance and additional data for exploration work being completed by ACME.

These forward-looking statements are subject to a variety of risks and uncertainties which could cause actual events or results to differ materially from those reflected in the forward-looking statements, including, without limitation: risks related to fluctuations in metal prices; uncertainties related to raising sufficient financing to fund the planned work in a timely manner and on acceptable terms; changes in planned work resulting from weather, logistical, technical or other factors; the possibility that results of work will not fulfill expectations and realize the perceived potential of the Company's properties; risk of accidents, equipment breakdowns and labour disputes or other unanticipated difficulties or interruptions; the possibility of cost overruns or unanticipated expenses in the work program; the risk of environmental contamination or damage resulting from the Company's operations and other risks and uncertainties. Any forward-looking statement speaks only as of the date it is made and, except as may be required by applicable securities laws, the Company disclaims any intent or obligation to update any forward-looking statement, whether as a result of new information, future events or results or otherwise. Unless otherwise indicated, the market and industry data contained herein is based upon information from industry and other publications and the knowledge and experience of management. While we believe that this data is reliable, market and industry data is subject to variations and cannot be verified with complete certainty due to limits on the availability and reliability of raw data, the voluntary nature of the data gathering process and other limitations and uncertainties inherent in any statistical survey. We have not independently verified any of the data from third-party sources referred to in this news release or ascertained the underlying assumptions relied upon by such sources. All technical and scientific disclosure pertaining to our mineral property interests in this news release have been reviewed by a Qualified Person, meaning an individual who is an engineer or geoscientist with at least five years of experience in mineral exploration, mine development or operation or mineral project assessment, or any combination of these; has experience relevant to the subject matter of the mineral project and the technical report; and is a member or licensee in good standing of a professional association.
