

**NEXUS URANIUM CORP.**  
**Management Discussion and Analysis**  
**For the year ended November 30, 2023**

The Management Discussion and Analysis (“MD&A”), prepared March 21, 2024, should be read in conjunction with the audited consolidated financial statements and notes thereto for the year ended November 30, 2023 of Nexus Uranium Corp. which were prepared in accordance with International Financial Reporting Standards.

This management discussion and analysis may contain forward-looking statements in respect of various matters including upcoming events. The results or events predicted in these forward-looking statements may differ materially from the actual results or events. The Company disclaims any obligation to update or revise any forward-looking statements, whether as a result of new information, future events or otherwise.

**DESCRIPTION OF BUSINESS**

Nexus Uranium Corp (Formerly, Golden Independence Mining Corp & 66 Resources Corp.) (“the Company”) was incorporated on May 31, 2017 under the laws of British Columbia. The address of the Company’s corporate office and its principal place of business is 503-905 Pender Street W, Vancouver, British Columbia, Canada.

On September 8, 2020, the Company’s name was changed from 66 Resources Inc. to Golden Independence Mining Corp. and the Company began trading under the stock symbol “IGLD”. The Company’s CUSIP number for the common shares was also updated on September 8, 2020 to 381083104.

On November 10, 2023, the Company’s name was changed from Golden Independence Mining Corp. to Nexus Uranium Corp. and the Company began trading under the stock symbol “NEXU”.

The Company’s principal business activities include the acquisition and exploration of mineral property assets. As at November 30, 2023, the Company had not yet determined whether the Company’s mineral property asset contains ore reserves that are economically recoverable. The recoverability of amount shown for exploration and evaluation asset is dependent upon the discovery of economically recoverable reserves, confirmation of the Company’s interest in the underlying mineral claims, the ability of the Company to obtain the necessary financing to complete the development of and the future profitable production from the property or realizing proceeds from its disposition. The outcome of these matters cannot be predicted at this time and the uncertainties cast significant doubt upon the Company’s ability to continue as a going concern.

## EXPLORATION PROJECTS

### Independence Property

The Independence property (“Independence”) is an advanced-stage gold property, consisting of 14 unpatented lode claims along with mill-site mining claims totaling 960 acres, lying in the Battle Mountain-Cortez Trend, Nevada, adjoining the Nevada Gold Mines’ Phoenix mine approximately 800 metres to the southwest, which is currently operated under joint-venture between Newmont Mining and Barrick Gold Corporation. Nevada Gold Mines is the largest gold producer in the state of Nevada and is expected to produce 3 million ounces of gold in 2021 at industry leading cash costs.

The Independence property has recorded over \$25 million in past exploration expenditures, including over 200 historic drill holes, metallurgical test work, and site development. The Independence property is fully permitted for the drilling of over 160 holes from 80 drill sites for resource expansion and development drilling. Independence hosts a current resource as follows:

<b>Independence Near Surface Mineralization</b>

### **Notes to Mineral Resource Estimate:**

1. Mineral Resources which are not Mineral Reserves do not have demonstrated economic viability. The estimate of Mineral Resources may be materially affected by environmental, permitting, legal, title, taxation, sociopolitical, marketing, changes in global gold markets or other relevant issues. The CIM definitions (2014) were followed for classification of Mineral Resources. The quantity and grade of reported inferred Mineral Resources in this estimation are uncertain in nature and there has been insufficient exploration to define these inferred Mineral Resources as an indicated Mineral Resource. It is probable that further exploration drilling will result in upgrading them to an indicated or measured Mineral Resource category.
2. The Mineral Resource Estimate incorporates over 125,000 feet of reverse circulation and core drilling in 234 holes, and outlines both a near surface and an underground resource. The near surface mineralization is primarily based on the reverse circulation drilling, while the underground mineralization is based entirely on core drilling.
3. The resource was prepared by James Ashton, P.E., an independent QP, with an effective date of May 17, 2021.
4. The mineral resources are unconstrained and presented at an undiluted 0.20 g/t gold cut-off grade which represents mineralization that is potentially available for open-pit mining and heap-leach processing. There are sulfides present at depth in the near surface mineralization. The Company is undertaking metallurgical studies to define the redox boundary.
5. Underground mineralization resources were quantified based on deep tabular solids representing potentially underground mineable lenses.
6. Gold equivalent values are based on a silver to gold ratio of 70:1

There are two targets at the Independence property. The first is the outcropping and shallow (oxide) chert and highly silicified calcareous siltstone hosted mineralization, a high-level epithermal system believed to have formed as a leakage halo above the deeper gold skarn (sulfide) mineralization. The historic resource includes significant higher grade structure and fracture controlled mineralization. The gold silver mineralization lies along the Wilson Independence Fault Zone, a series of subparallel N50W striking sub-vertical westerly dipping faults and shear zones. The predominant metal-bearing minerals are oxidation products of the original sulfide minerals: goethite, hematite, cerargeryte, argentiferous plumbojarosite, scorodite, along with very fine grained native gold and rare native silver. Oxidation in the shallow deposits is pervasive and ubiquitous to depths of 400 feet (122 metres) below the surface. A mixed sulfide – oxide zone extends for roughly 100 feet (30 metres) below this and may extend to more than 1000 feet (300 metres) along certain structures and fractures. The main portion of the shallow mineralized body is roughly 3,800 feet (1,160 metres) long.

The deeper (sulfide) precious metal mineralization is a classic gold skarn, similar to the original Fortitude skarn (2.5 million ounces of gold at 0.25 opt) mined in the adjacent pit by Battle Mountain Gold. The gold was deposited as microscopic grains of free gold on micro fractures and on crystal faces generated through brittle deformation of the Battle Mountain, Edna Mountain and Antler Peak formations. The deeper mineralization, occurring as sub-horizontal “blankets” 5 to 25 feet (0.5 to 7.6 metres) thick and locally modified by post-mineral faulting, has been encountered in drill holes over an area more than 1,400 feet wide and 3,400 feet long (425 by 1,036 metres) and is open in all directions. The Company cautions investors the presence of gold mineralization at Fortitude is not necessarily indicative of similar mineralization at Independence.

### **Independence Exploration Completed During the Year ended November 30, 2023**

On August 9, 2023, the company announced the completion of the preliminary earthworks in preparation for an upcoming drill program at Independence. The earthworks contractor has completed road cuts and drill pad site preparation for future exploration drilling on the project. In addition, geologic staff have completed preliminary sampling at the newly exposed areas including sampling, mapping and prospecting of the Rebel zone. The samples have been delivered to ALS USA Inc. in Reno, Nev., for analysis. The company will look to finalize plans for drilling on receipt and interpretation of all results and remains fully permitted for an exploration drill program at the Rebel zone.

