

## Management's Discussion and Analysis

As at June 30, 2022, and for the three and six-month periods ended June 30, 2022 and 2021

Management's Discussion and Analysis As at June 30, 2022, and for the three and six-month periods ended June 30, 2022 and 2021 (Expressed in Canadian dollars)

## INTRODUCTION

This Management's Discussion and Analysis ("MD&A") is provided to enable a reader to assess the results of operations and financial condition of Xigem Technologies Corporation for the period ended June 30, 2022. This MD&A is dated August 25, 2022 and should be read in conjunction with the interim condensed consolidated financial statements and related notes for the period ended June 30, 2022. ("Financial Statements"). Unless the context indicates otherwise, references to "Xigem", "the Company", "we", "us" and "our" in this MD&A refer to Xigem Technologies Corporation and its operations.

### FORWARD-LOOKING INFORMATIONS

Certain information included in this MD&A contains forward-looking information within the meaning of applicable Canadian securities laws. This information includes, but is not limited to, statements made in *Business Overview and Strategy, Results from Operations, Debt Profile,* and other statements concerning Xigem's objectives, its strategies to achieve those objectives, as well as statements with respect to management's beliefs, plans, estimates and intentions, and similar statements concerning anticipated future events, results, circumstances, performance or expectations that are not historical facts. Forward-looking information generally can be identified by the use of forward-looking terminology such as "outlook", "objective", "may", "will", "would", "expect", "intend", "estimate", "anticipate", "believe", "should", "plan", "continue", or similar expressions suggesting future outcomes or events or the negative thereof. Such forward-looking information information reflects management's beliefs and is based on information currently available. All forward-looking information in this MD&A is qualified by the following cautionary statements.

Forward looking information necessarily involves known and unknown risks and uncertainties, which may be general or specific and which give rise to the possibility that expectations, forecasts, predictions, projections or conclusions will not prove to be accurate, assumptions may not be correct and objectives, strategic goals and priorities may not be achieved. A variety of factors, many of which are beyond Xigem's control, affect the operations, performance and results of the Company and its subsidiaries, and could call actual results to differ materially from current expectations of estimated or anticipated events or results.

Although Xigem believes that the expectations reflected in such forward-looking information are reasonable and represent the Company's projections, expectations and beliefs at this time, such information involves known and unknown risks and uncertainties which may cause the Company's actual performance and results in future periods to differ materially from any estimates or projections of future performance or results expressed or implied by such forward-looking information. Important factors that could cause actual results to differ materially include but are not limited to: **Business Overview**, **Results from Operations**, **Liquidity and Capital Resources**, **Capital Structure**. See **Risks and Uncertainties** for further information. The reader is cautioned to consider these factors, uncertainties, and potential events carefully and not to put undue reliance on forward-looking information, as there can be no assurance that actual results will be consistent with such forward-looking information.

Given the current level of uncertainty arising from the COVID-19 pandemic, there can be no assurance regarding the impact of COVID-19 on the business, operations, and financial performance of Xigem, as well as on consumer behaviors and the economy in general. General risks and uncertainties relating to the COVID-19 pandemic also include, but are not limited to, the length, spread and severity of the pandemic; efficacy of the vaccines and any applicable boosters, the nature and length of the restrictive measures implemented or to be implemented, including any loosening or tightening of the restrictive measures, by the various levels of the government in Canada. For further details on the risks relating to COVID-19 and its potential impact on the Company, refer to **Risks and Uncertainties** section of this MD&A.

## FORWARD-LOOKING INFORMATION (Cont'd)

The forward-looking information included in this MD&A is made as of the date of this MD&A and should not be relied upon as representing Xigem's views as of any date subsequent to the date of this MD&A. Management undertakes no obligation, except as required by applicable law, to publicly update or revise any forward-looking information, whether as a result of new information, future events or otherwise.

## **BUSINESS OVERVIEW AND GROWTH STRATEGY**

#### **Business Overview**

Xigem was founded and is led by skilled entrepreneurs and operators, with extensive start-up experience and a proficiency in the capital markets and was established to address increasing opportunities emerging from the Remote Economy.

The Xigem Platform is based on a US patented technology 15/651,458 filed on July 17, 2017 and titled *"Simultaneous Messaging Systems and Methods"*, which is a continuation-in-part of U.S. Patent Application No. 15/182,029 filed on June 14, 2016 and titled *"Simultaneous Messaging System and Method"* (now US Patent No. 9,756,492 issued on September 5, 2017) (the "Platform" or the "Xigem Platform") Xigem obtained the worldwide rights to the Platform, also known as iAgent, through an exclusive license from its original developer. The Platform consists of a comprehensive cloud-computing solution for remote business operations, giving increased safety and access to remote virtual work environments. The Platform's focus is synchronizing business practice and management productivity.

The Platform will generate revenue through a variety of platform-as-a-service ("PaaS") and software-as-a-service ("SaaS") models. The subscription plans offered to customers will vary depending on the level of service the customers opt into. On custom development projects, every contract will be tailored to the customers' needs dependent on the criteria best suited for their business. The Company has also announced plans to sell a more standardized version of its Platform on an "out of the box" basis. The Company anticipates significant platform usage supported by its highly targeted sales and marketing strategies.

Xigem's business objectives are to complete the customization and upgrading of the Platform, while acquiring other technologies or an interest in other technologies, via their developers, in order to create a technology ecosystem capable of supporting its Platform or creating significant shareholders value. The Company is in progress of a soft commercial launch in the various industries that make up our understanding of the remote economy ("Business Objective").

#### Market Overview

Remote work is changing how the global workspace operates. In 2016, the number of American workers working remotely was 43%<sup>1</sup>. The COVID-19 pandemic that began in 2020 accelerated the transition to a work-from-home model or a hybrid model, which involves a combination of working at the office and elsewhere. Initially considered by many employers to be a temporary measure to protect workers during the pandemic, the remote work model has found widespread acceptance and changed the expectations of many workers.

A study of 209,000 people in 190 countries completed in late 2020 by Boston Consulting Group and The Network found that 89% of respondents worldwide now prefer to work from home at least occasionally. The preference was strongest among digital and knowledge-based workers, among whom 70% had worked remotely on a full or partial basis during COVID-19. <sup>2</sup> A separate survey of U.S. workers by Prudential found that 68% believe a hybrid workplace model allowing

<sup>&</sup>lt;sup>2</sup> BCG, Decoding Global Ways of Working, June 30, 2021

## BUSINESS OVERVIEW AND GROWTH STRATEGY (Cont'd)

#### Market Overview (Cont'd)

at least one day of remote work per week is ideal; the figure was 87% among those who had been working remotely during the pandemic. Of the current remote workers surveyed, 42% said they would look for a new job if their current company did not continue to offer remote work options long term.<sup>3</sup>

The shift towards a remote work model has led to a growing need for specialized products and services catering to business operations that exceed the physical boundaries of the office floor.

