Notes to Condensed Interim Financial Statements – June 30, 2023
(Expressed in Canadian Dollars) (unaudited)

1. CORPORATE INFORMATION

Spacefy Inc. (the “Company” or “Spacefy”) is an online marketplace that connects people in creative industries, such as photographers, filmmakers, musicians, artists, ad agencies, and event planners, with locations to execute their projects.

The Company was incorporated on August 25, 2014 under the laws and regulations of the Ontario Business Corporations Act. On November 29, 2018, the Company completed an initial public offering (“IPO”) and commenced trading on the Canadian Securities Exchange under the symbol SPFY.

The financial statements were authorized for issue on August 25, 2023 by the directors of the Company.

Going concern

These financial statements have been prepared assuming the Company will continue as a going concern. The going concern basis of presentation assumes the Company will continue in operation for the foreseeable future and be able to realize its assets and discharge its liabilities and commitments in the normal course of business. However, the Company has incurred a net loss of \$41,515 (2022 - \$44,050) during the six months ended June 30, 2023 and, as of that date, had a working capital deficiency of \$583,786 (December 31, 2022 –\$542,271) and an accumulated deficit of \$5,723,027 (December 31, 2022 - \$5,681,512). Although the Company believes it will be successful, there is no guarantee the Company will attain its goal of a successful online marketplace. As a result, material uncertainty exists that may cast significant doubt about the Company’s ability to continue as a going concern.

These financial statements have been prepared on the basis of accounting principles applicable to a going concern. Accordingly, they do not give effect to adjustments that would be necessary should the Company be unable to continue as a going concern and therefore be required to realize its assets and liquidate its liabilities in other than the normal course of business and at amounts different from those in the accompanying financial statements. Such adjustments could be material. Management is of the opinion that working capital will be obtained from future cash flows by achieving profitable operations through continuing to manage expenditures and concentrating on building upon the revenue level. The Company will periodically have to raise funds to continue operations and, although it has been successful in doing so in the past, there is no assurance it will be able to do so in the future.

Given the challenges posed by COVID-19, the Company had made changes to its personnel in 2020. The Chairman of the Board was appointed as Interim President and Chief Executive Officer of the Company as the CEO has stepped away from his roles as CEO and board member. The Chief Operating Officer & VP of Marketing (a founder of the Company) stepped away from these roles, but continued to provide advisory services to the Company as needed remained on the Board of Directors. The Company dismissed all other staff positions and will outsource personnel as required.

The Company continues to pursue synergistic acquisitions and partnerships to drive growth and revenue.

The New Plan increased the number of common shares reserved for issuance under from 900,000 common shares to 10% of the number of common shares outstanding from time to time. The Company has determined that the number of common shares reserved for issuance under the New Plan in combination with the aggregate number of common shares issuable under all of the Company’s other equity incentive plans in existence from time to time, including the Stock Option Plan, shall not exceed 20% of the issued and outstanding common shares. All potential dilutive stock options and warrants were excluded from the dilutive calculations as they are anti-dilutive due to the loss for the years.

10. RISK MANAGEMENT

The Company's financial instruments are exposed to the following financial risks:

Credit risk

Credit risk arises from the potential that a counter party will fail to perform its obligations. Management does not believe there is any significant credit risk from any of the Company's customers as orders are only processed after payment is received. The Company reviews financial assets past due on an ongoing basis with the objective of identifying potential matters which could delay the collection of funds at an early stage. Once items are identified as being past due, contact is made with the respective customer to determine the reason for the delay in payment and to establish an agreement to rectify the breach of contractual terms. To manage cash credit risk, the Company only engages banks with appropriate credit ratings. Credit risk on sales tax receivable balances is considered insignificant.

Currency risk

The Company generates all revenue in Canadian dollars but expenses are incurred in both U.S. and Canadian dollars, exposing the Company to fluctuations in earnings from volatility in foreign currency rates. Management however concludes the exposure to currency risk is not material and the Company does not utilize any financial instruments or cash management policies to mitigate such currency risks.

Liquidity risk

Liquidity risk is the risk that an entity will encounter difficulty in meeting obligations associated with financial liabilities. The Company is exposed to this risk mainly with respect to ensuring the sufficiency of funds for working capital and commitments. The Company monitors the maturity dates of existing accounts payable and accrued liabilities, loans payable, and commitments to mitigate this risk. The Company's financial liabilities are comprised of accounts payable and accrued liabilities, loan payable and loans from related parties. See Note 1 related to going concern.

The payments due by period are set out in the following tables:

As at June 30, 2023:

As at December 31, 2022:

Fair Value Risk

Due to their short-term nature, the carrying value of cash and cash equivalents, accounts receivable, accounts payable and accrued liabilities and loans payable from related parties approximates their fair value.

11. CAPITAL MANAGEMENT

The Company's capital management objectives are to ensure its ability to continue as a going concern and to grow its operations. The Company derives its financing from internally generated revenue and external sources. The capital structure of Spacefy currently consists of Shareholders' deficiency and loans payable. The Company manages the capital structure and makes adjustments to it in the light of changes in economic conditions and the risk characteristics of the underlying assets. This may involve Spacefy arranging more loans, issuing new shares through private placements, or selling assets to fund operations. Management reviews its capital management approach on a regular basis. The Company is not subject to externally imposed capital requirements.

The Company invests all capital that is surplus to its immediate operational needs in short-term, liquid and highly-rated financial instruments, such as cash and other short-term guaranteed deposits, all held with major financial institutions.
