**SPEY RESOURCES CORP.**  
**NOTES TO THE CONDENSED INTERIM FINANCIAL STATEMENTS**  
**FOR THE NINE MONTH PERIOD ENDED AUGUST 31, 2018**

(Expressed in Canadian dollars)

(UNAUDITED)

---

1. NATURE OF OPERATIONS

Spey Resources Corp. ("the Company") was incorporated on July 31, 2017 under the laws of British Columbia. The address of the Company's corporate office and its principal place of business is 900-580 Hornby Street, Vancouver, British Columbia, Canada.

The Company's principal business activities include the acquisition and exploration of mineral property assets. As at August 31, 2018, the Company had not yet determined whether the Company's mineral property asset contains ore reserves that are economically recoverable. The recoverability of amount shown for exploration and evaluation asset is dependent upon the discovery of economically recoverable reserves, confirmation of the Company's interest in the underlying mineral claims, the ability of the Company to obtain the necessary financing to complete the development of and the future profitable production from the property or realizing proceeds from its disposition. The outcome of these matters cannot be predicted at this time and the uncertainties cast significant doubt upon the Company's ability to continue as a going concern.

The Company had a deficit of \$272,977 as at August 31, 2018, which has been funded by the issuance of equity. The Company's ability to continue its operations and to realize its assets at their carrying values is dependent upon obtaining additional financing and generating revenues sufficient to cover its operating costs.

These financial statements do not give effect to any adjustments which would be necessary should the Company be unable to continue as a going concern and therefore be required to realize its assets and discharge its liabilities in other than the normal course of business and at amounts different from those reflected in these financial statements.

2. SIGNIFICANT ACCOUNTING POLICIES

a) Statement of compliance

These financial statements have been prepared in accordance with International Financial Reporting Standards ("IFRS") issued by the International Accounting Standards Board ("IASB").

These financial statements were authorized for issue in accordance with a resolution from the Board of Directors on October 29, 2018.

b) Basis of presentation

The financial statements have been prepared on the historical cost basis, with the exception of financial instruments which are measured at fair value, as explained in the accounting policies set out below. In addition, these financial statements have been prepared using the accrual basis of accounting, except for cash flow information.

The accounting policies set out below have been applied consistently to all periods presented in these financial statements.

c) Cash equivalents

Cash equivalents include short term deposits with an original maturity of three months or less, which are readily convertible into a known amount of cash. As of August 31, 2018, the Company held no cash equivalents.

2. SIGNIFICANT ACCOUNTING POLICIES (continued)

d) Exploration and evaluation assets

All costs related to the acquisition, exploration and development of mineral properties are capitalized. Upon commencement of commercial production, the related accumulated costs are amortized against projected income using the units-of-production method over estimated recoverable reserves.

Management annually assesses carrying values of non-producing properties and properties for which events and circumstances may indicate possible impairment. Impairment of a property is generally considered to have occurred if the property has been abandoned, there are unfavourable changes in the property economics, there are restrictions on development, or when there has been an undue delay in development, which exceeds three years. In the event that estimated discounted cash flows expected from its use or eventual disposition is determined by management to be insufficient to recover the carrying value of the property, the carrying value is written-down to the estimated recoverable amount.

The recoverability of mineral properties and exploration and development costs is dependent on the existence of economically recoverable reserves, the ability to obtain the necessary financing to complete the development of the reserves, and the profitability of future operations. The Company has not yet determined whether or not any of its future mineral properties contain economically recoverable reserves. Amounts capitalized to mineral properties as exploration and development costs do not necessarily reflect present or future values.

When options are granted on mineral properties or properties are sold, proceeds are credited to the cost of the property. If no future capital expenditure is required and proceeds exceed costs, the excess proceeds are reported as a gain.

e) Share-based payments

Share-based payments to employees and others providing similar services are measured at the estimated fair value of the instruments issued on the grant date and amortized over the vesting periods. Share-based payments to non-employees are measured at the fair value of the goods or services received or the fair value of the equity instruments issued if it is determined the fair value of the goods or services cannot be reliably measured, and are recorded at the date the goods or services are received. The amount recognized as an expense is adjusted to reflect the number of awards expected to vest. The offset to the recorded cost is to equity settled share-based payments reserve.