Organizations around the world are proactively building information technology departments to support the sector as the adoption of remote work continues to grow. Governments and labor unions are updating labor market regulations as labor reforms are beginning to emerge and complement new organizational models. The World Economic Forum issued a stable employment outlook for remote work over the coming five years, with a positive impact on the growth in the number of jobs due to mobile internet and cloud technology, signaling the widespread application of telework.<sup>4</sup>

For the successful adoption of a distributed workplace, organizations need to compensate for physical efficiencies lacking in a home environment. The right tools are necessary for working experiences to enable management and employees to be as productive as possible when they work from home.

With consistent innovation in communication technology, an increasing number of professionals are working remotely either from home, a customer's location, or simply from the road with the use of mobile and other portable devices. Some major companies have partially or fully eliminated traditional offices in favor of remote work solutions. Organizations will continue streamlining operations as emergency preparation and as education and consulting resources increase, businesses will feel more supported in the conversion process and will quickly adopt the benefits of distributed operations, including better controlled overhead costs and higher productivity.

#### Growth Strategy

The Company's efforts will be directed toward executing the Business Objectives. The Company expects to use a variety of marketing tools including grassroots marketing, web advertising, affiliate marketing programs, public relations, investor relations and key strategic alliances to support its Business Objectives.

The Company aims to do this by:

- Emphasize a 'product first' approach by directing funds and efforts towards the betterment of the Platform to surpass customers' expectation on functionality and experience;
- Building long-term relationship relationships with customers, advertising partners, medical institutions and offices, academic and other education facilities;
- Focus on offerings proactively to customers specifically aligned with the solutions provided by Xigem; and
- A strategy of aggregating a portfolio of innovative technologies capable of disrupting traditional customer acquisition and retention business models, while supporting the Company's Platform.

Management's Discussion and Analysis As at June 30, 2022, and for the three and six-month periods ended June 30, 2022 and 2021 (Expressed in Canadian dollars)

## **BUSINESS ENVIORNMENT AND OUTLOOK**

As a result of the COVID-19 pandemic, organizations around the world are developing new ways of interacting with their employees and customers. To meet these new demands, companies are technology investments across the business model. McKinsey estimates that the pandemic has resulted in an increase adoption by three to seven years in the span of months.<sup>5</sup>

Several notable examples:

- <u>Remote work</u>. It is estimated that 20% of all labor in the United States may be satisfied by remote workers, from up to 5% pre-COVID. Where remote work is feasible, the typical business plan calls for employees to spend two days of each work week at home.<sup>6</sup>
- <u>E-commerce</u>. Overall online penetration remains approximately 35% above pre-COVID-19 levels. In the grocery sector, online penetration tripled during the pandemic levels to 9% to 12%, representing an acceleration of three to five years compared to prior expectations.<sup>7</sup>
- <u>Business-to-business ("B2B") sales</u>. A recent survey found that 92% of B2B buyers prefer virtual sale interactions, up 17% from 2020, and 79% of sellers realize its effectiveness, compared to 54% in the prior year. Suppliers recognize that virtual selling can lead to more frequent communication with customers, cost-effective interactions, and the ability to interact with more prospects.<sup>8</sup>
- <u>Payments</u>. The pandemic represented an inflection point in the adoption of digital payment technologies, with 78% of global customers adjusting the way they pay for items. The digital payments market is forecasted to grow at a compound annual growth rate of 13.7% between 2021-2026, driven by greater convenience, favorable government policies and evolving consumer behavior.<sup>9</sup>
- <u>Travel and hospitality</u>. After failing by two-thirds in 2020, business travel may only recover to 80% of prepandemic levels by 2024. Hotels and airlines will need to re-evaluate their pricing, marketing, networks, digital strategies, and investment plans to compete.<sup>10</sup>

## BUSINESS ENVIORNMENT AND OUTLOOK (Cont'd)

• <u>Telehealth</u>. In a recent survey, 40% of US consumers said they expect to continue to use telehealth services going forward, compared to 11% of consumers who used telehealth prior to COVID-19, whereby estimates that up to \$250 billion of current US healthcare spend could be virtualized, compared to \$3 billion of total annual revenues of US telehealth players prior to the pandemic.<sup>11</sup>

As at June 30, 2022, we committed \$1,498,068 of capital towards the internal development of our intellectual property. We also continue to invest significant resources, both directly and indirectly, in the expansion in the capabilities of our Platform. In January 2022, we acquired the assets of 2747524 Ontario Inc. ("Cylix") (see **Subsequent Events**) a business intelligence company with a proprietary database of more than 74-million data points amalgamated by third-party vendors and internally originated sources. We plan to integrate the Cylix application into our Platform, to allow users to streamline information about current and potential customers and business partners.

## PRESENTATION OF FINANCIAL INFORMATION AND NON-IFRS MEASURES

#### Presentation of Financial Information

Unless otherwise specified herein, financial results, including historical comparatives, contained in this MD&A are based on Xigem's 2021 Financial Statements, which have been prepared in accordance with International Financial Reporting Standards ("IFRS") as issued by the International Accounting Standards Board ("IASB") and the interpretations of the IFRS Interpretations Committee ("IFIRC"). Unless otherwise specified, amounts are in Canadian dollars and percentage changes are calculated using whole numbers.

#### Non-IFRS Measures

In addition to the reported IFRS measures, industry practice is to evaluate entities considering certain non-IFRS performance measures, such as earnings before interest, taxes, depreciation and amortization ("EBITDA") or adjusted earnings before interest, taxes, depreciation and amortization ("Adjusted EBITDA").

These measures are not in accordance with IFRS and have no standardized definitions, and as such, our computations of these non-IFRS measures may not be comparable to measures by other reporting issuers. In addition, Xigem's method of calculating non-IFRS measures may differ from other reporting issuers, and accordingly, may not be comparable.

#### Earnings Before Interest, Taxes, Depreciation and Amortization ("EBITDA")

EBITDA is used as an alternative to net income because it includes major non-cash items such as interest, taxes and amortization, which management considers non-operating in nature. A reconciliation of EBITDA to IFRS net income is presented under the section **Results from Operations** of this MD&A.

<sup>&</sup>lt;sup>11</sup> McKinsey & Company. (July 9, 2021). Telehealth: A quarter-trillion-dollar post-COVID-19 reality? https://www.mckinsey.com/industries/healthcaresystems-and-services/our-insights/telehealth-a-quarter-trillion-dollar-post-covid-19-reality

## PRESENTATION OF FINANCIAL INFORMATION AND NON-IFRS MEASURES (Cont'd)

#### Non-IFRS Measures (Cont'd)

Adjusted Earnings Before Interest, Taxes, Depreciation and Amortization ("Adjusted EBITDA")

Adjusted EBITDA is used as an alternative to net income because it excludes major non-cash items such as amortization, stock-based compensation, current and deferred income tax expenses and other items management considers non-operating in nature. A reconciliation of adjusted EBITDA to IFRS net income is presented under section **Results from Operations** of this MD&A.

EBITDA and Adjusted EBITDA are measured used by management as inputs in our internal metrics and in evaluating our ability to satisfy the Company's obligations. EBITDA and Adjusted EBITDA are used as alternatives to IFRS net income (loss) because it excludes major non-cash items (including depreciation and amortization, interest, taxes and share-based payments) and other items that management considers non-operating in nature.

