Title to exploration and evaluation assets involves certain inherent risks due to the difficulties of determining the validity of certain claims as well as the potential for problems arising from the frequently ambiguous conveyancing history characteristic of many exploration and evaluation assets. The Company has investigated title to all of its exploration and evaluation assets, and, to the best of its knowledge, title to all of its properties, are properly registered and in good standing.

| Accounts payable and accrued liabilities | (620,584)             | -          | (620,584) | -        |

The carrying values of amounts receivable, accounts payable and accrued liabilities approximate their fair values due to the relatively short period to maturity of those financial instruments. Reclamation deposits approximately their fair value due to their liquidity.

As at September 30, 2022 and December 31, 2021, the financial instruments recorded at fair value on the statements of financial position are cash and cash equivalents and marketable securities which are measured using Level 1 of the fair value hierarchy. As at September 30, 2022 and December 31, 2021, there were no financial assets or liabilities measured and recognized in the statement of financial position at fair value that would be categorized as Level 2 and 3 in the fair value hierarchy above.

#### 11) FINANCIAL INSTRUMENTS (CONTINUED)

#### Fair value (continued)

IFRS 13 establishes a fair value hierarchy that reflects the significance of inputs used in making fair value measurements as follows:

Level 1: Unadjusted quoted prices in active markets for identical assets or liabilities; Level 2: Inputs other than quoted prices included in Level 1 that are observable for the asset or liability either directly (i.e., as prices) or indirectly (i.e., derived from prices); and Level 3: Inputs that are not based on observable market data.

The Company has determined the estimated fair values of its financial instruments based upon appropriate valuation methodologies.

#### **Financial risk management**

# <u>Credit risk</u>

Credit risk is the risk of an unexpected loss if a customer or third party to a financial instrument fails to meet its contractual obligations. The Company's exposure to credit risk includes cash and cash equivalents and amounts receivable.

The Company's cash and cash equivalents is held at a large Canadian financial institution in interest bearing accounts. The Company has no investments in asset-backed commercial paper.

The Company's maximum exposure to credit risk is the carrying value of its financial assets.

Management believes that the credit risk concentration with respect to these financial instruments is remote. Cash and cash equivalents based in Canada are accessible. The Company's amounts receivable balance does not represent significant credit exposure as it is principally due from the Government of Canada.

# Liquidity risk

Liquidity risk is the risk that an entity will encounter difficulty in raising funds to meet commitments associated with financial instruments. The Company manages liquidity by maintaining adequate cash balances to meet liabilities as they become due.

As at September 30, 2022, the Company had cash and cash equivalents of \$9,131,148 and accounts payable and accrued liabilities of \$615,955. All accounts payable and accrued liabilities are current.

#### 11) FINANCIAL INSTRUMENTS (CONTINUED)

#### Financial risk management (continued)

#### <u>Market risk</u>

The significant market risks to which the Company is exposed are interest rate risk, foreign currency risk, and price risk.

#### Interest Rate Risk

Interest rate risk is the risk that the fair value or the future cash flows of a financial instrument will fluctuate because of changes in market interest rates. The Company's cash and cash equivalents is held at a Canadian chartered bank. Management believes that the credit risk concentration with respect to cash is remote as the cash and cash equivalents are easily accessible.

The Company's interest rate risk principally arises from the interest rate impact of interest earned on cash and cash equivalents. A 1% change in interest rates on the balance of cash at September 30, 2022 would result in an approximately \$91,000 change to the Company's loss for the nine months ended September 30, 2022.

#### Foreign Currency risk

The Company is exposed to currency risk to the extent that monetary assets and liabilities held by the Company are not denominated in Canadian dollars ("CAD"). The Company has not entered into any foreign currency contracts to mitigate this risk.

The Company's cash, amounts receivable, and accounts payable and accrued liabilities are held in CAD and United States dollars ("US"); therefore, US accounts are subject to fluctuation against the CAD.

The Company's financial instruments were denominated as follows as at September 30, 2022:

|                                          | CA\$      | US\$      |
|------------------------------------------|-----------|-----------|
| Cash and cash equivalents                | 9,017,840 | 82,474    |
| Amounts receivable                       | 28,514    | -         |
| Reclamation deposits                     | -         | 35,000    |
| Accounts payable and accrued liabilities | (174,863) | (321,060) |
|                                          | 8,871,491 | (203,586) |
| Rate to convert to \$1.00 CAD            | 1.00      | 1.37      |
| Equivalent to CAD                        | 8,871,491 | (279,699) |

Based on the above net exposures as at September 30, 2022, and assuming that all other variables remain constant, a 10% change of the CAD against the US would change profit or loss by approximately \$28,000.

#### Commodity price risk

The Company is exposed to price risk with respect to commodity prices. The Company's ability to raise capital to fund exploration and development activities may be subject to risks associated with fluctuations in the market price of commodities. The Company is not exposed to significant other price risk.