Consideration received on the exercise of stock options is recorded as share capital and the related equity settled share-based payments reserve is transferred to share capital. Charges for options that are forfeited before vesting are reversed from equity settled share-based payment reserve.

Share-based compensation expense relating to deferred share units is accrued over the vesting period of the units based on the quoted market price. As these awards can be settled in cash, the expense and liability are adjusted each reporting period for changes in the underlying share price.

f) Flow-through shares

The resource expenditure deductions for income tax purposes related to exploration and development activities funded by flow-through share arrangements are renounced to investors in accordance with Canadian tax legislation. On issuance, the premium recorded on the flow-through share, being the difference in price over a common share with no tax attributes, is recognized as a liability. As expenditures are incurred, the liability associated with the renounced tax deductions is recognized through profit and loss with a pro-rata portion of the deferred premium.

2. SIGNIFICANT ACCOUNTING POLICIES (continued)

f) Flow-through shares (continued)

To the extent that the Company has deferred tax assets in the form of tax loss carry-forwards and other unused tax credits as at the reporting date, the Company may use them to reduce its deferred tax liability relating to tax benefits transferred through flow-through shares.

g) Foreign currency

Transactions and balances in currencies other than the Canadian dollar, the currency of the primary economic environment in which the Company operates ("the functional currency"), are translated into the functional currency using the exchange rates prevailing at the dates of the transactions. Foreign exchange gains and losses resulting from the settlement of such transactions and from the translation of monetary assets and liabilities denominated in foreign currencies at exchange prevailing on the statement of financial position date are recognized in the statement of comprehensive loss.

h) Decommissioning, restoration and similar liabilities

An obligation to incur restoration, rehabilitation and environmental costs arises when environmental disturbance is caused by the exploration or development of a mineral property interest. Such costs arising from the decommissioning of plant and other site preparation work, discounted to their net present value, are provided for and capitalized at the start of each project to the carrying amount of the asset, along with a corresponding liability as soon as the obligation to incur such costs arises. The timing of the actual rehabilitation expenditure is dependent on a number of factors such as the life and nature of the asset, the operating license conditions and, when applicable, the environment in which the mine operates.

Discount rates using a pre-tax rate that reflects the time value of money are used to calculate the net present value. These costs are charged against profit or loss over the economic life of the related asset, through amortization using either the units-of-production or the straight-line method. The corresponding liability is progressively increased as the effect of discounting unwinds creating an expense recognized in profit or loss

Decommissioning costs are also adjusted for changes in estimates. Those adjustments are accounted for as a change in the corresponding capitalized cost, except where a reduction in costs is greater than the unamortized capitalized cost of the related assets, in which case the capitalized cost is reduced to nil and the remaining adjustment is recognized in profit or loss.

The operations of the Company have been, and may in the future be, affected from time to time in varying degree by changes in environmental regulations, including those for site restoration costs. Both the likelihood of new regulations and their overall effect upon the Company are not predictable.

The Company has no material restoration, rehabilitation and environmental obligations as the disturbance to date is immaterial.

i) Loss per share

The Company presents basic and diluted loss per share data for its common shares, calculated by dividing the loss attributable to common shareholders of the Company by the weighted average number of common shares outstanding during the period. Diluted loss per share does not adjust the loss attributable to common shareholders or the weighted average number of common shares outstanding when the effect is anti-dilutive.

2. SIGNIFICANT ACCOUNTING POLICIES (continued)

j) Income taxes

Current tax is the expected tax payable or receivable on the taxable income or loss for the year, using tax rates enacted or substantively enacted at the period end date, and includes any adjustments to tax payable or receivable in respect of previous years.

Deferred income taxes are recorded using the liability method whereby deferred tax is recognized in respect of temporary differences between the carrying amounts of assets and liabilities for financial reporting purposes and the amounts used for taxation purposes.

Deferred tax is measured at the tax rates that are expected to be applied to temporary differences when they reverse, based on the laws that have been enacted or substantively enacted by the statement of financial position date. Deferred tax is not recognized for temporary differences which arise on the initial recognition of assets or liabilities in a transaction that is not a business combination and that affects neither accounting, nor taxable profit or loss.