In addition, the company currently has two applications for water rights with the State of Nevada Division of Water Resources to support mining and production activities for the Independence project. The application process consists of 1) filing an application with supporting documents and

payment of fees; 2) a "map table" review; 3) sent for publication; 4) protest period; 5) ready for action (or RFA); 6) a hearing, if required; and 7) determination of action (approved with or without conditions or denied). Both of the company's permits are currently at the ready for action stage and are pending approval. The company remains optimistic about a favourable outcome as water rights were previously granted for this 480-acre parcel of land (referred to as Section 17 as first announced on Nov. 19, 2020) in 2013 by the State engineer of Nevada.

### **2020 Phase I and Phase II Nexus Reverse Circulation Drilling Program, Quality assurance**

All samples were shipped to the ALS Minerals prep lab in Elko, Nev., with analyses completed at the ALS Minerals Lab in Reno, Nev. Both facilities are ISO 9001:2015 and ISO/IEC 17025:2017 certified. All samples are analyzed utilizing ALS ME-ICP41 procedure, an aqua regia digestion with ICP-AES finish, with gold determined by the Au-AA23 procedure, a 30-gram fire assay with AAS finish. Over limit gold values are determined by the Au-GRA21 procedure, a 30 gram fire assay with a gravimetric finish. ALS Minerals is independent from Nexus Uranium. Nexus Uranium institutes a rigorous quality assurance/quality control program of duplicate samples, blanks and standards. Based on a review of the QA/QC data is not aware of any other factors that could materially affect the accuracy or reliability of the data referred to herein.

### **Independence Property Option Agreement**

Pursuant to an option agreement (the "Option Agreement") dated August 28, 2020, the Company was granted an option to acquire up to a 75% interest in the Independence Gold Project (the "Property") located in Lander County, Nevada. The underlying option agreement dated February 3, 2017 is between Independence Gold and Silver Mines Inc. (the "Owner") and Americas Gold Exploration Inc. ("AGEI").

In accordance with the terms of the Option Agreement, the Company will be obligated to meet the following in accordance with the time periods set forth in the Option Agreement, in order to earn a 51% interest in the Project ("Initial Earn-In Option"):

Within 30 days of execution of the Option Agreement, issue 33,333 common shares to Americas Gold Exploration, Inc. (ISSUED);

- a) Within 30 days of execution of the Option Agreement pay US\$50,000 to AGEI (PAID);
- b) Make cash payments totaling US\$4,300,00 to the Owner as per the following schedule:
  - i) Cash payment of US\$75,000 to the Owner on or before August 31, 2020 (PAID);
  - ii) Cash payment of US\$75,000 to the Owner on or before December 15, 2020 (PAID);
  - iii) Cash payment of US\$75,000 to the Owner on or before June 1, 2021 (contract amended);
  - iv) Cash payment of US\$75,000 to the Owner on or before December 15, 2021 (contract amended);
  - v) Cash payment of US\$4,000,000 to the Owner on or before December 31, 2021 (contract amended)

In the event the Company makes the \$4,000,000 cash payment due under Note 6 (c)(v) above on or before August 31, 2021, the cash payments set forth under Notes 5(c)(iii) and 5(c)(iv) will no longer be required.

- c) Incur expenditures of not less than US\$3,000,000 as per the following schedule:
- i) Expenditures in the amount of at least US\$1,250,000 on or before December 31, 2020, of which \$350,000 must be incurred on or before October 31, 2020, subject to award of all necessary Permits and contractor availability (PAID);
  - ii) Expenditures in the amount of at least an additional US\$1,750,000 on or before December 31, 2021 (incurred).

In accordance with the terms of the Option Agreement, upon exercising the Initial Earn-In Option, a joint venture (the "Joint Venture") will be formed. A Joint Venture Agreement will be negotiated and entered into by the Company and AGEI as soon as practicable thereafter, and in any event within thirty days of the exercise of the Initial Earn-In Option.

Upon formation of the Joint Venture, the Company will hold a 51% interest and AGEI will hold a 49% interest. For one year from the effective date of the Joint Venture Agreement, the Company will be entitled to provide AGEI with notice that it is exercising the option to acquire an additional 24% interest in the Property (the "Bump Up Option"). If AGEI does not reject the option or the Bump Up Option, the Company shall be entitled, for a period of four years from the date of the Bump-Up Option Notice of Intent, to acquire up to an additional 24% in the Joint Venture through the funding of up to US\$10,000,000 in expenditures provided, for each US\$1,000,000 of expenditures incurred by the Company during the Bump Up Option term, the Company shall be entitled to an additional 2.4% interest in the Joint Venture.

Upon the Company earning a 75% share in the Joint Venture, AGEI will be entitled to receive a 2% Net Smelter Returns royalty on the Property. The Company has the right to purchase the first 1% of the royalty for \$1,000,000 and the remaining 1% for \$1,000,000 at any time during the starting from the date of commencement of commercial production.

On January 25, 2021, the Company announced it had amended the terms of its option to acquire up to a 75% interest in the Property. Pursuant to the amending agreement, the original requirement to make a US\$4,000,000 cash payment on or before December 31, 2021 was revised to require a cash payment of US\$1,700,000 and the issuance of 326,667 common shares of the Company to the Owner on or before January 29, 2021. Upon final payment being made, AGEI will have earned its entitlement to the Property subject to a 2% NSR under the underlying option agreement.

In connection with the amending agreement, the Company also agreed to pay a consulting fee of US\$50,000 in cash and issued 8,167 common shares.

On January 27, 2021, the Company issued 334,833 common shares of the Company and paid a total of US\$1,750,000 pursuant to the amending agreement.

On December 13, 2021, upon reaching the \$3,000,000 USD qualifying expenditure total, the Company announced the formation of a Joint Venture with "AGEI" to continue the advancement of the Independence Property. The Joint Venture was formed pursuant to the Option Agreement and the Amending Agreement described above.

Key terms of the Joint Venture include:

- (i) The Company has an initial 51% interest in the Independence project while AGEI holds an initial 49% interest.

- (ii) The Company is the operator and is entitled to a 10% operator fee until a production decision is made on the Independence Property.
- (iii) Both the Company and AGEI must contribute to funding further development at the Independence project on a pro-rata basis or have their interest diluted as per the standard formula outlined by the Rocky Mountain Mineral Law Foundation.
- (iv) Should either party of the Joint Venture be diluted to a 15% interest that interest will be converted into a 2% NSR on the Independence Property of which half (ie. 1%) can be repurchased for US\$4,000,000.

### **Fraser Lake Property**

The Company acquired by staking the Fraser Lake copper project in March, 2022. The project consists of three distinct claim groups totaling approximately 9,900 hectares, lying 40 to 55 kilometres northwest of Fraser Lake, proximal to the Quesnel Trough.

The Fraser Lake copper project is being explored for porphyry copper and molybdenum associated with a series of Endako plutons, intruding Cache Creek complex, carbonate, clastic and volcanic rocks. The Quest West regional lake sediment geochemistry identified areas of anomalous copper and/or molybdenum in the drainage systems from the low ridges hosting the plutons. A 2008 AeroTEM 3 airborne electromagnetic and magnetometer survey identified magnetic and/or electromagnetic anomalies up drainage from the anomalous geochemistry that make compelling exploration targets.

