

# Spey Resources Signs Option Agreement to Acquire a 100% Interest in the Pocitos I and II Claims from AIS Resources in Salta, Argentina

Vancouver, British Columbia--(Newsfile Corp. - June 24, 2021) - Spey Resources Corp. (CSE: SPEY) (OTC Pink: SPEYF) (FSE: 2JS) ("**Spey**" or the "**Company**") is very pleased to announce that it has entered into an Option Agreement (the "**Agreement**") dated June 23, 2021 with A.I.S. Resources Ltd. ("**AIS**") for an Option (the "**Option**") to acquire a 100% interest in the Pocitos I and Pocitos II claims (the "**Property**") located in Salta, Argentina.

The project is located approximately 10km from the township of Pocitos where there is gas, electricity and telephone internet services. Pocitos I is 800 Ha and Pocitos II 532 Ha, both of which are accessible by road. AIS Resources has spent more than USD\$1.5m exploring the project, including surface sampling, trenching, TEM geophysics and drilling two 400m holes had outstanding results. To date, Pocitos II has yet to be drilled and the locations have been identified for holes 3 and 4.

AIS Resources did not pursue the property due to the high magnesium content of the brines, however, the Ekosolve™ lithium extraction process will help alleviate the magnesium situation. Lithium values of up to 125ppm were recorded and the flow rate of the hole exceeded 75,000 Litres per minute and continued for more than 5 hours. Both drill holes had exceptional brine flow rates. Spey's plan is to sample the current drill holes and drill a further two holes to estimate a NI 43-101 resource calculation and progress discussions to build a production pilot plant.

Pursuant to an option agreement, AIS has an option (the "**Underlying Option**") to acquire the Property from the current owners. Upon the exercise of the Underlying Option by AIS, Spey will be able to exercise

the Option and acquire a 100% interest in the Property from AIS by paying a total of US\$1,732,000 (the "**Purchase Price**") prior to June 23, 2022.

In order to maintain the Option in good standing under the Agreement, Spey must immediately pay AIS a total of US\$100,000 and issue 2,500,000 Spey common shares. In addition, Spey must complete a US\$500,000 exploration program on the Property within the next 12 months. Upon exercise of the Option and Spey's acquisition of a 100% interest in the Property, AIS will retain a 7.5% royalty on the sales revenue of lithium carbonate or other lithium compounds from the Property, net of export taxes.

CEO and director Nader Vatanchi states, "Working with AIS and their team in Argentina has been very productive and we are fortunate that they have access to these projects to expand our lithium portfolio. Spey is still focused on moving our Incahuasi exploration program forward and aim to be drill this summer now that we have the results from our TEM geophysics. Our new properties announced today, Pocitos I and II, are advanced stage and we look forward to drilling and completing a NI 43-101 report so that we can begin planning for potential production."

### **Qualified Person**

Phillip Thomas, BSc Geol, MBusM, FAusIMM, MAIG, MAIMVA, (CMV), a Qualified Person as defined under NI 43-101 regulations, has reviewed the technical information that forms the basis for portions of this news release, and has approved the disclosure herein. Mr. Thomas is independent of the Company but discloses that he is a shareholder of SPEY.

### **About Spey Resources Corp.**

Spey Resources is a Canadian mineral exploration company which holds two option agreements to acquire 100% interest in the Candela II, Pocitos I and II lithium brine projects located in the Salta Province, Argentina. Spey also holds an option to acquire a 100% undivided interest in the Silver Basin Project located in the Revelstoke Mining Division of British Columbia as well as an option to acquire a 100% interest in the Kaslo Silver project, west of Kaslo, British Columbia.