Management believes that these measures are helpful to investors because they are widely recognized measures of Xigem's performance and provides a relevant basis of comparison to other entities. In addition to IFRS results, these measures are also used internally to measure the operating performance of the Company.

### **RESULTS FROM OPERATIONS**

#### Select Annual Information

	For the 3 months	For the 6 months	For the 3	For the 6

Total debt (ii)	\$ 294,776	\$ 543,101
Debt to total assets (i) (iii)	18%	19%

(i) Represents a non-IFRS measure. The Company's method for calculating non-IFRS measures may differ from other reporting issuers' methods and accordingly may not be comparable. For definitions and basis of presnetation of non-IFRS measures, refer to **Non-IFRS Measures**.

(ii) Total debt is defined as accounts payable and accrued liabilities and due to related party.

(iii) Debt to total assets is a non-IFRS measure and is calculated as total debt divided by total assets.

## **RESULTS FROM OPERATIONS (Cont'd)**

#### **Revenues**

The Company does not currently generate any revenues from operations (see Risks and Uncertainties).

The Company is anticipating generating revenues through a variety of PaaS and SaaS models. Subscription plans offered to customers can vary considerably depending on the level of service and will be tailored based on the needs of the user given their business and industry.

#### Development costs

As at June 30, 2022, included in accounts payable and accrued liabilities are software development expenditures of \$151,044 (December 31, 2021 – \$302,328) for development, maintenance, and support services related to iAgent and FOOi, and are capitalized to intellectual property, as part of intangible assets on the interim condensed consolidated statements of financial position.

#### Operating expenses

	For the 3 months	For the 6 months	For the 3 months	For the 6 months
	ended June 30,	ended June 30,	ended June 30,	ended June 30,
	2022	2022	2021	2021
	\$	\$	\$	\$
Share-based payments	313,458	802,195	148,937	1,193,979
Amortization	343,444	551,607	29,935	59,541
Management and consulting fees	132,921	150,781	-	-
Public filing fees	49,524	94,570	-	-
Professional fees	11,213	42,851	68,894	302,194
Investor relations	3,377	31,083	-	-
Advertising and promotion	4,849	15,423	721,136	721,136
Insurance	8,630	13,005	-	-
Dues and subscriptions	- · · · ·	7,686	1,250	2,290
Interest and bank charges	1,860	3,969	1,487	1,753
	869,276	1,713,170	971,639	2,280,893

Share-based payments for the three-month and six-month periods ended June 30, 2022 was \$313,458 and \$802,195, respectively. Share-based payments relate to the IFRS accretion of stock-based compensation for options granted for services and other non-cash-based payments for services during the period.

Amortization for the three-month and six-month periods ended June 30, 2022 was \$343,444 and \$551,607, respectively. An acceleration of amortization of the Company's property and equipment and intangible assets was implemented in the current quarter, resulting in the increase.

Professional fees for the three-month and six-month periods ended June 30, 2022 was \$11,213 and \$42,851, respectively. The amounts in the current period relate to our regular scope of services provided for corporate, accounting, and legal services.

Public filing fees for the three-month and six-month periods ended June 30, 2022 was \$49,524 and \$94,570, respectively. The increase from the prior periods was due to due to costs incurred relating to Company's transfer agent, the Canadian Securities Exchange and the Over-The-Counter market related costs.

## **RESULTS FROM OPERATIONS (Cont'd)**

#### Operating expenses (cont'd)

Investor relations for the three-month and six-month periods ended June 30, 2022 were \$3,377 and \$31,083, respectively. During the three-month period June 30, 2022 related to costs incurred related to the Company's market awareness studies and public relations services were substantially reduced.

Management and consulting fees for the three-month and six-month periods ended June 30, 2022 were \$132,921 and \$150,781, respectively. The increase from the prior period was due to increased activity in pursuing strategic relationships and market opportunities.

#### EBITDA and Adjusted EBITDA

The following table presents a summary of the non-IFRS measures that management uses to assess Xigem's operating performance for the six-month period ended June 30, 2022 and 2021:

Six-month period ended June 30,	2022	2021
	\$	\$
Net loss and comprehensive loss	(10,771,170)	(3,392,632)
Add (deduct):		
Amortization	551,607	59,541
EBITDA (i)	(10,219,563)	(3,333,091)
Add:		
Share-based payments	802,195	1,193,979
Acquisition costs	-	1,013,897
Loss on acquisition	9,058,000	-
Adjusted EBITDA (i)	(359,368)	(1,125,215)

(i) Refer to non-IFRS measures section of this MD&A for further details.

## LOSS ON ACQUISITION

#### Background

On January 7, 2022, the Company entered into an asset purchase agreement ("APA") for substantially all of the assets of 2747524 Ontario Inc. o/a Cylix Data Group ("Cylix"), a business intelligence technology company whose software improves efficiency and increases productivity for business professionals through the supply of information required to implement risk-management and decision-making processes. The APA closed on January 24, 2022.

The acquisition of the Cylix assets for an aggregate consideration of \$9,058,000, has been settled through the issuance of 6,470,000 units ("Purchaser Units") at a price of \$1.40 per Purchaser Unit, with each Purchaser Unit comprised of one common share of the Company, and one-seventh (1/7) of one common share purchase warrant (each whole warrant, a "Purchaser Warrant"). Each Purchaser Warrant entitles the holder to acquire an additional common share of the company at a price of \$6.00 for a period of 24 months.

## LOSS ON ACQUISITION (Cont'd)

#### Events during the six-month reporting period

Subsequent to the closing of the APA, the Company's management is of the view that that the vendor of Cylix has breached certain key provisions of the asset purchase agreement currently making it highly improbable for the Company to recognize sole control of the Cylix asset and the books and records associated with it; resulting in the Company's inability to formally control the Cylix asset.

As a result, for accounting purposes Xigem has had to record a loss on the acquisition of the assets of Cylix of \$9.1M in the three-months ended March 31, 2022, and has had to recognize an impairment of the Cylix asset on its balance sheet. The Company is currently pursuing resolution with the vendor of the Cylix asset.

The Company considered the breach to be an adjusting event, whereby such events are those providing evidence of conditions existing at the end of the reporting period. As a result, for the three months ended March 31, 2022, the Company recognized the entire amount of purchase consideration of \$9,058,000 as an other item in profit and loss while recognizing the effect of issuance of Purchaser Units on the interim condensed consolidated statement of changes in equity.

#### Events subsequent to this reporting period

Notwithstanding various attempts at obtaining control of the Cylix assets and its books and records, as defined in the APA, the Company is, as of the date of these interim condensed consolidated financial statements, unable to able to access or utilize the Cylix assets. The Company is presently pursuing dispute resolution options with the vendor of the Cylix assets, however evaluation of the outcome of this process is difficult to determine at this very early stage. Management intends to vigorously pursue its rights in connection with the APA.

### LIQUIDITY AND CAPITAL RESOURCES

#### Liquidity and Cash Management

The Company expects to meet all its obligations and other commitments as they become due. The Company has various financing sources to fund operations and will continue to fund working capital needs through these sources until cash flows generated from operating activities is sufficient.