On March 30, 2023 Nexus Uranium announced the signing of an option agreement for the Fraser Lake copper property. Pursuant to the terms of the option agreement, Valleyview Resources Ltd., a private British Columbia company, has the right to acquire a 100% interest, subject to a 2% net smelter return (NSR) royalty, in the three claim blocks comprising the 9,900-hectare project, by making stage payments of three million shares and exploration expenditures of \$300,000. The Company understands that Valleyview intends to complete an initial public offering and concurrent stock exchange listing.

Under the terms of the option agreement, Valleyview can earn an initial 51% interest through the issuance of 1.0 million shares and incurring \$100,000 in exploration expenditures within the first 12 months, and an additional 49% interest through the issuance of 2.0 million shares and incurring \$200,000 in exploration expenditures within 18 months of acquiring the initial 51% ownership. Nexus Uranium will retain a 2% NSR royalty, of which 1% can be repurchased for \$2.0-million in cash. Following the acquisition of the initial 51%, if Valleyview elects to not acquire the remaining 49%, both companies shall form a standard joint venture based on pro rata ownership.

### **Fraser Lake Exploration Completed During the Year ended November 30, 2023**

Joint venture partner Valleyview Resources Ltd. completed the exploration expenditures portion of the agreement in June 2023. They completed a grid soil sampling program over three distinct areas in the claim block, collecting 666 samples. The soil sampling program was designed to test the targets identified by Mr. Warren Robb in his technical report dated October 15, 2022. The assay results were outstanding as of November 30, 2023.

### **Fraser Lake Exploration Completed Subsequent to the Year ended November 30, 2023**

A Technical Report prepared on behalf of Valleyview Resources Ltd. and documenting the May-June 2023 exploration program was completed subsequent to quarter end. In addition, on September 8,

2023, the company received 1.0 million common shares of Valleyview Resources Ltd., a private British Columbia company, as the final milestone towards the initial earn in of 51% of the Fraser Lake claim located proximal to the Quesnel Trough of Central British Columbia. Under the terms of the option agreement, which was entered into on March 30, 2023, Valleyview has earned a 51% stake through the issuance of the 1.0 million shares and incurring over \$100,000 in exploration expenditures within the first 12 months of the option agreement.

### **Napolean Property**

On March 24, 2023, the Company completed the acquisition (the “Napoleon Acquisition”) of all the issued and outstanding securities of 1396791 B.C. Ltd. ("Napoleon"), pursuant to a three-cornered amalgamation involving 1396791 B.C. Ltd., 1406126 B.C. Ltd. (the successor corporation), and the Company. As part of the Napoleon acquisition, all outstanding common shares of 1396791 B.C. Ltd. were exchanged for 7,000,000 common shares of the Company. Napoleon’s principal asset, acquired through this transaction, is a 100% interest in the Napoleon property located in Kamloops, British Columbia, Canada.

The Napoleon property is comprised of 996 hectares located in the Kamloops Mining Division which is northwest of the city of Kamloops, BC. The underlying claims comprising the Napoleon property are wholly-owned with no underlying royalties.

The Napoleon acquisition was an asset acquisition under IFRS because 1396791 B.C. Ltd. did not meet the definition of a business under IFRS 3, as only inputs were acquired and there were no processes that when applied could generate outputs. The purpose of the acquisition of 1396791 B.C. Ltd. was the purchase of the Napoleon Property and the acquisition consideration was reflected as the fair value of the Napoleon Property.

On April 13, 2023 Nexus Uranium announced the Company has increased the project's size by about 506 acres or 20 per cent to 3,168 acres through direct staking based on prospective historical sampling results. The Napoleon project represents a contiguous 3,168-hectare land position which is wholly owned with no underlying royalties.

### **Napolean Exploration Completed During the Year ended November 30, 2023**

On July 13, 2023, Nexus Uranium announced the completion of a phase one exploration program at the Napoleon. A rock sampling and prospecting program was undertaken by Tripoint Geological Services during June. A total of 13 rock samples were collected and submitted to ALS Global for analysis. In the southern portion of the Napoleon claims, the prospecting program at Napoleon located similar intrusive to those hosting the Bonaparte deposit, along with vuggy quartz veins hosted in Nicola Group rocks in the north, which represents a second potential host of mineralization.

In the southern portion of the claims closest to the Bonaparte mine, prevalent subcrop of quartz diorite occurs hosting up to 5% disseminated pyrite and pyrrhotite which appears genetically similar to that observed at the Bonaparte mine. Vuggy quartz veins hosted in Nicola Group rocks located in the northern portion of the claim block represents a second potential host of mineralization. The Company is reviewing the results and conducting QA/QC and expects to release the results in due course.

The technical content of this Management Discussion and Analysis has been reviewed and approved by R. Tim Henneberry, P.Geo. (BC) a Director of Nexus Uranium and a Qualified Person under National Instrument 43-101.

## **Wray Mesa Property**

Pursuant to an option agreement with Basin Uranium Corp. (the “Owner”) dated October 16, 2023, the Company was granted an option to acquire up to a 90% interest in the Wray Mesa uranium project in Utah, USA. (the “Wray Mesa Property”). The Wray Mesa Property, consisting of 308 unpatented mining claims, is subject to a joint venture formation upon the Company's fulfillment of specific conditions as outlined below:

First Option: To earn a 51% interest in the Wray Mesa Property, the Company must:

- Issue 300,000 common shares and make a cash payment of \$50,000 within five days of approval of the Canadian Securities Exchange (the “CSE Approval”); (Paid)
- Incur US\$250,000 in exploration expenditures by the first anniversary of the CSE Approval;
- Pay \$100,000 in cash and issue \$250,000 equivalent of common shares by the second anniversary of the CSE Approval; and
- Incur an additional US\$500,000 in exploration expenditures by the second anniversary of the CSE Approval.

Second Option: Upon fulfilling the First Option, the Company may acquire an additional 20% interest (for a total of 71%) by:

- Paying \$75,000 in cash and issuing \$250,000 equivalent of common shares by the third anniversary of the CSE Approval; and
- Incurring an additional US\$1,000,000 in exploration expenditures by the third anniversary of the CSE Approval.

Third Option: Upon fulfilling the Second option, the Company may acquire a further 19% interest (for a total of 90%) by:

- Paying \$75,000 in cash and issuing \$250,000 equivalent of common shares by the fourth anniversary of the CSE Approval; and
- Incurring an additional US\$1,000,000 in exploration expenditures by the fourth anniversary of the CSE Approval.

Pursuant to the option agreement for the Wray Mesa Property, the Company also accepted assignment of a royalty agreement from the Optionor which includes a 1.25% net smelter royalty payable on the property to Planteau Ventures LLC.

Upon the exercise of the options and achievement of a 90% interest by the Company, a Joint Venture (“JV”) will be established. The JV Agreement, to be negotiated and entered promptly, will formalize the JV's governance, including the formation of a management committee and the provision for dilution mechanisms and funding obligations aligned with industry standards per the Rocky Mountain Mineral Law Foundation. The Company, as the operator, will oversee the JV's exploration and development efforts, with both parties contributing to future expenditures in proportion to their JV interests. This arrangement also includes provisions for handling default, assignment, force major events, confidentiality, dispute resolution through arbitration, and the detailed responsibilities of each party throughout the option period and upon the formation of the JV.