A deferred tax asset is recognized for unused tax losses, tax credits and deductible temporary differences, to the extent that it is probable that future taxable profits will be available against which they can be utilized. Deferred tax assets are reviewed at each period end date and are reduced to the extent that it is no longer probable that the related tax benefit will be realized.

k) Financial assets

All financial assets are initially recorded at fair value and designated upon inception into one of the following four categories: held to maturity, available for sale, loans and receivables or at fair value through profit or loss ("FVTPL").

Financial assets classified as FVTPL are measured at fair value with unrealized gains and losses recognized through earnings. The Company's cash is classified as FVTPL.

Financial assets classified as loans and receivables and held to maturity assets are measured at amortized cost. At August 31, 2018, the Company has not classified any financial assets as loans and receivables.

Financial assets classified as available for sale are measured at fair value with unrealized gains and losses recognized in other comprehensive income and loss except for losses in value that are considered other than temporary which are recognized in earnings. At August 31, 2018, the Company has not classified any financial assets as available for sale.

Transactions costs associated with FVTPL financial assets are expensed as incurred, while transaction costs associated with all other financial assets are included in the initial carrying amount of the asset.

l) Financial liabilities

All financial liabilities are initially recorded at fair value and designated upon inception as FVTPL or other financial liabilities.

Financial liabilities classified as other financial liabilities are initially recognized at fair value less directly attributable transaction costs. After initial recognition, other financial liabilities are subsequently measured at amortized costs using the effective interest method. The effective interest method is a method of calculating the amortized cost of a financial liability and of allocating interest expense over the relevant period. The effective interest rate is the rate that discounts estimated future cash payments through the expected life of the financial liability, or, where appropriate, a shorter period. The Company's accounts payable are classified as other financial liabilities.

---

**SPEY RESOURCES CORP.**  
**NOTES TO THE CONDENSED INTERIM FINANCIAL STATEMENTS**  
**FOR THE NINE MONTH PERIOD ENDED AUGUST 31, 2018**

(Expressed in Canadian dollars)

(UNAUDITED)

---

2. SIGNIFICANT ACCOUNTING POLICIES (continued)

I) Financial liabilities (continued)

Financial liabilities classified as FVTPL include financial liabilities held for trading and financial liabilities designated upon initial recognition as FVTPL. Derivatives, including separated embedded derivatives are also classified as held for trading and recognized at fair value with changes in fair value recognized in earnings unless they are designated as effective hedging instruments. Fair value changes on financial liabilities classified as FVTPL are recognized in earnings. At August 31, 2018, the Company has not classified any financial liabilities as FVTPL.

A financial liability is derecognized when the obligation under the liability is discharged or cancelled or expires.

3. SIGNIFICANT ACCOUNTING ESTIMATES AND JUDGMENTS

The preparation of these financial statements requires management to make certain estimates, judgments and assumptions that affect the reported amounts of assets and liabilities at the date of the financial statements and reported amounts of expenses during the reporting period. Actual outcomes could differ from these estimates. These financial statements include estimates which, by their nature, are uncertain. The impacts of such estimates are pervasive throughout the financial statements, and may require accounting adjustments based on future occurrences. Revisions to accounting estimates are recognized in the period in which the estimate is revised and future periods if the revision affects both current and future periods. These estimates are based on historical experience, current and future economic conditions and other factors, including expectations of future events that are believed to be reasonable under the circumstances.

Significant assumptions about the future and other sources of estimation uncertainty that management has made at the financial position reporting date, that could result in a material adjustment to the carrying amounts of assets and liabilities, in the event that actual results differ from assumptions made, relate to, but are not limited to, the following:

*Significant accounting estimates*

- i. the assessment of indications of impairment of the mineral property and related determination of the net realizable value and write-down of the mineral property where applicable;
- ii. the measurement of deferred income tax assets and liabilities; and
- iii. the inputs used in accounting for share-based payments.

*Significant accounting judgments*

- i. the determination of categories of financial assets and financial liabilities; and
- ii. the evaluation of the Company's ability to continue as a going concern.

