## **2. DESCRIPTION OF THE BUSINESS**

The Company is in the business of the exploration and evaluation of mineral properties. The Company was incorporated under the Business Corporations Act of British Columbia on September 1, 2016. On June 12, 2018, the Company listed its shares on the Canadian Securities Exchange ("CSE") and trades under the symbol "AJN", and on the Frankfurt Stock Exchange ("FTE") under the symbol "5AT". The address of the Company's registered office and principal place of business is Suite 1400 - 1199 West Hastings St., Vancouver, British Columbia, V6E 3T5, Canada.

## **3. OUTLOOK AND GOING CONCERN**

### **a) Outlook**

The Company's primary business is the acquisition and exploration of mineral properties. The Company's mineral property consists of the Salt Wells Lithium Property (the "Salt Wells Property"), located in Nevada, USA, and exploration permits (the "Kabunda South Project" and the "Manono Northeast Project") located in the Manono Territory, Tanganyika Province of the Democratic Republic of the Congo ("DRC"). The Company's exploration and evaluation assets do not presently host any known mineral deposits nor, given the high degree of risk involved, can there be any assurance that its exploration activities will result in such deposits being located or, ultimately, a profitable mining operation in the future.

On February 8, 2022, the Company, through its wholly owned subsidiary AJN Resources Congo SASU ("AJN Congo"), entered into a memorandum of understanding (the "MoU") with the DRC to acquire a number of exploration permits in the Kilo Moto Gold Belt in North-East DRC. In connection with the MoU, the DRC has established a wholly owned subsidiary Congo Ressources SAU ("Congo Ressources") to acquire a 100% interest in certain claims in the area. AJN Congo will have the option to acquire Congo Ressources in exchange for common shares of the Company representing 60% of the fully diluted issued and outstanding common shares of the Company. As at April 30, 2024, the Company awaits the transfer of permits to Congo Ressources as per the MoU.

### **b) Going concern**

During the three and nine months ended April 30, 2024, the Company incurred a net loss of \$810,018 and \$2,983,460, respectively (2023 - \$276,279 and \$1,050,765, respectively). As at April 30, 2024, the Company has a working capital deficiency of \$773,470 (July 31, 2023 - \$453,792), and accumulated deficit of \$10,097,455 (July 31, 2023 - \$7,113,995). The Company has no source of operating cash flows, and there is no assurance that sufficient funding (including adequate financing) will be available to conduct required exploration and development of its mineral property projects. These factors indicate a material uncertainty that casts significant doubt on the Company's ability to continue as a going concern.

Should the Company be unable to continue as a going concern, asset and liability realization values may be substantially different from their carrying values. This MD&A does not give effect to adjustments that would be necessary to the carrying values and classification of assets and liabilities should the Company be unable to continue as a going concern. Such adjustments could be material.

##### Q3 2024 compared to Q3 2023

Net loss increased to \$810,018 compared to \$276,279 in the prior year comparable period. The primary drivers of this increase in net loss were as follows:

- Exploration expenses increased to \$623,505 compared to \$58,388 in the prior year comparable period due to the continuing drilling programs at the Manono Northeast Project initiated in Q1 2024. Exploration expenses incurred during Q3 2024 were for salaries, wages and geological consulting fees, and other project support costs related to the underlying drilling programs. Exploration expenses incurred during Q3 2023 were for geological consulting fees, and other project support costs to explore potential mineral properties in the DRC.
- Professional fees increased to \$62,204 compared to \$38,821 in the prior year comparable period mainly due to additional due diligence and legal counsel services for projects in the DRC incurred during the current period.

Partially offsetting the increase in net loss was accretion expense which decreased to \$nil from \$24,273 in the prior year comparable period due to the maturity of the convertible debenture on April 17, 2023.

##### YTD 2024 compared to YTD 2023

Net loss increased to \$2,983,460 compared to \$1,050,765 in the prior year comparable period. The primary drivers of this increase in net loss were as follows:

Exploration expenses incurred during YTD 2023 were for geological consulting fees, and other project support costs to explore potential mineral properties in the DRC.
- Marketing expense increased to \$156,859 compared to \$133,068 in the prior year comparable period due to digital marketing efforts to promote the Company's drilling programs in the DRC and to attract new investors to the Company during the current period.
- Share-based compensation increased to \$894,867 compared to \$nil in the prior year comparable period mainly due to the immediate vesting of 3,550,000 stock options issued to certain directors, officers and consultants in accordance with the omnibus equity incentive compensation plan during the current period.

