Management Discussions and Analysis

For the nine months ended April 30, 2019

This management discussion and analysis of financial position and results of operations (“MD&A”), prepared as of June 11, 2019 provides an analysis of the operations and financial results of AJN Resources Inc. (“the Company”) for the nine months ended April 30, 2019, and should be read in conjunction with the interim financial statements for the nine months ended April 30, 2019.

AJN Resources Inc. (“AJN”) is an exploration and development company formed for the purposes of acquiring, exploring and, if warranted and feasible, developing Lithium resource properties. We acquire and develop properties of demonstrated potential.

During the year ended July 31, 2017, the Company entered into an option agreement dated April 25, 2017 (the “Option Agreement”), and as last amended on July 3, 2017, to acquire a 100% interest in certain claims comprising the Salt Wells Lithium Project located in Nevada, USA, subject to a 4.5% net smelter returns royalty.

The financial information in this MD&A is derived from the Company’s unaudited financial statements which have been prepared in Canadian dollars, in accordance with International Financial Reporting Standard (“IFRS”) as issued by the International Accounting Standards Board (“IASB”) and the interpretations of the International Financial Reporting Interpretations Committee (“IFRIC”).

This discussion contains forward-looking statements that involve risks and uncertainties. Such information, although considered to be reasonable by the Company’s management at the time of preparation, may prove to be inaccurate and actual results may differ materially from those anticipated in the statements made.

CAUTION REGARDING FORWARD-LOOKING INFORMATION

This MD&A contains forward-looking statements and forward-looking information (collectively, “forward-looking statements”) within the meaning of applicable Canadian and US securities legislation. These statements relate to future events or the future activities or performance of the Company. All statements, other than statements of historical fact are forward-looking statements. Forward-looking statements are typically identified by words such as: believe, expect, anticipate, intend, estimate, postulate and similar expressions, or which by their nature refer to future events. These forward looking statements include, but are not limited to, statements concerning:

- the Company’s strategies and objectives, both generally and in respect of its existing business and planned business operations;
- the Company’s plans to grow sales and offer new products and services;
- the Company’s future cash requirements;
- general business and economic conditions;
- the Company’s ability to meet its financial obligations as they come due, and to be able to raise the necessary funds to continue operations;
- the timing, pricing, completion, regulatory approval of proposed financings if applicable;

Although the Company believes that such statements are reasonable, it can give no assurance that such expectations will prove to be correct. Inherent in forward looking statements are risks and uncertainties beyond the Company’s ability to predict or control, including, but not limited to, risks related to the Company’s ability to raise the necessary capital or to be fully able to implement its business strategies, and other risks identified herein under “Risk Factors”.

The Company cautions investors that any forward-looking statements by the Company are not guarantees of future performance, and that actual results are likely to differ, and may differ materially, from those expressed or implied by forward looking statements contained in this MD&A. Such statements are based on a number of assumptions, which may prove incorrect, including, but not limited to, assumptions about:

- general business and economic conditions;
- conditions in the financial markets generally, and with respect to the prospects for small capitalization commercial/technology companies specifically;
- the Company’s ability to continue to roll out its business plan which includes new product launches and associated planning in production, sales, distribution and marketing;

AJN Resources Inc.

Management Discussions and Analysis

- the Company's ability to secure and retain employees and contractors to carry out its business plans;

These forward-looking statements are made as of the date hereof and the Company does not intend and does not assume any obligation, to update these forward-looking statements, except as required by applicable law. For the reasons set forth above, investors should not attribute undue certainty to or place undue reliance on forward-looking statements.

Historical results of operations and trends that may be inferred from the following discussion and analysis may not necessarily indicate future results from operations. In particular, the Company has moved from a private corporation operating with very limited capital and therefore with very restricted operations, to a publicly traded venture issuer. Accordingly, drawing trends from the Company's limited operating history is difficult.

OVERALL PERFORMANCE

The Company has no operational revenue, and exploration activity is subject to the availability of funds raised through financings. Global financial and commodity markets have been volatile, and the Company is thus impacted by these generic industry factors which are beyond its control. The Company anticipates obtaining additional financing in the future primarily through further equity financing.

by exploration results and the amount and timing of the Company's write-offs of capitalized mineral property costs will vary in a fiscal period from one year to the next and typically cannot be predicted in advance.