#### Capital Management Framework

Xigem defines capital as the aggregate of common shares and debt. The Company's capital management framework is designed to maintain a level of capital that funds the operations and business strategies and builds long-term shareholder value. The Company's objective is to manage its capital structure in such a way as to diversify its funding sources, while minimizing its funding costs and risks. For 2022, Xigem expects to be able to satisfy all of its financing requirements through use of some or all of the following: cash on hand and through the public offerings of common equity.

## LIQUIDITY AND CAPITAL RESOURCES (Cont'd)

#### Capital Structure

Xigem's capital structure is as follows:

	June 30,	December 31,
	2022	2021
	\$	\$
Accounts payable and accrued liabilities	257,946	507,239
Lease liability	36,830	35,862
Total debt	294,776	543,101
Share capital	14,452,458	5,829,812
Total capital	14,452,458	5,829,812
Total assets	1,651,296	2,809,435
Ratio of total debt to total assets	18%	19%

### **OUTSTANDING SHARE DATA**

#### Common Shares

The following table details Xigem's outstanding share data as of June 30, 2022 and the date of this MD&A:

	June 30,	Date of this
	2022	MD&A
	#	#
Common shares	15,316,821	15,316,821

Subsequent to the period ended June 30, 2022, the Company consolidated its common shares on a 10:1 basis (see **Subsequent Events**).

#### Warrants

As at June 30, 2022, the Company had the following warrants outstanding with the corresponding average exercise prices:

	Warrants outstanding			Wa	rrant	s exercisable	
Expiry date	Number outstanding		Average exercise price	Average remaining contractual life (years)	Weighted number exercisable	exer	Weighted number cisable price
24-Jan-24 01-Jun-24	924,286 766,703	\$ \$	6.00 2.30	1.57 1.92	924,286 766,703	\$ \$	6.00 2.30
	1,690,989	\$	4.15	1.62	1,690,989	\$	3.89

## OUTSTANDING SHARE DATA (Cont'd)

#### Warrants (cont'd)

On the close of acquisition of Cylix assets the Company issued 6,470,000 Common shares and 924,285 common share purchase warrant (each whole warrant, a "Purchaser Warrant"). Each Purchaser Warrant entitles the holder to acquire an additional common share of the company at a price of \$6.00 for a period of 24 months. The value split between common share and warrants was \$8,484,146 and \$573,854, respectively.

The fair value allocated between the common shares and warrants on the issuance of the units was based on a relative fair value allocation between the common shares issued and warrants issued. See **Loss on Acquisition**.

Subsequent to the period ended June 30, 2022, the Company consolidated its warrants on a 10:1 basis (see **Subsequent Events**).

#### **Options**

On January 26, 2022, the Company granted 450,000 incentive stock options pursuant to its Stock Option Plan. Each Option entitles the holder to purchase one common share of the Company at an exercise price of \$1.95 for a period of five years and vest immediately.

An aggregate of 497,500 of incentive stock options granted during the year ended December 31, 2021, were cancelled on March 2, 2022.

On March 10, 2022, the holders of 329,060 options exercised their right to convert the options into the Company's common shares at a price of \$0.060 per common share for gross proceeds of \$20,000, allocated to the share capital account on the consolidated statement of financial position.

On April 18, 2022, the Company granted 830,000 incentive stock options. Each Option entitles the holder to purchase one Common share at an exercise price of \$0.90 for a period of five years and will vest on July 18, 2022.

On July 27, 2022, the Company has cancelled 1,225,000 incentive stock options (the "Options") pursuant to its Stock Option Plan. The Options had been granted between January and April 2022 to several of the Company's directors, officers, consultants, and advisory board members. The key terms and conditions related to the grants as at June 30, 2022 are as follows; all options are to be settled by physical delivery of shares.

		Number	Weighted-avg.
	Vesting conditions	of options	exercise price
		#	\$
Balance, December 31, 2021		771,560	1.770
Granted to key management personnel	Vesting on grant date	390,000	1.465
Granted to directors	Vesting on grant date	505,000	1.264
Granted to consultants	Vesting on grant date	385,000	1.077
Cancelled	Vesting on grant date	(497,500)	7.290
Exercised	Vesting on grant date	(329,060)	0.060
Outstanding, June 30, 2022	¥_¥	1,225,000	1.240
Exerciseable, June 30, 2022		1,225,000	1.240

Management's Discussion and Analysis As at June 30, 2022, and for the three and six-month periods ended June 30, 2022 and 2021 (Expressed in Canadian dollars)

## SIGNIFICANT ACCOUNTING POLICIES AND ESTIMATES

Except as noted below, the Company's significant accounting policies are described in Note 3 of the Financial Statements. The preparation of the Financial Statements requires management to make estimates and judgments that affect the reported amounts of assets, liabilities, revenues and expenses and the related disclosures as of the date of the Financial Statements. Actual results may differ from estimates under different assumptions and conditions.

### FUTURE ACCOUNTING PRONOUNCEMENTS

At the date of authorization of these interim condensed consolidated financial statements, the Company has not applied the following new and revised IFRS Standards that have been issued but are not yet effective and, in some cases, had not yet been adopted by the relevant accounting body:

Amendments to IAS 1	Classification of Liabilities as Current or Non-current
Amendments to IFRS 3	Reference to the Conceptual Framework
Amendments to IAS 16	Property, Plant and Equipment—Proceeds before Intended Use
Amendments to IAS 37	Onerous Contracts—Cost of Fulfilling a Contract
Annual Improvements to IFRS Standards 2018-2020 Cycle	Amendments to IFRS 1 First-time Adoption of International Financial Reporting Standards, IFRS 9 Financial Instruments, IFRS 16 Leases, and IAS 41 Agriculture
Amendments to IAS 1 and	Disclosure of Accounting Policies
IFRS Practice Statement 2	
Amendments to IAS 8	Definition of Accounting Estimates
Amendments to IAS 12	Deferred Tax related to Assets and Liabilities arising from a Single Transaction

The directors do not expect that the adoption of the Standards listed above will have a material impact on the interim condensed financial statements of the Company in future periods.

# DISCLOSURE CONTROLS AND PROCEDURES AND INTERNAL CONTROLS OVER FINANCIAL REPORTING

#### **Disclosure Controls and Procedures**

The CEO and CFO have designed or caused to design controls to provide reasonable assurance that: (i) material information relating to the Company is made known to management by others, particularly during the period in which the annual and interim filings are being prepared; and (ii) information required to be disclosed by the Company in its annual and interim filings or other reports filed or submitted under securities legislation is recorded, processed, summarized and reported within the time frame specified in the securities legislation.

Based on the evaluations, the CEO and CFO have concluded that the Company's disclosure controls and procedures were adequate and effective.

# DISCLOSURE CONTROLS AND PROCEDURES AND INTERNAL CONTROLS OVER FINANCIAL REPORTING (Cont'd)

#### Internal Controls over Financial Reporting

Xigem has established internal controls over financial reporting to provide reasonable assurance regarding the reliability of the Company's financial reporting and the preparation of financial statements for external purposes in accordance with IFRS. Management, including the Company's CEO and CFO, have determined that as at and for the six-month period ended June 30, 2022, the internal controls over financial reporting were effective.