---

**SPEY RESOURCES CORP.**

**FOR THE NINE MONTH PERIOD ENDED AUGUST 31, 2018**

(Expressed in Canadian dollars)

(UNAUDITED)

---

4. NEW ACCOUNTING STANDARDS ISSUED BUT NOT YET EFFECTIVE

Standards issued, but not yet effective, up to the date of issuance of the Company's financial statements are listed below. This listing of standards and interpretations issued are those that the Company reasonably expects to have an impact on disclosures, financial position or performance when applied at a future date. The Company intends to adopt these standards when they become effective.

Effective for annual periods beginning on January 1, 2018

*IFRS 2 Share-based Payment*

The amendments clarify the classification and measurement of share-based payment transactions.

*IFRS 9 Financial Instruments – Classification and Measurement*

IFRS 9 is the first step in the process to replace IAS 39 Financial Instruments: Recognition and Measurement. IFRS 9 introduces new requirements for classifying and measuring financial assets and liabilities and carries over from the requirements of IAS 39.

*IFRS 15 Revenue from Contracts with Customers*

IFRS 15 is a new standards which supersedes *IAS 11 – Construction Contracts*, *IAS 18 – Revenue*, *IFRIC 13 – Customer Loyalty Programmes*, *IFRIC 15 – Agreements for the Construction of Real Estate*, *IFRIC 18 – Transfers of Assets from Customers*, and *SIC 31 – Revenue – Barter Transactions Involving Advertising Services*. IFRS 15 establishes a comprehensive five-step framework for the timing and measurement of revenue recognition.

Effective for annual periods beginning on January 1, 2019

*New standard IFRS 16 Leases*

IFRS 16 is a new standard that sets out the principles for recognition, measurement, presentation, and disclosure of leases including guidance for both parties of a contract, the lessee and the lessor. The new standard eliminates the classification of leases as either operating or finance leases as is required by IAS 17 and instead introduces a single lessee accounting model.

The extent of the impact of the adoption of these standards and interpretations on the financial statements of the Company has not been determined.

Certain new standards, interpretations and amendments to existing standards have been issued by the IASB or the International Financial Reporting Interpretations Committee ("IFRIC") that are mandatory for accounting periods beginning on or after July 1, 2016, or later periods. Some updates that are not applicable or are not consequential to the Company may have been excluded from the list above.

**SPEY RESOURCES CORP.**

5. EXPLORATION AND EVALUATION ASSET

	Acquisition Costs	Exploration Costs	Total
	\$	\$	\$
Opening balance	-	-	-
Acquisition and exploration costs	5,000	80,093	85,093
Balance, November 30, 2017	5,000	80,093	85,093
Shares issued for exploration asset	10,000	-	10,000
Balance, August 31, 2018	15,000	80,093	95,093

**Standfast Wigwam Property**

Pursuant to an option agreement (the "Agreement") dated July 31, 2017, the Company was granted an option to acquire a 100% undivided interest in the Standfast Wigwam Property (the "Property") located in the Revelstoke Mining Division in British Columbia.

In accordance with the Agreement, the Company has the option to acquire a 100% undivided interest in the Property by issuing a total of 600,000 common shares of the Company to the Optionors, making cash payments totaling \$155,000, and incurring a total of \$500,000 in exploration expenditures as follows:

	Common Shares	Cash	Exploration Expenditures
	#	\$	\$
Upon execution of the Agreement (paid)	-	5,000	-
Upon listing of the Company's common shares on a Canadian Stock Exchange (the "Listing") (issued)	100,000	-	-
On or before the first anniversary of the Listing	100,000	-	-
On or before the second anniversary of the Listing	100,000	20,000	100,000
On or before the third anniversary of the Listing	100,000	30,000	100,000
On or before the fourth anniversary of the Listing	200,000	100,000	300,000
On or before the fifth anniversary of the Listing	-	-	-
Total	600,000	155,000	500,000

The Optionors will retain a 3% Net Smelter Returns royalty on the Property. The Company has the right to purchase the first 1% of the royalty for \$750,000 and the remaining 2% for \$1,000,000 at any time prior to the commencement of commercial production.