## Yukon Claims

On April 25, 2023, the Company announced that it had acquired a portfolio of quartz mining claims located in eastern Yukon which were previously held by Bearing Lithium Corp. The Yukon claims are comprised of three projects covering almost 8,000 hectares, the HY-Jay, VBA and VM, all of which are located along the 50-kilometre Upper Hyland River Gold Belt. This belt of favourable stratigraphy, comprised of Upper Proterozoic to Lower Cambrian Hyland Group, is host to several high-grade, sediment-hosted orogenic gold vein occurrences. The acquisition of these claims took place for no material consideration. The Company is currently aggregating all the historical exploration data from these projects in order to determine the best next best steps forward for the projects.

A summary of the Company's acquisition and exploration expenditures for the year ended November 30, 2023 is presented below:

	Acquisition Costs	Exploration Costs	Total
	\$	\$	\$
Balance, November 30, 2021	5,650,130	3,772,606	9,422,736
Acquisition and exploration costs	17,302	327,999	345,301
Balance, November 30, 2022	5,667,432	4,100,605	9,768,037
Acquisition and exploration costs	3,807,968	308,278	4,116,246
Balance, November 30, 2023	9,475,400	4,408,883	13,884,283

## SELECTED ANNUAL INFORMATION (\$000's except loss per share)

	November 30, 2023	November 30, 2022	November 30, 2021	November 30, 2020

## OPERATIONS

### Twelve-month period ended November 30, 2023

During the year ended November 30, 2023 the Company reported a net comprehensive loss of \$1,522,611 (2022 - \$936,690). Included in the determination of operating loss was:

Advertising and promotion – The Company engaged multiple marketing firms during the fiscal year ended November 30, 2023 in order to increase investor awareness around the work being done at the

Company's Independence property in Nevada. Total advertising and promotional expense for fiscal 2023 was \$669,053 (2022 - \$191,815) which was in line with the Company's budget for the year.

Rent – Rent decreased during fiscal 2023 to \$20,952 (2022 - \$24,762). The Company's Corporate Head Office remains at 503-905 Pender St. W in Vancouver, BC.

Professional fees – The Company incurred professional fees of \$188,725 (2022 - \$97,013) for the year ended November 30, 2023. The increase in fees over the prior year related to increased operations within the Company including: Financing efforts; Negotiations of property purchases, and an increase in general corporate maintenance.

Management fees – Management fees for 2023 totaled \$196,619 (2022 - \$241,549). In the final quarter of fiscal 2023, the Company reached consulting agreements with key management to oversee the expansion of the business into Utah.

Transfer agent and filing fees – The total expenditure relating to transfer agent and filing fees for 2023 was \$75,910 (2022 - \$49,443). Additional news flow along with associated costs to maintain listings on multiple exchanges led to the increase in 2023 over the prior year.

Travel and entertainment – Total travel and entertainment expense for the year ended November 30, 2023 was \$Nil (2022 - \$14,149). As remote work has increased since the COVID-19 pandemic, the Company has conducted less on-site visits in 2023.

Stock based compensation – Total stock based compensation in 2023 was \$280,289 (2022 - \$18,596). Share based compensation represents the estimated fair value of various equity which was granted, either as options to management and contractors, or as broker warrants on financial raises. The majority of the stock based payment recorded in 2023 relates to options which were issued during the 2023 financial year which vested in the current fiscal year.

**Three-month period ended November 30, 2023**

During the three-month period ended November 30, 2023, the Company reported a net loss of \$166,691 (2022 - \$381,588). A summary of material expenditures included in the determination of operating loss was as follows:

Advertising and promotion – The Company incurred advertising and promotional recovery of \$15,000 (2022 - \$Nil). The Company decreased the marketing expenditure materially over the prior year as there was a heavy focus on marketing the Independence project when it was acquired in late 2020. The amount recovered represents a refund of advertising initially budgeted.

Management fees – Management fees for the three-month period ended November 30, 2023 totaled \$41,000 (2022 - \$51,000). Management fees include fees paid to the Company's CEO, CFO and former COO. The management fees paid in the quarter decreased compared to the prior year due to the retirement of the Company's COO in late fiscal 2023.

Professional fees – The Company incurred professional fees of \$59,832 (2022 - \$22,041) for the quarter ended November 30, 2023. The current quarter's expenses represent general legal maintenance costs.

Consulting fees – The Company incurred consulting fees of \$15,000 (2022 - \$15,000) during the fourth quarter of 2023.

## LIQUIDITY AND CAPITAL RESOURCES

The Company's cash and cash equivalents at November 30, 2023 were \$1,241,952 compared to \$673,366 at November 30, 2022. The Company had working capital of \$1,245,517 as at November 30, 2023.

## OFF-BALANCE SHEET ARRANGEMENTS

The Company has not entered into any off-balance sheet arrangements.

## TRANSACTIONS WITH RELATED PARTIES

Parties are considered to be related if one party has the ability, directly or indirectly, to control the other party or exercise significant influence over the other party in making financial and operating decisions. Related parties may be individuals or corporate entities. A transaction is considered to be a related party transaction when there is a transfer of resources or obligations between related parties.

The Company has incurred the following key management personnel cost from related parties:

	Year ended November 30, 2023	Year ended November 30, 2022
	\$	\$
Management fees	196,619	241,549
Share-based payments	231,941	18,596
Total	428,560	260,145

Key management includes directors and key officers of the Company, including the President, Chief Executive Officer ("CEO"), Chief Financial Officer ("CFO") and Chief Operating Officer ("COO")

As at November 30, 2023, included in the accounts payable of the Company was an amount of \$7,350 (2022 - \$7,350) due to a Company controlled by the CFO of the Company, and \$5,250 (2022 - \$27,250) due to a Company controlled by the CEO of the Company. The amounts are unsecured, non-interest bearing, due on demand and included in accounts payable and accrued liabilities.

During the year ended November 30, 2023, the Company entered into an option agreement to acquire the Wray Mesa property from Basin Uranium Corp, an entity related to the Company by virtue of a common officer, being the CFO of the Company and Basin Uranium Corp. Refer to Note 6 for further information.

## COMMITMENTS

There were no material commitments.

## **SUBSEQUENT EVENTS**

The Company cancelled 53,334 incentive stock options (the “Options”) issued pursuant to its prior option plan. The cancelled Options had an exercise price of \$7.80 and expiry date of October 14, 2025.

The Company engaged Resultz Ventures Inc. (“Resultz”) to provide capital markets advisory services to the Company, effective December 1, 2023 for a term of one year. As compensation for these services, the Company has agreed to grant Resultz a total of 200,000 restricted share units (“RSUs”).

The Company agreed to grant to Mr. Christopher Hill 650,000 RSUs for corporate development services provided by Mr. Hill pursuant to a corporate development agreement (the “Hill Agreement”) dated February 1, 2023 between Mr. Hill and the Company. The Hill Agreement continues on a month-to-month basis until otherwise terminated.