#### **Inherent Limitations**

It should be noted that in a control system, no matter how well conceived and operated, can provide only reasonable, not absolute, assurance that the objectives of the control system are met. Given the inherent limitations in all control systems, no evaluation of controls can provide absolute assurance that all control issues, including instances of fraud, if any, have been detected. These inherent limitations include, among other items: (i) that management's assumptions and judgments could ultimately prove to be incorrect under varying conditions and circumstances; (ii) the impact of any undetected errors; and (iii) controls may be circumvented by unauthorized acts of individuals, by collusion of two or more people, or by management override.

## **RELATED PARTY TRANSACTIONS AND BALANCES**

#### Key Management Personnel Transactions

Key management includes the Company's directors, officers and any consultants with the authority and responsibility for planning, directing, and controlling the activities of an entity, directly or indirectly. Management of the Company appointed by the board of directors as follows: Chief Executive Officer, Chief Financial Officer, Chief Technical Officer.

During the period ended June 30, 2022, key management personnel compensation consisting exclusively of short-term benefits as follows:

	For the 3	For the 6	For the 3	For the 6
	months ended	months ended	months ended	months ended
	June 30, 2022	June 30, 2022	June 30, 2021	June 30, 2021
	\$	\$	\$	\$
Share based payments (options)	313,458	802,195	-	910,499
Management and consulting fees incurred	83,114	130,719	67,133	108,783
Management / consulting fees, in accounts payable	16,958	16,958	3,334	3,334
	413,530	949,872	70,467	1,022,616

Subsequent to year-end, all issued options were cancelled (Note 15), including the share based payments identified in the table above.

Management's Discussion and Analysis As at June 30, 2022, and for the three and six-month periods ended June 30, 2022 and 2021 (Expressed in Canadian dollars)

#### **RISKS AND UNCERTAINTIES**

The are several risk factors that could cause future results to differ materially from those described herein. The risks and uncertainties described herein are not the only ones the Company faces. Additional risks and uncertainties, including those that the Company does not know about as of the date of this MD&A, or that it currently deems immaterial, may also adversely affect the Company's business. If any of the following risks occur, the Company's business may be harmed, and its financial condition and the results of operation may suffer significantly.

### **RISKS AND UNCERTAINTIES (Cont'd)**

#### <u>COVID-19</u>

#### Negative impact of COVID-19 outbreak

In March 2020, the World Health Organization declared coronavirus COVID-19 a global pandemic. This contagious disease outbreak, which has continued to spread, and any related adverse public health developments, has adversely affected workforces, economies, and financial markets globally, potentially leading to an economic downturn. It is not possible for the Company to predict the duration or magnitude of the adverse results of the outbreak and its effects on the Company's business.

#### Business interruption risks

The Company may be impacted by business interruptions resulting from pandemics and public health emergencies, including those related to the COVID-19 pandemic. An outbreak of infectious disease, a pandemic or a similar public health threat, such as the recent outbreak of the novel coronavirus known as COVID-19, or a fear of any of the foregoing, could adversely impact the Company. It is unknown whether and how the Company may be affected if such an epidemic persists for an extended period. The Company may incur expenses or delays relating to such events outside of its control, which could have a material adverse impact on its business, operating results and financial condition.

#### Risks relating to the Transaction

#### Xigem is in the development stage with little operating history

As the Company has yet to begin to generate revenue, it is extremely difficult to make accurate predictions and forecasts of its finances. In addition, the Company intends to operate in the technology industry, which is rapidly transforming. There is no guarantee that the Company's products or services will be attractive to potential consumers. Therefore, the Company is subject to many of the risks common to early-stage enterprises, including under-capitalization, cash shortages, limitations with respect to personnel, financial, and other resources, and lack of revenues. There is no assurance that the Company will be successful in achieving a return on shareholders' investment and likelihood of success must be considered considering the early stage of operations.

#### Going concern

The Company's ability to continue as a going concern depends on its ability to either generate sufficient revenues or to secure sufficient financing, whether debt or equity, to sustain its continued operations. There can be no assurance that the Company can obtain such revenues or financing on commercially favorable terms and there is therefore no guarantee that the Company will be able to sustain its ongoing operations in the future.

Management's Discussion and Analysis As at June 30, 2022, and for the three and six-month periods ended June 30, 2022 and 2021 (Expressed in Canadian dollars)

### **RISKS AND UNCERTAINTIES (Cont'd)**

#### Risks relating to the Transaction (Cont'd)

#### Competition

Many other businesses in Canada engage in similar activities to the Company, developing and commercializing remote work technologies to similar customers. Current and new competitors may have better capitalization, a longer operating history, more expertise and able to develop higher quality equipment or products, at the same or a lower cost. The Company cannot provide assurances that it will be able to compete successfully against current and future competitors. Competitive pressures faced by the Company could have a material adverse effect on its business, operating results, and financial condition.

#### Dividends

There is no assurance as to whether the Company will be profitable, earn revenues, or pay dividends. The Company anticipates that it will incur substantial expenses relating to the development and initial operations of its business. The payment and amount of any future dividends will depend upon, among other things, the Company's results of operations, cash flow, financial condition, and operating and capital requirements. There is no assurance that future dividends will be paid, and, if dividends are paid, there is no assurance with respect to the amount of any such dividends.

#### Uncertainty of revenue growth

There can be no assurance that the Company can generate revenue growth, or that any revenue growth that is achieved can be sustained. Revenue growth that the Company may achieve may not be indicative of future operating results. The Company may increase its operating expenses to fund research and development, increase its sales and marketing efforts and increase its administrative resources in anticipation of future growth.

To the extent that increases in such expenses precede or are not subsequently followed by increased revenues, the Company's business, operating results, and financial condition will be materially adversely affected.

#### Development of new products

The Company's success will depend, in part, on its ability to develop, introduce and market new and innovative products. If there is a shift in consumer demand, the Company must meet such demand through new and innovative products or else its business will fail. The Company's ability to develop, market and produce new products is subject to it having substantial capital. There is no assurance that the Xigem will be able to develop new and innovative products or have the capital necessary to develop such products.

#### Effective commercialization

There is a risk that the technology and the Company's products will not perform as expected in certain applications and therefore, the Company may encounter delays to commercialization or may run the risk that the technologies will never be successfully commercialized. This means that the Company may never receive revenues or return on its technology development.

## **RISKS AND UNCERTAINTIES (Cont'd)**

#### **Technology Risks**

Technical risks

Technical risks are inherent in the development and commercialization process, in that an immature technology could present unexpected challenges that exceed the planned time or financial resources to overcome. There can be no guarantee that the Company will be able to overcome technical risks associated with the development of its technology.