6. SHARE CAPITAL

a) Authorized:

The Company is authorized to issue an unlimited number of common shares without par value.

b) Escrow Shares:

The Company entered into an escrow agreement, whereby common shares will be held in escrow and are scheduled for release at 10% on the listing date and 15% on every six month from date of listing. At August 31, 2018, there were 2,880,000 common shares are held in escrow.

c) Issued and Outstanding as at August 31, 2018: 11,540,000 common shares.

For the period ended November 30, 2017, the Company had the following share capital transactions:

- (i) The Company issued 2,000,000 common shares at a price of \$0.005 per share for gross proceeds of \$10,000. The fair value of the 2,000,000 common shares was estimated to be \$40,000. Accordingly, the Company recorded share-based payments of \$30,000 and a corresponding increase to contributed surplus.
- (ii) The Company issued 5,940,000 common shares at a prices of \$0.02 and \$0.05 per share for gross proceeds of \$184,000. 4,100,000 of those common shares were issued on a flow-through basis.

For the purposes of the calculating the tax effect of any premium related to the issuance of the flow-through shares, the Company reviewed recent financings and compared it to determine if there was a premium paid on the shares. As a result of the review the Company did not recognize any premium on the flow-through shares issued.

For the period ended August 31, 2018, the Company had the following capital transactions:

- (iii) The Company issued 3,500,000 common share at a price of \$0.10 per share pursuant to a prospectus for gross proceeds of \$350,000.
- (iv) The Company issued 100,000 common shares at a deemed price of \$0.10 for the exploration and evaluation asset.

d) Stock Options

During the period ended August 31, 2018, the Company adopted a Stock Option Plan ('Plan') for directors, officers and employees, consultants of the Company. The Company may grant options to individuals, options are exercisable over periods of up to ten years, as determined by the Board of Directors of the company, to buy shares of the Company at the fair market value on the date the option is granted. The maximum number of shares which may be issuable under the Plan can not exceed 10% of the total number of issued and outstanding shares on a non-diluted basis.

On December 21, 2017, the Company granted 790,000 stock options to certain directors and officers of the Company at an exercise price of \$0.10 for a period of five years from the date of grant. The fair value of the stock options was estimated at \$69,730 using the Black Scholes Pricing Model with the following assumptions:

Share price	\$0.10
Risk free interest rate	1.82%
Expected life	5 years
Expected volatility	125%
Expected forfeiture rate	Nil
Expected dividends	Nil

**SPEY RESOURCES CORP.**  
**NOTES TO THE CONDENSED INTERIM FINANCIAL STATEMENTS**  
**FOR THE NINE MONTH PERIOD ENDED AUGUST 31, 2018**

(Expressed in Canadian dollars)

(UNAUDITED)

6. SHARE CAPITAL (continued)

f) Warrants

A Summary of the Company's share purchase warrants are as follows:

	Number of Warrants	Weighted Average Exercise Price
Outstanding and exercisable, November 30, 2017	–	–
Granted	350,000	\$0.10
Outstanding and exercisable, August 31, 2018	350,000	\$0.10

On August 23, 2018 the Company issued 350,000 agent warrants related to the IPO. The agent warrants are exercisable at \$0.10 per share and expire on August 23, 2020. The weighted average remaining contractual life of the warrants is 1.98 years.

The following assumptions were used for the Black-Scholes valuation of warrants issued:

	<b>2018</b>
Share price	\$0.10
Risk – free interest rate	2.12%
Expected life of warrants	2 years
Dividend rate	0%
Annualized volatility	115%

The fair value per agent's warrant issued is \$0.10.

7. RELATED PARTY BALANCES AND TRANSACTIONS

Parties are considered to be related if one party has the ability, directly or indirectly, to control the other party or exercise significant influence over the other party in making financial and operating decisions. Related parties may be individuals or corporate entities. A transaction is considered to be a related party transaction when there is a transfer of resources or obligations between related parties.