The Company issued 2,744,632 common shares pursuant to the exercise of 170,000 stock options and 2,574,632 warrants exercised for proceeds of \$79,050 and \$1,287,316 respectively.

On March 19, 2024, the Company entered into an option agreement with CanAlaska Uranium Ltd. Pursuant to this agreement, the Company has the right to acquire up to a 75% interest in the Cree East uranium project located in Saskatchewan, Canada for aggregate consideration of \$2,000,000 in cash, issuance of common shares equivalent to \$10,000,000 and incurring exploration expenditures totaling \$19,000,000. The Company has also agreed to issue 1,500,000 common shares to certain finders.

The Company engaged MIC Market Information & Content Publishing GmbH (“MIC”) for provision of marketing and advertising services in exchange for total consideration paid of EUR 500,000.

The Company engaged Sideways Frequency LLC for provision of marketing and advertising services in exchange for total consideration paid of USD 300,000.

## **ADOPTION OF NEW ACCOUNTING STANDARDS, INTERPRETATIONS AND AMENDMENTS**

There are no accounting pronouncements with future effective dates that are applicable or are expected to have a material impact on the Company’s consolidated financial statements.

## **CRITICAL ACCOUNTING ESTIMATES AND JUDGEMENTS**

The preparation of these financial statements requires management to make certain estimates, judgements and assumptions that affect the reported amounts of assets and liabilities at the date of the financial statements and reported amounts of expenses during the reporting year. Actual outcomes could differ from these estimates. These financial statements include estimates which, by their nature, are uncertain. The impacts of such estimates are pervasive throughout the financial statements, and may require accounting adjustments based on future occurrences. Revisions to accounting estimates are recognized in the year in which the estimate is revised and future years if the revision affects both current and future years. These estimates are based on historical experience, current and future economic conditions and other factors, including expectations of future events that are believed to be reasonable under the circumstances.

Significant assumptions about the future and other sources of estimation uncertainty that management has made at the financial position reporting date, that could result in a material adjustment to the carrying

amounts of assets and liabilities, in the event that actual results differ from assumptions made, relate to, but are not limited to, the following:

*Significant accounting estimates*

- i. the measurement of deferred income tax assets and liabilities; and
- ii. the inputs used in accounting for share-based payments.

*Significant accounting judgements*

- i. the determination of categories of financial assets and financial liabilities;
- ii. the evaluation of the Company's ability to continue as a going concern; and
- iii. the assessment of impairment of the Company's exploration and evaluation assets and related determination of the net realizable value and write-down of the exploration and evaluation assets where applicable.

## **SHARE CAPITAL**

### Issued

The company had 18,494,748 shares issued and outstanding as at November 30, 2023 and 21,539,378 shares issued and outstanding as at March 21, 2024

For the period ended November 30, 2023, the Company had the following share capital transactions:

On March 1, 2023, the Company completed a non-brokered private placement consisting of 7,076,354 units at a price of \$0.31 per unit for total gross proceeds of \$2,193,670. Each unit consists of one common share and one whole common share purchase warrant. Each warrant is exercisable for one additional common share at an exercise price of \$0.50 for a period of two years. In connection with the private placement, the Company paid an aggregate of \$68,542 in finders' fees and other issuance costs and issued 236,778 finders' warrants. The finders' warrants have the same term as the share purchase warrants.

On March 23, 2023, the Company entered into an agreement to acquire the Napoleon Property located in Kamloops, British Columbia, pursuant to a three-cornered amalgamation with 1396791 B.C. Ltd., 1406126 B.C. Ltd. and the Company. As consideration, 7,000,000 common shares of the Company with a fair value of \$3,640,000 were issued to shareholders of 1396791 B.C. Ltd.

On October 16, 2023, the Company entered into an option agreement to acquire the Wray Mesa Uranium property located in San Juan County, Utah. The Property is being acquired pursuant to an option agreement. As consideration, the Company issued 300,000 common shares on October 24, 2023 with a fair value of \$111,000.

For the year ended November 30, 2022, the Company had the following share capital transactions:

The Company settled a litigation commenced in April 2021. Pursuant to the terms of the settlement, the Company has paid US\$60,000 and issue 238,000 common shares of the Company to Independence Gold-Silver Mines, Inc. As a result of the settlement, the parties have released all claims against each other and have agreed to file to dismiss the claims pending in the Court of the State of Nevada.

On November 1, 2022, the Company completed a consolidation of its issued and outstanding common shares on the bases of fifteen (15) pre-consolidation common shares, options and warrants to one (1) post consolidation common share, option, and warrant (the "Share Consolidation"). The Share Consolidation has been presented throughout the financial statements retroactively and all equity related figures are presented on a post-consolidation basis.

### Share Purchase Options

As at November 30, 2023, there were 1,032,334 stock options outstanding and 775,667 stock options outstanding as at March, 21, 2024

For the period ended November 30, 2023, the Company had the following share capital transactions:

On March 24, 2023, the company granted an aggregate of 830,000 options to purchase up to a total of 830,000 common shares (the "Option Shares") in the capital of the Company, at an exercise price of \$0.465 per Option Share, for a period of five years from the date of grant, in accordance with the company's stock option plan. The options will vest at 25% every three months from the grant date and will be fully vested by December 24, 2023. The share-based payments expense recognized for these options granted in the current year was \$278,591.

On October 30 2023 the company granted 100,000 options to purchase up to a total of 100,000 common shares (the "Option Shares") in the capital of the Company, at an exercise price of \$0.38 per Option Share, for a period of five years from the date of grant, in accordance with the Plan. The options will vest at 25% every three months from the grant date and will be fully vested by October 30, 2024. The share-based payments expense recognized for these options granted in the current year was \$844.

During the year ended November 30, 2023, 23,333 options previously outstanding expired or were surrendered, resulting in a reduction of the contributed surplus account of \$106,550. These options were removed from the Company's stock option registry.

For the year ended November 30, 2022, the Company had the following share capital transactions:

During the year ended November 30, 2022, 80,000 options previously outstanding expired or were forfeited resulting in a reduction of the contributed surplus account of \$587,191. These options were removed from the Company's stock option registry.

On April 18, 2022, the Company granted 15,667 stock options to certain directors of the Company at an exercise price of \$1.50 for a period of five years. These options vest immediately upon issuance. The fair value of these options was calculated to be \$18,596 and was recognized as share-based payments on the Company's Consolidated Statements of Comprehensive Loss during the year ended November 30, 2022.

## Warrants

As at November 30, 2023, there were 7,313,132 warrants outstanding and 4,738,999 warrants outstanding as at March, 21, 2024

For the period ended November 30, 2023 the Company had the following share capital transactions:

3,333 warrants previously outstanding expired on December 9, 2022.

384,203 warrants previously outstanding expired on April 9, 2023.

On March 01, 2023, the Company issued 236,778 Finders Warrants at an exercise price of \$0.50. The fair market value of these warrants, determined to be \$67,915, was calculated based on the Black Scholes method.