#### Our technology may be unable to achieve broad market acceptance

Even when product development is successful, our ability to generate significant revenue and profits depends on the acceptance of our products by our customers and end users of the products, such as companies or individuals purchasing vehicles incorporating our technology. The market acceptance of any product depends on a number of factors, including but not limited to awareness of a product's availability and benefits, the price and cost-effectiveness of our products relative to competing products; general competition, and the effectiveness of marketing and distribution efforts. Any factors preventing or limiting the market acceptance of our technology could have a material adverse effect on our business, results of operations and financial condition.

#### Emerging products and technology

The market for Company's products continues to evolve and continued growth and demand for, and acceptance of, these products remains uncertain. In addition, other emerging technology and products may impact the viability of the market for Company's products.

Company's continued success will depend upon its ability to keep pace with technological and marketplace change and to introduce, on a timely and cost-effective basis, new and enhanced products that satisfy changing customer requirements and achieve market acceptance.

There can be no assurance that the Company will be able to respond effectively to changes in technology or customer demands. Moreover, there can be no assurance that Company's competitors will not develop competitive products or that any such products will not have an adverse effect upon Xigem's business, financial condition, or results of operations.

#### Obsolescence

Maintaining a competitive position requires constant growth, development and strategic marketing and planning. If the Company is unable to maintain a technological advantage, the Company's ability to grow its business will be adversely affected and its products may become obsolete compared with other technologies.

## **RISKS AND UNCERTAINTIES (Cont'd)**

#### Other Risks

#### Key Personnel

The Company's success has depended and continues to depend upon its ability to attract and retain key management, including the officers and technical experts. The Company will attempt to enhance its management and technical expertise by continuing to recruit qualified individuals who possess desired skills and experience in certain targeted areas. The Company's inability to retain employees and attract and retain sufficient additional employees or engineering and technical support resources could have a material adverse effect on the Company's business, results of operations, sales, cash flow or financial condition. Shortages in qualified personnel or the loss of key personnel could adversely affect the financial condition of the Company, results of operations of the business and could limit the Company ability to develop and market its work remotely related products. The loss of any of the Company senior management or key employees could materially adversely affect the Company's business plan and strategy, and the Company may not be able to find adequate replacements on a timely basis, or at all.

#### Management of Growth

The Company may be subject to growth-related risks including capacity constraints and pressure on its internal systems and controls. The ability of the Company to manage growth effectively will require it to continue to implement and improve its operational and financial systems and to expand, train, and manage its employee base. The inability of the Company to deal with this growth may have a material adverse effect on the Company's business, financial condition, results of operations and prospects.

#### Dependence on suppliers and skilled labor

The ability of the Company to compete and grow will be dependent on it having access, at a reasonable cost and in a timely manner, to skilled labor, equipment, parts and components. No assurances can be given that the Company will be successful in maintaining its required supply of skilled labor, equipment, parts and components.

#### Conflicts of Interest

Certain directors and officers of the Company are or may become associated with other companies in the same or related industries which may give rise to conflicts of interest. Directors who have a material interest in any person who is a party to a material contract or a proposed material contract with the Company are required, subject to certain exceptions, to disclose that interest and generally abstain from voting on any resolution to approve the contract. In addition, the directors and the officers are required to act honestly and in good faith with a view to the best interests of the Company. The directors and officers of the Company have either other full-time employment or other business, or time restrictions placed on them and accordingly, the Company will not be the only business enterprise of these directors and officers.

Management's Discussion and Analysis As at June 30, 2022, and for the three and six-month periods ended June 30, 2022 and 2021 (Expressed in Canadian dollars)

## **RISKS AND UNCERTAINTIES (Cont'd)**

#### Other Risks (Cont'd)

Research and Development

We believe that we must continue to dedicate a significant amount of resources to our research and development efforts to maintain and develop our solutions and maintain and enhance our competitive position. We recognize the costs associated with these research and development investments earlier than the anticipated benefits, and the return on these investments may be lower, or may develop more slowly, than we expect. If we spend significant resources on research and development and are unable to generate an adequate return on our investment, our business, financial condition and results of operations may be materially and adversely affected.

#### Financial Reporting and Internal Controls

Upon the completion of the listing, Company will become subject to reporting and other obligations under applicable Canadian securities laws and exchange rules. These reporting and other obligations will place significant demands on Company's management, administrative, operational and accounting resources.

To meet such requirements, Company is working with its legal, accounting and financial advisors to identify areas in which changes should be made to Company's financial management control systems. These areas include corporate governance, corporate controls, internal audit, disclosure controls and procedures and financial reporting and accounting systems. Company has made, and will continue to make, changes in these and other areas, including Company's internal controls over financial reporting. If Company is unable to accomplish any such necessary objectives in a timely and effective fashion, its ability to comply with its financial reporting requirements and other rules that apply to reporting issuers could be impaired. Moreover, any failure to maintain effective internal controls could cause Company to fail to meet its reporting obligations or result in material misstatements in its financial statements.

If Company cannot provide reliable financial reports or prevent fraud, its reputation and operating results could be materially harmed which could also cause investors to lose confidence in the reported financial information, which could lower share prices. There can be no assurance that internal controls over financial reporting will prevent all error and all fraud. A control system, no matter how well designed and implemented, can provide only reasonable, not absolute, assurance that the control system's objectives will be met. Furthermore, the design of a control system must reflect the fact that there are resource constraints, and the benefits of controls must be considered relative to their costs. Due to the inherent limitations in all control systems, no evaluation of controls can provide absolute assurance that all control issues within the Company are detected. The inherent limitations include the realities that judgments in decision-making can be faulty, and that breakdowns can occur because of simple errors or mistakes. Controls can also be circumvented by individual acts of some persons, by collusion of two or more people or by management override of the controls. Due to the inherent limitations in a cost-effective control system, misstatements due to error or fraud may occur and not be detected.

Management's Discussion and Analysis As at June 30, 2022, and for the three and six-month periods ended June 30, 2022 and 2021 (Expressed in Canadian dollars)

## **RISKS AND UNCERTAINTIES (Cont'd)**

#### Other Risks (Cont'd)

#### Intellectual Property

The Company's ability to compete effectively will depend, in part, on its ability to maintain the proprietary nature of its brand and its product creation processes. The Company has adopted procedures to protect its intellectual property and maintain secrecy of its confidential business information and trade secrets. However, there can be no assurance that such procedures will afford complete protection of such intellectual property, confidential business information and trade secrets. There can be no assurance that the Company's competitors will not independently develop technologies that are substantially equivalent or superior to the Company's technology. To protect the Company's intellectual property, it may become involved in litigation, which could result in substantial expenses, divert the attention of its management, cause significant delays, and materially disrupt the conduct of its business. The Company may also inadvertently infringe others intellectual property and be subject to litigation in respect of same.

#### Intellectual Property Litigation

The Company may be forced to litigate to enforce or defend its intellectual property rights, to protect its trade secrets or to determine the validity and scope of other parties' proprietary rights. Any such litigation could be very costly and could distract its management from focusing on operating the Company's business. The existence and/or outcome of any such litigation could harm the Company's business.

