

Nexus Announces Closing of Flow Through Offering and Engagement of Venture Liquidity Partners

Vancouver, British Columbia--(Newsfile Corp. - June 25, 2024) - Nexus Uranium Corp. (CSE: NEXU) (OTCQB: GIDMF) (FSE: 3H1) (the "**Company**" or "**Nexus**") is pleased to announce that it has closed its previously announced non-brokered units of the Company ("**FT Units**") (the "**Offering**"). Pursuant to the Offering, the Company issued 2,887,114 FT Units at a price of \$0.52 per FT Unit to raise gross proceeds of approximately \$1,500,000.

Each FT Unit consists of one common share of the Company (a "**FT Share**") to be issued as a "flow-through share" within the meaning of within the meaning of the *Income Tax Act* (Canada) (the "**Tax Act**") and one common share purchase warrant (a "**Warrant**") each of which is exercisable to acquire one common share for 24 months following closing at an exercise price of \$0.60.

The gross proceeds from the Offering will be used to incur "Canadian exploration expenses" as defined in subsection 66.1(6) of the Tax Act and "flow through critical mineral mining expenditures" as defined in subsection 127(9) of the Tax Act at the Cree East uranium project located in the Athabasca Basin.

The Company has paid certain eligible finders cash finders' fees totalling \$102,016 in aggregate and has issued to such finders 195,030 non-transferrable warrants of the Company (the "**Finder's Warrants**"). Each Finder's Warrant is exercisable at any time prior to the date that is 24 months from closing to acquire one common share at an exercise price of \$0.52.

The Company also announces that it will retain Venture Liquidity Providers Inc. ("**VLP**") to initiate its market-making service to provide assistance in maintaining a consistent and orderly trading market for its common shares. The market-making service will be undertaken by VLP through a registered broker, W.D. Latimer Co. Ltd., in compliance with the applicable policies of the CSE and other applicable laws.

For its services, the Company has agreed to pay VLP \$5,000 per month, commencing on July 1, 2024. The agreement has an initial term of three months, following which it will renew for successive one-month terms, provided that after the initial three-month term the agreement may be terminated by either party at any time. The Company and VLP act at arm's length, and VLP has no present interest, directly or indirectly, in the Company or its securities. The fee paid by the Company to VLP is for services only.

VLP is a specialized consulting firm based in Toronto providing a variety of services focused on CSE-listed issuers. VLP's CEO, JC Cunningham, can be reached by telephone at (416) 891-4349 or by email at info@vlpinc.net.

About Nexus Uranium Corp.

Nexus Uranium Corp. is a multi-commodity development company focused on advancing the Cree East uranium project in the Athabasca Basin and the Wray Mesa uranium-vanadium project in Utah in addition to its precious metals portfolio that includes the development-stage Independence mine located adjacent to Nevada Gold Mine's Phoenix-Fortitude mine in Nevada, the Napoleon gold project in British Columbia, and a package of gold claims in the Yukon. The Wray Mesa project covers 6,282 acres within the heart of the prolific Uruvan mining district in Utah and has extensive historical drilling of over 500 holes defining multiple mineralized zones. The Independence project hosts an M&I (measured and indicated) resource of 334,300 ounces of gold (28M tonnes at 0.41 g/t gold) and an inferred resource of 847,000 ounces (9M tonnes at 3.22 g/t gold) of gold with a substantial silver credit. A 2021 Preliminary Economic Assessment (PEA) outlined a low-cost heap leach operation focusing on the near-surface resource with total production of 195,443 ounces of gold at an all-in sustaining cost of \$1,078 (U.S.) per

ounce of gold. The Napoleon project comprises over 1,000 hectares and prospective for multiple forms of gold mineralization, with exploration in the area dating back to the 1970s with the discovery of high-grade gold. The Yukon gold projects are comprised of almost 8,000 hectares of quartz claims prospective for high-grade gold mineralization with historical grab sampling highlights of 144 g/t gold.

Nexus Uranium cautions investors the preliminary economic assessment is preliminary in nature, it includes inferred mineral resources that are considered too speculative geologically to have the economic considerations applied to them that would enable them to be categorized as mineral reserves, and there is no certainty that the preliminary economic assessment will be realized. The Company further cautions investors Mineral Resources which are not Mineral Reserves do not have demonstrated economic viability and further cautions investors the quantity and grade of the reported inferred Mineral Resources are uncertain in nature and there has been insufficient exploration to define these inferred Mineral Resources as indicated Mineral Resources.

The Company cautions investors it has yet to verify the historical data and further cautions investors grab samples are selective by nature and are unlikely to represent average grades of sampling on the entire property.