For the nine months ended April 30, 2019, mineral property acquisition and exploration costs totaled \$82,922. The table below outlines the costs added to the exploration and evaluation asset during the period:

	As at July 31, 2018	Net Change	As at April 30, 2019
Acquisition Costs	\$ 42,839	16,338	\$ 59,177
Exploration Costs

	<u>158,229</u>	<u>66,583</u>	<u>224,812</u>
Total	<u>\$ 201,068</u>	<u>\$ 82,922</u>	<u>\$ 283,989</u>

LIQUIDITY

Since incorporation, the Company's capital resources have been limited. The Company has had to rely upon the sale of equity securities for the cash required for property acquisition payments, office and miscellaneous expenses and accounting, audit and legal fees, among other expenses.

During the period from incorporation to July 31, 2017, the Company raised \$270,000 through the issuance of 11,000,000 common shares.

During the year ended July 31, 2018 the Company raised \$431,300 through the issuance of 3,656,500 common shares and 656,500 special warrants. The company has not raised any additional funds during the nine months ended April 30, 2019.

The Company expects that its cash position of \$256,838 as at the most recent month end being April 30, 2019, will be sufficient for the Company to become operational to begin meeting its objectives and milestones. Once the Company is operational, it will require additional working capital in order to increase its growth rate and may seek to raise additional funds via one or more private placements.

CAPITAL RESOURCES

As at April 30, 2019, the Company's share capital was \$701,300 (2018: \$676,300) representing 15,313,000 issued and outstanding common shares without par value (2018: 14,406,500).

Under the escrow agreement dated January 19th, 2018, 10% of the escrowed common shares are to be released from escrow on the date of listing on the Canadian Securities exchange. Subsequent to listing, and additional 15% will be released every six months over a thirty six month period. As at April 30, 2019, a total of 5,850,000 shares were held in escrow.

During the nine months ended April 30, 2019, the company did not enter into any transactions which affect its share capital.

In accordance with the recommendations of the Company's independent geologist, the Company has allocated \$112,101 from the proceeds of the Offering for the Phase I initial exploration program. If the results of this Phase I exploration program are successful, the Company plans to raise the estimated \$295,110 in funds required to finance

Phase II by way of equity financing during the current year. There is no guarantee that the Company will be able to raise the funds needed.

RISK FACTORS

The Company's financial instruments consist of cash and trade payables. The carrying values of these financial instruments approximate their respective fair values due to the short-term nature of these instruments.

Fair values of financial instruments are classified in a fair value hierarchy based on the inputs used to determine fair values. The levels of the fair value hierarchy are as follows:

Level 1 – Unadjusted quoted prices in active markets for identical assets or liabilities;

Level 2 – Inputs other than quoted prices that are observable for the asset or liability either directly or indirectly; and

Level 3 – Inputs that are not based on observable market data.

As at April 30, 2019, the fair value of cash held by the Company was based on level 1 inputs of the fair value hierarchy.

The Company's risk exposures and the impact on the Company's financial instruments are summarized below:

Credit risk: Credit risk is the unexpected loss if a customer or third party to a financial instrument fails to meet its contractual obligations. With cash on deposit with sound financial institutions, it is management's opinion that the Company is not exposed to significant credit risks arising from the financial instruments.

Liquidity risk: Liquidity risk is the risk that the Company will not be able to meet its financial obligations as they fall due. As at April 30, 2019, the Company had current liabilities totaling \$54,779 and cash of \$256,838 and is not exposed to significant liquidity risk at this time. However, since the Company is in the exploration stage, it will periodically have to raise funds to continue operations and intends to raise further financing through private placements.

Market risk: Market risk is the risk that changes in market prices such as commodity prices, foreign exchange rates and interest rates will affect the Company's income. The objective of market risk management is to manage and control market risk exposure within acceptable parameters. The Company does not use derivative instruments to reduce its insignificant exposure to market risks.

OUTSTANDING SHARE DATA

The Company's authorized capital is unlimited common shares without par value. As at June 10, 2019, the following common shares, options and share purchase warrants were outstanding:

As at June 10, 2019	Number issued and outstanding
Common Shares	15,313,000
Special Warrants	0