During the year ended November 30, 2022, the Company had the following share capital transactions:

6,667 warrants previously outstanding were cancelled. These warrants were removed from the Company's warrant registry.

## **FINANCIAL INSTRUMENTS**

### Fair Value of Financial Instruments

The Company's financial assets include cash and is classified as Level 1. The carrying value of these instruments approximates their fair values due to the relatively short periods of maturity of these instruments.

Assets measured at fair value on a recurring basis were presented on the Company's Statement of Financial Position as at November 30, 2023 are as follows:

	Fair Value Measurements Using			Total
	Quoted Prices in Active Markets For Identical Instruments (Level 1)	Significant Other Observable Inputs (Level 2)	Significant Unobservable Inputs (Level 3)	
	\$	\$	\$	\$
Cash	1,241,952	–	–	1,241,952

### Fair value

The fair value of the Company's financial instruments approximates their carrying value as at November 30, 2023 because of the demand nature or short-term maturity of these instruments.

### Financial risk management objectives and policies

The Company's financial instruments include cash and accounts payable. The risks associated with these financial instruments and the policies on how to mitigate these risks are set out below. Management manages and monitors these exposures to ensure appropriate measures are implemented on a timely and effective manner.

*(i) Currency risk*

The Company's expenses are denominated in Canadian dollars. The Company's corporate office is based in Canada and current exposure to exchange rate fluctuations is minimal.

The Company does not have any significant foreign currency denominated monetary liabilities. The principal business of the Company is the identification and evaluation of assets or a business and once identified or evaluated, to negotiate an acquisition or participation in a business subject to receipt of shareholder approval and acceptance by regulatory authorities.

*(ii) Interest rate risk*

The Company is exposed to interest rate risk on the variable rate of interest earned on bank deposits. The fair value interest rate risk on bank deposits is insignificant as the deposits are short-term.

The Company has not entered into any derivative instruments to manage interest rate fluctuations.

*(iii) Credit risk*

Credit risk is the risk of loss associated with the counterparty's inability to fulfill its payment obligations. Financial instruments that potentially subject the Company to concentrations of credit risks consist principally of cash. To minimize the credit risk the Company places these instruments with a high-quality financial institution.

*(iv) Liquidity risk*

In the management of liquidity risk of the Company, the Company maintains a balance between continuity of funding and the flexibility through the use of borrowings. Management closely monitors the liquidity position and expects to have adequate sources of funding to finance the Company's projects and operations.

**Additional Risk Factors**

There are a number of risks that may have a material and adverse impact on the future operating and financial performance of the Company and could cause the Company's operating and financial performance to differ materially from the estimates described in forward-looking statements relating to the Company. These include widespread risks associated with any form of business and specific risks associated with the Company's business and its involvement in the precious metal exploration and development industry.

This section describes risk factors identified as being potentially significant to the Company and its material properties. Additional risk factors may be included in technical reports or other documents previously disclosed by the Company. In addition, other risks and uncertainties not discussed to date or not known to management could have material and adverse effects on the valuation of our securities, existing business activities, financial condition, results operations, plans and prospects.

**Reliance on Key Personnel**

The senior officers of the Company are critical to its success. In the event of the departure of a senior officer, the Company believes that it will be successful in attracting and retaining qualified successors but there can be no assurance of such success. Recruiting qualified personnel as the Company grows is

critical to its success. The number of persons skilled in the acquisition, exploration and development of mining properties is limited and competition for such persons is intense. As the Company's business activity grows, it will require additional key financial, administrative, engineering, geological and mining personnel as well as additional operations staff. If the Company is not successful in attracting and training qualified personnel, the efficiency of its operations could be affected, which could have an adverse impact on future cash flows, earnings, results of operations and the financial condition of the Company. The Company is particularly at risk at this stage of its development as it relies on a small management team, the loss of any member of which could cause severe adverse consequences.

### **Substantial Capital Requirements and Liquidity**

The Company anticipates that it will make substantial capital expenditures for the continued exploration and development of the Independence Project in the future. The Company currently has no revenue and may have limited ability to undertake or complete future drilling, permitting and mine development. There can be no assurance that debt or equity financing, or cash generated by operations will be available or sufficient to meet these requirements or for other corporate purposes or, if debt or equity financing is available, that it will be on terms acceptable to the Company. Moreover, future activities may require the Company to alter its capitalization significantly. The inability of the Company to access sufficient capital for its operations could have a material adverse effect on the Company's financial condition, results of operations or prospects. Sales of substantial amounts of securities may have a highly dilutive effect on the ownership or share structure of the Company. Sales of a large number of common shares in the public markets, or the potential for such sales, could decrease the trading price of the common shares and could impair the Company's ability to raise capital through future sales of common shares.

The Company has not yet commenced commercial production at any of its properties and as such, it has not generated positive cash flows to date and has no reasonable prospects of doing so unless successful commercial production can be achieved at one or more of its Properties. The Company expects to continue to incur negative investing and operating cash flows until such time as it enters into commercial production. This will require the Company to deploy its working capital to fund such negative cash flow and to seek additional sources of financing. There is no assurance that any such financing sources will be available or sufficient to meet the Company's requirements. There is no assurance that the Company will be able to continue to raise equity capital or that the Company will not continue to incur losses.

### **Property Commitments**

The Company's mining properties may be subject to various land payments, royalties and/or work commitments. Failure by the Company to meet its payment obligations or otherwise fulfill its commitments under these agreements could result in the loss of related property interests.

### **Exploration and Development**

Exploring and developing natural resource projects bears a high potential for all manner of risks. Additionally, few exploration projects successfully achieve development due to factors that cannot be predicted or foreseen. Moreover, even one such factor may result in the economic viability of a project being detrimentally impacted such that it is neither feasible nor practical to proceed. Natural resource exploration involves many risks, which even a combination of experience, knowledge and careful evaluation may not be able to overcome. Operations in which the Company has a direct or indirect interest will be subject to all the hazards and risks normally incidental to exploration, development and production of natural resources, any of which could result in work stoppages, damage to property, and possible environmental damage. If any of the Company's exploration programs are successful, there is a

degree of uncertainty attributable to the calculation of resources and corresponding grades being extracted or dedicated to future production.

### **Operational Risks**

The Company will be subject to a number of operational risks and may not be adequately insured for certain risks, including: environmental pollution, accidents or spills, industrial and transportation accidents, which may involve hazardous materials, labour disputes, catastrophic accidents, fires, blockades or other acts of social activism, changes in the regulatory environment, impact of non-compliance with laws and regulations, natural phenomena such as inclement weather conditions, floods, earthquakes, ground movements, cave-ins, and encountering unusual or unexpected geological conditions and technological failure of exploration methods.

There is no assurance that the foregoing risks and hazards will not result in damage to, or destruction of, the property of the Company, personal injury or death, environmental damage or, regarding the exploration or development activities of the Company, increased costs, monetary losses and potential legal liability and adverse governmental action, all of which could have an adverse impact on the Company's future cash flows, earnings, results of operations and financial condition.