#### Ability to obtain and retain any relevant licenses

If obtained, any licenses in Canada are expected to be subject to ongoing compliance and reporting requirements. Failure by the Company to comply with the requirements of licenses or any failure to maintain licenses would have a material adverse impact on the business, financial condition and operating results of the Company. Should any jurisdiction in which the Company considers a license important not grant, extend or renew such license or should it renew such license on different terms, or should it decide to grant more than the anticipated number of licenses, the business, financial condition and results of the operation of the Company could be materially adversely affected.

#### No established market

There is currently no market through which the Company's securities may be sold and purchasers may not be able to resell the Company Shares purchased under this Prospectus. An active public market for the Company Shares might not develop or be sustained after this offering. Even if a market develops, there is no assurance that the price of the Company Shares offered under this Prospectus, will reflect the prevailing market price of the Company Shares following this offering. If an active public market for the Company Shares does not develop, the liquidity of a shareholder's investment may be limited, and the Company Share price may decline below the initial public offering price. The holding of Company Shares involves a high degree of risk and should be undertaken only by investors whose financial resources are sufficient to enable them to assume such risks and who have no need for immediate liquidity in their investment. The Company Shares should not be purchased by persons who cannot afford the possibility of the loss of their entire investment.

## **RISKS AND UNCERTAINTIES (Cont'd)**

#### Other Risks (Cont'd)

Lack of active market

There can be no assurance that an active market for the Company Shares will continue and any increased demand to buy or sell the Company Shares can create volatility in price and volume. Any return on investment from the Company Shares is not guaranteed.

There can be no assurance regarding the amount of return to be generated by the Company's investments. The Company Shares are equity securities of the Company and are not fixed income securities. Unlike fixed-income securities, there is no obligation of the Company to distribute to shareholders a fixed amount or to return the initial purchase price of a Company Share on a date in the future. The market value of the Company Shares will deteriorate if the Company is unsuccessful in its investments, and that deterioration may be significant.

#### There is a risk of dilution

The Company may issue additional securities from time-to-time to raise funding for its business, and such issuances may be dilutive to existing shareholders.

#### Global economic risk

The ongoing economic slowdown and downturn of global capital markets has generally made the raising of capital equity or debt financing more difficult. Access to financing has been negatively impacted by the ongoing global economic risks. As such, the Company is subject to liquidity risks in meeting our development and future operating cost requirements in instances where cash positions are unable to be maintained or appropriate financing is unavailable. These factors may impact the Company's ability to raise equity or obtain loans and other credit facilities in the future and on terms favorable to the Company. If uncertain market conditions persist, the Company's ability to raise capital could be jeopardized, which could have an adverse impact on the Company's operations and trading price of the Company Shares on the stock exchange.

#### Economic environment

The Company's operations could be affected by the economic context should the unemployment level, interest rates or inflation reach levels that influence consumer trends and consequently, impact the Company's sales and profitability. As well, general demand for banking services and alternative banking or financial services cannot be predicted, and prospects of such areas might be different from those predicted by the Company's management.

Management's Discussion and Analysis As at June 30, 2022, and for the three and six-month periods ended June 30, 2022 and 2021 (Expressed in Canadian dollars)

## **RISKS AND UNCERTAINTIES (Cont'd)**

#### Other Risks (Cont'd)

Risks Associated with acquisitions

As part of the Company's overall business strategy, the Company may pursue select strategic acquisitions after the completion of the Listing, which would provide additional product offerings, vertical integrations, additional industry expertise, and a stronger industry presence in both existing and new jurisdictions. Future acquisitions may expose it to potential risks, including risks associated with: (a) the integration of new operations, services and personnel; (b) unforeseen or hidden liabilities; (c) the diversion of resources from the Issuer's existing business and technology; (d) potential inability to generate sufficient revenue to offset new costs; (e) the expenses of acquisitions; or (f) the potential loss of or harm to relationships with both employees and existing users resulting from its integration of new businesses. In addition, any proposed acquisitions may be subject to regulatory approval.

#### Lack of experience and commitment of team

The project manager and leader is the most responsible person, and a replacement or inexperienced manager could jeopardize the completion of the Platform.

#### Unrealistic deadlines

Software projects may fail when deadlines are not properly set. Project initialization, completion date and time must be realistic.

#### Improper budget

Cost estimation of a project is very crucial in terms of project success and failure. Low cost with high expectations of large projects may cause project failure.

#### Lack of resources

Software and hardware resources may not be adequate. Lack of resources in terms of manpower is also a critical risk factor of software failure.

#### Inappropriate design

Software designers have a major role in the success or failure of the project if a design is inappropriate for the project.

#### User data

The Company may require the registration of its users prior to accessing its products or services or certain features of its products or services and the Company may be subject to increased legislation and regulations on the collection, storage, retention, transmission and use of user-data that is collected. The Company's efforts to protect the personal information of its users may be unsuccessful due to the actions of third parties, software bugs or technical malfunctions, employee error or malfeasance, or other factors. In addition, third parties may attempt to fraudulently induce employees or users to disclose information to gain access to the Company's data or the Company's users' data.

## **RISKS AND UNCERTAINTIES (Cont'd)**

#### Other Risks (Cont'd)

User data (Cont'd)

If any of these events occur, users' information could be accessed or disclosed improperly. Any incidents involving the unauthorized access to or improper use of the information of users or incidents involving violation of the Company's terms of service or policies could damage its reputation and brand and diminish its competitive position.

#### Product Development Risks

#### Failure to protect personal information

A wide variety of provincial, state, national, and international laws and regulations apply to the collection, use, retention, protection, disclosure, transfer, and other processing of personal data. These data protection and privacy-related laws and regulations are evolving and being tested in courts and may result in ever-increasing regulatory and public scrutiny as well as escalating levels of enforcement and sanctions. Any actual or perceived loss, improper retention or misuse of certain information or alleged violations of laws and regulations relating to privacy, data protection and data security, and any relevant claims, could result in enforcement action against us, including fines, imprisonment of Company officials and public censure, claims for damages by customers and other affected individuals, damage to our reputation and loss of goodwill (both in relation to existing customers and prospective customers), any of which could have an adverse effect on our operations, financial performance, and business. Any perception of privacy or security concerns or an inability to comply with applicable laws, regulations, policies, industry standards, contractual obligations or other legal obligations, even if unfounded, may result in additional cost and liability to us, harm our reputation and inhibit adoption of our products by current and future customers, and adversely affect our business, financial condition, and operating results. We have implemented and maintain security measures intended to protect personally identifiable information. However, our security measures remain vulnerable to various threats posed by hackers and criminals. If our security measures are overcome and any personally identifiable information that we collect or store becomes subject to unauthorized access, we may be required to comply with costly and burdensome breach notification obligations. We may also be subject to investigations, enforcement actions and private lawsuits. In addition, any data security incident is likely to generate negative publicity and have a negative effect on our business.

#### Effective Operating and Scaling of Technology

The Company's ability to provide products and services to customers is dependent on its information technology systems. If the Company is unable to manage and scale the technology associated with its business effectively, the Company could experience increased costs, reductions in system availability and losses of network participants.