**AJN Resources Inc.****Management's Discussion and Analysis**

For the three and nine months ended April 30, 2024 and 2023

Partially offsetting the increase in net loss were decreases to expenses as follows:

- Office and miscellaneous decreased to \$51,210 compared to \$82,206 in the prior year comparable period due to incurring government processing costs related to negotiations of prospective projects in the DRC during the prior year comparable period that was not repeated during the current period.
- Accretion expense decreased to \$nil from \$81,088 in the prior year comparable period due to the maturity of the convertible debenture on April 17, 2023.

**5. SUMMARY OF QUARTERLY RESULTS**

During the last eight quarters, the Company's net loss has ranged between \$546,762 (Q4 2022) and \$1,602,045 (Q2 2024). These losses are mainly as a result of exploration expenses that were incurred exploring mineral property interests located in the DRC that the Company does not own or control, as well as administrative overhead expenses that are required to be compliant as a public company and to promote the Company's financing activities in the market. These expenses are controlled by management and fluctuate depending on the funding available to the Company. In addition, the significant net loss in Q3 2024 was due to the immediate vesting of stock options issued during the period.

**8. LIQUIDITY AND CAPITAL RESOURCES**

**a) Liquidity**

Since incorporation, the Company's capital resources have been limited. The Company has had to rely upon the sale of equity securities and issuance of the convertible debenture for the cash required for property acquisition payments, office and miscellaneous expenses and accounting, audit and legal fees, among other expenses.

As at April 30, 2024, the Company's cash balance of \$292,095 (July 31, 2023 - \$1,171,941) will not be sufficient to meet its obligations related to its accounts payable and accrued liabilities balance of \$62,826 (July 31, 2023 - \$483,810), accrued interest payable balance of \$7,743 (July 31, 2023 - \$71,839), and convertible debenture balance of \$1,256,115 (July 31, 2023 - \$1,256,115). The Company's financial instruments are exposed to certain financial risks. The risk exposures and the impact on the Company's financial instruments are summarized below.

##### **a) Credit risk**

Credit risk is the risk of financial loss to the Company if a customer or counterparty fails to meet an obligation under contract. Credit risk exposure arises with respect to the Company's cash and deposits. The risk exposure is limited because the Company places its cash in banks of high credit worthiness within Canada and legal counsel in the DRC, and its deposits are held with an established mining institution in Nevada, USA.

##### **b) Liquidity risk**

Liquidity risk is the risk that the Company will encounter difficulty in meeting obligations associated with its financial liabilities. As the Company's operations do not generate cash, financial liabilities are discharged using funding through the issuance of common shares or debt as required. The Company is exposed to liquidity risk through its accounts payable and accrued liabilities, accrued interest payable, and convertible debenture. Management mitigates this risk by monitoring its cash position and issuing common shares or debt as required.

As at April 30, 2024, the Company's cash balance of \$292,095 (July 31, 2023 - \$1,171,941) will not be sufficient to meet its obligations related to its accounts payable and accrued liabilities balance of \$62,826 (July 31, 2023 - \$483,810), accrued interest payable balance of \$7,743 (July 31, 2023 - \$71,839), and convertible debenture balance of \$1,256,115 (July 31, 2023 - \$1,256,115). Therefore, the Company is exposed to liquidity risk.

##### **c) Interest rate risk**

Interest rate risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in market interest rates. The Company is not exposed to interest rate risk as its convertible debenture is payable at a fixed interest rate and no other liabilities are subjected to variable interest rates.

##### **d) Foreign exchange risk**

Foreign exchange risk is the risk that the fair value of the Company's assets and liabilities will fluctuate due to changes in foreign exchange rates. The Company is exposed to foreign exchange risk to the extent that monetary assets and liabilities held by the Company are not denominated in its functional currency. The Company does not manage currency risk through hedging or other currency management tools.

**e) Geopolitical risk**

Geopolitical risk is the risk that the fair value of financial instruments will fluctuate if there is a sudden and rapid destabilization of global financial conditions in response to future events, as government authorities may have limited resources to respond to the current or future crisis. Future crises may be precipitated by any number of factors outside the Company's control, including another pandemic, natural disasters, geopolitical instability, supply chain constraints or sovereign defaults. Any sudden or rapid destabilization of global economic conditions could negatively impact the Company's ability to obtain equity or debt financing or make other suitable arrangements to operate and/or finance its projects. In the event of increased levels of volatility or a rapid destabilization of global economic conditions, the Company's results of operations and financial condition could be adversely affected.