Additionally, the Company may be subject to liability or sustain loss for certain risks and hazards against which the Company cannot insure or which the Company may elect not to insure because of the cost. This lack of insurance coverage could have an adverse impact on the Company's future cash flows, earnings, results of operations and financial condition.

### **Environmental Risks**

All phases of mineral exploration and development businesses present environmental risks and hazards and are subject to environmental regulations. Environmental legislation provides for, among other things, restrictions and prohibitions on spills, releases or emissions of various substances used and or produced in association with natural resource exploration and production operations. The legislation also requires that facility sites be operated, maintained, abandoned and reclaimed to the satisfaction of applicable regulatory authorities. Compliance with such legislation can require significant expenditures and a breach may result in the imposition of fines and penalties, some of which may be material. Environmental legislation is evolving in a manner expected to result in stricter standards and enforcement, larger fines and liability and potentially increased capital expenditures and operating costs. The discharge of pollutants into the air, soil or water may give rise to liabilities to foreign governments and third parties and may require the Company to incur costs to remedy such discharge. No assurance can be given that the application of environmental laws to the business and operations of the Company will not result in a curtailment of production, or a material increase in the costs of production, development or exploration activities or otherwise adversely affect the Company's financial condition, results of operations or prospects.

The Company's development opportunities at the Independence Project are subject to potential future risks related to water-use considerations. Desert basins, by their very nature, have limited water resources, and future supplemental demands can result in conflicting requirements for those resources. Future negotiation and apportioning of water resources has the potential to adversely affect the Company's operations or prospects.

### **Volatility of the Market Price of the Company's Common Shares**

The Company's common shares are listed on the Canada Securities Exchange ("CSE") under the symbol IGLD, on the Frankfurt Stock Exchange under the trading symbol 6NN and, on the OTCQB under the trading symbol GIDMF. The quotation of the Company's common shares on the CSE may result in a less

liquid market available for existing and potential stockholders to trade Common Shares, could depress the trading price of our common stock and could have a long-term adverse impact on our ability to raise capital in the future.

Securities of junior companies have experienced substantial volatility in the past, often based on factors unrelated to the financial performance or prospects of the companies involved. These factors include macroeconomic developments in North America/globally and market perceptions of the attractiveness of particular industries. The Company's common share price is also likely to be significantly affected by delays experienced in progressing our development plans, a decrease in the investor appetite for junior stocks, or in adverse changes in our financial condition or results of operations as reflected in our quarterly financial statements. Other factors unrelated to our performance that could have an effect on the price of the Company's common shares include the following:

- (a) The trading volume and general market interest in the Company's common shares could affect a shareholder's ability to trade significant numbers of common shares; and
- (b) The size of the public float in the Company's common shares may limit the ability of some institutions to invest in the Company's securities.

As a result of any of these factors, the market price of the Company's common shares at any given point in time might not accurately reflect the Company's long-term value. Securities class action litigation often has been brought against companies following periods of volatility in the market price of their securities. The Company could in the future be the target of similar litigation. Securities litigation could result in substantial costs and damages and divert management's attention and resources.

### **Future Share Issuances May Affect the Market Price of the Common Shares**

In order to finance future operations, the Company may raise funds through the issuance of additional common shares or the issuance of debt instruments or other securities convertible into common shares. The Company cannot predict the size of future issuances of common shares or the issuance of debt instruments or other securities convertible into common shares or the dilutive effect, if any, that future issuances and sales of the Company's securities will have on the market price of the common shares.

### **Economic and Financial Market Instability**

Global financial markets have been volatile and unstable at times since the global financial crisis, which started in 2007. Bank failures, the risk of sovereign defaults, other economic conditions and intervention measures have caused significant uncertainties in the markets. The resulting disruptions in credit and capital markets have negatively impacted the availability and terms of credit and capital. High levels of volatility and market turmoil could also adversely impact commodity prices, exchange rates and interest rates. In the short term, these factors, combined with the Company's financial position, may impact the Company's ability to obtain equity or debt financing in the future and, if obtained, on terms that are favourable to the Company. In the longer term these factors, combined with the Company's financial position could have important consequences, including the following:

- (a) Increasing the Company's vulnerability to general adverse economic and industry conditions;
- (b) Limiting the Company's ability to obtain additional financing to fund future working capital, capital expenditures, operating and exploration costs and other general corporate requirements;
- (c) Limiting the Company's flexibility in planning for, or reacting to, changes in the Company's business and the industry; and

- (d) Placing the Company at a disadvantage when compared to competitors that has less debt relative to their market capitalization.

### **Issuance of Debt**

From time to time the Company may enter into transactions to acquire assets or the shares of other companies. These transactions may be financed partially or wholly with debt, which may increase the Company's debt levels above industry standards. The Company's articles do not limit the amount of indebtedness that the Company may incur. The level of the Company's indebtedness from time to time could impair the Company's ability to obtain additional financing in the future on a timely basis to take advantage of business opportunities that may arise. The Company's ability to service its debt obligations will depend on the Company's future operations, which are subject to prevailing industry conditions and other factors, many of which are beyond the control of the Company.

### **Industry Competition and International Trade Restrictions**

The international resource industries are highly competitive. The value of any future reserves discovered and developed by the Company may be limited by competition from other world resource mining companies, or from excess inventories. Existing international trade agreements and policies and any similar future agreements, governmental policies or trade restrictions are beyond the control of the Company and may affect the supply of and demand for minerals, including gold, around the world.

### **Governmental Regulation and Policy**

Mining operations and exploration activities are subject to extensive laws and regulations. Such regulations relate to production, development, exploration, exports, imports, taxes and royalties, labor standards, occupational health, waste disposal, protection and remediation of the environment, mine decommissioning and reclamation, mine safety, toxic and radioactive substances, transportation safety and emergency response, and other matters. Compliance with such laws and regulations increases the costs of exploring, drilling, developing, constructing, operating and closing mines and refining and other facilities. It is possible that, in the future, the costs, delays and other effects associated with such laws and regulations may impact decisions of the Company with respect to the exploration and development of its current properties, or any other properties in which the Company has an interest. The Company will be required to expend significant financial and managerial resources to comply with such laws and regulations. Since legal requirements change frequently, are subject to interpretation and may be enforced in varying degrees in practice, the Company is unable to predict the ultimate cost of compliance with these requirements or their effect on operations. Furthermore, future changes in governments, regulations, government-protected areas (e.g. National Wilderness Protected Areas, Military Ranges etc.) and policies and practices, such as those affecting exploration and development of the Company's properties could materially and adversely affect the results of operations and financial condition of the Company in a particular period or in its long-term business prospects.

The development of mines and related facilities is contingent upon governmental approvals, licenses and permits which are complex and time consuming to obtain and which, depending upon the location of the project, involve multiple governmental agencies. The receipt, duration and renewal of such approvals, licenses and permits are subject to many variables outside the control of the Company, including potential legal challenges from various stakeholders such as environmental groups or non-government organizations. Any significant delays in obtaining or renewing such approvals, licenses or permits could have a material adverse effect on the Company.