Material defects or errors in the Company's Technology Infrastructure could harm the Company's reputation, result in significant costs to the Company and impair its ability to sell its services. Software developed for the Company's technology can contain errors, defects, security vulnerabilities or software bugs that are difficult to detect and correct, particularly when first introduced. Despite internal testing, the

Management's Discussion and Analysis As at June 30, 2022, and for the three and six-month periods ended June 30, 2022 and 2021 (*Expressed in Canadian dollars*)

### RISKS AND UNCERTAINTIES (Cont'd)

#### Product Development Risks (Cont'd)

#### Effective Operating and Scaling of Technology (Cont'd)

Company's technology may contain serious errors or defects that cause performance problems or service interruptions, security vulnerabilities or software bugs that the Company may be unable to successfully correct in a timely manner, or at all, which could result in:

- unexpected credits or refunds to the Company's clients, loss of clients and other potential liabilities;
- delays in client payments, increasing the Company's collection reserve and collection cycle;
- diversion of development resources and associated costs;
- harm to the Company's reputation and brand; and
- unanticipated litigation costs.

#### Data Security and Hacking

Increasingly, organizations are subject to a wide variety of attacks on their networks. In addition to traditional computer "hackers," malicious code (such as viruses and worms), employee theft or misuse, denial of service attacks, ransomware, malware and sophisticated government and government-supported actors now engage in incidents and attacks (including advanced persistent threat intrusions), and add to the risks to our internal networks and the information they store, manage and process. It is virtually impossible for Absolute to entirely mitigate these risks (especially as it relates to unlicensed or outdated versions of our product or agent). Any such security incident or breach could compromise our networks, creating system disruptions or slowdowns and exploiting security vulnerabilities of our products, and the information stored on our networks could be accessed, publicly disclosed, lost, or stolen, which could subject us to liability and cause us financial harm. These breaches, or any perceived breach, may also result in damage to our reputation, negative publicity (through research reports or otherwise), loss of partners, end-customers and sales, increased costs to remedy any problem, and costly litigation and may result in the Company's business, operating results and financial condition being materially adversely affected.

#### Risk of Safeguarding Against Security & Privacy Breaches

A security or privacy breach could:

- expose the Company and Company to additional liability and to potentially costly litigation;
- increase expenses relating to the resolution of these breaches;
- deter potential customers from using our services; and
- decrease market acceptance of electronic commerce transactions.

As a provider of software technology, the Company and Resulting Issuer are at risk of exposure to a security or privacy breach of its system which could lead to potentially costly litigation, deter potential customers from using its services, or bring about additional liability of the Company and Resulting Issuer.

## RISKS AND UNCERTAINTIES (Cont'd)

Product Development Risks (Cont'd)

Risk of Safeguarding Against Security & Privacy Breaches (Cont'd)

The Company and Resulting Issuer cannot assure that the use of applications designed for data security and integrity will address changing technologies or the security and privacy concerns of existing and potential customers. Although the Company and Resulting Issuer require that agreements with service providers who have access to sensitive data include confidentiality obligations that restrict these parties from using or disclosing any data except as necessary to perform their services under the applicable agreements, there can be no assurance that these contractual measures will prevent the unauthorized disclosure of information.

### COVID-19

The outbreak of the novel strain of coronavirus, specifically identified as "COVID-19", has resulted in governments worldwide enacting emergency measures to combat the spread of the virus. These measures, which will include the implementation of travel bans, self-imposed quarantine periods and social distancing have caused material disruption to businesses globally resulting in an economic slowdown. Global equity markets have experienced significant volatility and weakness. Governments and central banks have reacted with significant monetary and fiscal interventions designed to stabilize economic conditions. The duration and impact of the COVID-19 outbreak is unknown, as is the efficacy of the government and central bank interventions.

Management cannot accurately predict the future impact COVID-19 may have on: (i) the severity and the length of potential measures taken by governments to manage the spread of the virus and their effect on labor availability; (ii) availability of essential supplies; (iii) purchasing power of the Canadian dollar; and (iv) ability to obtain additional funding.

At the date of the approval of the financial statements, the Canadian government has not introduced measures which impede the activities of the Company. However, it is not possible to reliably estimate the length and severity of these developments and the impact on the financial results and conditions of the Company in future periods.

#### **CONTINGENCIES AND COMMITMENTS**

#### **Contingencies**

On March 8, 2022, the Company was served with a statement of claim in the Ontario Superior Court of Justice. Lumbermens Credit Group Ltd. ("Lumbermens") has commenced a civil action against Xigem Technologies Corporation as well as 2747524 Ontario Inc. o/a Cylix Data, 997322 Ontario Inc., Roy Murad, Jacob Murad, Aaron Murad, Noah Murad and Monica Murad (the "Action"). The Action seeks, among other things, damages of \$32,350,000 for alleged unlawful competition, misuse of confidential information, conversion and copyright infringement. In addition, the Action seeks certain declaratory relief, punitive damages of \$1,000,000, interest and legal costs.

The Company has formally delivered its statement of defense on April 20, 2022. Although evaluation of the merits of the claim as against the Company is difficult at this very early stage, management is of the view that the Action is meritless as against the Company. Management intends to vigorously defend the Action and seek the costs for so doing from the plaintiff.

Management's Discussion and Analysis As at June 30, 2022, and for the three and six-month periods ended June 30, 2022 and 2021 (*Expressed in Canadian dollars*)

## CONTINGENCIES AND COMMITMENTS (Cont'd)

#### Management services agreement with 2781705 Ontario Inc

On October 20, 2020, and in connection with the acquisition of iAgent, The Company entered into a management services agreement with 2781705 Ontario Inc. The Company is obligated to pay US \$20,000 a month for development, maintenance, and support services, to the extent that they are rendered. The Company can cancel at the earlier of: (i) completion of The Company's platform; (ii) 30-days written notice by either The Company or 2781705 Ontario Inc.; or (iii) mutual consent.

As at June 30, 2022, aggregate amount of \$151,044 (December 31, 2021 – \$302,328) has been included in accounts payable and accrued liabilities with respect to management services as per the agreement.

#### Hybrid Financial Ltd.

On March 15, 2022, the Company retained the services of Hybrid Financial Ltd. for an initial period of 12 months with automatic renewal for successive six-month periods theater for a monthly fee of \$22,500, to the extent that these services are rendered.

#### SUBSEQUENT EVENTS

#### Share consolidation

On July 20, 2022, the Company completed a consolidation of the Company's issued and outstanding share capital at a rate of ten (10) pre-consolidation common shares for one (1) post-consolidation common share (the "Consolidation"). No fractional shares were issued upon the consolidation, each fractional Common Share that is less than 1/2 of one post-Consolidation Common Share was cancelled and each fractional Common Share that is at least 1/2 of one post-Consolidation Common Share is rounded up to one whole post-Consolidation Common Share.

The exercise or conversion price and/or the number of Shares issuable under any of the Company's outstanding convertible securities, stock options and warrants were proportionally adjusted after giving effect to the Consolidation based on the Consolidation ratio (10:1).

#### Stock options

On July 27, 2022, the Company has cancelled 1,225,000 incentive stock options (the "Options") pursuant to its Stock Option Plan. The Options had been granted between January and April 2022 to several of the Company's directors, officers, consultants, and advisory board members.