The Company had incurred the following key management personnel cost from related parties:

	<b>Period ended August 31, 2018</b>	<b>Period ended November 30, 2017</b>
	\$	\$
Share-based payments	69,730	30,000
Total	69,730	30,000

Management fees and share-based payments were incurred from a director and a company owned by a director of the Company. Key management includes directors and key officers of the Company, including the President, Chief Executive Officer and Chief Financial Officer.

**SPEY RESOURCES CORP.**  
**NOTES TO THE CONDENSED INTERIM FINANCIAL STATEMENTS**  
**FOR THE NINE MONTH PERIOD ENDED AUGUST 31, 2018**

(Expressed in Canadian dollars)

(UNAUDITED)

8. MANAGEMENT OF CAPITAL

The Company's objectives when managing capital are to safeguard the Company's ability to continue as a going concern in order to pursue the sourcing and exploration of its resource property. The Company does not have any externally imposed capital requirements to which it is subject.

The Company considers the aggregate of its share capital, contributed surplus and deficit as capital. The Company manages the capital structure and makes adjustments to it in light of changes in economic conditions and the risk characteristics of the underlying assets. To maintain or adjust the capital structure, the Company may attempt to issue new shares or dispose of assets or adjust the amount of cash.

9. FINANCIAL INSTRUMENTS AND FINANCIAL RISK

International Financial Reporting Standards 7, *Financial Instruments: Disclosures*, establishes a fair value hierarchy that reflects the significance of the inputs used in making the measurements. The fair value hierarchy has the following levels:

Level 1 - quoted prices (unadjusted) in active markets for identical assets or liabilities;

Level 2 - inputs other than quoted prices included in Level 1 that are observable for the asset or liability, either directly (i.e. as prices) or indirectly (i.e. derived from prices); and

Level 3 - inputs for the asset or liability that are not based on observable market data (unobservable inputs).

Fair Value of Financial Instruments

The Company's financial assets include cash and are classified as Level 1. The carrying value of these instruments approximates their fair values due to the relatively short periods of maturity of these instruments.

Assets measured at fair value on a recurring basis were presented on the Company's statement of financial position as at August 31, 2018 are as follows:

	Fair Value Measurements Using			Total
	Quoted Prices in Active Markets For Identical Instruments (Level 1)	Significant Other Observable Inputs (Level 2)	Significant Unobservable Inputs (Level 3)	
	\$	\$	\$	\$
Cash	190,777	-	-	190,777

Fair value

The fair value of the Company's financial instruments approximates their carrying value as at August 31, 2018 because of the demand nature or short-term maturity of these instruments.

9. FINANCIAL INSTRUMENTS AND FINANCIAL RISK (continued)

Financial risk management objectives and policies

The Company's financial instruments include cash and accounts payable. The risks associated with these financial instruments and the policies on how to mitigate these risks are set out below. Management manages and monitors these exposures to ensure appropriate measures are implemented on a timely and effective manner.

(i) *Currency risk*

The Company's expenses are denominated in Canadian dollars. The Company's corporate office is based in Canada and current exposure to exchange rate fluctuations is minimal.

The Company does not have any significant foreign currency denominated monetary liabilities. The principal business of the Company is the identification and evaluation of assets or a business and once identified or evaluated, to negotiate an acquisition or participation in a business subject to receipt of shareholder approval and acceptance by regulatory authorities.

(ii) *Interest rate risk*

The Company is exposed to interest rate risk on the variable rate of interest earned on bank deposits. The fair value interest rate risk on bank deposits is insignificant as the deposits are short-term.

The Company has not entered into any derivative instruments to manage interest rate fluctuations.

(iii) *Credit risk*

Credit risk is the risk of loss associated with the counterparty's inability to fulfill its payment obligations. Financial instruments that potentially subject the Company to concentrations of credit risks consist principally of cash. To minimize the credit risk the Company places these instruments with a high quality financial institution.

(iv) *Liquidity risk*

In the management of liquidity risk of the Company, the Company maintains a balance between continuity of funding and the flexibility through the use of borrowings. Management closely monitors the liquidity position and expects to have adequate sources of funding to finance the Company's projects and operations.

10. COMMITMENTS

The Company is committed to certain cash payments, common share issuances and exploration expenditures as described in Note 5.