### **Properties May be Subject to Defects in Title**

The Company has investigated its rights to explore and exploit the Independence and Champ Projects and, to the best of its knowledge, its rights in relation to lands forming those projects are in good standing. Nevertheless, no assurance can be given that such rights will not be revoked, or significantly altered, to the Company's detriment. There can also be no assurance that the Company's rights will not be challenged or impugned by third parties. Although the Company is not aware of any existing title uncertainties with respect to lands covering material portions of its properties, there is no assurance that such uncertainties will not result in future losses or additional expenditures, which could have an adverse impact on the Company's future cash flows, earnings, results of operations and financial condition.

### **No Revenue and Negative Cash Flow**

The Company has negative cash flow from operating activities and does not currently generate any revenue. Lack of cash flow from the Company's operating activities could impede its ability to raise capital through debt or equity its business operations. In addition, working capital deficiencies could negatively impact the Company's ability to satisfy its obligations promptly as they become due. The Company is currently operating under a working capital deficiency, and requires additional financing to ensure it can continue to maintain a positive working capital position. If the Company does not generate sufficient cash flow from operating activities it will remain dependent upon external financing sources. There can be no assurance that such sources of financing will be available on acceptable terms or at all.

### **Legal and Litigation**

All industries, including the mining industry, are subject to legal claims, with and without merit. Defense and settlement costs of legal claims can be substantial, even with respect to claims that have no merit. Due to the inherent uncertainty of the litigation process, the resolution of any particular legal proceeding to which the Company may become subject could have a material adverse effect on the Company's business, prospects, financial condition, and operating results. Defense and settlement of costs of legal claims can be substantial. There are no current claims or litigation outstanding against the Company.

### **Insurance**

The Company is also subject to a number of operational risks and may not be adequately insured for certain risks, including: accidents or spills, industrial and transportation accidents, which may involve hazardous materials, labour disputes, catastrophic accidents, fires, blockades or other acts of social activism, changes in the regulatory environment, impact of non-compliance with laws and regulations, natural phenomena such as inclement weather conditions, floods, earthquakes, tornados, thunderstorms, ground movements, cave-ins, and encountering unusual or unexpected geological conditions and technological failure of exploration methods.

There is no assurance that the foregoing risks and hazards will not result in damage to, or destruction of, the properties of the Company, personal injury or death, environmental damage or, regarding the exploration or development activities of the Company, increased costs, monetary losses and potential legal liability and adverse governmental action, all of which could have an adverse impact on the Company's future cash flows, earnings, results of operations and financial condition. The payment of any such liabilities would reduce the funds available to the Company. If the Company is unable to fully fund the cost of remedying an environmental problem, it might be required to suspend operations or enter into costly interim compliance measures pending completion of a permanent remedy.

No assurance can be given that insurance to cover the risks to which the Company's activities are subject will be available at all or at commercially reasonable premiums. The Company is not currently covered by any form of environmental liability insurance, since insurance against environmental risks (including liability for pollution) or other hazards resulting from exploration and development activities is unavailable or prohibitively expensive. This lack of environmental liability insurance coverage could have an adverse impact on the Company's future cash flows, earnings, results of operations and financial condition.

### **Conflicts of Interest**

The Company's directors and officers are or may become directors or officers of other mineral resource companies or reporting issuers or may acquire or have significant shareholdings in other mineral resource companies and, to the extent that such other companies may participate in ventures in which The Company may, or may also wish to participate, the directors and officers of the Company may have a conflict of interest with respect to such opportunities or in negotiating and concluding terms respecting the extent of such participation. The Company and its directors and officers will attempt to minimize such conflicts. If such a conflict of interest arises at a meeting of the directors of the Company, a director who has such a conflict will abstain from voting for or against the approval of such participation or such terms. In appropriate cases the Company will establish a special committee of independent directors to review a matter in which several directors, or officers, may have a conflict. In determining whether or not the Company will participate in a particular program and the interest to be acquired by it, the directors will primarily consider the potential benefits to the Company, the degree of risk to which the Company may be exposed and its financial position at that time. Other than as indicated, the Company has no other procedures or mechanisms to deal with conflicts of interest.

### **Impact of COVID-19**

The Company's business, operations, and financial condition, and the market price of the Shares, could be materially and adversely affected by the outbreak of epidemics or pandemics or other health crises, including the recent outbreak of COVID-19. To date, there have been a large number of temporary business closures, quarantines, and a general reduction in consumer activity in a number of countries. The outbreak has caused companies and various international jurisdictions to impose travel, gathering and other public health restrictions. While these effects are expected to be temporary, the duration of the various disruptions to businesses locally and internationally and the related financial impact cannot be reasonably estimated at this time. Similarly, the Company cannot estimate whether or to what extent this outbreak and the potential financial impact may extend to countries outside of those currently impacted. Such public health crises can result in volatility and disruptions in the supply and demand for gold and other minerals, global supply chains and financial markets, as well as declining trade and market sentiment and reduced mobility of people, all of which could affect commodity prices, interest rates, credit ratings, credit risk, share prices and inflation. The risks to the Company of such public health crises also include risks to employee health and safety, a slowdown or temporary suspension of operations in geographic locations impacted by an outbreak, increased labor and fuel costs, regulatory changes, political or economic instabilities or civil unrest. At this point, the extent to which COVID-19 will or may impact the Company is uncertain and these factors are beyond the Company's control; however, it is possible that COVID-19 may have a material adverse effect on the Company's business, results of operations, and financial condition and the market price of the Shares.

## **FINANCIAL AND DISCLOSURE CONTROLS AND PROCEDURES**

During the year ended November 30, 2023, there has been no significant change in the Company's internal control over financial reporting since last year.

The Chief Executive Officer and Chief Financial Officer of the Company are responsible for establishing and maintaining appropriate information systems, procedures and controls to ensure that information used internally and disclosed externally is complete, reliable and timely. They are also responsible for establishing adequate internal controls over financial reporting to provide sufficient knowledge to support the representations made in this MD&A and the Company's financial statements for the twelve-month period ended November 30, 2023.

The Chief Executive Officer and Chief Financial Officer of the Company have filed the Venture Issuer Basic Certificate with the Interim and Year End Filings on SEDAR at [www.sedar.com](http://www.sedar.com).

In contrast to the certificate required for non-venture issuers under National Instrument 52-109 Certification of Disclosure in Issuers' Annual and Interim Filings ("NI 52-109"), the venture issuer basic certificate does not include representations relating to the establishment and maintenance of disclosure controls and procedures ("DC&P") and internal control over financial reporting ("ICFR"), as defined in NI 52-109. Investors should be aware that inherent limitations on the ability of certifying officers of a venture issuer to design and implement on a cost-effective basis DC&P and ICFR as defined in NI 52-109 may result in additional risks to the quality, reliability, transparency, and timeliness of interim and annual filings and other reports provided under securities legislation.

### **APPROVAL**

The Board of Directors of the Company has approved the disclosure contained in this MD&A and the Company will be provide copies upon request.
